"(9) to advise and assist the Director in developing procedures and programs to promote the participation of States and State agencies under this Act; and

"(10) to advise and assist the Director, the Economic Opportunity Council established by section 631 of this Act, and the heads of other Federal agencies, in identifying problems posed by Federal statutory or administrative requirements that operate to impede effective State involvement in or coordination of programs related to this title, and in developing methods or recommendations for overcoming those problems.

"(b) The Director shall take steps as will assure that:

"(1) all applications for assistance under this title and under title VIII within a State are submitted through the State Office, and that the Office is afforded a reasonable opportunity to (but not to exceed 30 days) review such applications before transmitting them to the Director (or to his delegate) with such comments and recommendations as the State may deem appropriate;

"(2) each State Office receives advance notice of the proposed approval of any application for assistance or of the proposed funding in the State of any program, project, or other activity under any other title in this Act, and is afforded a reasonable opportunity to comment upon such proposed approval or funding; and

"(3) each State Office receives such other information and technical assistance, and is afforded such other opportunities to play an affirmative role in the programs financed under this Act, as may be required to carry out effectively the functions specified in subsection (a).

"(c)(1) Whenever a State Office (with the concurrence of the Governor) shall recommend against the approval of an application submitted under subsection (b)(1), such application shall not be approved (or shall not be approved without changes suggested by the State Office) for funding under this title unless the Director shall have made a finding that approval of such application would strengthen the overall program plan of a local community action agency; or with respect to applications submitted by other eligible applicants, that the approval of such application would be in furtherance of the purposes of this Act.

"(2) The Director shall not delegate the responsibility for making the finding required in paragraph (1) except to the heads of other Federal agencies and he shall not make such finding without having first afforded the State Office notice and opportunity for a hearing.

"(d) In any grants to or contracts with State agencies, the Director shall give prefer-

ence to programs or activities which are administered or coordinated by the State Offices established under subsection (a), or which have been developed by and will be carried on with the assistance of those Offices.

"(e) In order to promote coordination in the use of funds under this Act and funds provided or granted by State agencies, the Director may enter into agreements with States or State agencies for purposes of providing financial assistance to community action agencies or other local agencies in connection with specific projects or programs involving the common or joint use of State funds and funds under this Act.

"STATE ECONOMIC OPPORTUNITY COUNCIL

"SEC. 252. (a) Any State which desires to participate in the development and carrying out of a State developmental and coordinating program for rural and urban community action, as provided by section 253, shall establish a State Economic Opportunity Council (hereinafter referred to as the 'State Council'), appointed by the Governor, which shall be broadly representative of the economic, educational, health, religious, and social services resources of the State and of the public, including persons representative of—

"(1) urban areas;

"(2) rural areas;

"(3) the poor (including representatives both of the urban and rural poor and of racial and ethnic groups in the State which experience a high incidence of poverty);

"(4) business, industry, and labor;

"(5) elected municipal officials;

"(6) elected county officials;

"(7) federally-assisted programs, such as Model Cities and manpower training, related to the problems of the poor; and

"(8) fields of professional competence (including both public and private education) in dealing with the problems of poverty.

"(b) The State Council shall advise the State Office on the development of and policy matters arising in the administration of the State developmental and coordinating programs submitted pursuant to section 253, and shall evaluate the programs, services, and activities assisted under this title and make a public report (at least annually) of the results of such evaluations.

"(c) The State Council shall prepare a long-range program plan (or, as may be appropriate from time to time, revisions of or supplements to such plan) for use of funds under sections 221 and 222 and title VIII of this Act which plan (1) is prepared in consultation with the State Office, (2) extends over a period of not less than five years and (3) taking into consideration available resources, sets forth a program of action which, in the judgment of the Council, would assure substantial progress toward achievement of the objectives of the plan.

"(d) From the sums appropriated under the authority of this Act for any fiscal year the Director shall (in accordance with regulations) pay to each State Council an amount equal to the reasonable amounts expended by it in carrying out its functions under this part in such fiscal year, except that the amount available for such purpose shall not exceed $150,000 and shall not be less than $50,000.

"STATE DEVELOPMENTAL AND COORDINATION PROGRAMS

"SEC. 253. (a) State desiring to carry out a developmental and coordination program for urban and rural community action shall submit to the Director (at such time and in such detail as he may specify and containing such information as he may deem necessary) an outline for such a program which—

"(1) has been prepared by the State Office in consultation with the State Council of that State and has been approved by the State Council;

"(2) designates the State Office as the sole agency for administration of the State program, or for supervision of the administration thereof by local community action agencies;

"(3) sets forth in detail the policies and procedures to be followed by the State in the distribution of funds to local community action agencies in the State and for the uses of such funds for the various programs and program components specified in sections 221 and 222, which policies and procedures assure that—

"(A) due consideration will be given to the relative needs of urban and rural areas within the State, and to the needs of various categories of persons living in poverty, in accordance with criteria supplied by the Director; and

"(B) due consideration will be given to periodic evaluation of programs, services, and activities assisted under this title;

"(4) describes how the activities and projects to be carried out under the program are related to the long-range program plan developed by the State Council pursuant to section 251(c) (except that such requirement may be waived during the first year the program is in operation);

"(5) sets forth policies and procedures satisfactory to the Director for approval of applications for assistance under sections 221 and 222 of this title and under title VIII submitted by local community action agencies and other qualified applicants, and for the review and monitoring of the program conducted by such applicants (including procedures to assure that such programs conform to the requirements of this Act);

"(6) sets forth procedures designed to improve the coordination of programs funded under this part with State-administered programs affecting the poor;

"(7) provides that any community action agency, or other public or private agency which is a qualified applicant for program assistance under this title, dissatisfied with a final action with respect to any application for funds under this title shall be given reasonable notice and opportunity for a public hearing by the State Office;

"(8) provides assurances that Federal funds made available under this part will be so used as to supplement, and to the extent possible increase the amount of State, local, and private funds that would in the absence of federal funds be made available for programs supported under this part, and in no case supplant such State, local, and private funds;

"(9) provides assurances satisfactory to the Director that all relevant requirements of this Act shall be complied with, and provides for making such reports in such form and containing such information and affording such access thereto as the Director may reasonably rquire to carry out his functions under this Act; and

"(10) sets forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, federal funds paid to the State (including such funds paid by the State to qualified applicants) under this title.

"(b)(1) The Director shall by regulation establish criteria for approval of State developmental and coordination programs submitted pursuant to subsection (a), and when he finds that such a program complies with such criteria and the requirements of this part and when he is satisfied that adequate procedures are set forth to insure that the assurances and provisions of such program will be carried out, he shall approve such program, and the Director shall not finally disapprove any program submitted under subsection (a), or any modification thereof, without first affording the State Office reasonable notice and opportunity for a hearing.

"(2) The Director shall take such steps as he deems necessary to assure that in the formulation and carrying out of State programs there is close liaison between the State Offices and the Office of Economic Opportunity.

"(3) The Director shall take final action to approve or disapprove a State developmental and coordination program submitted under subsection (a) within ninety days after the date of its submission (or resubmission in the event it should have been withdrawn by the State), and he may not delegate the authority to approve or disapprove such programs to any other person.

"(c)(1) For any fiscal year in which any State has in operation a State developmental and coordination program approved in accordance with this part the Director shall make available to such State for carrying out the approved program the sums allotted to such State for such year under section 225 (a) and (b); *Provided, however,* That, until June 30, 1971, the Director may reserve not more than one-fourth such amount, to assist (in accordance with the provisions of this title) activities and projects in such State which are not funded under the State program, but only if the Director has determined that the failure to support such activities and projects during the period in which he may reserve funds would result in a substantial disruption of efforts directed toward the elimination of poverty in such State, or that it is necessary to assist programs authorized under section 222 of this Act.

"(2) The Director shall pay, from the amount available to the State for assistance under this part, to each State the amount required to pay the Federal share of carrying out activities and projects under the approved State program, and for administration of the State program (except that sums paid for State administration shall not exceed five per centum of the amount available to the State for assistance under this title in any fiscal year), and such payments may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

"(3) The term "State administration" in paragraph (2) means those costs attributable to the supervision, auditing, coordination, and servicing of activities carried out under this part or to the provision of technical services (including the training of personnel needed to provide such services), and similar costs related to carrying out an approved State program, but shall not include the costs of State operation of a substantive program authorized by this Act.

"(d)(1) Whenever the Director, after reasonable notice and opportunity for hearing to the State office administering a State program approved under subsection (a), finds that—

"(A) the State program has been so changed that it no longer complies with the provisions of subsection (a), or

"(B) in the administration of the program there is a failure to comply substantially with any such provision, the Director shall notify such State office that no further payments will be made to the State under the State program (or, in his discretion, that further payments to the State under the program will be limited to activities under or portions of such program not affected by such failure) until he is satisfied that there will no longer be any failure to comply. Until he is so satisfied, the Director shall support eligible community action and VISTA volunteer programs in such State in accordance with other provisions of this title (except that he may support those activities under or portions of the State program not affected by such failure).

"(2) A State office which is dissatisfied with a final action of the Director under this

subsection or subsection (b) may appeal to the United States Court of Appeals for the circuit in which the State is located, by filing a petition with such court within sixty days after such final action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Director, or any officer designated by him for that purpose. The Director thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Director or to set it aside, in whole or in part, temporarily or permanently, but until the filing of the record the Director may modify or set aside his action. The findings of the Director as to the facts if supported by substantial evidence shall be conclusive, but the court, for good cause shown, may remand the case to the Director, to take further evidence, and the Director may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence. The judgment of the court affirming or setting aside, in whole or in part, any action of the Director shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code. The commencement of proceedings under this subsection shall not, unless so specifically ordered by the court, operate as a stay of the Director's action."

TITLE III—TECHNICAL AND PERFECTING AMENDMENTS

PART A—AMENDMENTS TO TITLE II ("COMMUNITY ACTION")

COMPOSITION OF COMMUNITY ACTION AGENCIES

SEC. 301. Section 211 of the Economic Opportunity Act of 1964 is amended as follows:

(1) Clause (3) of subsection (b) is amended to read—

"(3) the remainder of the members (which shall consist of not less than one-quarter of the total membership of such board) are appointed by the elected public officials who serve on or have representatives serving on the board, and are officials or members of business, industry, labor, religious, welfare, education, or other major groups and interests in the community."; and

(2) the first sentence of subsection (c) is amended to read—

"Where a community action agency places responsibility for major policy determinations with respect to the character, funding, extent, and administration of and budgeting for programs to be carried on in a particular geographic area within the community in a subsidiary board, council, or similar agency, such board, council, or agency shall be broadly representative of such area, and it shall be so constituted as to assure that at least one-third of the members are public officials, appointed by the elected public officials who serve (or appoint representatives to serve) on the board of the community action agency, unless the number of such officials reasonably available or willing to serve is less than one-third of the membership of the subsidiary board."

COSTS OF DEFENDING LAW SUITS

SEC. 302. Section 222(a) of such Act is amended by adding to paragraph (3) (relating to "Legal Services") the following:

"Whenever a lawsuit or other legal action is initiated by a plaintiff or plaintiffs with assistance under this program, and such action results in a verdict or other outcome favorable to the defendant in such lawsuit or other legal action, and the United States shall be liable for such costs (to be paid out of funds made available for the Legal Services program), as are ordered in accordance with the law of the jurisdiction, by the court or other board or agency which has juisdiction of the matter, the same as a private person."

AUTHORIZATION OF ALCOHOLIC RECOVERY PROGRAM

SEC. 303. Section 222(a) of such Act is further amended by adding at the end thereof the following new paragraph:

"(8) An 'Alcoholic Recovery' program designed to discover and bring about treatment for the disease of alcoholism. Such a program shall be community based, serve the objective of maintaining the family structure as well as recovery of the individual alcoholic, encourage the use of neighborhood facilities and the services of recovered alcoholics as program workers and emphasize the reentry of alcoholics into society rather than the institutionalization of alcoholics. Such a program shall also emphasize the coordination and full utilization of existing appropriate community services which pertain to the treatment of alcoholism and/or related disorders."

SPECIAL ASSISTANCE TO FAMILIES OF MEMBERS OF ARMED FORCES IN HARDSHIP CASES; PILOT PROJECTS OF ASSISTANCE FOR THE ELDERLY POOR

SEC. 304. Section 232 of such Act is amended by adding at the end thereof the following new subsections:

"(g) The Director shall conduct projects either directly or through grants or other arrangements, under which funds available under this section will be used to raise the income levels of families of members of the Armed Forces, when such families reside in the United States and through exceptional circumstances have an income level below the poverty level (as determined by the Director), and preference shall be given to cases of greatest hardship. Projects under this subsection shall be developed jointly by the Director and the Secretary of Defense.

"(h) The Director shall also conduct, either directly or through grants or other arrangements, pilot projects under which funds available under this section will be used to raise the income levels of persons over 65 years of age above the poverty level (as determined by the Director), with preference given to cases of exceptional hardship, in order to examine and evaluate systems of income maintenance for the elderly poor as an alternative to welfare assistance."

TECHNICAL AMENDMENT OF GOVERNOR'S VETO PROVISION

SEC. 305. Section 242 of such Act is amended by striking out the period at the end of the first sentence and inserting:

"; *Provided, however,* That this section shall not apply with respect to any application which the State Office has recommended not be approved under section 251(c)(1)."

AUTHORIZATION OF STATE AUDIT

SEC. 306. Section 243 of such Act is amended by adding a new subsection as follows:

"(e) The Director shall take such steps as may be necessary to insure that programs assisted under this title shall be subject to financial audit by appropriate State officials and agencies at the request of such officials and agencies, and he shall direct the governing board of each community action agency to cooperate in carrying out such audits."

PART B—AMENDMENTS TO TITLE VI (ADMINISTRATION)

PROHIBITION OF POLITICAL ACTIVITY STRENGTHENED

SEC. 321. Section 603(a) of the Economic Opportunity Act of 1964 is amended to read as follows:

"(a) For purposes of chapter 15 of title 5 of the United States Code any overall community action agency which assumes responsibility for planning, developing, and coordinating community-wide antipoverty programs, or any agency assuming part or all of such responsibilities (including the administration of components of a community action program) under delegation from an overall community action agency, and receives assistance under this Act, shall be deemed to be a State or local agency."

ANTI-RIOT PROVISION STRENGTHENED

SEC. 322. Section 613 of such Act is amended to read as follows:

"SEC. 613. No individual employed or assigned by any community action agency or any other agency assisted under this Act shall (whether or not pursuant to or during the performance of services rendered in connection with any program or activity conducted or assisted under this Act) plan, initiate, participate in, or otherwise aid or assist in the conduct of any unlawful demonstration, rioting, or civil disturbance, and the Director shall take such steps as may be necessary to assure that any individual who violates this provision is removed from his employment or assignment in programs conducted or assisted under this Act."

PROHIBITIONS ON UPWARD BOUND PROGRAMS

SEC. 323. Section 621 of such Act is amended by inserting "(a)" after "SEC. 621." and by adding at the end thereof the following new subsection:

"(b) The Director shall give full effect to the intent of Congress that 'Upward Bound' programs, however, described, shall be administered by the Commissioner of Education, and the Director shall not carry out or fund any program described in section 222(a)(5) (as in effect on June 30, 1969), or any comparable program, whether under the authority of that section or any other section of this Act, and whether or not carried on by or in a school, institution of higher education, penal or correctional institution, or any other agency or institution."

SEC. 324. Title VI of such Act is further amended by adding at the end of Part A the following new subsections:

"EVALUATION OF PROGRAMS OF THE OFFICE OF ECONOMIC OPPORTUNITY

"SEC. 622. (a) The Director shall: (1) at the time of entering into any contract or arrangement with non-governmental organizations or individuals for the evaluation of programs or projects administered by him under this Act, or entering into any substantial modification of any existing such contract or arrangement, furnish to the Comptroller General of the United States a copy of the contract or modification thereof or a description of the arrangement or modification thereof, together with a statement of the bases upon which he considers the evaluation work involved and the estimated cost thereof justified, and upon which he has determined that it was necessary to contract or arrange with a non-governmental organization or individual for its performance;

(2) require each community action agency designated under section 201 of this Act, to advise him of each contract or arrangement entered into by it with non-governmental organizations or individuals for the evaluation of programs or projects administered by it under this Act, including information regarding the purpose, cost, scope, evaluation methodology, and organizations or individuals involved in such contract or arrangement; and

(3) furnish to the Comptroller General of the United States at the end of each calendar quarter a listing of all contracts or arrangements reported to him in accordance with paragraph (2) of this subsection during such calendar quarter, including identification of the program or project, the organization or individual and the cost involved in each contract or arrangement.

"(b) The Comptroller General shall conduct evaluations of programs carried out under this Act, and upon request by a committee of the Congress, or to the extent personnel are available, by Members of Congress shall (1) conduct studies of existing statutes and regulations governing programs carried on under this Act, (2) review the policies and practices of Federal aegncies administering such programs, (3) review the evaluation procedures adopted by such agencies carrying out such programs, (4) initiate evaluation projects of particular programs, and (5) compile data necessary to carry out the preceding functions.

"(c) In carrying out the studies and evaluations herein authorized, the Comptroller General shall give particular attention to the practice of the Office of Economic Opportunity and of community action agencies designated under section 201 of the Act of contracting with private firms, organizations and individuals for the provision of a wide range of studies and services (such as personnel recruitment and training, program evaluation, and program administration), and shall report to the Director and to the Congress his findings with respect to the necessity for such contracts and their effectiveness, in achieving the objectives of this Act.

"(d) The Comptroller General or any of his duly authorized representatives shall have access for the purpose of audit and examination to any books, documents, papers, and records that are pertinent to the financial assistance received by any agency under this Act."

"(e) There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of these sections.

"PREVENTION OF CONFLICTS OF INTEREST

"SEC. 623. The Director shall issue regulations and take such other steps as may be necessary to assure that the Office of Economic Opportunity (or any other agency utilizing funds appropriated under the authority of this Act) shall not contract with, make a grant to, or enter into any other type of financial arrangement with, any individual who has been an officer or employee of the Office of Economic Opportunity or any other agency of the executive branch of the United States Government which administers funds appropriated under the authority of this Act (or with a partner of such individual, or with a firm or business organization in which such individual holds a substantal financial interest or in which he serves as an officer), within one year after such employment, for any service or activity (other than reemployment as an officer or employee of a department or agency of the United States Government) in which such person participated personally and substantially as an officer or employee through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise.

"PAYMENT OF DUES PROHIBITED

"SEC. 624. No funds appropriated under the authority of this Act shall be used for or on behalf of any person, organization, or agency to make any payment in the nature of dues or membership fees in any public or private organization or association.

"NEPOTISM PROHIBITED

"SEC. 625. No person shall be employed (or continue in employment) with funds appropriated under the authority of this Act in a position (1) over which a member of his immediate family exercises supervisory authority, or (2) while he or a member of his immediate family serves on a board or committee which has authority to order personnel actions affecting such position, or (3) while he or a member of his immediate family serves on a board or committee which, either by rule or practice, regularly nominates, recommends, or screens candidates for the agency or program in which such position is located. For the purposes of this section, a member of an immediate family shall include any of the following persons: husband, wife, father, mother, brother, sister, son, daughter, uncle, aunt, niece, nephew, father-in-law, mother-in-law, brother-in-law, sister-in-law, son-in-law, or daughter-in-law."

PART C—AMENDMENTS TO TITLE VIII ("VISTA")

RESTRUCTURING ADMINISTRATION OF PROGRAM

SEC. 331. Section 810 (a) of the Economic Opportunity Act of 1964 is amended by striking out that part of the first sentence which precedes the numbered paragraphs and by inserting in lieu thereof the following:

"The Director is authorized to make grants to State and local public agencies to recruit, select, train and assign persons to serve in full-time volunteer programs. Such programs shall be those established by the grantee agency or (upon satisfactory assurance that the work of such volunteers will be supervised by competent individuals) by other public agencies or private nonprofit organizations, which involve the assignment of volunteers to work—"

ASSISTANCE IN LEGAL SERVICES PROGRAMS

SEC. 332. Section 834 of such Act is amended by inserting at the end thereof a new subsection, as follows:

"(f) Persons serving as volunteers under this title shall provide legal services or legal counsel only as a part of a legal services program (and at the request and under the supervision of the directors of such program) supported under section 222(a)(3) of this Act."

Mr. AYRES (interrupting the reading). Mr. Chairman, the amendment is printed in the RECORD as of yesterday, it is in today's RECORD, and in view of that and the 3 hours of discussion on the substitute, I ask unanimous consent that the substitute amendment be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. The gentleman from Ohio is recognized for 5 minutes in support of his substitute amendment.

Mr. AYRES. Mr. Chairman, I feel that the substitute amendment has been thoroughly discussed in general debate. I think it is understood by all why many of us, on both the minority side and majority side, feel that a substitute proposal is necessary. I repeat that this is not an Ayres substitute as such, it is not a Republican substitute as such, but it is an amendment that was worked out by the members of the Republican Party and members of the Democratic Party in a truly bipartisan manner.

However, it is my understanding, Mr. Chairman, that there are several amendments to be offered to the substitute, and I would hope that we can give serious consideration to the amendments, because after the President's press conference of Monday evening, we were advised, both publicly, through the press and over the television, that the President has suggested in very exacting terms that we work toward accommodations. That we have done.

I want to commend the gentlemen who have worked so hard to bring about a meeting of the minds in this very complicated and controversial field. This substitute is not a slap in any way at the Director of the Office of Economic Opportunity. Quite the contrary, it is a sincere attempt to give him the tools that we feel are necessary, having lived with this program for over 5 years, for him to do the job to help the poor, which we all know has not been done under the existing structure of the Office of Economic Opportunity.

I would hope today, Mr. Chairman, we can pass the substitute. We can go to conference with the other body with a vehicle which will make it possible for us to come back to this House with a proposal which is acceptable to the House and at the same time will give this program redirection, under new leadership, so that when we come back after this act expires, approximately a year and a half from now, we will be able to say to ourselves, "We did a good job. The Director has done a good job. The original purpose of this act, to help the poor people of this country, has been accomplished."

Mr. BRADEMAS. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. Chairman, there are many reasons I rise in opposition to the amendment offered by the gentleman from Ohio. I only have 5 minutes, so I do not have enough time to go through all of them. Let me try to recite two or three.

In the first place, this proposal to turn the control of the efforts to fight poverty in our country over to the States is an antilocal control amendment if I ever saw one. We get a lot of speeches in this place about how deeply we care about assuring local control over important Federal programs, but I have here in front of me a letter which I take it all of us received today, signed by four outstanding mayors of our country. I really do not know the political views or the partisan affiliation of most of these mayors, except the one from my own State, the mayor of the city of Indianapolis, Mayor Richard G. Lugar, who has just been elected to an important position as the leader, I guess it is, of the National League of Cities.

All four of these mayors—of Philadelphia, Pa.; San Leandro, Calif.; San Diego, Calif.; and Indianapolis, Ind.—are mayors who are strongly opposed to the legislation proposed here today in the nature of the amendment offered by the gentleman from Ohio. They say:

> As the local elected officials closest to the individuals that these programs serve, we urge you to reject any attempt to remove the control of these programs from the local communities. The substitute would remove the control but leave the responsibility for the programs on the shoulders of the mayors of this land.

Mr. Chairman, the mayors sent along an editorial from the current issue of the magazine of the National League of Cities, Nation's Cities, which states:

> To sweep away the truly local character antipoverty programs would be most unfortunate. And to sweep them away under the guise of local control when the true meaning is state control would be a fraud on the public and particularly on the poor.

The mayors say, "A fraud on the public and particularly on the poor." That is not I speaking as a Democratic member of the committee. This is from a letter signed by four outstanding mayors of both parties, making very clear what the amendment offered by the gentleman from Ohio and those who support it represents.

I have here a letter I have received from my Republican friend from Indianapolis, Mayor Lugar, who says in his letter dated November 17:

I am hopeful that you will vote to defeat amendments offered to provide state governmental interference in the O.E.O. programs. I can assure you that I need to maintain control by the City of Indianapolis of any O.E.O. programs in our jurisdiction in order that the results will be reasonable and just. Relationships between Indianapolis and O.E.O., directly, are often complex. Interposing state government in the middle of these relationships would create an intolerable mess, in my judgment.

That is a second reason why this amendment seems to me to be most unfortunate, Mr. Chairman.

I believe that those who have observed State government in the United States are aware that historically our State governments have done almost nothing to make any serious contribution toward solving the great problem of enormous poverty in a very wealthy land.

I come from the State of Indiana, and I know whereof I speak when I refer to my own State. My own State does not even have a State economic opportunity office. My own State does not even allow, because of the position of our Governor, the people of the State of Indiana to participate in the programs afforded by the Older Americans Act.

My own State, only this year, within the last month, decided to join the union and permit the citizens of Indiana to have an opportunity to enjoy the benefits of the continuing education program under the Higher Education Act.

The fact of the matter is, and everybody here knows it, that State governments have been notoriously recalcitrant about responding to the needs of urban people generally, but of poor people in particular in both rural and urban America.

And for Congress to vote to take the Federal funds that President Nixon, when he urged that we extend for a period of 2 years the present poverty program, and turn these funds over to the States, would be an indication that Congress is not willing to give consideration to any serious and honorable means to help the poor people of our country.

Mr. Chairman, it is possible that the wealthiest nation that mankind has ever known will turn away from the ancient and serious problem of poverty?

As the mayors wrote, the substitute amendment and its results would be a fraud on the public and particularly on the poor. They know it. They just have a hard time getting their message through to their elected Representatives in Congress.

Mr. Chairman, I hope very much the substitute is defeated.

Mr. CLAY. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. Chairman, I strongly support the bill reported by our committee. I offer my support—not because the bill meets the needs of poor Americans—but because it is the only bill we have which incorporates the kinds of concerns translated into programs which can address the needs of poor Americans. I strongly oppose the substitute bill proposed by certain Members of this body who seek to turn OEO over to the States. And I submit that their effort would effectively destroy these programs for the poor—and would give a dose of overkill to the little hope left for rallying this Government to a solution for poverty.

Any Member who can seriously suggest that the States of Mississippi, Georgia, Alabama, and others—both North and South—will pick up the banner of social and economic reform and charge into the poverty areas in those States—is simply ignoring truth and fact. Any Member who seriously contemplates turning responsibility for alleviating poverty—to the machineries and mechanism which have rigidly served to perpetrate the conditions of poverty—is not committed to equal opportunity but to the status quo.

It was only recently that President Nixon unveiled to the American people the welfare mess which has resulted from the individual State administration of those social programs. We are aware of the gross discrepancies which exist among the States—in their unwillingness and inability to meet the needs of poor people. We know that the migration of the poor from many States into the urban ghettos comes about because they are trying to get away from the harsh climates of hatred and closed systems which exist in many States.

It has been said that we cannot change the way a person feels by legislation—but to some extent, we can alter his behavior. No one knows better at this time than the poor—the Federal administration of Federal programs is the only way they have received any benefits from social and economic reform efforts. We know the present dispositions of too many State administrations and they are not inclined toward the eradiction of poverty. In fact, many of them still maintain that poor people are responsible for their poverty. Anyone who holds such notions should not be given the reins of control over OEO programs. And yet this is what the Green-Quie substitute intends—that without regard for the documented and established records that many States have for "keeping poor people down"—we should give them the responsibility for "raising poor people up." State governments have not taken it upon themselves as their public duty to educate, to train, to feed, to employ, to meet the health needs, the legal services needs of the poor. We need innovative approaches to these problems—which we have seen through OEO federally administered. You cannot assign contemporary solution making to people who think only along traditional lines.

When you talk about transferring OEO programs to State administration, giving them the responsibility for approving all OEO program applications before they are sent to OEO for funding, giving State economic opportunity councils the sole authority to develop an antipoverty program for the State—you are in essence talking about writing off the poor, and turning the administration of a federally funded program aimed at the poor to State administrations which have shown little sensitivity for the poor.

If some Members have the notion that this substitute gives the responsibility for problem solving to the people closest to the problems, they are wrong. Look at the welfare food budgets in the States of Alabama and Mississippi. In Alabama, a poor person is allowed 6 cents a meal on which to eat—or $1.40 for an entire week. And in Mississippi, a poor person must get by on only 4 cents a meal—and only 80 cents a week. In my own State of Missouri, the allowance is only 11 cents for a meal or a total of $2.50 a week. These are a few examples of how close the State governments are to the problems of poverty—how sympathetically they review the needs. In Missouri there is one black highway patrolman. In the highway department—8,000 employees—less than 20 blacks. I know how our Governor will administer.

No, gentlemen, the substitute offered by Members of this body, GREEN and QUIE, cannot be made out to be anything but what it is—legislation to cripple the whole poverty effort. I, for one, know very well how the States would welcome this authority.

There is no way I can vote for tying any part of OEO to the States—whether it is legal services, VISTA, community action, and surely not when you are destroying the whole concept behind OEO and farming it all out. How can you expect those of us familiar with the problems of poverty to stand still while you work to get members of community action and neighborhood board appointed by elected officials? When we are talking about the participation of communities and individuals in their own programs, here comes a substitute legislative sham which would guarantee there would be no such representation.

Members of this body who share my concern and know the facts of State administration for poverty programs—could talk for hours giving illustrations which support this case.

Whether or not, and irrespective of how the positions supporting the substitute may be rationalized, such a vote will register the mark of a confused mind. Whatever any Member says about his vote for the substitute—or any legislation tied to State consideration and control—do not say it is in the interest of the poor.

To those who are supporting the substitute and who are using as a shield the fact that you have a glorious past of supporting the poor—I say that the commitment to justice and equality is a continuing one—if you were for the poor yesterday and against them today—then you were either hypocritical yesterday or you are hypocritical today.

Mr. LANDRUM. Mr. Chairman, will the gentleman yield?

Mr. CLAY. I yield to the gentleman from Georgia.

Mr. LANDRUM. I am disturbed about the reference which the gentleman has made to the possibility of such a program of State planning failing in Georgia and in other States.

Mr. CLAY. Mississippi and Alabama.

Mr. LANDRUM. Let me say to the gentleman in response to that suggestion this: Today I was in a telephone conversation with a director of the Atlanta, Ga., Office of Economic Opportunity and was told by him—not in answer to a question, but voluntarily—that at no time in history has that office ever made a recommendation to Governor Maddox but that it was accepted by the Governor. The Governor has said that while he differed with reference to certain aspects of the program, and that he recognized there was a problem but as long as he was Governor he was going to do what he could to help those the original act was intended to help.

Mr. CLAY. Let me say to the gentleman from Georgia the question we are discussing today is the effort of the poor people in the State of Georgia to improve their condition. In the State of Georgia the record is quite clear that Georgia in its attitude has not carried forth the program as it was designed to be. For instance, in Alabama a poor person on State welfare is allowed 6 cents a meal on which to eat or $1.40 for an entire week. In Mississippi, a poor person on State welfare must get by on only 4 cents a meal and only 80 cents a week. In my own State of Missouri, the allowance is only 11 cents for a meal or a total of $2.50 a week.

In Mississippi today there is a program, the Headstart program, that is being held up by the Governor because he will not ratify the grant unless the people of Headstart agree to certain conditions that the Governor would like. Some of those conditions are as I understand them to be that the people of Headstart take on the responsibility of stopping boycotts by black people of white merchants in four counties of Mississippi. In three of those counties there are no Headstart programs. The Governor insists that before he approves the sum of $7 million for a Headstart program that they give him the exclusive right of firing anyone whom he charges is engaged in any kind of political activity. I say that the Southern States in this country represent one instance where there has been resistance to a program of this kind directed toward alleviating the conditions of poverty on the part of people who have been insensitive to this problem in this regard.

AMENDMENT TO THE SUBSTITUTE AMENDMENT OFFERED BY MR. ESCH

Mr. ESCH. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. ESCH to the substitute amendment: At the end of title II of the substitute bill insert a new section as follows:

"EXEMPTION OF HEADSTART PROGRAMS

"SEC. 254. The Secretary of Health, Education, and Welfare (during any period in which he has been delegated responsibility for the administration of those programs authorized under section 222(a)(1) and 222(a)(2) of this Act) may exempt such programs from inclusion under the provisions of this part (either generally or with respect to inclusion in the program approved for a particular State)."

Mr. ESCH. Mr. Chairman, I believe we have explained the provisions of this amendment during the general debate, but I would like to review them for the Committee at this time.

Mr. Chairman, the purpose of this amendment is to exempt the Headstart and Follow Through programs which are already being delegated to the Department of Health, Education, and Welfare, from this substitute.

I think it is essential that we recognize that the President has begun to develop an orderly transfer and a gradual transfer of these programs into the Office of Health, Education, and Welfare, so that this transfer is being pursued not in a disruptive manner, but in an orderly process.

The amendment will continue this process.

I think that we should also recognize that Secretary Finch has indicated his desire that we adopt this amendment, which is a perfecting amendment, and one which I hope will have the support of the entire Committee. He has stated that the transfer of Headstart in an orderly way to the Office of Health, Education, and Welfare, would be seriously impaired, if the substitute is adopted without excluding Headstart.

So, Mr. Chairman, I hope that the amendment will be accepted by the Committee so that the transfer can continue to occur.

Mr. BRADEMAS. Mr. Chairman, would the gentleman yield?

Mr. ESCH. I yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Chairman, I thank the gentleman for yielding, and I appreciate the thrust of the amendment offered by the gentleman from Michigan, but what I do not understand is this:

If the gentleman is not willing to trust little children to the tender mercies of the State governments, why is he willing to go along apparently with trusting adults?

Mr. ESCH. Mr. Chairman, I appreciate the question asked by the gentleman from Indiana. I think that the gentleman is well aware that the transfer is already in existence, and it is not a question of whether you trust or do not trust the States, or trust the Federal Government; the point is that there is in process an orderly transfer to HEW of these early child programs.

Surely the gentleman from Indiana would concur that any future legislation will have this direction rather than in the Office of Economic Opportunity.

Mr. AYRES. Mr. Chairman, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from Ohio, the ranking member on the committee.

Mr. AYRES. Mr. Chairman, I just noticed that the gentlewoman from Oregon was on her feet, and since the gentlewoman has been so active in this I wonder if she might comment.

Mrs. GREEN of Oregon. Mr. Chairman, would the gentleman yield?

Mr. ESCH. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. Mr. Chairman, I agree with the contention of the gentleman from Michigan that the Headstart and Follow Through programs are already over in the Office of Health, Education, and Welfare. I am one of those who urged such a transfer by legislative action last year.

It seems to me, Mr. Chairman, that the amendment offered by the gentleman from Michigan (Mr. ESCH) makes this transfer much easier, and also more certain.

So, Mr. Chairman, I would support the perfecting amendment that has been offered by the gentleman from Michigan, and I hope that it will be adopted by the House.

Mr. QUIE. Mr. Chairman, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from Minnesota.

Mr. QUIE. Mr. Chairman, I would also say to the gentleman from Michigan that this is discretionary with the Secretary of Health, Education, and Welfare, and already they have gone through four seed programs to work out the situation, and in 19 States it has already been worked out.

Mr. AYRES. Mr. Chairman, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from Ohio.

Mr. AYRES. As the gentleman is aware, I conferred with the gentleman at some length prior to his offering the amendment, and after the gentleman spoke in general debate I had a chance to review it carefully, and we on the minority side accept the amendment offered by the gentleman from Michigan.

Mr. ESCH. Mr. Chairman, I appreciate the comment of the gentleman from Ohio, and I hope that the Committee will adopt the amendment.

Mr. BRADEMAS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I shall not take the 5 minutes. I only want to draw attention to the ludicrous nature of the situation in which we find ourselves in respect to the kind of amendment offered by our friend from the State of Michigan.

For his amendment, I think, really has nothing to do with whether or not Headstart has been transferred to the Department of Health, Education, and Welfare—a fact with which we are familiar.

The point is that the gentleman's amendment would in effect remove from the control of local communities and turn over to the States the Headstart programs which have proved to be so enormously popular and effective throughout the Nation for children of preschool age. Indeed, in my own subcommittee, as the gentleman knows, we are now considering legislation, H.R. 13520, the Comprehensive Preschool Education and Child Day Care Act, that will extend the benefits of Headstart-type programs to all children, regardless of income group.

But the harsh fact of the matter is,

and we ought to be very candid about it, that the effort is here being made by the proponents of differing antipoverty programs to exempt from the control of the States the particular programs in which they sympathize. This effort to exempt such programs is nothing but a confession of the unwisdom of giving control of these programs to the States and stripping the control away from the local communities that have heretofore operated them.

Mr. ESCH. Mr. Chairman, will the gentleman yield?

Mr. BRADEMAS. I yield to the gentleman.

Mr. ESCH. I think the intent of this amendment to clarify an action that is already onboard—and that is a delegation of responsibility for Headstart and Follow Through programs from the OEO to HEW. That is an orderly process that is now onboard. It is a recognition of a fact that already exists and hopefully they will continue to work both with State and local educational groups and local agencies.

Mr. BRADEMAS. The gentleman completely misses the point of what I am trying to say, and I am confident that he is aware that he is missing the point of what I am trying to say.

We are not talking about the impact of the transferability of the Headstart program from OEO to HEW. That is not the issue at all.

The point is rather this: Are Headstart programs going to be exempted from the tender mercies of those State governments which we are all aware have not been shown to be very generous about preschool programs for the poor and have shown not very much initiative at all about showing the slightest degree of concern about poor people until the Federal legislation authorizing an effort to fight poverty in the country came along?

I am sure the gentleman knows what we are talking about. I am not talking about the question of transferability to HEW.

If he wants to throw posies at Headstart, I certainly understand the thrust of his amendment. But I just wish he would be more candid in his explanation.

Mr. LANDRUM. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think it is well that we pause just briefly at least and review what it was we were driving at when this legislation originally came to the House in 1964.

When economic opportunity legislation was introduced into the House in 1964, it was in the hope that the package of proposals being offered would provide services that would help millions of Americans become participants in our economy and our society—to become taxpayers rather than taxeaters.

It had been 25 years since Pearl Harbor ended the first war on poverty. International problems and apparent prosperity had dominated the attention of the majority of Americans during the 1940's and 1950's—but now there was an uneasiness that there were too many men, women, and children who were not sharing in America's growth.

Essentially an underdeveloped province, what little progress they made was vastly outstripped by the rapidly growing technology of the "haves."

Right here in America was a microcosm of the world problem of the haves and the have-nots—the developed and the underdeveloped. There were many of us who felt that the future for a nation so divided would be as uncertain as that Lincoln described as half slave and half free.

The problems of this Nation's poor, moreover, were so diverse and complicated, that it seemed that only a massive and multisided attack composed of many daring new programs—in addition to expanded older programs—could provide the impetus necessary to make progress. For coordination and maximum thrust, it seemed best to have those efforts focused by one agency—an agency able to reach directly into communities.

Neither congressional supporters nor administration backers expected instant success. We knew the job ahead would be very difficult. But apparently the public expected immediate progress and the poor allowed themselves to become hopeful long before administrative gears meshed.

The result was a rush for results before adequate planning. Procedures for evaluation were often nonexistent. Dr. Fred Crawford, director of the Center for Research in Social Change at Emory University, who studied the Atlanta OEO program for a 3-year period has reported that, and I quote:

> Services were started, people were involved, but no one was gathering evidence to use in determining what was happening. This is comparable, he says, to shooting a rocket at the moon with no means of tracking the rocket after launching, no means of correcting its course in flight, and no way to tell whether it landed or not.

As Dr. Crawford points out, such a procedure is not only expensive, but dangerous from a psychological and sociological point of view. He explains that:

> The ramifications of intrusive forces on human lives, as positive as these may be in intent, apparently create more problems than they resolve. . . . Prior testing and accurate projections of immediate and long-range effects seem totally necessary if we are not to damage individuals and the social system through the introduction of "good" program.

In addition to a dangerous lack of planning and anticipation of results, many local OEO programs have had difficulty in delivering the services they are supposed to deliver. There are strong indications that this has not just been the result of inadequate funding—but a result of the structure of the OEO program and its relationships with other local agencies.

A good example of a problem area is that of finding jobs for the poor. The study of the local OEO program in Atlanta indicates that 72 percent of the black clients and almost 57 percent of the white clients visiting neighborhood centers for the first time come seeking help in locating jobs—statistics which should certainly counter the arguments that most of the poor do not want to work.

So they come seeking employment. Unfortunately, however, not many find it. The usual procedure is to refer them to other employment agencies—and the usual result is not very good. Only one in three are placed. Furthermore, as many as three-fourths of these placements are for jobs classified as "menial"—jobs which will not take the recipients out of poverty.

For the young there are a few job training openings—but not nearly enough—and often not in the subjects applicants desired. For the middle aged and older, training and retraining are virtually nonexistent.

I have come to believe that one of the reasons local OEO agencies have not been able to deliver services is that they cannot or will not work closely enough with other local institutions. Supposed to be catalysts to community development, they are often viewed as foreign objects.

The structure of the Office of Economic Opportunity is admittedly an administrative experiment. Grants from Washington are made through regional offices to locally incorporated groups which are constituted according to national OEO guidelines.

In most instances, however, local OEO groups seem to be responsible to no one but themselves: not to Washington, not to regional offices, not to the communities in which they serve—or to the poor, and Washington headquarters of OEO assumes the attitude toward Congress. They look at us with contempt.

The result is that benefits have often been obscured by controversy. There has not been enough planning and coordination of activities with State and local officials. And there have been too many instances of poor administration and of self-dealing. By "self-dealing" I mean instances of profitmaking on contracted services and evaluations undertaken by former OEO employees.

One can only conclude that it is time to achieve more responsible and responsive administration. To establish planning systems that will assure coordination with other agencies. To establish evaluation systems that will give us a clear idea of what good and what harm we are doing the poor. We must harness OEO and other poverty-fighting forces for a protracted war. We cannot continue to dissipate our few resources in false starts, waste, and in-fighting. State planning seems to me to be the best solution to our aim and desire to reach the poor and to our desire to have the OEO in general respect the intent of the Congress.

Now I am not in disagreement at all with my distinguished young friend, the gentleman from Missouri (Mr. CLAY) when he talks about what we need to accomplish.

Our difference is in the way to approach it, and the way I am afraid he has his thinking oriented toward a welfare program here. This is not a welfare program—this is an education program. This is a program that is designed to take Americans out of welfare and make them become taxpayers rather than taxeaters. That is the purpose of this program. It is not being managed toward this goal.

Now, I yield to no Member of this body or no man in this land in my concern for the poor. Long before some of those here today were advocating continuation of the program as it is I was standing where the distinguished chairman is, fighting for the original program, and we have had some successes. The Headstart program is an example. But we have had some failures, and we ought to stand and recognize the fact that these failures are making the country criticize this program and are preventing it from having the success that it must have.

Therefore, I can come to only one conclusion.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

(On request of Mr. WAGGONNER, by unanimous consent, Mr. LANDRUM was allowed to proceed for 3 additional minutes.)

Mr. WAGGONNER. Mr. Chairman, will the gentleman yield?

Mr. LANDRUM. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. Mr. Chairman, I would merely like to say, for those who have not been around here since the inception of the program, it is easy to recall that the gentleman in the well, Mr. LANDRUM of Georgia, stood, as he just recalled to us, in the well of the House initially handling this legislation, and he had exactly the same thing to say then that he has to say now about the hopes and the aspirations of this program. He described it then as a program to make taxpayers out of taxeaters. He made crystal clear that we were not talking about a welfare program. It was to be an educational process to improve the ability of our citizens to do something for themselves. He made a very good explanation of the bill then and its noble purposes, and I simply want to say he is only reiterating now what he had to say then.

Mr. LANDRUM. I thank the gentleman.

Let me say these final words. I have not used any time during the general debate. I am not now a member of this committee. I sometimes miss its activities.

But let me say that no one here is more concerned about the continuation of this program and having it do what it was originally intended to do than the Member speaking to you now. I believe, after a thorough examination and observation of all the activities of OEO, that unless we change direction in its administration, unless we make the change that is indicated in this substitute, we are dooming the program to failure. I do not believe it is dangerous to resort to the State capitals, the Governors, the mayors, and the leadership at home for, after all, from whence did we come? How are you going to question the sincerity of a Governor, of a mayor, of a State legislator, of a State superintendent of schools in formulating programs to meet these objectives when after all he comes from the same source from which we come and has the same aspirations and hopes that we have?

I want this program to continue. I want it to succeed. I want to see every man, woman, and child in this Nation participate. I want to see them made taxpayers instead of taxeaters. But I am telling you, as one who bled for the original passage of this act, that unless we change its direction today, the act is going to fail in its mission.

The CHAIRMAN. The Chair recognizes the gentlewoman from New York (Mrs. CHISHOLM).

Mrs. CHISHOLM. Mr. Chairman, I rise in opposition to the amendment.

You know, it is a beautiful thing to sit here this afternoon and to listen to so much debate and bleeding hearts concerned about this program. And yet many of us feel and realize that we would not have had to be on this floor today discussing this program if there was such a thing as equality in every State of this Nation.

The fact of the matter is this: Let us stop practicing a fraud. Let me tell you now about this substitute amendment.

The fact of the matter is that it is nothing more than political patronage that will be returned to the States. If the Members are so concerned about the utilization of the funds for the poor, and that these funds have not been administered correctly, I believe that we should have addressed ourselves to correcting the abuses or the negatives in the program.

For the first time we gave the disillusioned poor, black and white, in this country the feeling that some group or some agency was concerned.

How can Members explain to me that they are so concerned about the funds not going to the poor? The cost of this new layer of administration is being ignored. The substitute amendment allocates $50 million for State administration, all to be paid from title II funds allocated to each State. This means $50 million less than that which would have been available to serve the needs of the poor, about whom we are so concerned in the local areas.

Why, then, since we have utilized approximately 2.19 percent for administration of the title II program, the CAP program, over the past 4 years, must we now double that allowance under the substitute bill for the State administration? Who is kidding whom?

The present administrative cost would be about 5 percent of the funds of this new large layer of bureaucracy, this new large layer of pork barrel patronage.

How can we be so concerned about the money going to the poor? Once again we see the poor as the scapegoat.

How can we be so concerned about using money which is going to the poor, when under this new bill approximately 5 percent, as contrasted to 2.19 percent, would go for administrative cost of the title II program?

I have just spoken briefly about the title II program. I have been delving into this thing now for the past 8 weeks. It is so wonderful for us always to be using the children, the poor and every other kind of revolutionary group, and whatever you have for scapegoats.

If we are really concerned about the poor of this Nation, we should accept the positive aspects of the program and then take the negative aspects and seek to improve those parts of the program.

In this U.S. Congress we do not abolish the Congress or do away with it, in spite of the fact that we have deficiencies and scandals. We do not do that. What we attempt to do is to see if in some way, although it is very slow to succeed, we can bring about an amelioration of certain conditions.

It seems to me that we must not defraud. We must recognize that there are errors and that there are abuses in the OEO program. I am not going to stand here before you this afternoon and tell you that the program is perfect. But neither am I going to say that the return of these programs to the States is the answer, because precisely why the program was developed in this Nation was the fact that large numbers of the States in this Nation for a long time were not addressing themselves to the concern of the poor.

I know that some Members do not like what I am saying, but the fact is that we have to face reality.

I would be very glad to yield to someone on the committee, because perhaps I got wrong information, but I wish someone on the committee would explain to me, if we are so concerned about the fact that the money has not been going to the poor, why we now want the money to really get to the poor and at the same time, under the new program, approximately 5 percent of the money under title II will be going for administrative cost as compared to a 2.19 percent for the past 4 years under OEO?

In recent weeks I have heard a number of charges or contentions about the Office of Economic Opportunity that I consider either unsupported by available facts or that are essentially biased in nature.

Some of our esteemed colleagues introduced a substitute bill recently, the basis of which seemed to contain a number of misconceptions. At that time there were some statements made that I thought that I might do well to check. I have done so and would now like to make some counter statements.

One of the statements had to do with the growth of businesses, especially consultant firms, centering around the OEO in particular and the antipoverty effort in general. Accordingly, I asked my staff to try to determine how many firms were involved in consultant relationships and further how many of those firms were headed by ex-employees of the OEO.

I also asked them to take it one step further and secure the same information for the other major Federal agencies, the Departments of Labor, Housing and Urban Development, Health, Education, and Welfare, Department of Transportation, and the Department of Defense.

The first response was received from the Legislative Research Section of the Library of Congress and it was basically, first, that such information was not centralized, even in the agencies themselves; second, that given enough time, subpena power, and manhours, a questionnaire might be possible for development of an approximate list, but the cost for such firms could not be ascertained without consulting the agencies concerned.

Now to the best of my knowledge no committee in either body of this Con-

gress has ever attempted such an endeavor nor has any individual. Therefore, I must assume that the statement was a generalization not based on known facts.

And as a generalization, I or anyone else, would be hard put to contest the statement. In fact I would be inclined to concur and applaud if the statement is in fact true. It would then be at very least a minor indication that the priorities of some people in the country have indeed changed.

The Department of Defense and I daresay other Government agencies of similar nature have not only subsidized but have indeed created consultant firms and "think tanks" of the nature some are wont to castigate OEO for and they have done so with almost no criticism from certain quarters.

Correlated to that statement about the new antipoverty consultant corporations was the suggestion that the Department of Justice investigate all such corporations. That is a suggestion that I concur with—provided that the scope of such an investigation be broadened to include the agencies that I have previously mentioned as well as a separate investigation into the number of retired military personnel hired by corporations with Defense Department contracts.

Another statement that has been made is almost too general to respond to and that is precisely why one must undertake a response. The charge is that antipoverty funds have been used to support revolutionary groups. None of the groups were named specifically, perhaps because there have been no such instances in reality, but nevertheless since I know that our different biases make us see the object in different ways let me essay to respond to that one also.

The Office of Economic Opportunity, itself, was created with an eye toward change. It undoubtedly hired some people who worked for change in what some of us might consider the wrong ways; just as business sometimes hires as workers people who will not work or the electorate elects legislators who do not legislate. There is no conspiracy to do so in the two latter cases nor has there been in the first. In fact, in my opinion, OEO may have a better track record than business or the electorate.

My final comment on this point is simply this: If anyone has sufficient facts to prove the contention that there was—or is—an active concerted effort on the part of OEO to hire enemies of this country, please present them to me so that I may change my opinion.

Having finally reached the matter of the substitute bill itself permit me to preface the balance of my remarks.

I, also, do not feel that the Office of Economic Opportunity has been as generally effective as it might have been. But much of its problem has been the year to year—at the whim of Congress—manner in which it has existed.

The bally-hoo with which it was started might have led some to believe that poverty would be ended in a year but I doubt it. It has had to expend entirely too much staff time and energy on congressional relations and public relations.

Nevertheless, because of its experimental and innovative nature, it has created and will hopefully continue to create programs of a positive nature that will indeed go far toward solving the problems of the poor—and as a consequence many of the internal problems of the Nation.

Among those programs, the most important three to my way of thinking, have been the community action program, the legal services program, and the VISTA program. Unfortunately for OEO they are also the three that have been most controversial in nature and the three that seem least popular with Congressmen.

These are the three, it would seem, that have given impetus to the introduction of the substitute bill.

Let me examine if I may two of the statements made about this substitute bill. The first was that State and local governments have got to run the poverty program. Many of you gentlemen were no doubt sitting in the same seats when that same thing was said in 1967.

At that time an amendment was attached to the Economic Opportunity Act. It was popularly known as the Green amendment and provided State and local governments with the option of taking over the local community action programs.

There was a further condition to the act that year. It directed OEO to contract for an independent study of the results of the Green amendment. The results were quite clear—only 3.3 percent of the local entities chose to do so, and to my knowledge no States chose to designate themselves as the CAA within the State.

One contention was that OEO had so administered the amendment that it stifled and discouraged State governments from designating themselves. My feeling is that if it is true, then the OEO administrators were smarter than the State administrators and ought indeed be running our antipoverty program if we are to have a successful effort.

The final point that I would like to discuss is a point of inconsistency. The issue raised was that of Republican and Democratic Party officials, at the local level, being involved in the antipoverty effort.

First, it is inconsistent to require up to one-third representation on local antipoverty boards for public officials and then to criticize their involvement in the program.

Second, it is inconsistent to suggest that the State and local governments run the program in entirety, as the substitute bill suggests, and then say there is already overinvolvement by political figures.

Third, it is inconsistent with the previous Green amendment which was designed to provide the opportunity for overinvolvement.

Fourth and finally, it is inconsistent with the findings of the study pursuant with the Green amendment. One of which was that some representatives of the poor felt their influence actually increased when Government officials joined the board. There are many other elements that support my contention that OEO must be kept as an intact entity. Many of my colleagues have already or will in the coming days discuss them. For me I can only say that I felt it necessary to respond to these rather specious arguments I have heard that supposedly support dismantling the agency.

In summary may I say that all rational reasons point toward not only maintaining the Office of Economic Opportunity as the Federal antipoverty agency but expending its mandate to end poverty in this country.

The only thing that the present substitute bill would do is to fragment and diffuse the Nation's effort to end poverty. For us to pass this bill would be breaking faith with the poor; were we to do that, how long would it take us to break faith with the ideal of a democratic society itself?

Mrs. GREEN of Oregon. Mr. Chairman, will the gentlewoman yield?

Mrs. CHISHOLM. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. One of the reasons why we wrote in the provision that the administrative cost at the State level would be limited to 5 percent is because at the present time we find the administrative costs averaging 20 percent and—in some cases—much, much higher. This is one of the reasons why we say the money is not going to the poor and is not going to the people for whom it is intended.

In addition, as I pointed out earlier, over one-half billion dollars has gone to private corporations on supporting contracts, technical assistance, that could have been going for programs within the States to help those who really need it. This is an attempt to save money and to use it where needed.

Mr. AYRES. Mr. Chairman, I move to strike the requisite number of words.

Mr. DELLENBACK. Mr. Chairman, will the gentleman yield?

Mr. AYRES. I yield to the gentleman from Oregon.

Mr. DELLENBACK. I thank the gentleman for yielding.

Mr. Chairman, may I remind this body that the pending business is an amendment of the gentleman from Michigan (Mr. ESCH); namely, to move in the area of Headstart. I speak a word in strong support of this amendment. The Headstart program, developed under OEO, has proven to be an excellent experimental program. As an excellent operating program it has been moved over to and delegated to HEW.

The motion of the gentleman from Michigan (Mr. ESCH) is aimed at continuing that operation if the substitute is adopted.

I urge this committee now to vote in favor of the amendment of the gentleman from Michigan (Mr. ESCH).

Mr. AYRES. Mr. Chairman, would it be in order to ask for a vote on the Esch amendment?

The CHAIRMAN. It would.

The question is on the amendment offered by the gentleman from Michigan (Mr. ESCH) to the substitute amendment

offered by the gentleman from Ohio (Mr. AYRES).

The amendment to the substitute amendment was agreed to.

Mr. AYRES. Mr. Chairman, I ask unanimous consent that all debate on the substitute amendment and all amendments thereto close at 6 o'clock.

Mr. PERKINS. Mr. Chairman, reserving the right to object, will the gentleman agree to let the last 5 minutes be reserved to the committee?

Mr. AYRES. Yes, I would agree to that.

Mr. PERKINS. All right.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. RYAN. Mr. Chairman, I object.

Mr. AYRES. Mr. Chairman, I move that all debate on the substitute amendment and all amendments thereto close at 6 o'clock with the last 5 minutes reserved to the committee.

The CHAIRMAN. The matter of the last 5 minutes being reserved to the committee may not be included in the motion.

Mr. AYRES. Mr. Chairman, I withdraw that portion of the motion.

The CHAIRMAN. The question is on the motion of the gentleman from Ohio (Mr. AYRES).

The question was taken; and on a division (demanded by Mr. OTTINGER) there were—ayes 124, noes 35.

So the motion was agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin (Mr. STEIGER).

AMENDMENT OFFERED BY MR. STEIGER OF WISCONSIN TO THE SUBSTITUTE AMENDMENT OFFERED BY MR. AYRES

Mr. STEIGER of Wisconsin. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. STEIGER of Wisconsin to the substitute amendment: Amend section 301(1) of the substitute to read as follows:

"(1) Clause (3) of subsection (b) is amended to read as follows:

"'(3) the remainder of the members (which shall comprise not less than one quarter of the total membership of such board) are officials or members of business, industry, labor, religious, welfare, education, or other major groups or interests in the community, and are chosen by such groups or interests.'"

In section 301(2) of the substitute, the proposed first sentence of subsection (c) of the section 211 of the Act is amended by striking "appointed by the elected public officials who serve (or appoint representatives to serve) on the board of the community action agency," and inserting in lieu thereof, "appointed by elected local officials whose constituencies include significant portions of such area,".

Mr. STEIGER of Wisconsin. Mr. Chairman, section 301(1) of the substitute does two things. First, it requires that those board members who serve as officials or members of business, industry, labor, religious, welfare, education, or other major groups and interests, constitute at least one-fourth of the total membership of the board. Second, it requires that these private-sector representatives be appointed by the elected public officials who serve on, or have representatives serving on, the board.

The requirement that these private sector representatives be selected by public officials would represent a very substantial change in the composition of community action agency boards. It would give the public officials seven-twelfths of the board membership. It would deprive the private sector of any real representation, since the board members would not be chosen as representatives of private groups. They would merely be representatives of public officials who happen to be officials or members of private groups.

This amendment to the substitute retains the requirement that at least one-fourth of the board members be representatives of private groups. That is a constructive suggestion to strengthen private sector participation in the poverty program. The amendment would eliminate the requirement that the private sector members be selected by public officials, however, and introduce instead a requirement that they be chosen by the private groups or interests themselves.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. STEIGER) has expired.

Does any Member wish to address the Committee on the amendment offered by the gentleman from Wisconsin (Mr. STEIGER)?

Mr. QUIE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I will just say to my colleagues that with an amendment like this, if there is any real problem in the provisions of the substitute to which the gentleman from Wisconsin addressed himself, it can be worked out in the conference.

Mr. Chairman, I ask for a vote against the amendment.

The CHAIRMAN. For what purpose does the gentleman from New York (Mr. FISH) rise?

Mr. FISH. Mr. Chairman, I rise with reference to the amendment offered by the gentleman from Wisconsin (Mr. STEIGER).

The CHAIRMAN. The gentleman from New York (Mr. FISH) is recognized.

Mr. STEIGER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman.

Mr. STEIGER of Wisconsin. Mr. Chairman, I appreciate my colleague's yielding.

AMENDMENT TO SECTION 301(2)

The substitute bill provides that area boards and councils to which community action agencies delegate significant powers must have a membership of which at least one-third are public officials. The substitute provides that these public officials are to be appointed by the elected public officials who serve on the board of the community action agency.

This amendment to the substitute would preserve the requirement that one-third of the membership of such a board be elected public officials, and would also preserve the requirement that they be chosen by elected public officials. However, it would change the method of selection to provide that the public officials who make the selections be elected officials representing the area served.

In the case of a multicounty community action agency which delegates significant powers to the countywide boards, the substitute provides that the officials sitting on the multicounty board would choose the officials to sit on the individual county boards. In the case of a major city such as Chicago or New York, the substitute provides that elected officials sitting on the central board would choose the public officials to sit on each neighborhood board. The result would be that the public representatives on a council for one part of the city would be chosen partly by officials representing other parts of the city. This kind of top-down selection system could easily result in having public officials on area councils who are entirely unrepresentative of the areas served by these councils. This amendment would cure that defect by providing that the public representatives on area boards and councils be selected by elected officials whose constituencies include significant portions of the area in question.

The CHAIRMAN. The time of the gentleman from New York (Mr. FISH) has expired.

The question is on the amendment offered by the gentleman from Wisconsin (Mr. STEIGER).

The question was taken; and on a division (demanded by Mr. STEIGER of Wisconsin), there were—ayes 26, noes 52.

So the amendment was rejected.

Mr. GIBBONS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and forty-seven Members are present, a quorum.

AMENDMENT OFFERED BY MR. BUSH TO THE SUBSTITUTE AMENDMENT

Mr. BUSH. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. BUSH to the substitute amendment offered by Mr. AYERS: In section 201 of the substitute, section 253 (c) (1) is amended by changing the period at the end thereof to a semicolon, and adding the following: *"Provided further,* That the Director shall reserve such sums as may be necessary to provide assistance for programs authorized under section 222(a) (6)."

Mr. BUSH. Mr. Chairman, this amendment would exempt the family planning programs from the State plan. President Nixon has named family planning as one of his national goals, and it is one that the Congress overwhelmingly supports. In my opinion, the best work that OEO does is in the area of family planning. They need all the funds that are earmarked. The funds they have used in the past have worked efficiently. They have worked without controversy. They have worked without disrupting anything. And I think it would be a shame to slow this national momentum.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. PETTIS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, upon reading the study recently released by the Office of Economic Opportunity, "Need for Subsidized Family Planning Services: United

States, Each State and County, 1968," I was distressed to learn that of the 5.3 million women in need of subsidized family planning services only 773,000 are being served. This is a serious situation that requires immediate action. I believe the OEO family planning program is taking the right approach in attacking this problem and therefore I am a strong supporter of the program.

However, this study also points out a very shocking statistic in regard to young people in this country: the rate of illegitimacy among teenagers has increased 60 percent over the last 20 years. Adolescents between 10 and 19 now account for 40 percent out-of-wedlock births. It is imperative that action be taken to stem this flood of unwanted children and ruined young lives.

In the past, publicly supported programs have only tried to help and counsel teenage girls after they have become pregnant. It is now apparent that this is not enough. Something must be done to prevent these pregnancies.

The Office of Economic Opportunity is presently developing ways of providing guidance and appropriate medical and contraceptive services to these sexually active teenagers. An example of this is a project in North Carolina which holds weekly sex information and counseling sessions for an average of 40 ghetto adolescents. Nonprescription contraceptives are made available to those in need.

OEO Director Donald Rumsfeld is proposing an increase in his budget for family planning from $15 million to $22 million this next year. He is doing so to enable OEO to expand and increase family planning services throughout the country. I believe OEO's present activities in this field justify such an expansion.

I commend OEO on its fine efforts in this vital area of health care, and support an expansion of its programs. Therefore, to place this successful program, which is just beginning to find ways to deal with previously unsolved social dilemmas such as the plight of the pregnant unmarried teenager, under rigid State control would seriously impede this excellent OEO program. It would be impossible for all 50 States to engage experts in the family planning field to continue the innovative programs that the competent OEO central family planning staff is now designing and operating.

I commend OEO on its valiant efforts in this field and show my faith in its family planning program by supporting Representative BUSH'S amendment to the substitute bill.

Mr. BUSH. Mr. Chairman, will the gentleman yield?

Mr. PETTIS. I yield to the gentleman from Texas.

Mr. BUSH. I am grateful to my colleague for yielding.

Family planning is different in many ways from other programs. It requires specialized people, people who are not available at this time in all of the States and in the numbers that are needed. We have already had a 6-month delay reaching this national goal of serving 5 million people in 5 years. We cannot afford any more delay.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WOLD. Mr. Chairman, I rise in support of the Bush amendment.

Mr. Chairman, some weeks ago a report on a very important study came across my desk. It was entitled, "Need for Subsidized Family Planning Services: United States, Each State and County, 1968." This study showed that there were 4.6 million poor women in the United States who wanted and needed family planning information and services but were not getting them. Furthermore, this report showed that out of this group of 4.6 million women, there were 1.4 million who lived in smaller metropolitan and predominately rural areas in the United States.

As you all know, delivery of health care in this country has always been a difficult problem in rural areas. Because of transportation and communication problems, rural Americans have not always had the same opportunity to receive the benefits of our advanced medical technology. I am concerned therefore that 1.4 million poor women in rural areas of this country who need family planning services will be left out when programs are developed to meet family planning needs of other Americans.

It is for this reason therefore that I take this opportunity to commend OEO for its proposed new initiatives that take into account the necessity for bringing family planning to the rural poor.

OEO Director Donald Rumsfeld has indicated that he intends to expand the existing community action agency-administered family planning programs in rural as well as urban areas. Furthermore, he wants to initiate two new programs that will have as their focal point the 1.4 million rural women in the United States.

One program involves the introduction of family planning services into hospitals as a part of standard maternity care. Since over 97 percent of births in the United States take place in hospitals, it seems to me the natural place to introduce women to family planning. Furthermore, I understand that these postpartum programs, as they are called, are the most economic way of bringing family planning to potential acceptors. OEO is to be commended for adopting this approach, for it is indeed simple and practical.

The other new initiative of OEO's family planning program in rural areas is its effort to involve private and group practice physicians. In those rural counties where health resources are at a premium it seems only fitting that existing resources should be used maximally. OEO proposes to ask private and group practice physicians to give family planning information and services in their own offices on a fee-for-services basis. This again makes good sense to me because it shows a cost consciousness that unfortunately is not characteristic of many health programs today.

It will certainly not be an easy task to reach 1.4 million women in rural America. Therefore, I congratulate OEO for its imagination and initiative in developing logical approaches to bring family planning to this group. I am further impressed, as I am sure you will be, with the emphasis that OEO's family planning program is placing on program economy. The problem of reaching rural America and the problem of doing it economically are vital issues.

It is for these reasons that I am a strong supporter of OEO's family planning program, and why I am concerned about its future today. The necessity for involvement of new agencies and innovative techniques and the very short supply of family planning experts make "State programing" of family planning programs entirely unfeasible. Such a blow to the OEO family planning effort would long delay, if not actually prevent, the effective delivery of family planning education and services to those rural women who desire and so greatly need subsidized family planning services. For this reason I fully support Representative BUSH'S amendment to the substitute bill to exempt family planning programs from the State plan, I urge you to do the same.

Mr. Chairman, I yield whatever time I have remaining to the gentleman from Texas (Mr. BUSH).

Mr. HORTON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, on July 18, 1969, President Nixon sent a detailed message on population and family planning to the Congress. This is the first such message by an American President. It reflects a commendable effort to focus the attention of the Nation on these important issues.

In defining the role of the Office of Economic Opportunity the President has asked OEO to determine ways in which OEO can best structure and extend its program in order to help achieve our national goal of providing "adequate family planning services within the next 5 years to all those who want them but cannot afford them."

The way that individuals can determine the number and spacing of their children is an essential element in improving the health and economic well-being of the poor. OEO's family planning program seeks to provide an alternative for poor women burdened by unplanned and unwanted pregnancies that endanger their health and keep their families locked in the poverty cycle. Participation is entirely voluntary, and in keeping with the individual's religious and social beliefs. Emphasis is placed on providing a dignified and professional atmosphere as well as maintaining the confidence and trust of the participant.

The characteristics of each OEO project differ, depending upon the needs and resources present in the local community. In all cases, the highest medical standards are maintained and a complete spectrum of services is provided. Babysitting facilities, nighttime clinic sessions, transportation to and from clinic locations, and referrals to social agencies for other services are common features of OEO-supported projects.

Approximately 230 community action agency-administered projects have been funded by OEO regional offices to date, two-thirds in urban areas, one-third in rural areas.

Approximately 45 percent are operated directly by CAA's, 37 percent are delegated for operation to Planned Parenthood Affiliates, 15 percent to health departments, and the remainder to a variety of other local agencies. The average project budget is $70,000, 70 percent provided by OEO.

Excluding the projects in Puerto Rico, the total program was attracting 10,500 new "acceptors" per month, as of October, 1968.

The President asked that OEO strengthen its innovative programs and pilot projects in the delivery of family planning services to the needy. In this regard, technical assistance is being provided, under a contract, to the 230 OEO funded service projects. Family planning specialists are available to assist projects in such fields as project development, program analysis, medical services, and recordkeeping.

In addition, through a $1.9 million grant the Population Council will support and coordinate family planning projects at 14 medical schools. Each school has an in-hospital family planning program that will be expanded. Most schools will establish new satellite clinics. Other special projects include adolescent pregnancy programs in cooperation with local boards of education, premarital counseling services, and involvement of Neighborhood Youth Corps and family life centers in family planning. Total target population is 400,000; 75,000 women will be served in this first year of operation. In Los Angeles, an effort is being made to coordinate and add support to those agencies in the Los Angeles area that offer family planning services. It is the first time that joint planning and coordination of services has been attempted in an entire metropolitan area in this country.

The President directed that OEO work with HEW in coordinating all domestic family planning programs, in surveying efforts to attract people to work in population and family planning programs, and in training them properly.

To this end, representatives of OEO, Planned Parenthood/World Population, and the Department of Health, Education, and Welfare have designed a standard family planning patient data form that is to be used by service projects supported by all three agencies. OEO projects are already using this system and it is hoped that all HEW and PP/WP projects will also be participating by the end of the year. When this program becomes fully operational early next year, it will be the first time that comparable data will be available on family planning patients enrolled in programs sponsored by several different organizations and agencies.

In summary, OEO's family planning programs are preventive, needed, and well received. They have one of the most favorable cost benefit ratios of any federally sponsored health activity. In view of the high priority given to family planning by President Nixon, and the outstanding success of the OEO program in providing this vital service to thousands of poor people, I urge you to support Congressman BUSH's amendment concerning family planning programs. I believe this amendment will enable OEO to extend its efforts in this area as rapidly and efficiently as possible.

Mr. Chairman, I yield whatever time I have remaining to the gentleman from Texas (Mr. BUSH).

Mr. BUSH. Mr. Chairman, again, it is very difficult to continue under these restricted time requirements. There is a great sensitivity involved in this subject of family planning. The Congress, the Federal Government, and the OEO are ahead of most of the State governments in this area. I think it is a very different program, and I strongly urge that this exemption be granted and that full funding be granted through OEO of this program. We cannot afford delay.

The CHAIRMAN. Does any other Member wish to speak on the Bush amendment? If not, the question is on the amendment offered by the gentleman from Texas (Mr. BUSH).

The question was taken; and on a division (demanded by Mr. QUIE) there were—ayes 75, noes 26.

So the amendment to the substitute amendment was agreed to.

AMENDMENTS OFFERED BY MR. GUBSER TO THE SUBSTITUTE AMENDMENT

Mr. GUBSER. Mr. Chairman, I have two amendments at the desk which I offer, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. GUBSER to the substitute amendment: Immediately following section 302, insert the following:

"LIMITATION ON LEGAL SERVICES PROGRAMS

"SEC. 303. Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out 'counseling, education, and other appropriate services' and inserting in lieu thereof 'legal counseling, education in legal matters, and other appropriate legal services.'"

And renumber the sections which follow accordingly.

Immediately following section 302, insert the following:

"LIMITATION ON CERTAIN ACTIVITIES RELATED TO LEGAL SERVICES PROGRAMS

"SEC. 303. The fourth sentence of section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by inserting '(A)' after 'this part) shall be utilized' and by inserting before the period at the end thereof the following: ', or (B) for any activity not directly related to the provision of services referred to in the first sentence of this paragraph and litigation on behalf of specific clients shall be conducted in accordance with the canons of professional ethics of the American Bar Association.'"

And renumber the sections which follow accordingly.

The CHAIRMAN. The gentleman from California is recognized in support of his amendments.

Mr. GUBSER. Mr. Chairman, I do not have time to thoroughly argue for the amendments, but I do take the 30 seconds to establish a legislative history.

There is a change in the second amendment from what appeared several days ago in the CONGRESSIONAL RECORD. My intent will be clearly spelled out as I revise and extend my remarks.

Second, for the purpose of establishing legislative history, I want it clearly known that it is not the intention of either of these amendments to outlaw so-called class lawsuits.

Mr. AYRES. Mr. Chairman, will the gentleman yield?

Mr. GUBSER. I yield to the gentleman from Ohio.

Mr. AYRES. The gentleman brought his amendments to us. Counsel has gone over them very carefully. We can accept the amendments of the gentleman from California.

Mr. GUBSER. I thank the gentleman.

Mr. BRADEMAS. Mr. Chairman, I rise in opposition to the amendments.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana (Mr. BRADEMAS).

Mr. BRADEMAS. Mr. Chairman, I do so for two reasons.

First, given the conditions of this debate, as the gentleman from California mentioned, it is rather difficult to know what in the world his amendments do. If I understood them correctly from the few seconds afforded this body to hear them, in effect they restrict the operation of the legal services program to enabling poor people to level suits against other poor people.

I hope the amendments will be rejected.

The CHAIRMAN. For what purpose does the gentleman from California (Mr. WIGGINS) rise?

Mr. WIGGINS. In support of the amendment, Mr. Chairman.

The CHAIRMAN. Is the gentleman's name on the list read by the Chair?

Mr. WIGGINS. I do not believe it is.

The CHAIRMAN. The gentleman cannot be recognized, then, under the time limitation.

The question is on the amendments offered by the gentleman from California (Mr. GUBSER), to the substitute amendment.

The question was taken; and on a division (demanded by Mr. AYRES) there were—ayes 65, noes 73.

So the amendments to the substitute amendment were rejected.

AMENDMENT TO THE SUBSTITUTE AMENDMENT OFFERED BY MR. MEEDS

Mr. MEEDS. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. MEEDS to the substitute amendment: In section 201 of the substitute, section 253(c)(1) is amended by changing the period at the end thereof to a semicolon, and adding the following: "*Provided further,* That the Director shall reserve such sums as may be necessary to provide assistance for programs to be conducted on Federal Indian reservations."

(By unanimous consent, Mr. MCCORMACK yielded his time to Mr. MEEDS.)

Mr. MEEDS. Mr. Chairman, the amendment I propose will exempt Indian community action programs from the effect of this substitute. I do so, and I think President Nixon will be happy to hear about this amendment because he said on September 27, 1968, when he was a candidate for the Presidency in Portland, Oreg.:

The special relationship between the Federal Government and the Indian people and the special responsibility of the Federal Government to the Indian people will be acknowledged.

Mr. Chairman, I would like to point out to the Members of this body that the best thing that has happened to the Indians now living on reservations during the past 5 years has been the Office of Economic Opportunity programs which they are running on their own reservations.

The CHAIRMAN. The time of the gentleman from Washington has expired.

The Chair recognizes the gentleman from Colorado (Mr. EVANS).

Mr. MEEDS. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Colorado. I yield to the gentleman from Washington.

Mr. MEEDS. Mr. Chairman, I would like to read a portion of a letter which I have received from the National Congress of American Indians:

Turning administration of this program over to State governments would only probably mean its demise for most poverty groups. For Indians, the demise of the programs would be certain.

Mr. Chairman, I think there is no question about that.

I insert at this point in the RECORD the contents of the letter which I have received from the National Congress of American Indians.

The letter referred to follows:

NATIONAL CONGRESS OF AMERICAN INDIANS,
Washington, D.C., December 12, 1969.

Re OEO-proposed Quie-Green amendment.

Hon. LLOYD MEEDS,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MEEDS: Knowing your interest in strengthening the OEO program for the benefit of the nation's impoverished, I am writing to express the vigorous opposition of the National Congress of American Indians (NCAI) to the proposed Quie-Green amendment to the OEO authorization act.

As you know, we are composed of 118 tribes representing nearly 400,000 American Indians, having a yearly average annual income of $1,500. The OEO programs serving American Indians have made a measurable impact in many Indian communities and have been among the most effective and least criticized of the OEO programs.

I have enclosed statistics setting forth the breakdown of funds expended to render various services to Indian communities, broken down by States. Separate and apart from these communities, OEO has programs operating in some areas on county-wide bases which also serve urban and some reservation Indians.

Turning administration of this program over to State governments would only probably mean its demise for most poverty groups. For Indians, the demise of the programs would be certain.

There is a long and well-established pattern of failure by State governments not only to provide to their Indian citizens the special services frequently needed, but even failing to provide those services which other citizens in the State take for granted.

When the crime control of 1968 was passed, providing money for law enforcement assistance, it routed money designated for Indian reservations thru State governments. In almost all instances, State governments have collected these funds from the Federal treasury, but have failed to provide services to reservations. Congress is presently considering amendments on both houses which would route funds for reservations directly to the tribal governments, a position we support. There can be no doubt that turning over the direction of OEO programs to the States can have no effect but to emasculate its effectiveness.

We strongly urge you to oppose the Quie-Green amendment, or, at the least, to exempt Indian program's from its effects.

We support a two-year extension of OEO, without amendment.

Thank you for your assistance.

Respectfully,

JOHN BELINDO,
Executive Director.

Mr. Chairman, I hope this amendment will be adopted.

The CHAIRMAN. The time of the gentleman from Washington has expired.

The Chair recognizes the gentlewoman from Oregon (Mrs. GREEN).

(By unanimous consent, Mr. GROSS yielded his time to Mrs. GREEN of Oregon.)

Mrs. GREEN of Oregon. Mr. Chairman, I would like to try to put in perspective the OEO program. The main purpose of this substitute amendment in relation to the total amount of Federal, State, and local funds being spent on the poor, the disadvantaged, is to try to bring about some coordination of multitudinous programs—to eliminate the scandalous waste of funds—to change this from an anti-Government program to an antipoverty program in fact. We do not do away with OEO—but we would try to have the poverty funds actually go to help the poor.

Today in America we are spending for fiscal year 1970, according to a study done for OEO, $27 billion.

Twenty-seven billion dollars in Federal funds and $14.9 billion in State and local funds for the poor and disadvantaged people and we have $2.4 billion in private funds earmarked for the poor.

In other words, we are spending in fiscal year 1970 over $40 billion for this purpose. OEO's $2 billion is only about 5 percent of the total effort. From the other programs, there are many similar efforts. Would not it be better to make it possible for the States to coordinate at that level what we cannot or will not do at the Federal level?

The CHAIRMAN. The time of the gentlewoman from Oregon has expired.

(By unanimous consent, Mr. GIAIMO was allowed to yield his time to Mrs. GREEN of Oregon.)

Mrs. GREEN of Oregon. So, Mr. Chairman, this effort on the part of those of us who offer the substitute is to try to make it possible for States to coordinate programs for the poor so that there will be more of the dollars actually going to them instead of duplicating our efforts and expending money on the high administrative costs, high salaries for poverty "specialists" who move from one program to another with the greatest of ease—and countless studies, reports, and evaluations.

The only argument I have heard today against the States—is that we cannot and must not trust the elected Governors, we must not trust the States, and some of these people who spoke so vehemently on this——

The CHAIRMAN. The time of the gentlewoman from Oregon has again expired.

(By unanimous consent, Mr. WAGGONNER was allowed to yield his time to Mrs. GREEN of Oregon.)

Mrs. GREEN of Oregon. Mr. Chairman, some of the people who have spoken so vehemently on this—do not trust your Governor; do not trust the States. The same people who said that today, in 1967 said that we must not trust city hall. The amendment then was to allow elected local officials to have a voice in the program. In 1967—"don't trust city hall." Today—"don't trust your Governor." These are strange words, strange advice from one branch of the Federal Government, contributing to the erosion of confidence in government as surely as the irresponsible militants who take to the streets to shout "no government can be trusted; no government is any good."

Rather, I would like to place my trust in those who have been elected by popular vote—than those who have been appointed and anointed as regional czars with absolute veto power in the regional office removed from the State and unfamiliar with its problems.

In the 1967 debate when it became the law—and still is—that a State could become a community action agency, the distinguished Speaker quoted and endorsed a proclamation by Governor Volpe which said in part:

Government has a basic responsibility for the economic well-being of all citizens in this State and Nation, and the State has the unique potential to effect necessary changes through cooperation with and coordination and utilization of the resources of the Federal and local governments as well as the private sector.

Let us not fear the elected representatives of the people—let us not continue to downgrade the chief officer of the State, the Governor. Let us start—from this day—to build a partnership that is responsive and responsible. The people cannot help but be the beneficiary.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington (Mr. MEEDS) to the substitute amendment.

The question was taken; and on a division (demanded by Mr. AYRES) there were—ayes 90, noes 41.

So the amendment to the substitute amendment was agreed to.

AMENDMENT OFFERED BY MR. TUNNEY TO THE SUBSTITUTE AMENDMENT

Mr. TUNNEY. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. TUNNEY to the substitute amendment offered by Mr. AYRES: Strike out subsection (c) (1) of section 253 of section 201 of the Ayers amendment and insert the following:

"(c) (1) For any fiscal year in which any State has had in operation a State developmental and coordination program approved in accordance with this part the Director shall make available to such State for carrying out the approved program the sums allotted to such States for such year under section 225(a) and (b) *Provided, however,* That the Director may reserve up to one half of such amount to initiate and carry out special programs and assistance in such

States pursuant to section 222, where the Director has determined that such projects and activities are necessary to strengthen efforts toward the elimination of poverty or otherwise to further the purposes of this Act."

At the end of section 253, insert the following:

"(e) Nothing in this section shall be construed to preclude the Director from developing and carrying on special programs and assistance pursuant to section 222 in States carrying out developmental and coordination programs."

Mr. TUNNEY. Mr. Chairman, my amendment is very simple. It would reserve one-half of the funds allotted to the States under sections 225(a) and (b) to the Director, rather than one-fourth of the funds as is contained in the substitute amendment offered by the gentleman from Ohio (Mr. AYRES) and it would allow the Director to initiate and carry out special programs in connection with efforts toward the elimination of poverty.

The CHAIRMAN. The time of the gentleman has expired.

The Chair recognizes the gentleman from Illinois (Mr. GRAY).

Mr. GRAY. Mr. Chairman, I ask unanimous consent that my time be allotted to the gentleman from California (Mr. TUNNEY).

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. TALCOTT. Objection, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. TUNNEY. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from California.

Mr. TUNNEY. Mr. Chairman, the purpose of the amendment would be to allow those States that would like to have a legal services program, which legal services program is not contained in the State plan, to have such a program if the Director of the Office of Economic Opportunity thought it was important and necessary. I feel that this is very important because there are many States that are going to try to attack the legal assistance program.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

The Chair recognizes the gentleman from California (Mr. WALDIE).

Mr. WALDIE. Mr. Chairman, I rise in support of the amendment, and I yield to the gentleman from California (Mr. TUNNEY).

Mr. TUNNEY. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I think that it is extremely important that this amendment be adopted, because I do feel that there are many States such as California where the Governor is opposed to the idea of a neighborhood legal service program. I think that this amendment would make it very clear that the Director of the Office of Economic Opportunity would have authority to assist local municipalities if they want a neighborhood legal service program.

The CHAIRMAN. The time of the gentleman from California has expired.

The Chair recognizes the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, since I was first elected to the House in 1962 I have directed my total effort at achieving a reallocation of this Nation's national priorities. In those 7 years we have made some very important basic steps toward this goal. A goal of providing a more meaningful and productive way of life for all of our citizens.

The establishment of the poverty program has been the primary foundation for providing the poor with the needed means to make them an active and productive segment of our society. It is only possible to have a healthy society if we are willing to continue the treatment until the illness is completely cured. I am confident that today we will continue to reaffirm our commitment to the eradication of the disease of poverty in this Nation.

There is a great deal which must be done to help the poor of this country now. It is not just a moral issue that is involved here. It is an economic issue as well. It is a question of how long this Nation can afford to continue with a substantial portion of our society deprived of a decent standard of living. And it is a question of how long our economy can continue to grow with such a large segment of the economy acting as a drag by its inability to become a productive part of the total system.

The poor are not just a burden to this country but are also a vast untapped resource of the Nation's potential wealth. However, as long as their potential contribution to our society remains a mere potential, the standard of decency for all our citizens will remain a mere potential.

Today we must decide the future course of this Nation's efforts to win the war against poverty. We must look to our past efforts as our guide to the future. Our past efforts have been greater than those of our predecessors, but then the problems have been greater also.

In many cases our efforts have not been as well directed as we would like to admit. At the same time, our efforts have been increasingly effective and the results of those efforts increasingly rewarding.

We who support the work of the Office of Economic Opportunity are willing to point to its past deficiencies just as readily as the program's most vehement critics. We realize the poverty program needs many changes to improve its performance record. That record has not been bad, but neither has it been as good as we would like to see it.

I do not propose that we today leave the Office of Economic Opportunity legislation untouched. This legislation definitely needs to be greatly strengthened. But it needs to be strengthened in such a way as to allow the program to become more effective, not less. Not more effective in terms of pacifying its critics, but more effective in terms of helping the poor, making the program more cost effective and making the program really work to eliminate poverty in this country.

The steps that we have taken so far are very basic. They are the foundation upon which we can build our future efforts. They are the only signs of hope that this country has in its fight against the disease of poverty that infests our country today.

I do not choose to stand by and watch as this foundation is attacked by those who do not seem overly anxious to eliminate poverty in this country. I do not wish to see the substitute bill enacted into law when it poses a most serious threat to the continuity of those efforts that we have just begun to make.

I realize that there are those who say that this substitute legislation will not destroy the poverty program. They say that it simply gives a larger role to the States in the antipoverty fight.

On the surface, this is what the substitute bill does. But, it is not necessary to look far beneath the surface to see that this bill will effectively cripple the OEO programs by increasing administrative costs, eliminating essential programs, and lessening the degree of local participation.

First let us look at the increased administrative costs.

The substitution bill will increase administrative costs substantially, perhaps as much as twofold. This State plan approach would result in a multiplicity of effort, duplicate staffing, and an unreasonable increase in administrative costs which would result in a decrease in the moneys actually available for program purposes.

It must be noted that the programs that would be turned over to the States by the substitute bill are not large operating programs. Their administration would be substantially less efficient if 50 State staffs were to replace the Federal staff now engaged in program administration. For example:

Legal services programs are budgeted at $54.9 million. They operate in almost all States. They are administered by a Washington staff of only 35 professionals.

Comprehensive health programs are budgeted at $74 million. Such programs will operate in 30 States and the District of Columbia, with only a single program in many of these States. These programs are administered by a Washington staff of only 23 professionals.

Programs for Indians are budgeted at $22 million. They operate in 20 States. They are administered by a Washington staff of only nine professionals.

Follow Through programs are budgeted at $58 million. They operate in almost all States. They are administered by a Washington staff of only 19 professionals.

If the States take over these programs as provided by the substitute bill, either the administrative costs will skyrocket or the program effectiveness will be greatly curtailed. I do not think the American public desire either of these alternatives.

It would be a travesty of justice if this Congress were to remove from the grasp of the poor the opportunity for them to help themselves escape from poverty. It would be equally unjust for this Congress to knowingly place an increased tax burden on the average citizen when such taxes already constitute an almost unbearable burden.

Second, let us look at an example of

programs that will be curtailed by institution of the substitute bill.

The substitute bill or State plan will in effect remove such programs as VISTA and VISTA lawyers from a great many States. It is not just administrative costs associated with recruiting, selection, training, support and supervision that would pose difficulties if separate programs were to be established in each State as provided by the substitute bill.

It is also the simple reality that applicants for VISTA are not evenly distributed. The colleges, from which VISTA receives most of its manpower, particularly skilled volunteers, tend to be centralized in the larger and more populous States. This is even more so of graduate schools, where VISTA is increasingly finding its volunteers—doctors, nurses, architects, lawyers, business school graduates, education specialists.

If States were to recruit only within their own boundaries for volunteers the smaller and frequently poorer and more rural States would be relatively starved for volunteers with technical skills.

VISTA now trains its volunteers in seven regional training centers. The cost of training now is low, the process is efficient. The proposal, however, would require creation of 50 training centers and the result would by the skyrocketing of training costs and the creation of a heavy overhead burden. Instead of efficiency the substitute bill promotes waste, new bureacracies, and higher costs.

The substitute bill also provides that VISTA lawyers may be assigned only to legal services programs funded by the OEO, and that they may serve only in States in which they have been admitted to the bar.

VISTA legal personnel are not practicing law but merely performing quasi-legal work for the community.

There is no sound reason for prohibiting the assignment of VISTA volunteers with legal skills to useful programs which do work outside the scope of the legal services program. The fact of the matter is the current recruitment and assignment of VISTA lawyers has the strong support of the Director of OEO, and the legal services program and the backing and involvement of the ABA, the NLADA, and law schools and bar associations all over the country.

The restrictions that lawyers be assigned only to States in which they are admitted to the bar is not a rule applied to lawyers in private practice. It is typically permissible for a lawyer who has not been admitted to work under the supervision of a lawyer who has been admitted. There is no reason why lawyers in VISTA should be treated differently.

Last, the substitute turns over major policy determination functions to the State economic opportunity offices. Although most critics and supporters of OEO programs have urged a larger degree of participation by local communities in conduct and administration, the substitute bill does not specifically provide for this.

In fact, this legislation would substantially reduce local involvement and replace it with a decisionmaking hierarchy at the State level. The community action programs are based upon the concept of participation by the poor in programs designed to assist them.

It is very questionable whether their active participation in these programs can be preserved in many States if the programs are turned over to the States.

It is significant that the Office of Economic Opportunity was established to fight poverty in the Nation at a time when the scope of the problem and the failure of the States to cope with it demanded action by the Federal Government.

I am afraid that much support for turning this program back to the States comes from those who do not necessarily want the States to carry out a program now being done by the Federal Government, but by those who do not want to see the program carried out at all.

The critics of the OEO program say that the program has not been as responsive to the States as it should have been in the past. The critics are right and there can be little doubt about it. But the answer is not to overrespond to such a degree that the program that we are trying to improve is in effect destroyed.

Since Mr. Rumsfeld has taken over as Director of the OEO, he has initiated many steps to bring the States more fully into the decisionmaking process in the establishment and operation of OEO programs within the various States. He has pledged to further increase these efforts.

The President in his recent news conference expressed his desire that the reforms pledged by Mr. Rumsfeld be given a chance to be carried out. I also urge this body to allow the OEO Director the flexibility to carry out his pledge.

The OEO program can and must be strengthened by passage of the enactment of substantial portions of the committee bill. This will continue the sound foundation upon which an efficient and responsive poverty program can expand.

I believe that the OEO, under the leadership of Mr. Rumsfeld has taken many steps to correct its past deficiencies and to expand the scope of its most effective programs.

The following list includes a number of major steps which have been taken in recent months by the Office of Economic Opportunity to heighten State involvement in antipoverty efforts:

A new Division of State and Local Government has been created and made directly responsible to the Assistant Director for Operations, who is a Presidential appointee. This office will help promote more effective relationships between State governments and field operations.

Within headquarters, the Associate Director for Congressional and Governmental Relations will have responsibility for maintaining effective liaison between the OEO Director and the 50 Governors and the National Governors Conference on matters affecting OEO and State relations generally.

An increase of nearly 30 percent in the basic funding level for State Economic Opportunity Offices has been included in the administration's budget request for fiscal year 1970.

A complete revision of the OEO directive on the "Role of State Economic Opportunity Offices" is being circulated to the Governors for review and comment. It provides for: Greater SEOO involvement in the preparation of the annual regional office funding plan for each State; SEOO participation in the monitoring and evaluation of OEO grantees; a strengthened checkpoint system to insure opportunity for the State to comment in the early stages of the grant application process; encouragement of State economic opportunity offices as potential grantees for demonstration or pilot programs; systematic consultation with the SEOO's in the training and technical assistance process; a requirement that regional offices shall work out a joint agreement with the SEOO's on the coordination of field personnel activities between the two offices; and, increased emphasis on the role of the SEOO as a mobilizer of State resources for use against poverty and as an advocate for the interests of the poor.

Preliminary discussions have been held with, and proposals have been received from a number of SEOO's with regard to innovative and experimental programs at the State level that they would like to undertake in a variety of areas. These include program evaluation and monitoring, analysis of State human resources programs from the point of view of their impact upon the poor, techniques of tapping private sector resources in the State for the poor, devices for coordinating State programs, economic development as a means to open up job opportunities for the rural areas, the need of the poor in State development district planning activities, and so forth. Plans are for at least 10 such demonstrations to get underway during fiscal year 1970.

A State special technical assistance program—STAP—has been initiated in three States. This program provides additional technical assistance staff capability to the SEOO's in such specialized areas as manpower, economic development, and management. Plans have been made to extend this program to an estimated total of 10 sites during fiscal year 1970.

A grant has been made to the Council of State Governments to provide technical assistance and other support to the State/STAP program. This is the first such grant that the council has accepted from any Federal agency.

Special planning grants have been made to 13 State economic opportunity offices for the purpose of strengthening their planning capabilities and maximizing the attention paid to the needs of the poor in statewide planning activities.

Funds have been set aside to bring the eight SEOO's whose present staffing authorization is below the level of five persons up to that number during fiscal year 1970.

Funds have been set aside for a training program for SEOO employees to enlarge both their technical skill level and their understanding of OEO structure and operations in particular and of the Federal Government in general. Concurrently, plans are being made to arrange for the training of OEO employees about

State government, perhaps with the assistance of an organization such as the Council of State Governments.

Planning is proceeding for a program of short-term exchanges of personnel between the SEOO's and the regional offices to improve personal relationships and to increase mutual awareness of systems, procedures and operating problems.

These steps which I believe will cure most of the OEO's past weaknesses are possible only by the adoption of a plan with the built in flexibility of the committee bill.

In the interests of a more meaningful way of life and the realization of an acceptable standard of living for all our citizens, I urge the rejection of this substitute bill and the speedy enactment of the committee bill.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana (Mr. MADDEN).

Mr. MADDEN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, this legislation will extend the Economic Opportunity Act, more commonly known as the poverty bill. If the Congress acts favorably it will extend the war on poverty for a period of 2 years. The Education and Labor Committee has given ample consideration to this legislation by hearings, investigations, meetings, and so forth, during this year.

During this 3-hour debate the members of the Commitee on Education and labor, who have had these extended hearings and investigations on the functions of this program have amply explained to the House the various sections for which this money will be expended. During its functioning the poverty program has not been perfect, like many other programs operated by Federal, State, or local governments, but nobody can expect a program as complex and complicated, and under so many departments and branches, caring for different functions of needy folks, to be 100 percent efficient. During the operation of the EOA relief and aid have been extended to millions. Under this bill the program has been extended to include specific work for career development programs; preschool and intensive follow-through education for primary school children and eliminating hunger and malnutrition. Areas which are affected by this legislation include work training and work study programs; urban and rural community action programs; special programs to combat poverty in rural areas; employment and investment incentives; work experience training and day care programs; and domestic volunteer service programs.

No doubt opponents who are endeavoring to curtail some of these necessary activities for the needy will set out different offices or localities where the program functioned poorly because of either mismanagement or inexperience of the directors.

These defects can and have been remedied in many cases were called to the attention of the top Federal directorship. Many Members of Congress opposing this program are aware that the $3½ billion farm subsidy program which was enacted this year by the Congress had many inexcusable segments of its operation which were defective and brought about waste of millions to large corporate farm operations who collect money fraudulently for vacant land by reason of mismanagement of the regional offices. Nevertheless, Members of Congress who enthusiastically supported that fabulous giveaway voted against limiting any one farm operation to $20,000 annually regardless of waste and inefficiency. Here is a bill which calls for the expenditure of money that will aid millions of low-paid and unemployed families throughout the Nation who are helpless through no fault of their own.

I do hope that the Congress will not curb the operation of this great charitable endeavor to aid millions of the needy within the next 2 years by transferring control to the governments of the various States.

The success of a program of this type depends on continuation of personnel in order to streamline and function the various offices at the least possible cost.

I think the Members of Congress should support the request of President Nixon that this program not be jeopardized and curtailed by transferring the operation authority to State governments. It will bring about added and unnecessary expense and when the main Federal office has to distribute money to 50 Governors who, in some States have a term of only 2 years, it will be an indirect way of terminating a mammoth operation that requires direct and regular supervisors withn experience and knowledge to carry out the work efficiently.

In President Nixon's TV newscast last Monday, he was asked the following question:

A move is under way in the House, and it's supported by the Republican leadership, to change the structure of the antipoverty program to give the Governors a veto over programs in their states. What is your position on that?

Senator HUGH SCOTT, minority leader of the Senate, placed the President's complete broadcast in the CONGRESSIONAL RECORD of Tuesday, December 9. It will hereby quote verbatim the President's answer:

I support the director of O.E.O. He has asked for a two-year extension. He has pledged to reform the O.E.O., and I think he should be given the chance to reform it. I hope he's able to work out with the leadership in the House, most of whom are Republicans in this instance who want the changes and some Democrats will be able to work out some kind of accommodation with them. But of course I support my director that I've appointed.

I do hope that the House will follow the leadership of the President of the United States and help our former colleague, Donald Rumsfeld, and pass this worthy program without amendments or change. I ask unanimous consent to include with my remarks an editorial from the Gary, Ind., Post-Tribune of October 22, 1969, concerning this major amendment of transferring power to the Governors of the States and particularly, the State of California.

[From the Gary (Ind.) Post-Tribune, Oct. 22, 1969]

A POOR PLOT

For once, California Sen. George Murphy is doing a song and dance routine that has a plot. The plot involves clamping a dangerous restriction on the Office of Economic Opportunity's power to help poor people get legal service they can't afford.

The script was apparently written by Gov. Ronald Reagan, another former Hollywood performer.

Murphy's amendment to a money bill, pushed through the Senate, would give governors the right to veto any legal service plan the OEO wants to start in their states.

Reagan hasn't fared well with OEO attorneys in his state, because the legal assistance they have given to migrant workers, especially, has frustrated some of his attempts to maintain the status quo.

The War on Poverty has touched more bases than those involving food, shelter and basic necessities. Protection of the law made available through expert legal help has also been denied poor people generally. They hunger for that too, and they deserve it.

The legal services plan has helped welfare mothers, slum tenants, even steelworkers, whose rights often have been brushed aside for lack of somebody to speak for them. Many landmark cases have hit the courts, a fact that some state and local officials view with varying degrees of irritation.

None has been troubled as much with the tide or progress as Reagan, who frankly doesn't like it.

Giving governors absolute veto over such programs would be a reactionary mistake. The House has a chance to correct the Senate's error, and we hope Northwest Indiana's representatives will get with it.

OEO Director Donald Rumsfeld is lobbying to get the amendment killed. He is enthusiastic about the legal services program. It has great promise, and should be allowed to flourish. Governors should have a say in federally-financed programs within their states, but they ought not have the power to block programs by whim.

California doesn't belong to Ronald Reagan alone, a fact he is finding out, and it irks him. But this case is bigger than California, for as California goes in this one, so goes the nation.

Sargent Shriver, former OEO boss, once said "Any program which enables the poor to do battle with the forces that oppress them at governmental expense has a high potential for conflict with the officials who make public policy affecting the poor. This is especially true where it is governmental action, often in programs designed to aid the poor, that is found to be oppressive."

What that means is that Murphy and Reagan have produced a bad show.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. FARBSTEIN).

Mr. FARBSTEIN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the Green-Quie substitute to the Economic Opportunity Act would effectively gut that program by giving the State governments a veto power over OEO activities. It is hard to contemplate a Ronald Reagan or a Lester Maddox permitting any activity which would benefit the poor or the black. I believe OEO should be extended without major changes.

The OEO program has done much to improve the life of our previously forgotten low-income and minority citizens. It has given them an opportunity to develop their talents, create better com-

munities, and has put them in a better position to compete with other sectors of our society. It is this that has scared many who advocate the Green-Quie substitute.

Through the concentrated employment programs, for example, the young are being trained and placed in jobs. Through Operation Mainstream, the talents of the elderly are being productively employed. Through the job opportunities in the business sector program, the talents of business firms are being used to train and employ the previously unemployed; and under the new careers program, the untrained are being trained to performed subprofessional jobs which have a chance for advancement.

One OEO program of which I am particularly proud is the emergency small loan program. I authored this program. Under this program, individuals may borrow up to $300 at 2-percent interest without collateral and with a minimum of investigation. The money is available to meet family emergencies. A woman in Texas, for example, obtained a loan with which to buy a special pair of shoes so that she could go to work as a nurse. She got the job and was able to pay back the loan. This program must be continued and I hope the amendment will not interfere with its continued funding.

The Green-Quie substitute would have the impact of making the antipoverty act into a State program in line with the administration's grand design to decentralize government. State Economic Opportunity Offices would receive all OEO applications before they are sent to OEO for funding. The State would have full authority to decide whether or not a program application should be approved. State economic opportunity councils would be created in each State with exclusive authority to develop an antipoverty program for the State. Once the council creates the program and passes it on to the OEO Director, he would have to approve or reject it in total.

In addition to these general provisions, the substitute would restrict the OEO legal services program by requiring all VISTA attorneys to be part of the legal services program and a member of the bar in the State in which they serve. Also a court would be authorized to award legal fees and costs to the loser of a lawsuit initiated by the legal services program.

These provisions would erode or eliminate local or community control by allowlowing State politics to interfere with a program presently isolated from politics and by discouraging maximum participation of the poor by requiring members of community action boards and agencies to be appointed by elected officials.

The Green-Quie substitute makes the poverty program operate the same as education programs and welfare categorical assistance programs under HEW now operate. These programs have been the victims of noticeable proliferation of bureaucracy, unresponsiveness, and an inability to reach those in need of help.

The legal services program would be particularly victimized under this amendment. It would introduce politics into a program which is now insulated from political pressures. This would present unsolvable conflicts of interest, as well as jeopardize the independence of the bar. It would punish legal services attorneys who lose a lawsuit by awarding legal fees and costs to losers of suits initiated by legal services. This provision which would discourage lawyers from initiating and fully pursuing cases is unnecessary since a present statute accomplishes the same thing without discriminating against legal services attorneys. It also multiplies the administrative costs of the program.

I shall vote against this substitute.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. ECKHART).

Mr. ECKHARDT. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, one of the most important elements of the poverty program has been the legal aid services. It would be unconscionable to permit a State to destroy legal aid in a community without any valid reason. Yet if a vigorous legal aid service offends the State authorities, who may be defendants in a case, the defendant may retaliate by dismantling the lawyer force which represented the plaintiff under the Ayres amendment. The amendment by the gentleman from California (Mr. TUNNEY) would prevent this. I would hope the Tunney amendment would pass, but I would still be against the substitute.

The substitute would permit States to dismantle the poverty program as it exists in each State involved. For instance, with respect to VISTA the substitute would only permit VISTA groups to be set up at all if they were established under grants to State or local public agencies. The State would effectively determine whether VISTA groups would come into being in the first place.

Under existing law VISTA groups come into being under the Office of Economic Opportunity. However, local control of VISTA groups is presently assured, and a VISTA group cannot be set up at a particular place without the written consent of the Governor. But the State may not prevent even the initial existence and recruitment of VISTA volunteers.

I think the program, even with present restrictions, has worked pretty well in Texas.

There are at present 272 VISTA volunteers working in Texas—more volunteers than in any other single State. They are assigned to 13 different projects, all sponsored by local community action agencies, churches, and local self-help organizations. Despite this relatively large number of volunteers VISTA, limited by budget, has not come close to filling requests. Sponsoring organizations in Texas have asked for 699 volunteers, to be used on 47 proposed projects.

Texas is not one of our richer States. It ranks 34th in income. There is severe poverty in both urban and rural areas. There are many separate poverty problems in Texas. The poor black in Houston, the Mexican American in the slums of Laredo, the migrant worker who lives in a shack in south Texas need different approaches, different kinds of help.

What is VISTA trying to accomplish in Texas? Four of the 13 current projects are in rural areas. Education, in the broadest sense of the word, is vital among the rural poor, most of whom are Mexican Americans whose only income comes from migrant work and seasonal farm labor. There are many rural areas where the average annual income of families is less than $3,000 a year. The median education level might be as low as 3.9 years. Functional illiteracy reaches as high as one-quarter of the population.

VISTA volunteers tutor schoolchildren, and school dropouts. They have organized adult basic education classes and literacy programs. They have set up day-care centers, freeing the mothers for work, and teaching preschoolers English so that they will be better able to function in the English language, Anglo-culture school system. Fifty-three VISTA's in Texas are working with thousands of poor people in a viable effort to expand their horizons—to help the poor help themselves. And they do. Poor people, with the initiative provided through VISTA programs, have continued the operation of day-care centers, set up food commodity programs, petitioned for sewage systems, obtained running water and gas lines to their homes, had streets paved and repaired houses, set up fumigation programs against rats and insects—in short, have come nearer to reaching a decent standard of living through their own efforts.

These are small projects, but they are far reaching. Ill-fed, ill-housed, undereducated people cannot make substantial changes all alone. Particularly in rural areas VISTA's deal with these basic problems. In the cities, problems are multiplied. There volunteers are involved in similar activities, attacking basic housing and education deficiencies. But they are also fulfilling the more complicated needs of the urban poor.

VISTA's, many of them lawyers, architects, business school graduates, are able to engender programs to help meet the needs of urban dwellers. In Austin, for example, half of the 16 volunteers assigned to that city are professional people.

VISTA volunteers, working with community groups, have been able to develop economic self-help projects—credit unions, food-buying clubs, and cooperatives. Directly through VISTA, thousands of poor have involved themselves in model cities decisions that affect their neighborhoods. Volunteers work with health clinics, community centers, day-care centers. They have organized teen clubs, recreational facilities, and programs for the elderly. Dozens of educational projects—preschool classes, tutoring, adult education courses, bilingual and literacy classes are set up and taught by VISTA's. The list is lengthy. These volunteers in Texas come from all over the United States. Some are professionals, some have a general college background, some are poor themselves and work in their own neighborhoods.

It was a group of these community VISTA volunteers in Del Rio, Tex., who were involved in the only project ever canceled by a Governor in any State during VISTA's 5 years of operation. Last March, the Val Verde County commissioners, where Del Rio is located, asked Gov. Preston Smith to cancel the VISTA program in Del Rio. He did, as he pointed out, because the county officials asked him to.

Another group of VISTA's were asked to leave Brownsville. They did. Their project was an interesting, complex, and obviously, controversial one.

Among other things the Brownsville VISTA's:

Taught citizenship classes in Brownsville, San Benito, and Raymondville, to over a hundred people who wanted to become American citizens but never knew how to.

Tutored and set up tutoring programs in Brownsville in several elementary schools for over 300 elementary school children.

Organized and put together a multipurpose center and clinic in Port Isabel.

Talked a local doctor into going to Port Isabel every other Wednesday and give medical help to the poor.

Publicized and brought people to three tuberculosis clinics throughout the country.

Assisted at the Settlement House in Brownsville 8 or more hours a day doing everything from janitor work to playing with the kids.

Worked with the new retarded children's school in Brownsville.

Built two youth centers in Raymondville.

Built a youth center in San Benito.

Organized a cooperative food buying club in the southmost area in Brownsville so that the poor could fight inflation.

Helped paint, fix plumbing and did electrical work on the several houses which the city had moved and dumped on the corner of 12th and Grant Street.

Organized a dance in Garden Park so that the proceeds could be used for the children of Garden Park to have a party.

Took the kids from the Maura Smith Day Care Center to see the planes at the Confederate Air Force and the Harlingen Airports.

Took a bunch of kids to see the Elks' Club "Calvacade of Stars" and bought their tickets out of their $90 a month salary.

Organized a small weekly newspaper in San Benito which had such controversial things as "Recipes to Fully Utilize Surplus Foods," "A Weekly Report of the Sullivan School's Principal," the announcement of meetings, citizenship classes, etc.

Organized car pools to bring poor people from Port Isabel to Brownsville to the county clinic, doctors, surplus foods' department.

Organized a carpool to take the poor from Brownsville to the mental health clinic in Harlingen.

Took a family of nine kids to Houston to visit their mother who eventually died of leukemia.

Drove a dying man in rush against death to the M. D. Anderson Hospital in Houston. He had asked help from the county, but the county said, "We are only allowed to pay for the transportation of dead bodies."

Organized a Girl Scout and Brownie troop in San Benito for poor kids.

Spent hours upon hours, days upon days, visiting homes, struggling with a language, trying to help where help is needed.

After this VISTA withdrawal the Reverend Jon Bourg, of Brownsville, wrote a letter of protest to Governor Smith. The Governor, in reply, expressed the hope that:

> The time will come when the local leadership, both public and private will have found the appropriate role for these volunteers and incorporated them again in their local system for both understanding and ministering to the problems of poverty in Cameron County.

The point here does not concern the merits of the case—whether the programs were good or bad—though there are many who will argue that they were excellent. The point is that here is a practical example of local and State control at work.

Under existing law a VISTA program exists in many localities in Texas. VISTA volunteers are ready and willing to work and are accepted gladly in most of the communities by all who deal with them. As the Governor has said, they will doubtless someday come back to Brownsville.

But under the Ayres substitute, the VISTA program might well not even exist in Texas. Had it been law from the beginning, there would have been no chance for VISTA to have proved itself. And I would hope that authority to detroy it altogether would not be given to the State of Texas. It is enough that State and local authorities may determine where it may be active.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. TUNNEY) to the substitute amendment offered by the gentleman from Ohio (Mr. AYRES).

The question was taken; and on a division (demanded by Mr. TUNNEY), there were—ayes 83, noes 101.

Mr. TUNNEY. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. TUNNEY and Mr. QUIE.

The Committee again divided, and the tellers reported that there were—ayes 125, noes 156.

So the amendment to the substitute amendment was rejected.

The CHAIRMAN. Are there any further amendments to the amendment offered by the gentleman from Ohio (Mr. AYRES) in the nature of a substitute?

AMENDMENT OFFERED BY MR. OTTINGER TO THE SUBSTITUTE AMENDMENT

Mr. OTTINGER. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. OTTINGER to the amendment offered by Mr. AYRES:

In section 201 of the substitute, section 253(c)(1) is amended by striking the proviso and inserting in lieu thereof the following: *Provided, however,* That the Director shall reserve such sums as may be necessary to provide assistance for programs in political subdivisions which, in accordance with section 210(e), have elected not to be included in the State developmental and coordination program."

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. OTTINGER) to the substitute amendment.

The question was taken; and on a division (demanded by Mr. WILLIAM D. FORD) there were—ayes 114, noes 141.

So the amendment to the substitute amendment was rejected.

AMENDMENT OFFERED BY MR. WHITE TO THE SUBSTITUTE AMENDMENT OFFERED BY MR. AYRES

Mr. WHITE. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITE to the substitute amendment offered by Mr. AYRES: After section 303 insert the following:

"SEC. 504. Section 222(a) of such Act is further amended by adding to the end thereof the following new paragraph:

"'(9) A "Narcotic Addict Recovery" program designed to discover and bring about post and/or pre-institutional treatment for narcotic addiction. Such a program shall be community based, with appropriate participation by parents, youth, educators and others in the community, serve the objective of maintaining the family structure as well as the recovery of the individual addict, encourage the use of neighborhood facilities and the services of former addicts as program workers and facilitate the re-entry of addicts into society. Such a program shall also emphasize the coordination and full utilization of existing community services which pertain to the treatment of addiction and/or related disorders.'"

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WHITE) to the substitute amendment offered by the gentleman from Ohio (Mr. AYRES).

The question was taken; and on a division (demanded by Mr. WHITE) there were—ayes 87, noes 98.

So the amendment to the substitute amendment was rejected.

AMENDMENT OFFERED BY MR. RANDALL TO THE SUBSTITUTE AMENDMENT OFFERED BY MR. AYRES

Mr. RANDALL. Mr. Chairman, I offer an amendment to the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. RANDALL to the substitute amendment offered by Mr. AYRES: Immediately following section 302, insert the following:

"APPLICABILITY OF CANONS OF ETHICS IN LEGAL SERVICES PROGRAMS

"SEC. 303. (a) The second sentence of section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by inserting '(A)' after 'assures' and by inserting before the period at the end thereof the following: ', and (B) that the Cannons of Professional Ethics promulgated by the American Bar Association will be complied with'.

"(b) Section 222(a)(3) of such Act is further amended by adding at the end thereof the following: 'The Director of the Administrative Office of the United States Courts shall receive any complaints or allegations

which may be made concerning the conduct of programs under the second sentence of this paragraph, insofar as they relate to matters involving subject matter cognizable by the courts of the United States. The Director of such Office shall make an annual summary of such complaints or allegations, which shall be objective in character and without evaluation or comment. Such summaries shall be available upon request to a committee of the Senate or House of Representatives, and shall, at least once each year, be submitted to the Senate and House of Representatives.'"

And renumber the sections which follow accordingly.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. RANDALL) to the substitute amendment.

The question was taken; and on a division (demanded by Mr. RANDALL) there were—ayes 124, noes 88.

So the amendment to the substitute amendment was agreed to.

Mr. SCHERLE. Mr. Chairman, the Murphy amendment, which was adopted by the Senate, would restore final responsibility for the OEO legal services to the Governors. It would authorize each Governor to determine how best to channel legal service programs in his State. In line with President Nixon's concept of the new federalism, the elected chief executive would exercise more control over the services in his State than the nonelected Washington official. At present, the decision as to whether a specific project is a proper function of the legal service now rests with an appointed bureaucrat. The Murphy amendment would shift that final determination to the chief elected State official.

The OEO legal service was set up to provide legal assistance on an individual basis for those too poor to afford a lawyer. It has instead expanded rapidly into the so-called law reform area at the expense of the individual legal aid services. In so doing it has far exceeded—one might even say, perverted its original purpose. Examples abound everywhere.

Suits financed by the war-on-poverty lawyers have sought to persuade the U.S. district courts in Newark, N.J. and Philadelphia, Pa., to appoint Federal receivers to run the local police department. The Philadelphia suit also asked to nullify State laws against carrying concealed deadly weapons, sedition, riot, conspiracy, loitering, and obstructing justice.

In Atlantic City, the legal service program is challenging the constitutionality of the New Jersey Narcotics Act and is contesting the State law requiring dope users to register with the police.

In Indianapolis, Ind., the local legal service program distributes several thousand cards in the city's low-income neighborhoods giving advice on the "art of noncooperation" with the police.

Students on OEO-financed fellowships in poverty law at the University of Pennsylvania held the national OEO legal service director captive in his sixth-floor office for 4½ hours. Later, these self-styled defenders of the law were arrested by the Washington, D.C., police.

In Washington, D.C., the OEO legal service was instrumental in changing the regulations of the National Capital Housing Authority so that low-income couples who are not legally married or free to marry are now eligible for public housing. Furthermore, the neighborhood legal services program will continue to press the suit on the grounds that the provision is still too vague and discriminates in favor of married couples.

Under the new regulation, the unmarried couple must prove that theirs is a stable relationship.

In Detroit, Mich., and virtually every other riot-torn city, legal service lawyers have devoted inordinate amounts of time and effort to defending alleged rioters. The Essex County, N.J., grand jury, after a thorough inquiry into the 1967 Newark riot, said that witnesses "denied in whole or in part having made statements attributed to them" by the local legal service program. A number of the statements taken and finally supplied to the jury by legal services were unsigned. The grand jury concluded:

During the excitement many of those taking statements from persons involved in the riots either deliberately or unconsciously distorted these statements and in many ways conducted themselves so as to create in the minds of the public a biased and inaccurate impression of many events connected with the disturbances.

The Dallas legal services project began organizing welfare mothers in Dallas to demonstrate and protest. On November 26, 1968, the demonstrators staged a sit-in. A court ordered them to leave the welfare office. They refused. Twenty-one of them, including Mrs. Ruth Jefferson, leader of the mothers, were given 3-day suspended jail sentences for contempt.

In July of 1969, the Dallas Housing Authority served a notice of eviction on Mrs. Jefferson at the request of 300 of her fellow tenants on the following grounds: First, she owed $415.28 in back rent on her $52-a-month apartment; second, she used the apartment as a meeting hall for militants; third, her presence in the project was a threat to other tenants who feared injury because of her activities; and fourth, she permitted persons other than herself and her children to reside in the apartment.

On November 3, 1969, Ruth Jefferson was taken onto the Federal poverty-war payroll at $5,400 a year plus "car expenses," as a community organizer in the west Dallas housing project from which she had been evicted. Robert Medrano, head of the West Dallas Poverty War Center, said Mrs. Jefferson was hired because of "her past performance as a community organizer."

The community lawyer fellowships, funded by the OEO through the University of Pennsylvania Law School, provide for 1-year assignments to work with local legal services throughout the country. Two of these fellows, assigned to Corpus Christi, Tex., were quoted as saying that they regret the lack of militance among the local poor people.

In California, a legal service attorney has appeared as counsel to challenge the right of a school district to set reasonable rules for the hair length of boys in high school. How ridiculous can you get?

At the Modesto, Calif., Junior College, a suit was filed in behalf of a Mexican-American club protesting a college requirement that all club members pay the student body fees of $8 per semester in order to be recognized by the school.

Mr. Roy G. Mikaken, president of the college, said:

Those six lawyers in the Modesto area seem to be more interested in "anti" movements against public agencies.

The California Legal Association has also filed a suit to compel Brawley's City Council and Board of Education to permit students to wear the berets and insignia of the Brown Berets in school.

Last year in Hartford, Conn., the OEO authorized a grant of $272,443 to a company which existed only on paper called the "Connecticut Law Reform." The request for the grant was drafted by Howard Orenstein, legal services consultant to the OEO, who made himself director of the organization at $20,000 a year. When this story broke, the ensuing public outcry and investigation resulted in a declaration by the GAO that the grant was illegal.

Although no publicly funded legal assistance service society is supposed to accept fee-producing cases, the California legal service has filed a number of such suits while refusing services to the truly eligible. It has on many occasions filed a number of suits involving the same or similar courses of action—in effect harassing individual citizens and agencies. The California program has moved so far down the road to legal reform that it, as a tax-financed agency, is suing other Federal-funded agencies as well as private citizens. At the same time it is closing down bona fide legal aid projects because, after the funds for legal reform are allotted, not enough is left for basic legal aid projects.

In Waterloo, Iowa, the OEO-funded legal service once intended to file suits against State colleges in Iowa which require students to pay parking fines as a condition of continuing as a student. They also said that they had intended to "instigate a grassroots organization of ADC mothers to develop political power which could be used to change community attitudes."

The St. Louis legal services has engaged in activities to suit their own sociological theories rather than to provide legal aid in civil cases for the poor. It has defended and counseled local militant groups which have participated in illegal demonstrations and disorders in that city. In some cases the militant defendants have incomes well above the level which would qualify them as poor.

The unlicensed director of legal services, Denison Ray, is currently receiving a $28,000 salary that is substantially higher than that now received by a member of the Missouri Supreme Court, the attorney general of Missouri, or the mayor of St. Louis. Mr. Ray, together with 20 percent of his staff of attorneys, has been refused permission to appear in Federal court because he is not a member of the State bar. The remaining three nonbar lawyers receive between $11,500 and $18,000 as staff attorneys.

T. Hartley Pollock, who did much to establish the legal aid program in St. Louis, called the present policy of the society "a complete departure from the basis on which the program was organized."

The Murphy amendment would make such unauthorized departures much more difficult. Although OEO programs would continue to function on a local level, their projects would be subject to the Governor's veto.

The responsibility for whether the taxpayers should subsidize suits which involve the right of a school board to set reasonable standards on hair length: or whether a State's narcotics laws are valid; or whether the Federal Government should take over a local police force; or whether a group of militants should be subsidized to attack churches, schools, store owners, or the Government must ultimately rest with some public official.

This amendment simply states that the elected chief executive responsible to the people should be allowed to exercise his obligation free from bureaucratic interference.

Public administration will soon come to a standstill in this country if every act of government is subject to a prolonged lawsuit brought by tax-paid lawyers are more often political than philanthropic.

On Saturday, November 29, an article appeared in the Des Moines Tribune quoting Iowa Gov. Robert D. Ray as being opposed to the Murphy legal aid amendment. Two days later his top legislative assistant, Elmer Vermeer, called my office requesting material concerning the amendment. He said:

> The Governor does not understand the Murphy amendment and he needs background material explaining its provisions.

No mention was made of the article in the Des Moines Tribune.

Later that same day, a constituent from my district called me regarding the stand that Governor Ray took on the Murphy amendment. I immediately called the Governor and asked him if he had read the amendment. He replied, "No, I have not."

This is typical of reaction throughout the country. Many who have not even read the amendment have voiced their opposition to it. The Governor of Iowa fits squarely in this category. He should take time to read an amendment before venturing to oppose it. It would be well for him to document his opposition as thoroughly as its advocates can support their position.

Mr. PRICE of Illinois. Mr. Chairman, I rise in opposition to the Republican substitute to H.R. 12321. The proposed transfer of the antipoverty program to the States would effectively cripple the program and transform it into a hodgepodge of unrelated efforts. In effect, each State would have an effective veto over the program and the Office of Economic Opportunity would be an administrative eunuch with little or no purpose except to passively await State decisions.

This action on the part of the minority contradicts their own President who announced that OEO was to serve as the central research and development agency for Government poverty programs. Logic defies this possibility if OEO is transformed into a holding agency with little or no structure or content.

More importantly, the Republican substitute could effectively thwart whatever progress has been made toward developing local participation in the poverty programs. Rather than democratizing the program, as the supporters contend their substitute would achieve, the substitute would have the effect of eroding and eliminating local or community control by allowing State politics to interfere with the program and by discouraging maximum participation of the poor by requiring members of the community action boards and agencies to be appointed.

Additionally, the legal services program, one of the most successful components of the antipoverty program, would be adversely affected by the substitute. Administrative costs would multiply under the substitute, legal services attorneys would be intimidated by the provisions allowing a court to award legal fees and costs to the loser of a lawsuit initiated by the legal services program, and politics would be interjected into the program.

If there are problems with the poverty program, the substitute proposal is not the way to handle them by creating 50 separate approaches. This creates an administrative nightmare and does little to further the goals of a national commitment toward eliminating poverty and injustice.

Mr. ROSENTHAL. Mr. Chairman, at a time when this country must redouble its efforts to eradicate poverty, a threat has arisen to undermine the entire crusade. Sadly enough, this menace has originated in the Congress, so the very least we owe to the public is to choke off the threat at its roots.

There are many reasons for supporting the 2-year extension of OEO. OEO Director Donald Rumsfeld has recognized the poverty organization's weaknesses and deserves the time to attempt to correct these deficiencies. President Nixon has voiced his preference for such a course, although I note with dismay that he has not backed Mr. Rumsfeld vigorously during the crucial days immediately preceding our vote.

It is not so much OEO's strengths, although they are considerable, but the Green-Quie amendment's weaknesses which provide the most dramatic case for rejection of the substitute bill.

With the increasingly rapid decay of our cities, the shocking exposes of mass hunger, and the rising discontent among oppressed and disadvantaged minorities, there is a special sense of urgency to meet the poverty problem headon and in the most pragmatic fashion possible.

We need not ponder whether this substitute bill that shifts major decisionmaking power to the State governments is a cynical sabotage of the national drive to reduce poverty. It is enough to say that the proposal is unrealistic and unworkable.

If all the States were equipped with the necessary apparatus and personnel to administer successful antipoverty programs and were determined to do so, the amendment before us might not be so unpalletable. But again, there is great disparity among the States.

Indeed if the States showed this kind of commitment and ability, there would be no need for any Federal antipoverty programs.

Mr. Chairman, let us turn for a moment to the strengths of OEO. This Government unit was specifically created to bypass not only the State but also Federal bureaucracies. It was designed to apply innovative approaches to problems that Federal and State agencies were either unwilling or unable to solve.

The President's message on OEO recognized that this agency was set up outside of the bureaucratic morass of redtape in order to prod Federal and State governmental units into action.

Under the Quie-Green amendment, who would be the catalyst for States derelict in their responsibilities to the poor?

States rights are important and must be preserved, but not at the expense of individual rights; namely, those of our Nation's indigent. All governmental rights in our society must ultimately be based on the rights of citizens to equal opportunity, including economic opportunity.

Of particular concern to me is the amendment's emasculation of OEO's legal services division, which has been so important in defending the poor against inequitable treatment from both public and private sources.

The provisions in the amendment would inhibit VISTA attorneys in their work and in effect, deprive the poor of legal counsel which has proven a major tool in their uphill struggle to enter the mainstream of our society.

I urge defeat of the amendment.

Mr. ROGERS of Colorado. Mr. Chairman, alcoholism ranks as the third major health problem in the Nation, afflicting at least 5 million adults. In addition, the families of alcoholics involve an average of three to four other persons. Even at that, we may only be seeing a portion of the problem. A neighborhood survey by one community action agency showed that one family out of every three had a problem with alcohol.

Perhaps more than any other vicious disease, alcoholism afflicts the whole man and the whole society. It disrupts the family, the church, and the school. And, it seriously disables the economy.

Alcoholism has a particularly heavy impact on persons and families already burdened with the multiple conditions of poverty. As in most other instances, the poor have less access to community services and facilities for alcoholics.

The chronic alcoholic is not likely to complete a job-training program or to look after his family's food and health needs even when welfare help is available. Also, the alcoholic and his family have frequently been excluded from community services simply because of the fact of alcoholism; in effect, they are punished rather than treated for illnesses.

Of particular concern are the most common effects of alcoholism; first, disruption of family life, and second, loss of employment and decreased employability.

In these two areas, alcoholism has the most impact of perpetuating individuals and families in poverty. To meet these problems, the most effective interven-

tions are before the person has reached the bottom, that is, while there are still family ties and prospects for employment to provide incentive for achieving rehabilitation.

Multiservice centers operated by community action agencies and neighborhood health centers are key points of contact for the low-income alcoholic and his family. By virtue of their structure and orientation, these agencies are ideally suited to provide services for the alcoholic which are truly responsive to his and his family's needs. They are oriented toward alcoholism as a problem related to the conditions of poverty and contributing to the continuation of poverty. Further, they are peculiarly capable of dealing with alcoholism as a community problem and mobilizing needed community resources.

The primary purpose of an alcoholic counseling and recovery program is to develop services for alcoholics and their families, aimed at inducing and maintaining sobriety for the alcoholic, and providing comprehensive services to the alcoholic and his family through effective relationships with other ongoing programs such as health services, vocational rehabilitation, and employment, and welfare assistance.

The potential for using OEO funds and facilities to help individuals and families at the poverty level to gain relief from this dread disease already exists. However, in order to maximize this potential, a national focus is needed to establish standards and encourage the development of local activities. This effort has been initiated and will be expanded during the coming year.

Mr. POFF. Mr. Chairman, I am opposed to the Murphy amendment adopted in the other body.

I support the substitute for the committee bill.

This means that I am satisfied that there is nothing in the substitute which is either substantially or procedurally the equivalent of the Murphy amendment.

Categorically, I say that under the substitute, the Governor does not have an absolute veto over legal services. He does not have a case-by-case veto power over legal services. And he has no line-item veto of any kind.

The substitute gives the Governor the power to concur or not to concur with his own State economic opportunity office when it disapproves an application for a legal services program. His concurrence in the disapproval does not constitute a final veto. The Director of OEO can override the disapproval. In cases where the application originated with a local community action agency, all that is required to justify the override is a finding that approval of the application would strengthen the overall program of the local community action agency. In cases where the application originated with other eligible applicants, the Director can override the disapproval upon finding that approval of such application would be in furtherance of the purposes of the act.

This burden the Director must bear is scarcely greater than the burden the present override law puts upon him.

The language in section 251(c)(1) of the substitute is not the Murphy amendment, either in form or effect, and nowhere else in the substitute will such be found.

Let me explain why I am opposed to the Murphy amendment.

A Governor ought not have the power to frustrate the citizen's opportunity for counsel when a lawsuit is brought against him, either by another citizen or by the government. Neither should a Governor have the power to frustrate the citizen's opportunity for counsel when, except for his poverty, that citizen has cause and standing to bring a lawsuit against another citizen or against the government.

A Governor's power to veto a routine poverty war program is one thing. A Governor's power to veto a legal services program is another. The exercise of the former is purely administrative in both function and effect. The exercise of the latter is administrative in function but judicial in effect.

When a Governor vetoes a routine community action program, he has made a judgment that an executive program will not be administered. When a Governor vetoes a legal services program, he has made a judgment that the judicial process will not be permitted to function fully. Such a judgment fractures the system of division of powers.

The judicial process must be protected against trespass. This is because the judicial process is the only mechanism by which citizen wrongs can be redressed and citizen rights can be enforced. If the judicial process is not independent of executive restraint, the mechanism can fail, especially if the executive branch of government is involved in citizen wrongs or citizen rights.

The judicial process is a mechanism fashioned for all men. But it is not always fully available to all men. Too often, it is available only to those who can afford the lawyer's fee. True, the judicial process in most States furnishes counsel to the indigent accused in criminal cases, but in civil cases, there is seldom such provision. Yet, the wrongs and rights in civil cases may be as vital to the citizen as those involved in criminal cases.

It is a pity that a small minority of lawyers participating in the legal services program has been guilty of questionable conduct. Unfortunately and unfairly, such conduct has cast a shadow over the entire legal services complex. Such conduct should be rebuked, especially when it approaches so close to the definition of barratry. It is the responsibility of the judiciary to discipline lawyers, who are officers of the court and accountable to it, for unprofessional conduct. It is the responsibility of those who administer the legal services program and their superiors in the Office of Economic Opportunity to maintain continuing oversight and impose appropriate corrective and preventive measures wherever and whenever necessary. Prevention can most effectively be achieved by inviting the advice and cooperation of authorities at State and community levels in the planning, organization and functioning of the legal services apparatus.

Mr. FISHER. Mr. Chairman, the Office of Economic Opportunity has little to show for the $7 billion plus that it has expended during the past 5 years. An exorbitant price has been paid for any good that may have resulted.

A few months ago the General Accounting Office concluded a 1-year study of OEO and gave it very few plus marks. It found, for example, that the Job Corps, which has cost more than $1 billion thus far, had not accounted for "any substantial economic benefit thus far for youths who participated in the program." The average cost of each Job Corps trainee was placed at $8,300 per year.

The GAO said of the Neighborhood Youth Corps, designed to induce teenage students to remain in or return to classes:

> The great majority of youths who have been enrolled in the NYC program . . . would probably have remained in or dropped out of school irrespective of their enrollment in the NYC program.

It cost the taxpayers a billion dollars.

The Headstart program has been one of the more popular and successful of OEO's projects. But the cost of each enrollee averaged $1,100 a year, according to GAO, and that is considered to be exceedingly high.

The VISTA program has undoubtedly done more harm than good. It has used misfits and ill-prepared young people for jobs which required maturity and commonsense. In San Antonio, for example, the press reported that paid VISTA workers were active in organizing voter registration drives and in political activities. At the same place such workers participated in welfare demonstrations. The press has been replete with similar reports from all over the country. In Del Rio, Tex., they handed out hate literature and became so objectionable that city and county officials had to call on the Governor to help rid the city of their presence.

Many of the OEO programs have been absorbed by other Government agencies, where much or all of their work was duplicated anyhow. What is remaining, if continued, could undoubtedly be better administered by other agencies and by the States.

NEW RESTRICTIONS IMPERATIVE

Mr. Chairman, the law which created the Office of Economic Opportunity is so loosely drawn and so lacking in guidelines with respect to how the money is to be expended, that wholesale abuses have been reported. Perhaps never in American history has the Congress delegated so much authority to a government agency with respect to the spending of tax money. It has been a virtual blank-check operation, as everyone knows.

If the program is to be continued it is imperative that some controls and restrictions be written into the law. There is pending a proposed substitute which is designed to accomplish that objective. Under our federal system it is appropriate that the States have a voice in such expenditures. We know from experience that the job cannot be properly done at

the Washington level. Money is too hard to come by, taxes are too high, the burden of government is too great, for this program to be continued at its present excessive cost. The people are tired of seeing this display of waste and extravagance.

In a questionnaire I sent to all of my adult constituents 2 years ago I asked this question: "Do you believe the antipoverty program has been worth the money?" the result: 6 percent said "yes" and 87 percent said "no."

Adoption of the pending substitute would apply some meaningful supervision over how and for what purposes all this money is spent.

WASTE AND MISUSE OF OEO FUNDS

There is no point in listing the scores and scores of instances of waste and inefficiency in the expenditure of OEO funds. Much of it has been of scandalous proportions. Money in vast amounts has been thrown around for every conceivable purpose, much of it only remotely if at all related to any rational use for antipoverty purposes. Some of it remains unaccounted for.

Overhead and administrative costs of this program have been stupendous. In some instances exorbitant wages have been paid. In others the personnel load has been unbelievably excessive. In one Texas city, for example, the San Antonio Light reported:

> Community action program records on the various poverty proponent projects show some 250 men and women are drawing good paychecks from Uncle Sam, from the executive director to last neighborhood aide.

The article continued:

> CAP funds being paid directors, supervisors, coordinators, all sorts of assistants, counselors, bookkeepers, secretaries, clerks, aides and trainees run into the thousands of dollars.

That city had a population of some 60,000. I mention this as an example of what I mean when I speak of excessive overhead and administrative costs.

The U.S. News & World Report, after a survey, reported:

> The five-year record (of OEO) bristles with examples of force and violence. . . . Repeatedly, there have been official charges of mismanagement, inefficiency, waste, fraud, graft, extravagance and lack of proper accounting in anti-poverty projects. . . . Critics have alleged that public funds have been misused by poverty workers in political campaigns and voter-registration drives, for union organizing, and in connection with racial disorders.

These charges are based upon hundreds of reliable reports.

The U.S. Conference of Mayors once charged that OEO was "creating tensions" among the poor and "fostering class struggle." A former mayor of San Francisco objected to an OEO Community Action Handbook which advocated "organizing low-income residents for political effectiveness."

As evidence of how the program has been bogged down in paperwork, surveys, evaluations, and what-have-you, the Washington Evening Star in its March 31, 1969, issue reported that in the last 5 years OEO had contracted for 818 evaluations, reports, studies, and surveys of antipoverty activities, costing more than $30 million. Lou Harris, the pollster, got nearly a million dollars for appraising a series of "job efforts" by the Job Corps.

Listen to this one: OEO announced a grant of $272,443 to what was called Connecticut Law Reform, Inc., of Windsor, Conn., to "coordinate legal services to low-income families."

It turned out there was no such thing. The State commissioner, LeRoy Jones, whose department was supposed to know about all OEO grants there, had never heard of it. Finally, after a persistent search the mystery was solved. It turned out that the address of the newly created law reform corporation was the home address of an OEO legal services consultant. Apparently the lawyer who was to get the handout had dreamed up the "Law Reform, Inc.," title without bothering to incorporate.

This is by no means an isolated case of waste, if not corruption. It serves as an example of how vast amounts of tax money can be spent for anything the whims of the OEO might dictate. The present law is so loose and lacking in guidelines that it seems OEO can spend it for almost any purpose that suits their fancy. Many revolutionary movements have been benefited from OEO funds, including Pride in Washington, Rangers in Chicago, and Black Panthers in Cleveland and elsewhere.

There have been any number of instances where former OEO officials have resigned to join or create firms which then contracted with the OEO to perform one of the evaluations. What an invitation this program presents for favoritism and ill-considered and unnecessary surveys and studies of projects when in most instances Government agencies are already available to handle such assignments when they are necessary.

HOW MUCH POVERTY?

Mr. Chairman, every right-thinking American is sympathetic with those who are in need and who because of conditions beyond their control are unable to help themselves. That fact accounts for the interest in charity drives, support of the Red Cross, the Salvation Army, and the generosity of many church organizations. Americans are compassionate people and throughout our history the unfortunate and the disadvantaged have been helped when the need was demonstrated.

As the subject of charity is pursued it is interesting to note the progress that has been made to reduce the incidence of poverty—progress which was being made in this country long before the war on poverty was ever heard of. There was inserted in the CONGRESSIONAL RECORD on last December 3 some pertinent Department of Commerce data on this subject. There it was revealed that, using 1964 constant dollars, 31 percent of the families in 1947 had incomes of less than $3,000 and by 1964—when OEO was created—only 18 percent of the families fit into this category. This remarkable record was accomplished through normal economic growth which created new job opportunities, along with the cooperation of industry, Government, and private organizations.

From all the publicity given to the OEO one might think that this is about the only source of Federal aid designed to help the unfortunate. Nothing could be further from the truth. The Federal Government is now spending $27 billion a year for the poor. In addition, the States and local governments pay out $14 billion, and $2.4 billion is contributed by voluntary private agencies.

Actually, the OEO spends only about 5 percent of the total amount that is spent to help poor people.

On December 3 the distinguished gentlewoman from Oregon disclosed in the RECORD the results of a study conducted at her request by the Library of Congress. This referred to two hypothetical poor families, one being a mother and four children, and the other a mother and eight children—in each instance the children being placed in various school categories, believed to be in accord with averages.

In the first instance it was found that by taking advantage of all Government programs available, that family would be entitled to receive the equivalent of $11,513 per year.

In the second instance, that family would be entitled to receive annually the equivalent of $21,093.

Mr. Chairman, does this sound like the Federal Government is niggardly in dishing out welfare funds? Actually, such largess can, when excessive, tend to cause more people to prefer the good income and security offered by seeking a welfare-receiving status. In any event, such outlays should be restricted to the deserving and should not be made so readily available that it would help perpetuate dependence on Government as a way of life.

Some people seem to think you can cure any problem on the face of the earth if you spend enough Federal money. In fact, that concept has been predominant in recent years. But it does not work that way. Since jobs and birth control constitute the only real and meaningful answer to poverty, would it not be more desirable to dismantle the present grant programs, both in and out of OEO, and replace them with a voluntary and private enterprise plan which would encourage businesses to continue to train unemployed workers who are interested, and encourage more planned parenthood, particularly for the poor?

The fact is that poverty and hunger are being exploited by certain politicians and the poverty cult. The latter, who could be described as professional beggers, have been encouraged by all the ballyhoo to promote welfare as a way of life. They have organized in an effort to extract more from the earnings of the haves and give it to the have-nots. These people never talk of jobs; they talk only of welfare, and more of it.

Only recently at the White House Conference on Hunger, attended by more than 3,000, a resolution was adopted which called for a Government-guaranteed annual income of $5,500 for every American family of four—whether they work or not. The cost? Those people could not care less. President Nixon, who disapproved the request, estimated the cost at $75 billion a year.

While in certain circles it seems to be stylish these days to favor any expenditure if it is related to hunger and poverty, the time is long overdue to repudiate unreasonable and unrealistic demands. The pie-in-the-sky myth must be repulsed.

The least we can do in the House at this time is to adopt the pending substitute to the OEO bill. The next move should then be to screen all programs, transfer their functions to other agencies or to the States. In that way we would be better serving the best interests of American taxpayers and we would be pursuing the better course in the war on poverty.

Mr. RIEGLE. Mr. Chairman, I rise today in opposition to the substitute to the administration OEO bill.

It is true that the early years of the poverty program were marred by inefficiency, fiscal waste, ineffective programs, and overlapping effort. But in recent years, we have seen some important improvement although further improvements are needed. VISTA, for example, has cut the cost of training a recruit from $1,250 to $850. Some ineffective programs have been weeded out, others combined, and still more transferred to other departments.

When President Nixon took office, many important initiatives were taken to improve the operation of this needed agency. His new Director, our former colleague Mr. Rumsfeld, is off to an impressive start in improving OEO's operations and programs. I feel that he deserves congressional backing to put his proposals into effect and I strongly oppose any substitute bill that would undermine his efforts to do so. Therefore, I urge my colleagues to support the position taken by the administration and vote no on the OEO substitute bill.

Mr. GRAY. Mr. Chairman, to be poor is to die a little each day. I think those words would sum up succinctly the plight many Americans find themselves in today in this land of plenty. When former Presidents Kennedy and Johnson launched the broad sweeping program to eliminate poverty in America they wanted every community, every State and the Federal Government to participate in a joint effort. I am sorry to say that my State of Illinois, as an example, is spending very little money on the elimination of poverty per se; it is true that the State is building highways and some forms of public works that will have a lasting benefit on the poor. However, the State is doing very little if anything to provide financial assistance at the grassroots level where poverty does exist in our State. It is for this reason that we must continue to rely upon the Office of Economic Opportunity, a Federal program to provide the tools with which to help ourselves. It is for this reason and many others that I strongly oppose the substitute amendment that would take away from the Director of the Office of Economic Opportunity the authority to work with local communities in stamping out poverty. If this substitute amendment is adopted any Governor of any State could put a halt to local programs. The cry has been made here for States rights, but I would submit to you, Mr. Chairman, that we are now under the existing law going beyond States rights and giving this assistance to local communities. I think a local poverty director on the scene knows much more about what is needed than some Governor who may sit in a Governor's mansion 200 or 300 miles or more from the site of the poverty project. Let me give you a very good example of a case that just happened in my district last month. A young lady was abandoned by her husband, left with a 4-year-old child to care for with no income. The young mother was forced to place this child in a foster home with some distant relatives. After she secured employment she went to pick up the child and due to the attachment the distant relatives had built up for the child they would not let the natural mother have the child back. This young lady was forced to go to the local legal services bureau funded by the poverty program. The legal services lawyer immediately filed a writ in the court for the natural mother to obtain custody.

Now, Mr. Chairman, the reason this story is so pertinent to the debate today, it is ironic but true that just 2 days after this episode happened affecting the lives of these two poor people one of the high officials in that county announced that he was repudiating the entire poverty program in his county because he felt the program had not been of any value to the poor. It so happens that this official carries a lot of political weight and is a personal friend of the Governor. If the substitute amendment were in effect it is my sincere belief that the Governor more than 250 miles away from this incident would listen to this official and would eliminate that legal services, plus other poverty programs in the area that have worked and worked well.

Mr. Chairman, we cannot afford to run the risk of eliminating these poverty programs for political expediency. The case I have alluded to, and many others in similar circumstances both for legal services and other programs administered by OEO would certainly be in jeopardy.

Mr. Chairman, much of the antipoverty money goes to the city, and many Governors and State legislatures have displayed a lackadaisical attitude toward the problems of the city. One big city mayor for example concluded there is an almost total lack of interest, lack of help on the part of the State. The Federal Government has been much more oriented toward solving the real problems that exist in this country both in rural and urban areas.

Therefore, I cannot understand any urban area Congressman, Republican or Democrat, voting for the substitute amendment. President Nixon has said he supports our friend and former colleague, Donald Rumsfeld, head of OEO. If he does, Mr. Chairman, then why not ask his own Republican colleagues in the House to support his own program and his own administrator. Next November we will hear the cry from the President, "I need a Republican Congress." Here is a good example of how a majority of the Democrats are supporting Mr. Rumsfeld and the Office of Economic Opportunity and the Nixon program and where a majority of the Republicans in Congress are against the President and his own OEO program. Our distinguished friend and colleague, the very able chairman of the House Committee on Education and Labor, Mr. CARL PERKINS, of Kentucky, recently called the substitute plan a "fraud upon the American poor" and stated that the plan will pass unless President Nixon steps in. I am constrained to agree with my friend Mr. PERKINS and hope the President will step in and that we can save this program for the poor people of southern Illinois and the country. I certainly will be doing my part to support the President and his program administered by the Office of Economic Opportunity and I hope my colleagues will reject the substitute amendment and will support the committee and help extend OEO for 2 more years.

Mr. GILBERT. Mr. Chairman, I commend the Committee on Education and Labor for its fine work in extending the Economic Opportunity Act for 2 years, with an authorization of $2.343 billion. I heartily endorse the committee's decision to perpetuate and increase the funds for such important programs as Headstart and Follow Through, Mainstream and New Careers, and emergency food and medical services. I also support the solicitude that the committee has shown for the elderly in various provisions of this legislation.

I would be less than candid, however, if I did not also add that conditions in our country justify a much greater financing of this legislation. I say this not in criticism of the committee, for I understand the handicap under which it has operated. We are living in inflationary times, under an economy-minded administration. But we are also living in times of social distress, and in my view the programs operating under the Economic Opportunity Act have demonstrated their merit in the years since their inception.

For this reason, I am unhappy that some Members on my own side of the aisle want to compromise with expediency by turning over all of the poverty program to the control of the States. We have had enough experience to know that there is no surer way to do in the war on poverty, lock, stock, and barrel. This is a time for a renewal of effort, not a retrenchment.

In fact, we are still fighting a skirmish against poverty, not the war we were promised when President Johnson proposed this legislation. The war we are fighting is abroad, where it should not be. We are still assigning false priorities to the work which must be done to repair the breaches in our society. The Office of Economic Opportunity has shown its worth, and it should be supported with an increasing financial commitment by Congress.

Mr. Chairman, I am unalterably opposed to the Green-Quie amendment, and I will vote against it.

Mr. ANDERSON of California. Mr. Chairman, I rise in support of H.R. 12321, which would extend the Economic Opportunity Act for 2 years.

The Office of Economic Opportunity, established in 1964, has done much to bring the poor and less fortunate into the mainstream of American society. It has provided jobs, training, and most of all, hope, to the poverty population. It is not an illusory hope, as many claim; it is a hope based on the efforts and the commitment of the many Americans who feel that poverty is not a "fact of life," and that poverty can be eliminated.

Should the programs of the OEO be placed under State control, their truly local character would be swept away. I, too, favor the local character of the program and participation on a local level.

In the past, we have found that in some States, cities have met resistance at the State level in meeting problems which are totally unique to the urban area. For this reason, a great many city officials have requested direct grants from Washington almost totally bypassing the State government. Should we expect the State governments suddenly to be sympathetic to the problems of urban areas?

If we urge local control, let us leave the structure of OEO programs as they are. Let us keep the poverty programs above the political whims of the State government. Let us keep poverty from becoming a political football and direct our attentions toward aiding the poor with jobs, training, and education.

To those who advocate State control of the legal services program, I ask, should the poor resolve their conflicts in the street? Or should they use the courts? The answer is obvious. If a Governor is allowed to veto certain cases, the poor in our society will not have the access to the courts that all citizens in our society need.

I concur with the American Bar Association that a Governor's veto "will impair the ability of legal services programs to respond to the needs of the poor and constitute oppressive interference with the freedom of the lawyers and the citizen."

Mr. DADDARIO. Mr. Chairman, the VISTA volunteer has more to offer than just a willingness to help the poor. Over the past 2 years, VISTA has concentrated on recruiting men and women with professional skills. Today, three out of four applicants selected for VISTA service have college degrees. A significant number are graduate business students, architects, planners, health specialists, teachers, and lawyers. Presently, more than one out of every nine VISTA volunteers is an attorney.

Six hundred VISTA lawyers are now serving all over the country, most of them under the sponsorship of legal services programs. They are supervised by staff lawyers of neighborhood legal service offices and other practicing attorneys in their areas. VISTA lawyers act as house counsel for large community groups who cannot afford to pay for professional assistance. Their services are unique.

For example, a year ago last September, New York University Law School enrolled 27 young VISTA lawyers in a 20-month masters degree program in urban affairs and poverty law, funded by the Office of Economic Opportunity's legal services. The students combine academic studies with legal field work in the poverty areas of New York City. They spread out into Brooklyn, into Harlem, the Bronx, and poor neighborhoods in Manhattan—each specializing in specific areas of poverty law, landlord-tenant problems, employment and education problems, health protection, consumer protection—whatever problem is most pressing in the communities where the VISTA lawyers live and work.

Stan Kesselman is an example of a VISTA lawyer at work. A 26-year-old graduate of Fordham Law School, and a member of the New York bar, he works on complaints from low-income consumers in Harlem. He has taken care of many through direct action with the offending firm. He handled a freezer fraud case which was settled out of court on behalf of 10 victims.

Last spring, Kesselman helped organize the Harlem Consumer Protection Union to offer free legal advice, counsel, and education. He helped to develop a legal structure for the group, write proposals to foundations, and obtained financial aid from various funding sources. Then, a couple of months ago, he helped set up another consumer protection program in the Bronx.

VISTA lawyer Louis Lanier recently discovered that a plan for vest pocket housing in Brooklyn called for the razing of all the buildings in eight blocks at one time. There were no relocation plans for 900 low-income families living in the buildings. Lanier worked with city planners and an architect on another plan asking for staged construction. This meant that only 50 families would have to move out initially. The other 850 would move into new units as they were built. The VISTA lawyer wrote up the plan in a proposal presented by tenant leaders at a city planning commission hearing. The result: housing authorities were requested to conduct relocation studies in the area. The abrupt displacement of 900 families was stopped.

Another VISTA attorney, Arnold Bothbaum, helped prevent what might have been a major student revolt in a Brooklyn high school. By working with student leaders day after day he was able to direct their discontent into constructive action. The students settled many of their differences with teachers and school administrators in a conference instead of a confrontation.

Today there are 53 young law graduates enrolled in the VISTA-New York University Law School program. Double the number who started last year. Some are members of the New York bar. Those who are not, work closely under the supervision of practicing New York attorneys.

The substitute OEO bill would not only slow up and drastically impair the progress of this program in poverty law, it would virtually destroy VISTA legal projects in States with few law schools to recruit volunteers. More than 430 young men and women from my own State of Connecticut have served as VISTA volunteers of which 112 are currently serving in all parts of the country. Of this number approximately 50 are serving in Connecticut in 14 projects. This substitute OEO bill—Quie-Green amendment—requires that all VISTA volunteers be native to the State in which they serve. If this requirement were made law the Nation would lose the services of more than 60 Connecticut volunteers who are presently active where they are most needed in other parts of the country. Of the 14 attorneys to volunteer from Connecticut, only three have been retained in the State, thus providing 11 skilled professionals for employment in areas where the need for their services is greater proportionate to the number of volunteers so equipped. It was not the intent of the original VISTA act to force regions with the greatest need to draw upon their limited supply of professionally qualified people. This amendment would cause this situation to develop and in doing so would likely end the effectiveness of the entire volunteer lawyer program.

Mr. MONAGAN. Mr. Chairman, I oppose the substitute.

I do not take this position because of a belief that the administration of the poverty program has been flawless. From personal experience as well as from the studies of the Special Studies Subcommittee of the House Committee on Government Operations which I chair, I have become only too familiar with the deficiencies in this program.

The special study which our subcommittee made of the administration of the medical care program in Bellaire, Ohio, which was published in July constitutes a striking example of the managerial, fiscal, legal, and policy failures of one facet of this program in one particular town.

Needless to say, there have been other more glaring and more culpable examples of maladministration.

My objection to this motion, however, is based on the belief that no substantial benefit in administration would be gained by shifting the program to the States while the potential improvements of an effective national administration probably would be lost.

I see nothing to indicate that the programs which are covered by this legislation would have improved management in my own State and in fact the Administrator of the Department of Community Affairs who presumably would have charge of any State program has specifically requested that the substitute be defeated.

At the same time, there have been some administrative improvements in OEO in recent months and one can believe that further improvements could be effected under the pressure of congressional control and close scrutiny.

I do want to make clear that in criticizing the program I do not indicate that it has been entirely ineffective. There are many helpful and constructive programs included under OEO and these programs such as the foster grandparents program, Headstart, vocational training, and others should be continued.

In short, I believe that retaining Federal control with an improved policy of centralized administration would have

better results for the country than splitting it up and setting up 50 different organizations and 50 different policies of operation.

Mr. RYAN. Mr. Chairman, 5 years ago Congress heard the voice of another America—an America inhabited by 35 million poor, who lived without hope and without opportunity. In response, the House passed the Economic Opportunity Act of 1964. It offered no instant miracles, no easy remedies, not even any assurance of clear-cut success. But it did do one thing—it offered what its very name says—opportunity.

With poverty still a disgrace amidst this country's affluence, the Ayres substitute bill would retract even that offer. It would turn over to the States the antipoverty program, and thereby would begin an antipoor program.

No clear-cut victories have yet been won by that silent and powerless minority of 35 million. Nor have easy answers been found. Mistakes have been made and will continue to be made, whether OEO survives or whether the poverty program is turned over to the States. This must be so, for the problems of poverty and hopelessness and lack of opportunity have confounded America for 300 years; no indictment can be sustained against OEO for not solving them in 5.

But certainly one momentous, yet subtle, change has been wrought in the last 5 years. The poor have found their voice; and they have found that some, at least, are willing to hear it.

It is too late now to resurrect the past. And it is too easy now, should this House pass the substitute to imperil the future.

The Economic Opportunity Act sought to involve the poor in determining and shaping their own destiny. It created the Office of Economic Opportunity as the only agency in the Federal Government which speaks for the poor and with the poor. Central to the poverty program is the concept of community action—the idea that people of a community, working together, can together serve their common interests and solve their common problems.

Despite the 1967 amendment to the act, which enabled local political bodies to designate themselves or others as community action agencies and thus to bring local political pressure to the fore, participation of the poor has remained the integral and vital basic premise: at least one-third of the membership of a community action agency governing board must be representatives of the poor.

The substitute guts OEO. If it is enacted, the OEO Director will be a mere figurehead: a conduit for money to the States with little supervisory authority and very doubtful authority to override a State's denial of a funding request by a local agency.

The substitute stills the voice of the poor. It turns over the Federal antipoverty program to the statehouse. It denies the local community action agency an effective right if its application for funding is rejected. It strengthens the hands of local politicians, for section 301 amends the present act's section 211 to require that public officials not only make up one-third of the community action agency board, but in addition, they are to appoint at least 25 percent of the remainder of the board.

Thus the substitute bill stifles the emerging, and essential, power of the poor by surrendering the antipoverty program to State and local politics. The bill inhibits the advocates of the poor—the legal service lawyers. And the bill turns over control of the allies of the poor—VISTA volunteers—to the States.

Section 250 of the substitute bill seeks "positive involvement" of the States "in the development, carrying out, and coordination of antipoverty programs within each State." It has been suggested that a State may opt out, that it need not exercise its authority to become positively involved. Certainly the bald truth is clear. No State is going to forgo the chance to increase power and control over those who would challenge the conventional wisdom that political power follows economic power.

Make no mistake. "Positive involvement" of the States means an attack on the poor and the powerless, on the Harlem black, and the Appalachian miner, and the forgotten Indian.

Section 251(a) of the substitute directs the OEO Director to fund the State economic opportunity offices, which are to serve as the conduits for applications for assistance made under title II—community action—and title VIII—VISTA. It further requires that each State economic opportunity office may comment on any proposed program or activity under every title of the Economic Opportunity Act. For the State office is to play "an affirmative role" in the poverty program, and most particularly in the community action and VISTA programs.

Whose benefit does this "affirmative role" serve? Certainly the past is prolog to the future, and surely the past is grim. The black ghettos of Harlem attest to the failure of affirmative action by Alabama, Georgia, Mississippi, and other States. The slums of Chicago's uptown bear witness to the lack of affirmative action by the Appalachian States.

The "affirmative role" played by the States since passage of the Economic Opportunity Act also teaches us a lesson. The present act provides in section 242 that a Governor may veto a community action grant, contract, or loan, although his veto may be overridden by the OEO Director. In 5 years, 70 Governor's vetoes have been registered. Of these, two-thirds—47—have been registered by only one-seventh of the States. Of these seven states, six are Southern—Alabama, 13; Florida, three; Louisiana, four; Mississippi, nine; South Carolina, one; and Texas, two. And the seventh State, California, did not register its 15 vetoes until the administration of a strongly conservative Governor.

It has been said that the so-called progressive State should not be prevented from playing an affirmative role because of the failures of the so-called regressive State. The truth is that no State is progressive in fighting poverty. No State has not failed. Every State should do more—it must do more.

But the Federal Government also must do more. It cannot do less. Poverty is a national problem—the poor black farmer of Mississippi is our spiritual brother and our economic responsibility. And the duty to help is a national one, and must be met by a viable national program.

Section 251 of the Ayres substitute bill solidifies the power of the States to pursue their own ends by whittling the OEO Director's power to override a Governor's veto down to form without substance. Under the present act, the Director may override a Governor's disapproval of a community action grant if he finds the grant to be consistent with the act and in furtherance of title II's purposes. But under the substitute proposal the Director would have the onerous burden of establishing that the State office's rejection of a local agency's application for funding "would seriously weaken the overall program of a community action agency." Certainly, the Federal Government's voice under the substitute is to be a hollow one.

Section 253(a) of the substitute is the keystone of the surrender to the States, and the key to the stifling of the poor. The section authorizes the State economic opportunity officer to seek from the Director designation as the "sole agency for administration of the State program, or for supervision of the administration thereof by community action agencies." Thereby, the Mississippi State house becomes minister to the needs of the delta farmer. And thereby disappears this man's chance for change.

This same section takes no half measures; for it also deprives local agencies of an effective right to appeal the State office's rejection of their applications for funding. The substitute provides "that any community action agency, or other public or private agency which is a qualified applicant for program assistance under this title, dissatisfied with a final action with respect to any application for funds under this title shall be given reasonable notice and opportunity for a hearing by the State office." Thus, the same State office, which may be the "sole agency for administration of the State program," is the arbiter of the applicant it has already rejected.

What has happened to the override power of section 251? It is largely meaningless—it cripples the OEO Director's authority by giving him an override only when he finds that "disapproval of such application would seriously weaken the overall program plan of a community action agency." But even this, section 253 seems to take away: if a State becomes the sole administering agency, I interpret section 253(a)(7) as cutting off the local agency's right of appeal to OEO.

Nor does section 604 of the present act appear to redeem this right. Section 604 authorizes the OEO Director to hear appeals from delegate agencies which have been rejected by the prime sponsor or community action agency. But the substitute proposes to supplant the Director by making the State office "the sole agency for administration of the State program."

Mr. Chairman, the Ayres substitute bill not only stifles the voice of the poor, themselves, by surrendering OEO's authority to State politics, and by turning over control of community action agencies to local politicians. It also severely

inhibits the legal services attorneys who are their advocates.

The substitute bill places the legal services program under the control of the States: as with community action agencies, the State economic opportunity office will be empowered to reject an application for funding. Thus, every legal service lawyer will have to ask himself at every crucial juncture whether the political fallout from his actions will destroy his program.

By what double standard do we attack those who seek redress of their grievances in the streets and seek to stifle those who embrace the courts?

If some attack the legal services program, they do so because of its successes, not its failures. They attack because the Governor of California was barred by the courts from making cuts in the State's medicaid program as the result of a legal services suit, and because the poor have won the right to counsel in the municipal courts of Oregon.

But it is the courts which ruled. It is the courts which acted. Lawyers do not make law. They represent clients. It is the courts, then, which are really being indicted here. Let us be forthright about what we do. Let us not penalize the poor by stifling their advocates, just because we do not like what the courts have done.

And by what double standard does the substitute bill require VISTA lawyers to be admitted to the bar of the State to which they are assigned, while the attorneys of the affluent may appear throughout the land merely by obtaining the very superficial supervision of local counsel?

This bar admission requirement would probably not harm New York or Illinois or California, for these States produce many attorneys who join the VISTA program. But few, if any, VISTA attorneys would be members of the bar in some States. Nor is it easy to say that VISTA volunteers can readily gain admission to the local bar. In many States, they would have to pass the State bar examination, which requires months of preparation in learning the peculiarities of local law—peculiarities seldom, if ever, relevant to VISTA volunteers' practice. And following the examination are months in waiting for the results and more months until formal admission.

Perhaps even more egregious, attorneys who seek to advocate the rights of the poor and the disadvantaged would have to pass the scrutiny of State "character" committees, a task not easily accomplished if the "character" committee is composed of a group of middle-aged successful lawyers wedded to the status quo.

The substitute bill's scope is not limited only to VISTA attorneys. The bill brings the power of the State house to bear against all VISTA volunteers, for it turns the program over to the States by giving them the power to recruit, train, assign VISTA volunteers under grants from the OEO Director.

I ask, when a VISTA volunteer stands by the side of the poor, who are seeking to change the system so that they may take their rightful place within it, how can that VISTA volunteer owe his allegiance—his very assignment—to the State house, which has so seldom responded to the voice of the poor? It takes no strained imagination to foresee that few idealistic youths are going to volunteer for VISTA when they will be held responsible to Lester Maddox's State economic opportunity office.

And what has happened to the calls for economy which we usually hear from the sponsors of the substitute? To fragment a national program into 50 parts is to multiply expense and overhead. In fact, this entire bill calls for more money for administration and less for the people. Fifty States administering 50 separate programs means more staff, more paperwork, more confusion. And so the poor lose again.

Finally, the substitute bill would even stifle those who are in the most superficial way allied with the poor. The bill proposes to limit the political activities of any "person who, directly or indirectly, received from funds appropriated under the authority of this act an amount which exceeds one-quarter of the total amount such person regularly receives in salary payments, or in consultant fees."

Thereby, employees of Thiokol Corp., which operates the Clearfield Job Corps Center in Utah, are barred from seeking partisan political office and from partisan campaigning. So too is the janitor who sweeps the floors at the Martin Luther King Community Health Center in Chicago, and the doctor who serves the poor there.

Mr. Chairman, poverty is a disgrace in our land—a disgrace which festers in our national conscience and which taints our national dignity. It is the guilt of the affluent and the burden of the poor. Yet by some tragic contortion, the substitute bill would transmute the ills and hopelessness of our poor into their blame and their shame. It would perversely punish those who have believed us when we said to them: "Stay within the system; seek your rights within it; your stake is as big in it as is ours."

There is one portion of the substitute bill which I note with very special interest. The bill proposes that the OEO Director shall conduct projects to raise the income levels of Armed Forces families, when such families reside in the United States and through exceptional circumstances have an income level below the poverty line. Further, the director is to conduct pilot projects to raise the income levels of persons 65 and over above the poverty level.

There is no reason to limit this assistance to apply only if, "through exceptional circumstances," they have an income level below the poverty line. Nor is there much to be learned from more pilot projects. OEO is already funding a negative income tax experiment among the rural poor which includes within the experimental group aged persons.

The time for half steps and for more experiments and pilot projects is past. As I proposed in my Income Maintenance Act, which I first introduced in May of 1968, and which I reintroduced in the same form in the 91st Congress as H.R. 586 and in revised form as H.R. 14773, the time is now for the House to enact a minimum income guarantee for everyone.

The administration has requested a 2-year extension of the Economic Opportunity Act. The House committee has reported out a bill making few changes. It expands the new careers and mainstream program; it adds a title which provides special comprehensive preschool programs and programs to provide for intensive followthrough education for primary school children; and it adds a new title which provides assistance for intensive programs to eliminate hunger and malnutrition.

I support the bill reported out by the committee. I would like to see more. I am not happy when the House appropriates $70 billion for the military and only $2.34 billion to fight poverty. I was not happy about the closing of 59 Job Corps centers. Certainly we cannot allow the antipoverty program to be further undermined by adopting the Ayres substitute.

Mr. FEIGHAN. Mr. Chairman, I vigorously oppose the amendment to grant Governors the right to veto legal services projects.

Proponents of this amendment have a very restrictive view of the role of legal services. Legal aid societies have a responsibility to represent the interests of the poor in the same manner that lawyers traditionally represent the interests of free-generating clients.

Frequently, the poor have legal problems involving the Government. When wealthy clients are confronted with governmental action that they wish to challenge legally, there is no bar on instituting a case against the Government in the appropriate forum. Under the proposed amendment, the case filed by the lawyer for a poor client would be subject to veto based upon political consideration. The amendment would offer only an inferior grade of legal relief to the poor. Conscientious legal representation of the poor necessitates more than routine legal representation for persons who cannot afford to pay fees.

It is through conscientious legal representation of clients that neighborhood legal services has become a vital force in bettering the plight of the poor. Innovative legal services projects have resulted in development of poverty law. A clarification of judicial interpretation of a specific law can benefit thousands of persons. It is through the politically volatile cases that law is made.

Landmark cases filed by the Legal Aid Society of Cleveland on behalf of indigent clients could have been prevented under this amendment. For instance, Cleveland Legal Aid Society lawyers were successful in an action against the Ohio Department of Public Welfare challenging the Ohio 1-year residency requirement for receipt of public assistance. In another case, Cleveland legal aid lawyers were victorious in challenging the city's method of structuring the Cleveland model cities program. There are several cases presently pending before Federal courts in Ohio, which would first, test the discrepancy in payments between aid to families with dependent children and other categorical assistance programs; second, challenge the Ohio public welfare stepfather rule; third,

challenge Ohio's regulation regarding the use of social security benefits specifically designated for a particular child; and, fourth, challenge the method by which the board of education solicits united appeal funds from poor schoolchildren.

Each of those cases would be subject to the veto of the Governor under the proposed amendment. A favorable decree in the mentioned cases would improve the plight of the poor in Ohio.

If governmental officials are of the belief that a legal challenge of a particular law is unfounded, the appropriate forum to resolve the dispute is the courts, not the political arena. If the validity of a law cannot be substantiated in the crucible of the judicial process, the law is questionable. The poor must not be deprived of this opportunity to challenge a questionable law.

It would be a tragedy to limit the legal representation of the poor at a time when inroads into solving the problems of the poor have begun.

Mr. ANDERSON of Illinois. Mr. Chairman, over the past week there has been some confusion as to where the White House stood on the so-called State plan substitute to the poverty bill. Some have stated that the President is not opposed to the substitute bill despite the OEO Director's repeated assertions that the substitute was an unacceptable crippling amendment and that he spoke for the administration.

Monday night, President Nixon made known his position in response to a question at his press conference. The President said, and I quote:

> I support the director of OEO. He has asked for a two-year extension. He has pledged to reform the OEO, and I think he should be given the chance to reform it.

The President went on to express the hope that some accommodation could be reached between the OEO Director and those proposing amendments. Mr. Chairman, I want to echo that hope and indicate that I think there are some portions of the substitute that would be acceptable and noncrippling. But the President has made explicit his opposition to any crippling amendments. In his October 11 message to Congress, President Nixon said:

> I have provided the Office of Economic Opportunity with a new director, a new structure, and added responsibilities as the research and development arm of the nation's effort to deal with the problems of the poor. . . . I have asked for a two-year extension of the existing legislation, without crippling amendments. I believe that a reformed OEO has a major and continuing role to play in our national life.

OEO Director Don Rumsfeld, our former colleague, has indicated that the heart of the substitute would clearly cripple the agency and "very likely would prove to be a nightmare to administer." It would radically alter the innovative research and development function of the agency by shifting the major program responsibilities to the States. I think the States should be given larger responsibilities in OEO planning, programing and evaluation. But I do not think the substitute bill offers a proper approach to this. Director Don Rumsfeld has pledged himself to implementing the provisions of the 1967 amendments which call for a wider State role; under the previous administration these amendments were ignored by the OEO. Don Rumsfeld has revised the OEO guidelines to provide for a stronger State voice in OEO programs. I think he is to be commended for this and I agree with the President that "he should be given the chance to reform it." To radically alter the agency at this time would be an unwarranted vote of no confidence in the new Director and the new directions he has charted for the agency. Let us give him a chance.

Mr. Chairman, at this point in the RECORD I wish to include a letter which I received from Don Rumsfeld in my capacity as chairman of the House Republican conference, and a transcript of the Director's recent appearance on the CBS television program, "Face the Nation," last Sunday, December 7.

The materials follow:

OFFICE OF ECONOMIC OPPORTUNITY,
Washington, D. C., December 2, 1969.

Hon. JOHN ANDERSON,
Chairman, Republican Conference, House of Representatives, Washington, D.C.

DEAR JOHN: The proposed substitute to the Economic Opportunity Act, to my knowledge, is still not available in final form. Unfortunately, this means that there has not been time for the Nixon Administration to study it and comment precisely on its potential impact. Also, it might be added that it will be equally difficult for Members of the House to study it and know with any precision what its effect might be. However, from what I know of the substitute, it seems clear that if passed it would substantially reduce the value of the reorganized and redirected Office of Economic Opportunity.

Some form of "state plan" approach is no doubt valid for certain kinds of federal programs. I have voted for some in the past. Also, the President has proposed a State approach in the Manpower Training Act for close to one-half of the Economic Opportunity Act funds. He specifically did not recommend this for the remaining activities of the Agency. The reason was that such an approach is not valid or sensible for many of the remaining activities to be conducted by this Agency.

I believe that in the past, the states have not been included in Office of Economic Opportunity planning and operations to the extent that they should have been. In the few months I have been Director several important and specific steps have been initiated to remedy this situation. Attached is a brief summary of those steps.

In my judgment, the proposed substitute would cripple the new role for the Office of Economic Opportunity. It would destroy the research, program development and evaluation function, be as damaging to the Legal Services program as the Senate-passed Amendment and very likely would prove to be a nightmare to administer.

On several occasions, the President has asked that the bill be extended without crippling amendments. This is clearly a crippling amendment. I have testified before the Congress opposing such a State plan. The President and I have both asked to be given a reasonable period of time to improve the activities of the Agency. I understand that this is a difficult vote for many members. However, a sufficient number of Republican votes are needed if we are to defeat the Waggonner-Giaimo-Green Amendment.

Sincerely,

DONALD RUMSFELD,
Director.

THE NEW OFFICE OF ECONOMIC OPPORTUNITY—OEO

Under the new Administration, OEO has a new focus and operates many different programs from those originally conceived in the 1964 legislation.

The Fiscal Year 1970 budget request for OEO is $2.048 billion. Of that amount $1.273 billion will be transferred to other agencies to fund delegated programs administered by those agencies; $775 million of the $2.048 will be used to fund programs administered by the Office of Economic Opportunity.

Office of Economic Opportunity Administered Programs

	Million
Community action operations (local initiative, training and technical assistance, State economic opportunity offices, program direction and Senior opportunity services)	$393.4
Legal programs	54.0
Health programs (comprehensive health services; emergency food and medical services; family planning)	127.0
Migrants	33.0
Research and pilot programs	114.6
VISTA	37.0
General direction	16.0
Total	775.0

Delegated Programs

	Million
Department of Labor (Job Corps; Neighborhood Youth Corps; concentrated employment program; job opportunities in the business sector; public service careers/new careers; Operation Mainstream)	$871.3
Department of Health, Education and Welfare (Headstart; Headstart Follow Through)	389.7
Department of Agriculture (Rural loans)	12.0
Total	1,273

REDIRECTION OF THE OFFICE OF ECONOMIC OPPORTUNITY

Organizational changes

Delegated Job Corps Program to the Department of Labor on July 1, 1969.

Delegated the Head Start Program to the Department of Health, Education and Welfare on July 1, 1969.

Transferred the Foster Grandparents Program to the Administration on Aging.

Executed this Administration's first complete reorganization of any major federal agency.

Establishing new regional offices in Boston, Denver, and Seattle.

Relationship with the States

Drafted new guidelines providing for a stronger state voice in OEO programs.

The Office of Economic Opportunity is strengthening the state economic opportunity offices so that they may:

Jointly develop with the Office of Economic Opportunity state funding plans for the expenditure of the Office of Economic Opportunity funds.

Better assist the Office of Economic Opportunity grantees in the planning and development of their applications for funding, and the Office of Economic Opportunity in its review of these applications.

Participate with the Office of Economic Opportunity in the evaluation of the Office of Economic Opportunity-funded programs within their state.

Community action operations

Refused to refund a number of Community Action Agencies and local delegate agencies because of poor performance.

Instituted a review of all Community Action Agencies to evaluate their effectiveness.

Prepared in draft form regulations which

prohibit the hiring, with federal funds, of persons with recent convictions of serious crimes for certain sensitive positions.

Issued regulations to speed up grant processing time.

Procurement practices and conflict of interest

Prepared in draft form regulations and policy instructions to tighten up procurement practices. These regulations would:

Place controls over contracting with organizations in which former OEO employees hold senior positions.

Limit procurements which are made without competition and increase the number of awards to small business.

PRESIDENT NIXON'S STATEMENTS ON THE OFFICE OF ECONOMIC OPPORTUNITY

On February 19th, President Nixon sent to Congress a message on the anti-poverty programs of the Office of Economic Opportunity in which he called for a one-year extension of the Economic Opportunity Act. The following are excerpts from that message:

"The blight of poverty requires priority attention. It engages our hearts and challenges our intelligence. It cannot and will not be treated lightly or indifferently, or without the most searching examination of how best to marshal the resources available to the Federal Government for combating it."

"In making these changes, I recognize that innovation costs money—and that if OEO is to continue its effectiveness as an innovating agency, adequate funds must be made available on a continuing basis. It is also my intent that the vital Community Action Programs will be pressed forward."

On June 2nd President Nixon issued a statement in which he requested a two-year extension of the Economic Opportunity Act:

"I will request an extension of the authorization for OEO appropriations from June 30, 1969 to June 30, 1971; and I will ask that the Economic Opportunity Act of 1964 be extended from June 30, 1970 to June 30, 1972."

"A two-year extension would provide a better framework within which the necessary improvements in the anti-poverty program can be made."

"If we are to make lasting significant headway against poverty, there still is a great deal to be learned about what works and what does not. This Administration is committed to search for that knowledge, and to use it. We are committed to the continuation of an agency whose special concern is the poor; and we are determined to make the Nation's anti-poverty efforts function more efficiently and serve the poor more effectively."

On August 11 the President issued a statement on the reorganization of the Office of Economic Opporunity:

"I believe that the goal of full economic opportunity for every American can be realized. I expect the Office of Economic Opportunity to play a central role in that achievement. With new organizational structures, new operating procedures, and a new sense of precision and direction, OEO can be one of the most creative and productive offices in the government. For here much of our social pioneering will be done. Here will begin many of our new adventures."

On October 11 President Nixon sent to the Congress a message on several legislative issues. One part of that message deals with reform of the Office of Economic Opportunity. Concerning OEO reform, the President stated:

"I have provided the Office of Economic Opportunity with a new director, a new structure, and added responsibilities as the research and development arm of the nation's effort to deal with the problems of the poor. . . . I have asked for a two-year extension of the existing legislation, without crippling amendments. I believe that a reformed OEO has a major and continuing role to play in our national life."

FACE THE NATION

(As broadcast over the CBS television network and the CBS radio network, Dec. 7, 1969)

Guest: Donald R. Rumsfeld, Director, Office of Economic Opportunity.

Reporters: George Herman, CBS News; Martin Nolan, Boston Globe; David Schoumacher, CBS News.

Mr. HERMAN. Mr. Rumsfeld, House Republicans are backing an amendment which you have said would make your job an absolute nightmare, but Republican Leader Gerry Ford seems to feel that the President will settle for the amendments. Do you have any new word from the President that he plans new action to oppose them?

Mr. RUMSFELD. Well, I discussed the legislation at some length with the President on Friday, and there is no question in my mind but that the President supports my position. And it is my hope that we can have the House very quickly pass legislation dealing with the Office of Economic Opportunity so that we can get on with our job.

ANNOUNCER. From CBS Washington, in color, FACE THE NATION, a spontaneous and unrehearsed news interview with the Director of the Office of Economic Opportunity, Donald Rumsfeld. Mr. Rumsfeld will be questioned by CBS News Correspondent David Schoumacher, Martin Nolan, of the Washington Bureau of the Boston Globe, and CBS News Correspondent George Herman. We shall continue the interview with Mr. Rumsfeld in a moment.

Mr. HERMAN. Mr. Rumsfeld, I can understand that you want the extension of the OEO passed, but do you want it passed with these amendments? Is that what the President and you are favoring?

Mr. RUMSFELD. No, indeed. I have stated categorically that I think that the substitute that has been proposed within the last 48 hours is not desirable and it is my hope that the two-year extension will be passed without amendments of that nature. The reason for this—this is the President's position also—the reason for this is that we have an agency that has been designed to function in a way which would enable it to embark on research, evaluation, the development of new programs, and to force the activities of that agency into a mold that would very closely approximate a state plan or a normal governmental approach which I think is undesirable and unwise.

Mr. NOLAN. Mr. Rumsfeld, when you were in the House you were always identified with the liberal wing of the Republican Party. You are a very good friend of Senator Goodell, of New York, who has been critical of just about everything Mr. Nixon does, and now you find yourself being opposed by Congressman Ford, who is the Republican floor leader. Which way do you think the Republican Party is headed in domestic legislation? Is it toward Senator Goodell's idea of things or toward Congressman Ford's?

Mr. RUMSFELD. I would think that, trying to read motion of the Republican Party into any debate on the Economic Opportunity Act really wouldn't be a very good idea, for this reason: Historically, this agency has been a very controversial one in the Congress. You can recall that it was created amid a very partisan atmosphere, back in 1964, and it has been subject to a great deal of criticism over a period of five years. The Republicans in the House who, of course, I have served with and are good friends of mine, have had a position, a good many of them, of opposition to the agency as it was being operated. It is understandable to me that the members of the House would reflect some of the criticisms we've seen across the country. I understand that. The fact remains that I think that it is desirable for this country to have an agency that has as its concern the problems of the poor. I think it is desirable that that agency—which is not a big agency, it is not a massive war on poverty, as has been said over the years, it is a smal office in the Executive Office of the President. Its budget is $2 billion, out of a budget of $192 billion. All agencies of government are involved in the problems of the poor and so, too, the state and local government. But my point is that I think that this country is big enough and wise enough to allocate some $775 million, which is essentially what is involved in this amendment, for the purpose of seeing if we as a society can make our institutions function as better problem-solving mechanisms. I don't think it is desirable to impose a mold on the activities of this office that is similar to the mold that functions with respect to so many other government programs. I think that we need better ideas. We need better solutions than we have.

Mr. SCHOUMACHER. Mr. Rumsfeld, there are, of course, people on the Hill that would disagree with your view of what the substitute would do in the Economic Opportunity field, but before I go into that I have a sort of a political question: Throughout the campaign, the President, in fact, called OEO a failure, the poverty program. The newspapers have been full of abuses that have been committed in this program. Many Congressmen, Republican Congressmen as well as Democrats, campaigned against this program last time. I can't understand what made you think that, in view of this background, Congress was going to be willing to accept a program identical with what has gone on in the past. How could you come before the Congress and say "Give us two more years of the same thing, with a little extra money"?

Mr. RUMSFELD. Well, I didn't, as a practical matter. The point I made, when I testified before both the House and the Senate, and the point the President made while I was still in Congress, before I ever left the Congress to come to the Office of Economic Opportunity, was that there were a variety of changes that he, the President, had made before I came in, such as the delegation of Headstart, the delegation of the Job Corps. There were a variety of changes that I have made subsequent to my becoming Director. We have completely reorganized the agency. We have redrafted, rewritten a great many of the procedures and guidelines, its relationships with states and local governments. We are in the process of fulfilling the President's mandate, to see that this agency becomes the innovative arm of the federal government. So there have been a substantial number of changes. There is an additional change that has been put forward. Out of the $2 billion in the Office of Economic Opportunity legislation, the President has proposed the Manpower Training Act, which would take about $900 million, and place them in the Department of Labor, where they are presently administered, although funded in our Act, and then develop a better involvement of the states for those parts of the program. But he specifically said—and I have specifically said—that the remainder of the funds in the Economic Opportunity Act, roughly the $775 million I am referring to, should not be placed down to a different level of government or handled in a different way.

Mr. SCHOUMACHER. But most of these things you're saying are regulations that you yourself have instituted, that may or may not work under you or someone in the future.

Mr. RUMSFELD. No, some of——

Mr. SCHOUMACHER. I mean streamlining the efficiency. Wouldn't you, if you were on the Hill, insist that there be some changes in the law?

Mr. RUMSFELD. Well, that is what I was just saying. There have been changes. The President has proposed the Manpower Training Act. He has already delegated Headstart and the Job Corps, prior to my even coming into the agency. There have been changes involving about three—three substantial changes,

some legislative and some not—involving about three-quarters of the agency's activities, about $1.2 billion out of $2 billion.

Mr. SCHOUMACHER. The controversy, of course, involves the Community Action, I mean much of the controversy——

Mr. RUMSFELD. This is true.

Mr. SCHOUMACHER. Surrounds the Community Action Agencies, and in that area there is no change in the law that you have asked for.

Mr. RUMSFELD. That's correct.

Mr. SCHOUMACHER. Are you not now willing, in view of this, let's say, fairly substantial sentiment in the House to consider a substitute to try to rescue the bill?

Mr. RUMSFELD. Well, of course, under our Constitution, the Congress certainly has the prerogative to debate and make changes in legislation. It is my responsibility, as Director of the agency, I think, to indicate what I believe is in the best interests of this country and the best interests of this agency, and this is what I have been attempting to do. I think that there is no question but that it is understandable, that the Congress is refleeting a reaction in the country. My hope and my concern is that I don't want to see the Congress over-react. I don't want to see an over-reaction that would lead to a situation where this country would not be able to deal in an effective way and an aggressive way with the problems of the poor.

Mr. HERMAN. Well, in hardtacks now, Mr. Perkins has got this delayed for a week or two. You have your forces to muster, presumably your biggest gun and your artillery is the President of the United States. I come back to my opening two questions. Perhaps I worded them a little loosely, but my question really basically is this: You have a short time left. All the surveys seem to show that the Democrats are behind you but they need a certain number of Republican votes, and they don't have them. Can you, with the aid of the President—is he going to do something new—can you muster the Republican votes needed to pass the bill the way you want it?

Mr. RUMSFELD. I don't know. Right now, it is close, to be quite honest.

Mr. HERMAN. Is the President going to do something new?

Mr. RUMSFELD. The situation is that there are 435 members of the House. Only 189 of those are Republicans. The vast majority are Democrats and we need a substantial number of Democrats and a substantial number of Republicans to prevail. I have been working on the Hill trying to see as many members in both political parties and to persuade them of the opportunities that we have with this agency to be sure to correct some of the excesses of the past. Now, I have talked with the President about this. I imagine this question would come up on Monday evening. There is no question in my mind but that the President fully supports my position, and he has indicated this on four separate occasions. He has made four statements, and he and I are both excited about the prospects that we have in this administration to have in the Executive Office of the President an agency that can do the important work that he has set forth for us.

Mr. HERMAN. Sir, I know that and the Republicans know that. Now they are all in the past. They were before these amendments were brought up. At this point, as I understand it, you need a third of the House Republicans behind you. Do you think the President can get them for you or that you can get them for yourself?

Mr. RUMSFELD. As I say, I don't know. I think it will be close. We have, I think, something approximating a third of the House Republicans who will be supporting us. We have members of the Republican leadership who are going to be supporting the position we have put forward.

Mr. HERMAN. Which members of the leadership?

Mr. RUMSFELD. Congressman John Anderson, I believe—

Mr. HERMAN. Oh, yes.

Mr. RUMSFELD. —and I think Congressman Robert Taft. Both are members of the leadership and have indicated that they are in favor of the President's position. That is my understanding, at any rate.

Mr. NOLAN. In light of your own rhetoric about saying that this is not a massive war on poverty, and in light of the fact that two leading components of OEO, the Job Corps and Headstart, are now gone from your jurisdiction, could you project for us what do you think the future of OEO will be like, say, five or six years from now? What sort of things will you be doing?

Mr. RUMSFELD. Well, if we look at, I think, the country, at least through my eyes, I see a situation where we have massive federal, state and local expenditures to deal with the problems of the society—in the case of the federal government, close to $200 billion. We see a shifting of priorities in this country. We see a reduction of defense expenditures. We see a phasing down of the war in Vietnam, base closings, and we see an increase in domestic expenditures. I am concerned. I don't believe that, as we shift priorities—and, indeed, they are shifting—as this happens, I don't believe that it will be desirable for this country to simply put more money into the existing federal programs we have. I don't believe that those faucets are working perfectly. I think some of them are rusted, have barnacles. And I don't think the institutions of this country are functioning in a perfect problem-solving way. And the charter that the President gave the Office of Economic Opportunity and what, if we are successful, will be the case, is that we will see this office embarking on things that are difficult, that are experimental, that are of a research nature, of a program develop nature, to the extent they are successful. We will try to develop them and expand them; to the extent they are not successful, I hope we have the courage to say they are not successful and stop them. But, for example, take the—

Mr. HERMAN. Let me break in right here, Mr. Rumsfeld, for just a moment. We will interrupt at this point, and we will be back to you in a moment.

* * * * *

Mr. HERMAN. Mr. Rumsfeld, I interrupted you in mid-stream. I apologize for that. I would like you to go on. I would also like, if you will, for you to discuss the problem of legal services under OEO.

Mr. RUMSFELD. Yes, indeed. My thought was this, that we have an agency that is very little understood. What it is, essentially, is 49 health centers, neighborhood health centers that are providing the delivery of health services in a very different way; family planning services across the country; migrants, Indian activities, community action agencies, and also some 1,850 legal services lawyers, a worthy legal services program, for example, to be placed under a state plan approach. I think it is likely that we would have great portions of this country where the poor would not have access to the legal system, the kind of access that the support and counsel that legal services lawyers provide. And I believe that it is providing the poor of this country access to the legal system, is exceedingly important; certainly is the most legal, the most reasonable, the most peaceful way to redress grievances in this society that exists.

Mr. HERMAN. In view of the fact that you have said that these amendments, putting it under state control and so forth, would make administering of the program an absolute nightmare. If these amendments, the Quie and Green amendments, pass, will you stay on as Director of OEO?

Mr. RUMSFELD. Well, I would think that we have got the conference, we have got the House action before us, we have got the House-Senate conference, I can't believe the Senate would be agreeable to some of these changes—for example, with respect to the VISTA Program. The effect of these amendments, as I understand it—and I must say, it is difficult to speak precisely about the substitute, because it has only been very recently made available, there have been no hearings on it; there has not been an opportunity to study it in complete depth—but the effect on the VISTA Program would amount to abolishing it, for example. There are 6,000 VISTA volunteers around the country. If it were operated on a state plan, that would mean you would have about 120 per state. Well, there is obviously no state that could conduct national recruiting for VISTA or national training. It would be a very different operation.

Mr. HERMAN. Well, on a hypothetical basis, if this should come about, how do you feel about staying on?

Mr. RUMSFELD. I would think that what would be done, if something like this were passed and approved when finally finished through the Congress, if it proved to be impossible to administer, that the next course of action would be to come up in January with legislation that would correct the defects, because certainly that is the way our system works between the Executive and the Legislative Branch.

Mr. SCHOUMACHER. I cannot, after reading the Hill testimony back in June and the debate recently on the floor, understand why you feel that the provisions of the substitute are as destructive as you seem to think. According to their sponsors, it is now in the law that a state can declare itself the community action agency and take over the program, with the escape valve that local communities can opt out, that that isn't really changed, and they say that there are six separate controls under their substitute that you would have over the program which, if you were dissatisfied with the state program, you could either close it down or you could still take it over and administer it directly from Washington. It is really as destructive as you're saying?

Mr. RUMSFELD. Well, of course, what I have said is that insofar as I am able to assess the substitute at this point, I feel it would be very undesirable. The President made a speech called "new federalism," and he talked about four things. He talked about the new family assistance program, which would revamp the welfare system. He talked about manpower training. He talked about revenue sharing, and he talked about the reorganization and the new charter for the Office of Economic Opportunity. In two of those instances, revenue sharing and manpower, he said that we want to have shared responsibility with the states, and we're going to move the responsibility toward the state in those instances. In the other two, in the family assistance system and in the Office of Economic Opportunity, he said that there is an important federal role. For example, in family assistance, he said there is going to be a national minimum, and he said that the federal government would assume a greater part of the role of financing the welfare programs. And, with respect to the Office of Economic Opportunity, he said something essentially the same. He said there is a need in this country for an office, a federal office, that has as its role the development of better ways of delivering services to the people of this country, better ways of improving economic opportunity, better ways of helping individuals improve their capabilities to take advantage of economic opportunities. There is nothing wrong in the world with having the states involved in many of these programs, and they are in the manpower program, and a variety of others.

My point is that I don't think it is healthy for a society to take all of the activities of the society and put them into the same mold, and this is, in effect, what this approach would seem to me to do. Therefore, I must concede there are parts of that substitute that are perfectly acceptable. We are already doing administratively some of the things that are in that substitute.

Mr. SCHOUMACHER. Well, Mr. Rumsfeld, aren't you also concerned, as some members of the Congress are, about this so-called "poverty industry" that has grown up? Some of these things seem to be almost the cries of pain of bureaucracy rather than of an agency that just wants freedom to innovate and make test programs.

Mr. RUMSFELD. Well, I am concerned, and I have indicated publicly my concern about this problem. I indicated, as a member of the Space Committee, when I saw what was happening in the space field. I discussed it, when I was in the Congress, concerning the defense industry. And it is inevitable. It happens. And it is something that our society has to be very alert to avoid, to the extent that we are able. There is no question but that there are a limited number of people in this country who have experience in space, who have experience in activities the nature of which the Office of Economic Opportunity is involved in. I have been attempting to improve the situation, to rewrite the guidelines, and I think we have done a very effective job.

Mr. NOLAN. On May 26, when you were sworn in at the White House, Mr. Nixon said that your first role would be as an assistant to him in regards to the problems of poor people, and only secondarily as Director of OEO and as a member of the Cabinet. Yet, if you were a poor person in the ghetto somewhere, you would look at the television and you would see Gerry Ford coming out of the White House briefing every week and talking one way, and why should he believe you? I am asking particularly in light of the fact that the Catholic Bishops of New York read at every mass in New York State today a letter talking about the growing bitterness and resentment towards the poor, which they said was caused by some of this legislation. So why should any poor person believe you, when so many other figures are talking another way?

Mr. RUMSFELD. Well, I guess the—I don't know the letter you are referring to, the growing bitterness of the poor or toward the poor?

Mr. NOLAN. Bitterness and resentment of their presence among us is the way the letter reads.

Mr. RUMSFELD. Because it is a comment on the fact that society today——

Mr. NOLAN. Recent legislation that has increased the hardship of many poor people, this is both on the state level—and New York is regarded as a more liberal state than others——

Mr. RUMSFELD. Well, I don't know if you are referring to state or federal legislation, but the fact of the matter is that in the nine months this administration has been in office, it has put forward a host of proposals that are still pending before the Congress concerning the welfare system, food and hunger, manpower training, the Office of Economic Opportunity, and I think that it is regrettable that the Congress has not acted on this legislation.

Mr. NOLAN. Yet they are about to cripple the——

Mr. RUMSFELD. The cold hard fact is that this is December. The fiscal year started five and a half months ago. The Office of Economic Opportunity still doesn't have its funds for the fiscal year that began five and a half months ago. This is no way to run a government. Now, we have passed, I think, four appropriation bills in the Congress thus far. This means that not only can you not plan but it is half through the fiscal year before you even know what you will be getting.

Mr. HERMAN. But, Mr. Rumsfeld, wasn't it the supporters of OEO that, in fact, delayed this program to this point? That is, that they were looking for votes. They didn't have votes until now. Now, at the very end of the session they have tried to push this through, and they have been blocked. It happens all the time on the Hill.

Mr. RUMSFELD. Well, it shouldn't happen, and I don't know that what you are saying is exactly correct. The fact of the matter is that it has happened with a whole list of pieces of legislation that are still before the Congress, that have not been acted on.

Mr. HERMAN. Well, on poverty, let me take you beyond Congress. I don't think it is fair always to belabor Congress as the villain. Do you think that the American people really are willing to support a massive effort to help the poor? For example, at the recent White House Conference on Hunger, the resolution was passed to seek $5,500 a year minimum for a poor family of four. Now, the calculations I've seen mean that this would amount to anywhere from $70 to $100 billion a year. Now, do you think the American taxpayer, to say nothing of the Congress, do you think the American mediumly-wealthy the American taxpayer is willing to support this kind of increase?

Mr. RUMSFELD. Us.

Mr. HERMAN. Us, you, me, everybody, people who own television sets—the American taxpayer is willing to support, whether Congress will or not, that much of an increase?

Mr. RUMSFELD. Well, of course, that isn't the recommendation that the President has made. The President has made a recommendation of a family assistance system to increase the coverage to a vast number of individuals.

Mr. HERMAN. I understand, sir, but——

Mr. RUMSFELD. And my point—I have a lot of confidence in the American people, I really do. I think that, when a subject is intelligently discussed and they understand it—the Office of Economic Opportunity is not for the poor. The Office of Economic Opportunity is for this country, and to the extent that we are able to do a good job in dealing with the problems of the poor, we have made this a better society. And we can't have a country where there is a separation, a division between people, and people feel separated from society.

Mr. HERMAN. And yet the relief rolls climbed 10 percent in the last year.

Mr. RUMSFELD. And this, of course, is testimony to the present welfare system, which is clearly a disaster. Everyone agrees with this, and this is why the President of the United States said, "I am not going to walk one more step down that road." This is the reason he has put before the Congress a very new and exciting and very bold program to completely revamp the present system.

Mr. NOLAN. Your own budget preparations—now, you have to prepare a budget that involves the community action program, legal services, VISTA and the rest, is that going to be considerably higher or at the same level as last year, or—

Mr. RUMSFELD. Well, of course, we are operating in the blind. The fiscal year is half over. We have already started the '71 budget cycle, as President Nixon recently indicated. It may be that the administration will not be able to come forward with the '71 budget because we don't have the vaguest idea from the Congress what we're going to be operating on during the year that is now half over.

Mr. NOLAN. Well, you must have some guidance from people in the White House and the Budget Bureau.

Mr. RUMSFELD. As I say, we are going through the Budget Bureau process right now, and we have requested an increase.

Mr. NOLAN. Are they optimistic, generous? How do you——

Mr. RUMSFELD. Well, I think it is rather clear, that it is a very difficult thing to build a budget for a year to follow on when you have not really been given any idea of what you are going to be able to have during the preceding year. In just developing a budget proposal, it is practically impossible to do it

Mr. SCHOUMACHER. With the minute or so that we have left, could you put on your presidential counsel hat again and tell us what is the problem of getting a new draft director? Do we have one yet? And have people turned it down? What is going on?

Mr. RUMSFELD. Well, it is not an area that I have been personally directly involved in. I will say that, from my experience in Congress, having worked to try and bring about changes in the draft system, I am disappointed that the Congress has not moved further along the line that the President has proposed. I am pleased that we have been able to make some changes. I would guess that there would be a decision on a new director of the Selective Service in a very reasonable period of time.

Mr. NOLAN. You're still for the volunteer army, despite the huge costs?

Mr. RUMSFELD. I am, indeed, and the cost would not be huge. The money difference is what we are presently taxing people by their service in the military. I think that this country is perfectly capable of paying people what they would be able to make in the civilian competitive manpower market for military service.

Mr. HERMAN. Thank you very much, Mr. Rumsfeld, for being with us here today on Face the Nation. We will have a word about next week's guest in a moment.

ANNOUNCER. Today, on "Face the Nation," the Director of the Office of Economic Opportunity, Donald Rumsfeld, was interviewed by CBS News Correspondent David Schoumacher, Martin Nolan, of the Washington Bureau of the Boston Globe, and CBS News Correspondent George Herman.

Mr. RANDALL. Mr. Chairman, I walked through the teller line in the Committee of the Whole in favor of State participation in antipoverty programs. I have no apology because my philosophy has always been in support of States rights. I did not act in haste or without a study of our situation in the State of Missouri. I consulted with some of our State officials and with the Governor of our State. It was their conclusion the poverty program would be improved by greater State participation.

While I agreed there may be some improvement achieved through State developed programs I doubt that even such steps can result in enough improvement soon enough as to make this program acceptable by the majority of my constituents.

Mr. Chairman, I am afraid it may be heretic to criticize the so-called war on poverty. The reason is there are countless organizations and individuals who feel an honest compassion for the plight of the poor in this country. I share that compassion. But I also have a responsibility and obligation to see that the tax money of our constituents is expended in ways that promise reasonable returns from every expenditure. The facts are that due to the high ratio of cost in relation to benefits there is very little to recommend OEO as a vehicle through which want can be eliminated in this country.

Of course, I am not against the poor. I am against money supposedly directed to the poor never reaching the poor. I am against high administrative costs which eats up all the money before it gets to the poor. I suppose that is why I was in favor of further State participation because I believed money spent by the States would do the most good.

Time will not allow enumeration of but a few of the cases of mishandling of funds under the banner of fighting poverty. Yet everyone knows there have been a countless number of instances of personal enrichment of various individuals connected with the Office of Economic Opportunity. Only today the Washington Post reports the indictment of a minister in Richmond, Va., on a charge of embezzling community action program funds. This is not an isolated news report. It just happened to be one that appeared in the paper today.

Mr. Chairman, were I to support H.R. 12321, the people in my district would know that I support the antics of Pride, Inc., here in Washington, D.C., and its director, Marion Barry. These stories have gone out over the wire services from coast to coast. My people know the Blackstone Rangers in Chicago have been subsidized by so-called poverty funds.

Recently, our colleague, the gentleman from Kentucky (Mr. CARTER) reports that the General Accounting Office revealed that in one poverty program conducted in his State, involving $1,100,000, only $295,000, or less than one-third of the total, actually went in direct benefits to the poor. All the remainder was for administrative expenses, which included about $100,000 travel expenses. This same kind of situation has been duplicated over and over throughout the United States.

In former years one of the foremost reasons I have opposed the poverty program was because of the imbalance or inequitable distribution of funding between urban and rural areas. That imbalance still exists. Poverty is just as real in rural America as it is in urban America. But the heavy funding goes to the urban areas. Those in charge of the program argue this is necessary to cool off racial motivated violence. On the contrary, I am convinced that in some of the eastern cities the funding provided by OEO has actually contributed to finance unrest and increased racial disturbances.

As in former years, let me make it clear that there are a few oases in the OEO desert of poor management and maladministration. Once again, I wish to compliment and praise the work of the regional office of OEO in Kansas City, Mo., and its fine director, Don Thomason, as well as the members of his excellent staff. Whenever I have complaints about the operation of some of the projects in our congressional district, he always provides a prompt and complete report. Because of the so-called "city hall" amendment he cannot always right the wrongs complained about, but he has offered suggestions which reduce the repetition of complaints that reach our office.

Yes there are some good things going on within the overall poverty program. Let me take the time to mention a most pleasant experience on Saturday afternoon, November 1, when I had occasion to visit the Sac-Osage Craft Center in Osceola, Mo., in our district. This project funded by the West Central Missouri Rural Development Corp., operating under a very small appropriation in a distinctly rural area is a place where our older people are given a chance to create or produce handicraft objects. They produce wood carvings, make quilts and rugs. They refinish antique furniture and reupholster furniture. All of these items are offered for sale in the craft center to provide added income for the senior citizens of the area who participate in this center. It is a distinct privilege to pay special tribute to Mr. Charles Braithwait, the director and his small staff that have proceeded on a low budget to enrich the lives of the senior citizens of this county. If there were more instances of this sort of good administration OEO would not reap such widespread criticism, but would merit the support of every Member of Congress.

Mr. LOWENSTEIN. Mr. Chairman, I spoke earlier today on the merits of the proposed Quie-Green substitute to the committee bill. I can add little now to what I said then about the merits, other than to express my amazement that if the substitute would be such an improvement every one seems to want his pet program exempted from its provisions.

I also want to remind my colleagues, especially my Republican colleagues, of something that keeps running through my mind as I listen to the oratory today.

One of America's hardest working, most capable, and most promising public servants is the new Director of the OEO. He was elected repeatedly to this House by overwhelming majorities, and came to be respected as one of the brightest and most dedicated men to serve here during this decade.

Furthermore, he is a Republican. So is the President who appointed him and conferred Cabinet status on him, and who now urges support for him.

I know no one who knows Don Rumsfeld who does not admire his integrity and his dedication to the democratic process and to America.

In view of these facts, much of this discussion baffles me. Is Don Rumsfeld the arrogant "bureaucrat" that the minority leader says he would not accept dictation from? Or was that a reference to the President? Is it the contention of those who are pressing this substitute proposal that Don Rumsfeld is incapable of administering the antipoverty program? If that is the case, was the President misguided to appoint him? Or is the contention that when you appoint a capable administrator the best way to use him is to make sure he has as little as possible to administer?

Lest anyone be in any doubt about what the Director of the OEO feels about the vote that is approaching, I am now going to read a statement from him dated December 12, 1969, that is explicit and eloquent about the question now facing us.

STATEMENT OF DONALD RUMSFELD, DIRECTOR, OFFICE OF ECONOMIC OPPORTUNITY, DECEMBER 12, 1969

Since assuming the responsibilities of Director of the Office of Economic Opportunity several months ago, I have repeatedly expressed support for the President's request for an extension of the Act and opposition to a state plan approach. That was my best judgment. It remains my best judgment.

I appreciate the intensive efforts that have been made by many friends of the agency to ameliorate the most objectionable features of the proposed substitute bill. Unfortunately, the end result of that effort has fallen short of what is necessary for an effective program.

While several changes have been made in the substitute bill, the fact remains, by the testimony of the principal author, that they do "not change the substance of the substitute." I agree with that assessment. For that reason it remains my hope that the substitute bill will be defeated.

The Administration has set forth its recommendation. The Senate has supported that position by a vote of 72 to 3. In the event the House adopts a different position, it is my hope and that of the President that the final legislation will meet the requirements for an effective national effort to deal with the problems of the poor.

I believe that this Nation is wise enough and big enough to recognize that there is much work to be done if we are to meet the urgent problems which face society—for the benefit of the poor and the non-poor alike—and get on with the task.

GENERAL LEAVE

Mr. PERKINS. Mr. Chairman, I ask unanimous consent that all Members who may desire to do so and who have not had an opportunity to speak on this legislation, may be permitted to insert their remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. The question now recurs on the substitute amendment offered by the gentleman from Ohio (Mr. AYRES), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. AYRES. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. AYRES and Mr. PERKINS.

The Committee divided, and the tellers reported that there were—ayes 167, noes 183.

So the substitute amendment, as amended, was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE I—EXTENSION OF AUTHORIZATION

SEC. 101. For the purpose of carrying out programs under the Economic Opportunity Act of 1964 for which there are no separate authorizations of appropriations in——

Mr. PERKINS. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

Mr. GUBSER. Mr. Chairman, reserving the right to object, may I inquire of

the gentleman from Kentucky if he intends to close off debate and the opportunity to offer amendments?

Mr. PERKINS. Let me say to my distinguished friend, we want to close this thing out tonight.

Mr. GUBSER. Mr. Chairman, I object.

The CHAIRMAN. The Clerk will continue to read.

The Clerk read as follows:

such Act, there are hereby authorized to be appropriated $1,563,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971.

SEC. 102. Sections 161, 245, 321, 408, 615, and 835 of the Economic Opportunity Act of 1964 are each amended by striking out "1967" and by inserting in lieu there of "1969". Section 523 of such Act is amended by striking out "June 30, 1968, and the two succeeding fiscal years" and by inserting in lieu thereof "June 30, 1969, and the three succeeding fiscal years".

TITLE II—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

SEC. 201. Title I of the Economic Opportunity Act of 1964 is amended redesignating part E as part F, by renumbering section 161 (as amended by section 102 of this Act) as section 171, and by inserting after part D, the following new part:

"PART E—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

"STATEMENT OF PURPOSE

"SEC. 161. The Congress finds that the 'Operation Mainstream' program aimed primarily at the chronically unemployed and the 'New Careers' program providing jobs for the unemployed and low-income persons leading to broader career opportunities are uniquely effective; that, in addition to providing persons assisted with jobs, the key to their economic independence, these programs are of advantage to the community at large in that they are directed at community beautification and betterment and the improvement of health, education, welfare, public safety, and other public services; and that, while these programs are important and necessary components of comprehensive work and training programs, there is a need to encourage imaginative and innovative use of these programs, to enlarge the authority to operate them, and to increase the resources available for them.

"SPECIAL PROGRAMS

"SEC. 162. (a) The Director is authorized to provide financial assistance to public or private nonprofit agencies to stimulate and support efforts to provide the unemployed with jobs and the low-income worker with greater career opportunity. Programs authorized under this section shall include the following:

"(1) A special program to be known as 'Mainstream' which involves work activities directed to the needs of those chronically unemployed poor who have poor employment prospects and are unable, because of age, physical condition, obsolete or inadequate skills, declining economic conditions, other causes of a lack of employment opportunity, or otherwise, to secure appropriate employment or training assistance under other programs, and which, in addition to other services provided, will enable such persons to participate in projects for the betterment or beautification of the community or area served by the program, including without limitation activities which will contribute to the management, conservation, or development of natural resources, recreational areas, Federal, State, and local government parks, highways, and other lands, the rehabilitation of housing, the improvement of public facilities, and the improvement and expansion of health, education, day care, and recreation services;

"(2) A special program to be known as 'New Careers' which will provide unemployed or low-income persons with jobs leading to career opportunities, including new types of careers, in programs designed to improve the physical, social, economic, or cultural conditions of the community or area served in fields of public service, including without limitation health, education, welfare, recreation, day care, neighborhood redevelopment, and public safety, which provide maximum prospects for on-the-job training, promotion, and advancement and continued employment without Federal assistance, which give promise of contributing to the broader adoption of new methods of structuring jobs and new methods of providing job ladder opportunities, and which provide opportunities for further occupational training to facilitate career advancement.

"(b) The Director is authorized to provide financial and other assistance to insure the provision of supportive and follow-up services to supplement programs under this part including health services, counseling, day care for children, transportation assistance, and other special services necessary to assist individuals to achieve success in these programs and in employment.

"ADMINISTRATIVE REGULATIONS

"SEC. 163. The Director shall prescribe regulations to assure that programs under this part have adequate internal administrative controls, accounting requirements, personnel standards, education procedures, availability of in-service training and technical assistance programs, and other policies as may be necessary to promote the effective use of funds.

"SPECIAL CONDITIONS

"SEC. 164. (a) The Director shall not provide financial assistance for any program under this part unless he determines, in accordance with such regulations as he may prescribe, that—

"(1) no participant will be employed on projects involving political parties, or the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(2) the program will not result in the displacement of employed workers or impair existing contracts for services, or result in the substitution of Federal for other funds in connection with work that would otherwise be performed;

"(3) the rates of pay for time spent in work-training and education, and other conditions of employment, will be appropriate and reasonable in the light of such factors as the type of work, geographical region, and proficiency of the participant; and

"(4) the program will, to the maximum extent feasible, contribute to the occupational development and upward mobility of individual participants.

"(b) For programs which provide work and training related to physical improvements, preference shall be given to those improvements which will be substantially used by low-income persons and families or which will contribute substantially to amenities or facilities in urban or rural areas having high concentrations or proportions of low-income persons and families.

"(c) Programs approved under this part shall, to the maximum extent feasible, contribute to the elimination of artificial barriers to employment and occupational advancement.

"(d) Projects under this part shall provide for maximum feasible use of resources under other Federal programs for work and training and the resources of the private sector.

"PROGRAM PARTICIPANTS

"SEC. 165. (a) Participants in programs under this part must be unemployed or low-income persons. The Director, in consultation with the Commissioner of Social Security, shall establish criteria for low income, taking into consideration family size, urban-rural and farm-nonfarm differences, and other relevant factors. Any individual shall be deemed to be from a low-income family if the family receives cash welfare payments.

"(b) Participants must be permanent residents of the United States or of the Trust Territory of the Pacific Islands.

"(c) Participants shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, leave, unemployment compensation, and Federal employment benefits.

"EQUITABLE DISTRIBUTION OF ASSISTANCE

"SEC. 166. The Director shall establish criteria designed to achieve an equitable distribution of assistance among the States. In developing those criteria, he shall consider, among other relevant factors, the ratios of population, unemployment, and family income levels. Of the sums appropriated or allocated for any fiscal year for programs authorized under this part not more than 12½ per centum shall be used within any one State.

"LIMITATIONS ON FEDERAL ASSISTANCE

"SEC. 167. Programs assisted under this part shall be subject to the provision of section 131 of this Act.

"AUTHORIZATIONS

"SEC. 168. For the purpose of carrying out programs under this part, there are hereby authorized to be appropriated $110,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971."

TITLE III—SPECIAL COMPREHENSIVE PRESCHOOL PROGRAMS AND PROGRAMS PROVIDING FOR INTENSIVE FOLLOW THROUGH EDUCATION FOR PRIMARY SCHOOL CHILDREN

SEC. 301. (a) The Economic Opportunity Act of 1964 is amended by adding at the end thereof the following:

"TITLE IX—SPECIAL COMPREHENSIVE PRESCHOOL PROGRAMS AND PROGRAMS PROVIDING FOR INTENSIVE FOLLOW THROUGH EDUCATION FOR PRIMARY SCHOOL CHILDREN

"FINDINGS AND PURPOSE

"SEC. 901. The Congress finds that children participating in Head Start projects and other preschool programs are afforded an increased opportunity for learning and healthy maturation, that more effective and maximum benefits accrue to children participating in preschool programs when special educational programs are provided for such children in the early primary grades immediately following their preschool participation, and that preschool and special educational programs and services provided in the early primary school years afford children with culturally deprived, educationally lacking, or economically distressed family background an essential opportunity to participate in the economic, social, and political mainstream activities of American life. It is the purpose of Congress in this title to afford broad authority to the Director, either acting directly or by delegation pursuant to the provisions of title VI of this Act, to broaden the opportunities of the children described in this paragraph for preschool and early primary education, including provisions for parental and home involvement, utilizing to the maximum extent possible existing agencies and organizations and resources to accomplish such purposes.

"AUTHORIZATIONS

"SEC. 902. For the purpose of carrying out the provisions of this title, the Director is authorized to make grants to community action agencies, local educational agencies, or other public or nonprofit agencies with the approval of the appropriate community action agency, or to a local educational agency or other public or nonprofit agency in an area where there is no community action agency. For the purpose of carrying out programs under this title, there are hereby authorized to be appropriated $578,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971.

"ALLOTMENT OF FUNDS; LIMITATIONS ON ASSISTANCE

"SEC. 903. The sums which are appropriated or allocated for the purpose of making grants under this title shall be alloted pursuant to section 225 of this Act and such sums and project assistance shall be subject to the provisions of that section.

"USES OF FUNDS

"SEC. 904. (a) Grants made pursuant to this title may be used for (1) the continuation of programs authorized by sections 222(a) (1) and (2) of this Act prior to the enactment of the Economic Opportunity Act Amendments of 1969, and known as 'Project Head Start' and 'Follow Through', where consistent with the purposes of this title, (2) planning for and taking steps leading to the development of early childhood programs for the benefit of children with culturally deprived, educationally lacking or economically distressed family backgrounds, including appropriate arrangements with educational agencies for special educational programs and services for the further intensified provision of educational opportunities for such children during the early years of compulsory school attendance, (3) the provision within such programs of such comprehensive health, nutritional, social, and other services as the Director finds will assist such children in gaining their full potential, (4) providing for direct participation of the parents of such children in the development, conduct, and overall program direction at the project operating level, (5) the establishment, maintenance, and operation of preschool and early primary school programs for the children described in this section, including the lease or rental of necessary facilities and the acquisition of necessary equipment and supplies necessary to provide comprehensive programs as described in this section, (6) the provision of comprehensive physical and mental health services for children needing such assistance in order to profit from educational programs, (7) food and nutritional services, including family consultative and educational programs to improve nutrition in the home, (8) special social services to broaden the educational environment in the homes of the homes of the children participating in such programs, and (9) other social and educational activities, including summer, weekend, and vacation programs for such children which are deemed by the Director to further the purposes of this title."

SEC. 302. Section 222(a) of the Economic Opportunity Act of 1964 is amended by striking out paragraphs (1) and (2) thereof.

TITLE IV—INTENSIVE PROGRAMS TO ELIMINATE HUNGER AND MALNUTRITION

SEC. 401. The Economic Opportunity Act of 1964 is amended by adding at the end thereof the following:

"TITLE X—INTENSIVE PROGRAMS TO ELIMINATE HUNGER AND MALNUTRITION

"STATEMENT OF PURPOSE

"SEC. 1001. Congress finds that existing programs aimed at providing surplus foods and free meals to needy children and families often are structured so as to have no or little impact on extremely economically disadvantaged children and families; that to reach the many victims of such impoverished circumstances, existing programs must be supplemented and broadened to produce effective results; that supplementary activities, requiring improved delivery services, increased family food subsidies, intensive family and child educational components, and emergency family medical services, are required frequently in the homes of the most economically disadvantaged; and that such conditions operate most severely on the elderly and the very young. It is the purpose of this title to provide broad authority to meet such needs expeditiously.

"AUTHORITY TO PROVIDE FOOD AND MEDICAL SERVICES AND SUPPLIES

"SEC. 1002. The Director is authorized to provide, directly or by delegation of authority pursuant to the provisions of title VI of this Act, financial assistance for the provision of such medical supplies and services, nutritional foodstuffs, and related services, as may be necessary to counteract conditions of starvation or malnutrition among the poor. Such assistance may be provided by way of supplement to such other assistance as may be extended under the provisions of other Federal programs, and may be used to extend and broaden such programs to serve extremely economically disadvantaged families with particular emphasis on the elderly and the extremely young where such services are not now provided and without regard to the requirements of such laws for local or State administration or financial participation. In extending such assistance, the Director may make grants to community action agencies or local public or private nonprofit organizations or agencies to carry out the purposes of this title. The Director is authorized to carry out the functions under this title through the Secretary of Agriculture and the Secretary of Health, Education, and Welfare in a manner that will insure the availability of such foodstuffs, medical services and supplies through a community action agency where feasible, or other agencies or organizations if no such agency exists or is able to administer programs to provide such foodstuffs, medical services, and supplies to needy individuals and families.

"AREAS OF SPECIAL EMPHASIS

"SEC. 1003. The Director shall take steps to assure that programs under this title shall be designated to deal particularly with the incidence of malnutrition, hunger and serious medical needs among persons in economically disadvantaged circumstances who are fifty-five years of age and older and young children. In the conduct of such programs, the Director shall encourage the employment of such elderly persons as regular, part-time, and short-term staff in programs designed to carry out the provisions of this title.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1004. For the purpose of carrying out programs under this title, there are hereby authorized to be appropriated $92,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971."

SEC. 402. Section 222(a) of the Economic Opportunity Act of 1964 is amended by striking out paragraph (5) thereof.

TITLE V—MISCELLANEOUS

AMENDMENT OF RURAL LOAN PROGRAM

SEC. 501. Section 302(a) of the Economic Opportunity Act of 1964 is amended by striking out "such families, and" and inserting "such families, or".

AVAILABILITY OF LEGAL SERVICES TO ARMED FORCES PERSONNEL

SEC. 502. Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following: "Members of the Armed Forces, and members of their immediate families, shall be eligible to obtain legal services under such programs in cases of extreme hardship (determined in accordance with regulations of the Director issued after consultation with the Secretary of Defense). The costs of providing such services shall be reimbursed by the Secretary of Defense."

APPLICABILITY TO TRUST TERRITORY

SEC. 503. Section 609(1) of the Economic Opportunity Act of 1964 is amended by striking out "and title II" and inserting ", title II, title III–A, and title IV".

Mr. PERKINS. Mr. Chairman, I renew my request. I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, every Member realizes that we are considering a very important bill. It means a great deal to countless millions of human beings in America, human beings like ourselves. The Committee of the Whole has defeated the substitute amendment, an action which I strongly supported. I assume the amendment will be the subject of a motion to recommit. At that time we must keep in mind that the substitute essentially turns control of the entire poverty program over to the States and thereby interposes another level of government. This will slow down assistance to the poor. In so doing the substitute attacks the basic concept of the 1964 law that local communities should identify the causes of poverty in their areas, as the local people know their problems, and also the local communities should design and carry out such programs.

The committee bill calls for a 2-year extension, which President Nixon called for and requested; but it also provides additional funds, authorized funds for, one, Headstart; two, Headstart Follow Through; three, emergency food and medical services; four, Operation Mainstream and New Careers, which relates to manpower programs.

I am sure that everyone here recognizes the justification for these programs that I have just mentioned that are included in the committee bill and for which additional funds are requested.

Under the substitute the State is placed in charge of the Community Action moneys, substituting itself for the local government. The additional money for these programs is $295 million over the substitute.

Practically all church organizations testified in support of an extension of the program and for additional funds, especially in the hunger and medical programs, Operation Mainstream, and New Careers.

The substitute adds three more worthy programs, I will admit, but, the substitute will add, as I understand it, if offered as it was a little while ago, three more programs, but it does not provide additional funds to finance them, which means that programs already in opera-

tion would have to suffer a reduction in the allocation of funds and a reduction in the existing programs themselves, those programs being Headstart, emergency food and medical programs, consumer education programs and neighborhood service programs.

So I hope when a motion to recommit is offered, Members will realize what is included in the substitute. It will slow down the program.

Mistakes, yes. We make mistakes in connection with our duties as we look back. But a decided improvement has been made all along, through the time the antipoverty program has been in existence; it is doing a good job and is improving.

I hope that when the substitute is offered on a motion to recommit, the House at that time will defeat the motion to recommit.

AMENDMENT OFFERED BY MR. GUBSER

Mr. GUBSER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GUBSER: Immediately following section 502, insert the following:

"LIMITATION ON LEGAL SERVICES PROGRAMS

SEC. 303. Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out 'counseling, education, and other appropriate services' and inserting in lieu thereof 'legal counseling, education in legal matters, and other appropriate legal services'."

And renumber the sections which follow accordingly.

The CHAIRMAN. The gentleman from California is recognized for 5 minutes in support of his amendment.

Mr. PERKINS. Mr. Chairman, will the distinguished gentleman yield?

Mr. GUBSER. I am happy to yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Chairman, I rise for the purpose of accepting the gentleman's amendment.

Mr. GUBSER. I thank the gentleman for his gracious consideration.

Mr. Chairman, I ask unanimous consent that the section number be renumbered so that I am amending the proper section of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. AYRES. Mr. Chairman, I move to strike the last word.

I realize that everyone is anxious to vote on the bill. I believe it would be proper for me to explain what the motion to recommit will be.

The motion to recommit will be the substitute which was previously offered, including the amendment by the gentleman from Michigan (Mr. ESCH), which was added to the substitute, and any other amendments which were adopted to the substitute.

Mr. GERALD R. FORD. Mr. Chairman, will the gentleman from Ohio yield?

Mr. AYRES. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. As I understand the situation, the motion to recommit will be the Ayres substitute, with the Esch amendment, and the Gubser amendment. In addition, it would include, as I understand it, the amendment offered by the gentleman from Missouri (Mr. RANDALL).

Let me add this, if I may, Mr. Chairman: If the substitute is not approved on a rollcall vote—and of course there will be one—then we will have a choice to vote for or against the committee version which, as I recollect, is the dollar recommendation of the Nixon administration plus $300 million extra.

I say to some of my friends on this side of the aisle, if you want to end up adding $300 million to the budget recommendation of the administration I hope you do it with your eyes wide open. It seems to me the better approach is to accept the substitute with the amendments that were included when the Committee of the Whole was working its will.

I therefore urge most strongly that the motion to recommit be approved, which is the dollar amount recommended by the President. In the final analysis, analyze where you are if the motion to recommit is disapproved.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. GUBSER).

The amendment was agreed to.

Mr. PERKINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I hope that we may be able to vote in a very few minutes. I am most hopeful that we will be able to vote down the motion to recommit.

The action taken here in the last hour displays that little thought had been given to this substitute. There is no protection in the substitute for a local community, for a municipality, for a local community action agency. They cannot opt out of a State plan. If they do there is no funding available for their program.

Now, if you will remember, under section 253 any State which has in operation a State development and coordination program the State plan covers all community action programs and most title II money will be disbursed in accordance with the State plan. In my judgment this will destroy initiative at the local level.

A local community action agency can be completely ignored. As I stated earlier there is much more sense in placing the cities in charge of this program than putting the States in charge under the pretense of coordination. The priorities of local officials and members of the community may be thrown in the waste paper basket at the State level if such priorities are in conflict with the State plan.

Mr. Chairman, this House should vote against this substitute because if we do not we may do terrific damage to the ghetto areas of the country. Poor rural areas will never have a voice. In other words, there is no meaningful opt out for a poor community in this substitute anywhere. There is no opting out, and I know the sponsors of the substitute will not contend that there is any opting out since most title II funds will only be available for programs in the State plan.

Mr. CAREY. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from New York.

Mr. CAREY. Mr. Chairman, the gentleman from Kentucky is making a very important statement and I want him to confirm my judgment in regard to what was said by the distinguished minority leader with regard to the money contained in this bill and the Nixon program and the budget estimates of the Nixon administration.

I am sure that the distinguished minority leader did not intend to mislead this Committee by indicating there was $300 million in this bill in addition and that the substitute was in accordance with the Nixon budget estimates.

I know that the gentleman from Kentucky will agree with me that there are three new programs contained in the substitute, none of which have been priced out. There is the emergency food and medical services. Operation Mainstream, and New Careers as well as Headstart and Follow Through which involve millions and millions more. So, this could be a $1 billion additional authorization on an open-ended basis with no price tag and, therefore, we do not know what the ultimate cost will be.

Mr. PERKINS. That is correct. Let me say to the minority leader that we added $188 million for Headstart and Follow Through, because we are currently taking care of only 10 percent of the poor children in the Nation today. For the hunger and malnutrition and medical services program, we added $62 million. For New Careers and for Mainstream which provides jobs and training for the hard-core unemployed, we added $54 million.

If we vote for this motion to recommit, we are voting against the advice of the administration and we are voting against the hard-core unemployed and the little children who desperately need child-development services. We must vote down the motion to recommit.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the distinguished Speaker.

Mr. McCORMACK. I am very sorry to hear the argument made by my dear friend from Michigan, the distinguished minority leader, because it brought back many memories of great fights in this body in years gone by where the basic issue was money values versus human values.

The gentleman from New York (Mr. CAREY) has shown that the substitute actually reduces the authorization by establishing three more worthy programs, but not provided for is the financing which would have to be taken out of the existing programs.

So, the real basic issue here, regardless of what my friend from Michigan has said, is materialism versus idealism and money values against human values.

Mrs. GREEN or Oregon. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have felt very strongly that there are many, many things wrong with the present OEO—the so-called War on Poverty and I have fought for changes that I believe should be made in the program, not on the basis that I am against the poor, but rather that I am in favor of the money going

to the poor instead of to big corporations—to those who benefit financially—to those who benefit by retaining the status quo.

Mr. Chairman, I am not going to speak long tonight, but I do believe that the record ought to at least reflect what is accurate and what is truthful about the substitute bill.

First of all, under the present legislation a State can be a community action agency. That is the law at the present time. It has been violated by the Office of Economic Opportunity. If the law were enforced any State today that wanted to could be designated as a community action agency, and it would have total authority over all programs, over all policies, and over all funding, everything that could be done under the substitute bill. I cannot believe that the legislative branch charged with writing the laws is going to give a vote of confidence to an agency that repeals the law by guidelines and regulation. Even though you may have voted against the amendment and the bill in 1967—surely you do not give your blessing to an executive branch agency that refuses to follow the law. If so, we embark upon a new era in Government.

The statement has been made over and over that a city cannot opt out. That simply is not true. But those who repeat it must have taken their line from Alice in Wonderland: "What I tell you three times is so." If there is a State community action agency a city can opt out the same as they can at the present time. There was no change in that, and I think the record should present the true facts on it.

In terms of the new programs, I regret very much that these new programs were not included. I think it is actually disgraceful in the United States today that we have, according to the estimates—in writing to the 50 States—about 10,000 families of GI's who are living below the poverty level. We pay money—all kinds of money in the poverty program to finance people who are not half as deserving. We have paid money to people who have demonstrated in the streets, who have made threats, who have contributed to violence. I think the families of the GI's—GI's who are in Vietnam or other places, who do not have the rights of the veterans because they are not veterans, should be taken care of, and we make no provision for these families. In the substitute bill—we direct OEO to pay the difference between what that family now has and the amount to bring them up to the poverty level. The estimates are that there are about 10,000 families. This might cost $10 million. But if it were to cost $50 million, we could spend it better this way than the money that goes to private corporations, a half billion dollars. From this saving, we would certainly be able to pay for these cash amounts to families of veterans.

Then we have heard so much in the House in the last 2 days about the elderly—about the inadequate social security payments, and we simply said as a pilot project that we would take those elderly people over 65 who are below the poverty level that the Government itself sets, and we would give them the amount to bring them up to that poverty level. It would be given on the basis of their needs, not on the basis of every social security recipient.

The third program which we suggest was the amendment which is in the Senate bill which will go to conference anyhow, that was offered by Senator HUGHES of Iowa, that would provide for an alcoholic program. I do not know of any single thing that has impoverished more Americans today than the question of alcoholism.

These are the three programs that we felt needed the funds. That we could save money, that money which is going to the private profitmaking corporations, that was spent on the Blackstone Rangers in Chicago, the Black Panthers in Cleveland, and a lot of other groups who are able bodied and who could get out and work. If we are really concerned about poverty, if we mean what we say—these are three areas where poverty funds could and should be spent.

It is for these reasons, Mr. Chairman, that I rise, simply to set the record straight. The substitute is not an effort to dismantle the Office of Economic Opportunity, but it is rather an effort to coordinate the programs, to take all of the multitudinous programs that we have in the Federal and State Governments, and to give people at the State level a chance to coordinate those programs so that the money would go where it would do the most good.

The other amendments on preventing political activity by OEO employees, putting a stop to nepotism—putting a stop to paying dues to lobby organizations out of Federal funds—these you know are part of the substitute. The opportunity presents itself to make meaningful changes—stop the abuses or continue for 2 more years what has become a disgraceful program.

AMENDMENT OFFERED BY MR. STEIGER OF WISCONSIN

Mr. STEIGER of Wisconsin. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STEIGER of Wisconsin: On page 16, line 10, after the period insert:

"SEC. 504. Notwithstanding any other provision of this bill the total expenditures authorized for programs authorized in their bill shall not exceed $2,048,000,000."

Mr. STEIGER of Wisconsin. Mr. Chairman, this amendment is perhaps not what I would like to have offered.

I would prefer to offer an amendment striking all that was added by the committee.

What this amendment does and what its effect is intended to be is to reduce the level of expenditures authorized in the committee bill by $295 million.

The adoption of the amendment would put the bill back in the form recommended by the Nixon administration, and agreed to by the distinguished gentleman from Kentucky, the chairman of the committee who is a cosponsor of the bill, H.R. 12321, and myself, and the gentleman from Michigan (Mr. GERALD R. FORD), the Director of the OEO and others, at a level of $2,048,000,000.

I made it clear and I say again to the Committee, it is always difficult to justify going beyond the expenditure level recommended by the administration—and I opposed reporting this bill on that basis because of all the additional funds and new programs.

If this amendment is adopted, it seems to me we clear the air and we put the committee bill back in the posture that it was prior to the additions of $295 million. I think it would give a chance to the House to work its will in a way that will enable us to preserve the agency and its integrity, and to preserve the action of the House, the budget and the posture of the administration in this instance.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Wisconsin. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. What the gentleman is really doing is taking recognition of the facts that exist. There was no money in the HEW appropriation bill that passed the House. The Senate has marked up the bill. They put in $1.948 billion. Therefore, under the rules that is the most money that the conferees can agree upon for this year, anyway. So what you are really doing is recognizing the facts of life. We could put $5 billion into this authorization, but under our procedures here, we cannot appropriate that kind of money. You are just recognizing the facts.

Mr. STEIGER of Wisconsin. I appreciate the gentleman's contribution.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Wisconsin. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. I, too, wish to commend the gentleman who is in the well for offering an amendment that I think is in keeping with fiscal responsibility. We have heard over and over again that the brunt of inflation is always borne by the poor. I think even in this instance, where I support our Director and his program, in view of the fact that we are almost 6 months into the present fiscal year and due to an inflationary condition in the country, I would hope that Members on both sides of the aisle will join in supporting what I think is a highly responsible effort.

Mr. STEIGER of Wisconsin. I appreciate very much the gentleman's contribution and his support of the amendment.

Mr. HAWKINS. Mr. Chairman, I move to strike out the requisite number of words.

I hope it is realized what this amendment is doing. You may talk about inflation. But it seems to me that we should not ask the poor people of this Nation to pay for the prosperity of some of us. Since January of this year 350,000 persons have lost their jobs. Since June of last year more than 1 million cases have been added to the welfare rolls. What you are doing, if you do not accept the committee bill, you are then saying to the poor people of this country, "You alone should bear the cost of trying to maintain price stability." By this amendment you will say to 175,000 children in Headstart, "You will not have an opportunity in life to get a decent educa-

tion." And also to 62,000 Follow Through, "We are going to cut you off." You will reduce the amount of emergency food and medical attention by $75 million to merely $17 million. You will say then to 15 million starving Americans, "We do not care anything about you."

Mr. STEIGER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Wisconsin.

Mr. STEIGER of Wisconsin. I have great respect for the gentleman in the well, but I think it would be totally unfair and completely wrong to characterize an amendment of this kind, which reduces something which has not been available before, as a barrier to opportunity. As the gentleman from Iowa (Mr. SMITH) pointed out, the budget level will be even below the $2.048 billion provided. That is what Congress will appropriate. Let us not go through the charade of saying that we are taking things out of the mouths of children when they never had it in the first place.

Mr. HAWKINS. That is not true. In a change of policy adopted by this administration since the first of this year the Headstart project has been changed so that the summer programs are not now available, and the amount of money which will then be available will mean, unless extra money is appropriated, that this number, 175,000 children, will not have slots in that program. And to say, as you do, if we do not appropriate the money, then you have done no harm, but how in the world can you, in spite of the need, the demonstrated need, since the first of this year—and conditions are not as good this year as they were last year—how can you say then, with a greater need, that we should now authorize less than was authorized 2 years ago?

That is a fact, and that is what your amendment is doing. Now, if you want to do that, then I go back to what the Speaker has already said. You are voting not for human rights; you are voting for so-called price stability. I agree we should fight inflation, but I say at the time we fight inflation let us have some special programs to take care of those who will be injured by the economic policies that are now operating under this administration, and I say started under the past administration, so it is not a partisan issue. It is a fact that we are worse off today and that consequently we should vote more money and certainly not less money.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Florida.

Mr. GIBBONS. I think the gentleman well knows that there are 25 million poor people in this country. We are authorizing roughly $2 billion. That works out to a grand total of 21 cents a day for those people. I think we can afford to do a little better than that. Does not the gentleman think so?

Mr. HAWKINS. If we cannot, then we certainly should not be talking about sending planes to China.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. STEIGER).

The question was taken; and on a division (demanded by Mr. STEIGER of Wisconsin) there were—ayes 93, noes 111.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. WHITE

Mr. WHITE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITE: On page 16 after line 10 insert the following:

"AUTHORIZATION OF NARCOTIC ADDICT RECOVERY PROGRAM

"SEC. 504. Section 222(a) of such Act is further amended by adding to the end thereof the following new paragraph:

"'(9) A "Narcotic Addict Recovery" program designed to discover and bring about post and/or preinstitutional treatment for narcotic addiction. Such a program shall be community based, with appropriate participation by parents, youth, educators and others in the community, serve the objective of maintaining the family structure as well as the recovery of the individual addict, encourage the use of neighborhood facilities and the services of former addicts as program workers and facilitate the re-entry of addicts into society. Such a program shall also emphasize the coordination and full utilization of existing community services which pertain to the treatment of addiction and/or related disorders.'"

The CHAIRMAN. The gentleman from Texas is recognized for 5 minutes in support of his amendment.

Mr. WHITE. Mr. Chairman, this amendment would provide a narcotic addict recovery program on a community base and with community participation. Institutional treatment of narcotic addiction poses two problems:

First. Institutional treatment facilities are very overcrowded and cannot handle even the known addicts.

Second. Institutional addiction treatment facilities that are removed from the addict's community cannot adequately prepare the addict for the stresses he experiences upon return to his community.

The program would provide a variety of supportive services for the addict while he was awaiting assignment to a treatment facility and when he returns from one.

The utilization of community persons and former addicts will bring persons known and familiar to the addict in contact with him. This familiarity will inspire trust by the addict—a trust that officials from "downtown" have difficulty inspiring.

Involvement of community persons in the problems of addiction in their own community will serve as an educational and prevention program. In many low-income communities, narcotics addiction is a problem that affects almost every family. Involvement of the community in the treatment of addicts can alert them both to the dangers of narcotics—of which the adults, if not the youth, are aware—and, most important, that addiction can be prevented and that they can help. Families in low-income communities often feel helpless before the threat of narcotics addiction in their neighborhoods. This program would allow them to take effective action.

This program, since it is OEO, would be restricted largely to low-income neighborhoods, where the problem of "hard-core" narcotics is centered.

Mr. PERKINS. Mr. Chairman, will the distinguished gentleman yield?

Mr. WHITE. I yield to the gentleman from Kentucky.

Mr. PERKINS. Let me state to the distinguished gentleman from Texas that his amendment was accepted a few moments ago to the substitute, and I do not know of any objection from this side of the aisle to the gentleman's amendment, and it will be accepted.

Mr. WHITE. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WHITE).

The amendment was agreed to.

Mr. BOGGS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I believe that we have concluded, or about concluded, the debate on this very important bill. It has been a splendid debate.

I must say, as the majority whip, I have been very proud to see the large attendance of Members on the floor on both sides of the aisle.

Soon we will be confronted with voting again on the substitute offered earlier here today and defeated in the Committee by a teller vote. That vote may be very close. I sincerely hope that the motion to recommit will be defeated in the full House as the substitute as defeated in the Committee a moment ago.

To change now a program which is only beginning to be felt and change its national impact would in my judgment be the height of folly.

Mr. Chairman, it is my contention that those who support the committee are actually lending support to the President in that he has come into this body and selected one of our most able younger Members on the Republican side of the aisle and asked him to head up the program. At the time of his appointment the President announced that he would have Cabinet status.

I cannot believe that a few months thereafter we will, in effect, turn back the clock and scuttle a program which, whether you believe it or not, has been tremendously helpful to the poor people of this country. I can only speak from experience. I have the great privilege of representing one of the large cities in the South, a city which has a very diversified population and a long history, but a city which also has the same problems that every other large city in this Nation is confronted with; namely, the tremendous increase, particularly in the inner city, of people who unfortunately are not skilled, not trained and in many instances with no education at all.

Now, since we have adopted this program, men and women have gone into the poor areas of my city with the Headstart program where we had children who could not articulate the simplest words in the English language at ages 5 and 6 but where we brought them in and taught them and in a matter of several years made them a part of the community where they could function.

The community action programs have been most successful in my city, a Southern city, and headed up by men and women of dedication and not people who are corrupt or scheming or graspy or greedy and who try to live as octopuses on the body politic. They are dedicated

people trying to do a job for their fellow citizens.

Mr. Chairman, I do not think we ought to make a mistake about what we do here today. I do not think we ought to sail under any false colors. If we vote to dismantle this program now we are saying to the millions and millions of disadvantaged citizens of our country of all types and backgrounds that we have indeed turned our backs on you and we have left you to do as best you can in this highly complex, violent, and complex society in which we live.

Mr. Chairman, I trust that the motion to recommit will be defeated.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee substitute amendment, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ROONEY of New York, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 12321) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes, pursuant to House Resolution 734, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment adopted in the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. AYRES

Mr. AYRES. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. AYRES. I am, in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. AYERS moves to recommit the bill H.R. 12321 to the Committee on Education and Labor, with instructions that it be reported back forthwith, with all after the enacting clause struck out, and the following substitute inserted in lieu thereof:

That this Act may be cited as the "Economic Opportunity Act Amendments of 1969."

TITLE I—EXTENSION OF AUTHORIZATION

SEC. 101. For the purpose of carrying out programs under the Economic Opportunity Act of 1964, there is hereby authorized to be appropriated $2,048,000,000 for each of the fiscal years ending June 30, 1970, and June 30, 1971.

SEC. 102. Sections 161, 245, 321, 408, 615, and 835 of the Economic Opportunity Act of 1964 are each amended by striking out "1967" and by inserting in lieu thereof "1969". Section 523 of such Act is amended by striking out "June 30, 1968, and the two succeeding fiscal years" and by inserting in lieu thereof "June 30, 1969, and the three succeeding fiscal years".

TITLE II—STATE PARTICIPATION IN ANTIPOVERTY PROGRAMS

SEC. 201. Title II of the Economic Opportunity Act of 1964 is amended by striking out section 231 (relating to "State Agency Assistance") and by inserting at the end of the title a new part, as follows:

"PART E—PARTICIPATION OF STATES

"STATEMENT OF PURPOSE

"SEC. 250. It is the purpose of this part to provide an effective mechanism for the positive involvement of State officers, agencies, and administrative resources in the development, carrying out, and coordination of antipoverty programs within each State, but only if and to the extent a State exercises the options set forth in this part. Accordingly, no State shall be required to establish a State Economic Opportunity Office described in section 251, or to take the further actions outlined in this part, as a condition for the support of programs under this Act in the State. In the event a State shall not choose to participate in the manner provided in this part, or is unable to satisfy the requirements for such participation set forth in this part, the Director shall continue to support eligible programs and projects in such State. However, the Director shall take every appropriate action to encourage effective State participation under this part in accordance with the finding of the Congress that such participation will strengthen the programs authorized by this Act.

"STATE AGENCY ASSISTANCE

"SEC. 251. (a) The Director shall provide financial assistance to the State Economic Opportunity Office (hereinafter referred to as the 'State Office') designated in accordance with State law, to enable such agency—

"(1) to advise the Governor of the State with respect to the policies and programs of the Office of Economic Opportunity and other resources available to combat poverty within the State, and at the request of the Governor to advise and assist him in carrying out his responsibilities under this Act;

"(2) to assist in coordinating State activities related to this title and to title VIII;

"(3) to provide technical assistance to communities and local agencies in developing and carrying out programs under this title and under title VIII;

"(4) to evaluate programs assisted under this title and under title VIII with a view to improving the capacity of their sponsors to fulfill the purposes of this Act and to utilize with maximum efficiency the financial assistance provided;

"(5) to evaluate State poverty-related programs and State administrative procedures and to develop mechanisms for making them more responsive to the needs of the poor;

"(6) to conduct financial audits of programs within the State supported under this title or under title VIII, at such times and in such a manner as to promote responsible financial management of such programs;

"(7) to mobilize and develop available resources at the State level needed to assist antipoverty measures within the State;

"(8) to encourage the development of career opportunities for the poor within agencies of State government;

"(9) to advise and assist the Director in developing procedures and programs to promote the participation of States and State agencies under this Act; and

"(10) to advise and assist the Director, the Economic Opportunity Council established by section 631 of this Act, and the heads of other Federal agencies, in identifying problems posed by Federal statutory or administrative requirements that operate to impede effective State involvement in or coordination of programs related to this title, and in developing methods or recommendations for overcoming those problems.

"(b) The Director shall take steps as will assure that:

"(1) all applications for assistance under this title and under title VIII within a State are submitted through the State Office, and that the Office is afforded a reasonable opportunity (but not to exceed 30 days) to review such applications before transmitting them to the Director (or to his delegate) with such comments and recommendations as the State may deem appropriate;

"(2) each State Office receives advance notice of the proposed approval of any application for assistance or of the proposed funding in the State of any program, project, or other activity under any other title in this Act, and is afforded a reasonable opportunity to comment upon such proposed approval or funding; and

"(3) each State Office receives such other information and technical assistance, and is afforded such other opportunities to play an affirmative role in the programs financed under this Act, as may be required to carry out effectively the functions specified in subsection (a).

"(c)(1) Whenever a State Office (with the concurrence of the Governor) shall recommend against the approval of an application submitted under subsection (b)(1), such application shall not be approved (or shall not be approved without changes suggested by the State Office (for funding under this title unless the Director shall have made a finding that approval of such application would strengthen the overall program plan of a local community action agency; or with respect to applications submitted by other eligible applicants, that the approval of such application would be in furtherance of the purposes of this Act.

"(2) The Director shall not delegate the responsibility for making the finding required in paragraph (1) except to the heads of other federal agencies, and he shall not make such finding without having first afforded the State Office notice and opportunity for a hearing.

"(d) In any grants to or contracts with State agencies, the Director shall give preference to programs or activities which are administered or coordinated by the State Offices established under subsection (a), or which have been developed by and will be carried on with the assistance of those Offices.

"(e) In order to promote coordination in the use of funds under this Act and funds provided or granted by State agencies, the Director may enter into agreements with States or State agencies for purposes of providing financial assistance to community action agencies or other local agencies in connection with specific projects or programs involving the common or joint use of State funds and funds under this Act.

"STATE ECONOMIC OPPORTUNITY COUNCIL

"SEC. 252. (a) Any State which desires to participate in the development and carrying out of a State developmental and coordinating program for rural and urban community action, as provided by section 253, shall establish a State Economic Opportunity Council (hereinafter referred to as the 'State Council'), appointed by the Governor, which shall be broadly representative of the economic, educational, health, religious, and social services resources of the State and of the public, including persons representative of—

"(1) urban areas;

"(2) rural areas;

"(3) the poor (including representatives both of the urban and rural poor and of racial and ethnic groups in the State which experience a high incidence of poverty);

"(4) business, industry, and labor;

"(5) elected municipal officials;

"(6) elected county officials;

"(7) federally-assisted programs, such as Model Cities and manpower training, related to the problems of the poor; and

"(8) fields of professional competence (including both public and private education) in dealing with the problems of poverty.

"(b) The State Council shall advise the State Office on the development of and policy matters arising in the administration of the State developmental and coordinating programs submitted pursuant to section 253, and shall evaluate the programs, services, and activities assisted under this title and make a public report (at least annually) of the results of such evaluations.

"(c) The State Council shall prepare a long-range program plan (or, as may be appropriate from time to time, revisions of or supplements to such plan) for use of funds under sections 221 and 222 and title VIII of this Act which plan (1) is prepared in consultation with the the State Office, (2) extends over a period of not less than five years and (3) taking into consideration available resources, sets forth a program of action which, in the judgment of the Council, would assure substantial progress toward achievement of the objectives of the plan.

"(d) From the sums appropriated under the authority of this Act for any fiscal year the Director shall (in accordance with regulations) pay to each State Council an amount equal to the reasonable amounts expended by it in carrying out its functions under this part in such fiscal year, except that the amount available for such purpose shall not exceed $150,000 and shall not be less than $50,000.

"STATE DEVELOPMENTAL AND COORDINATION PROGRAMS

"SEC. 253. (a) Any State desiring to carry out a developmental and coordination program for urban and rural community action shall submit to the Director (at such time and in such detail as he may specify and containing such information as he may deem necessary) an outline for such a program which—

"(1) has been prepared by the State Office in consultation with the State Council of that State and has been approved by the State Council;

"(2) designates the State Office as the sole agency for administration of the State program, or for supervision of the administration thereof by local community action agencies;

"(3) sets forth in detail the policies and procedures to be followed by the State in the distribution of funds to local community action agencies in the State and for the uses of such funds for the various programs and program components specified in sections 221 and 222, which policies and procedures assure that—

"(A) due consideration will be given to the relative needs of urban and rural areas within the State, and to the needs of various categories of persons living in poverty, in accordance with criteria supplied by the Director; and

"(B) due consideration will be given to periodic evaluations of programs, services, and activities assisted under this title;

"(4) describes how the activities and projects to be carried out under the program are related to the long-range program plan developed by the State Council pursuant to sction 251(c) (except that such requirement may be waived during the first year the program is in operation);

"(5) sets forth policies and procedures satisfactory to the Director for approval of applications for assistance under sections 221 and 222 of this title and under title VIII submitted by local community action agencies and other qualified applicants, and for the evaluation, review, and monitoring of the program conducted by such applicants (including procedures to assure that such programs conform to the requirements of this Act);

"(6) sets forth procedures designed to improve the coordination of programs funded under this part with State-administered programs affecting the poor;

"(7) provides that any community action agency, or other public or private agency which is a qualified applicant for program assistance under this title, dissatisfied with a final action with respect to any application for funds under this title shall be given reasonable notice and opportunity for a public hearing by the State Office;

"(8) provides assurances that federal funds made available under this part will be so used as to supplement, and to the extent possible increase the amount of State, local, and private funds that would in the absence of federal funds be made available for programs supported under this part, and in no case supplant such State, local, and private funds;

"(9) provides assurances satisfactory to the Director that all relevant requirements of this Act shall be complied with, and provides for making such reports in such form and containing such information and affording such access thereto as the Director may reasonably require to carry out his functions under this Act; and

"(10) sets forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, federal funds paid to the State (including such funds paid by the State to qualified applicants) under this title.

"(b)(1) The Director shall by regulation establish criteria for approval of State developmental and coordination programs submitted pursuant to subsection (a), and when he finds that such a program complies with such criteria and the requirements of this part and when he is satisfied that adequate procedures are set forth to insure that the assurances and provisions of such program will be carried out, he shall approve such program, and the Director shall not finally disapprove any program submitted.

"(2) The Director shall take such steps as he deems necessary to assure that in the formulation and carrying out of State programs there is close liaison between the State offices and the Office of Economic Opportunity.

"(3) The Director shall take final action to approve or disapprove a State developmental and coordination program submitted under subsection (a) within ninety days after the date of its submission (or resubmission in the event it should have been withdrawn by the State), and he may not delegate the authority to approve or disapprove such programs to any other person.

"(c)(1) For any fiscal year in which any State has in operation a State developmental and coordination program approved in accordance with this part the Director shall make available to such State for carrying out the approved program the sums allotted to such State for such year under section 225(a) and (b); *Provided, however,* That, until June 30, 1971, the Director may reserve not more than one-fourth such amount, to assist (in accordance with the provisions of this title) activities and projects in such State which are not funded under the State program, but only if the Director has determined that the failure to support such activities and projects during the period in which he may reserve funds would result in a substantial disruption of efforts directed toward the elimination of poverty in such State, or that it is necessary to assist programs authorized under section 222 of this Act.

"(2) The Director shall pay, from the amount available to the State for assistance under this part, to each State the amount required to pay the Federal share of carrying out activities and projects under the approved State program, and for administration of the State program (except that sums paid for State administration shall not exceed five per centum of the amount available to the State for assistance under this title in any fiscal year), and such payments may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

"(3) The term "State administration" in paragraph (2) means those costs attributable to the supervision, auditing, coordination, and servicing of activities carried out under this part or to the provision of technical services (including the training of personnel needed to provide such services), and similar costs related to carrying out an approved State program, but shall not include the costs of State operation of a substantive program authorized by this Act.

"(d)(1) Whenever the Director, after reasonable notice and opportunity for hearing to the State Office administering a State program approved under subsection (a), finds that—

"(A) the State program has been so changed that it no longer complies with the provisions of subsection (a), or

"(B) in the administration of the program there is a failure to comply substantially with any such provision, the Director shall notify such State Office that no further payments will be made to the State under the State program (or, in his discretion, that further payments to the State under the program will be limited to activities under or portions of such program not affected by such failure) until he is satisfied that there will no longer be any failure to comply. Until he is so satisfied, the Director shall support eligible community action and VISTA volunteer programs in such State in accordance with other provisions of this title (except that he may support those activities under or portions of the State program not affected by such failure).

"(2) A State Office which is dissatisfied with a final action of the Director under this subsection or subsection (b) may appeal to the United State Court of Appeals for the circuit in which the State is located, by filing a petition with such court within sixty days after such final action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Director, or any officer designated by him for that purpose. The Director thereupon shall file in the court the record of the proceedings on which he based his action, as provided in secton 2112 of title 28, United States Code. Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Director or to set it aside, in whole or in part, temporarily or permanently, but until the filing of the record the Director may modify or set aside his action. The findings of the Director as to the facts, if supported by substantive evidence, shall be conclusive, but the court, for good cause shown, may remand the case to the Director to take further evidence, and the Director may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence. The judgment of the court affirming or setting aside, in whole or in part, any action of the Director shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code. The commencement of proceedings under this subsection shall not, unless so specifically ordered by the court, operate as a stay of the Director's action.

"EXEMPTION OF HEADSTART PROGRAMS

"SEC. 254. The Secretary of Health, Education, and Welfare (during any period in which he has been delegated responsibility for the administration of those programs au-

thorized under section 222(a)(1) and 222(a)(2) of this Act) may exempt such programs from inclusion under the provisions of this part (either generally or with respect to inclusion in the program approved for a particular State)".

TITLE III—TECHNICAL AND PERFECTING AMENDMENTS

PART A—AMENDMENTS TO TITLE II ("COMMUNITY ACTION")

COMPOSITION OF COMMUNITY ACTION AGENCIES

SEC. 301. Section 211 of the Economic Opportunity Act of 1964 is amended as follows:

(1) Clause (3) of subsection (b) is amended to read—

"(3) the remainder of the members (which shall consist of not less than one-quarter of the total membership of such board) are appointed by the elected public officials who serve on or have representatives serving on the board, and are officials or members of business, industry, labor, religious, welfare, education, or other major groups and interests in the comunity."; and

(2) the first sentence of subsection (c) is amended to read—

"Where a community action agency places responsibility for major policy determinations with respect to the character, funding, extent, and administration of and budgeting for programs to be carried on in a particular geographic area within the community in a subsidiary board, council, or similar agency, such boards, council, or agency shall be broadly representative of such area, and it shall be so constituted as to assure that at least one-third of the members are public officials, appointed by the elected public officials who serve (or appoint representatives to serve) on the board of the community action agency, unless the number of such officials reasonably available or willing to serve is less than one-third of the membership of the subsidiary board."

COSTS OF DEFENDING LAW SUITS

SEC. 302. Section 222(a) of such Act is amended by adding to paragraph (3) (relating to "Legal Services") the following:

"Whenever a lawsuit or other legal action is initiated by a plaintiff or plaintiffs with assistance under this program, and such action results in a verdict or other outcome favorable to the defendant in such lawsuit or other legal action, and the United States shall be liable for such costs (to be paid out of funds made available for the Legal Services program) as are ordered in accordance with the law of the jurisdiction, by the court or other board or agency which has jurisdiction of the matter, the same as a private person."

LIMITATION ON LEGAL SERVICES PROGRAMS

SEC. 303. (a) Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out "counseling, education, and other appropriate services" and inserting in lieu thereof "legal counseling, education in legal matters, and other appropriate legal services".

(b) The fourth sentence of section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by inserting "(A)" after "this part) shall be utilized" and by inserting before the period at the end thereof the following: ", or (B) for any activity not directly related to the provision of services referred to in the first sentence of this paragraph and litigation on behalf of specific clients shall be conducted in accordance with the canons of professional ethics of the American Bar Association."

APPLICABILITY OF CANONS OF ETHICS IN LEGAL SERVICES PROGRAMS

(c) The second sentence of section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by inserting "(A)" after "assures" and by inserting before the period at the end thereof the following: ", and (B) that the Canons of Professional Ethics promulgated by the American Bar Association will be complied with".

(b) Section 222(a)(3) of such Act is further amended by adding at the end thereof the following: "The Director of the Administrative Office of the United States Courts shall receive any complaints or allegations which may be made concerning the conduct of programs under the second sentence of this paragraph, insofar as they relate to matters involving subject matter cognizable by the courts of the United States. The Director of such Office shall make an annual summary of such complaints or allegations, which shall be objective in character and without evaluation or comment. Such summaries shall be available upon request to a committee of the Senate or House of Representatives, and shall, at least once each year, be submitted to the Senate and House of Representatives."

AUTHORIZATION OF ALCOHOLIC RECOVERY PROGRAM

SEC. 304. Section 222(a) of such Act is further amended by adding at the end thereof the following new paragraph:

"(8) An 'Alcoholic Recovery' program designed to discover and bring about treatment for the disease of alcoholism. Such a program shall be community based, serve the objective of maintaining the family structure as well as recovery of the individual alcoholic, encourage the use of neighborhood facilities and the services of recovered alcoholics as program workers and emphasize the reentry of alcoholics into society rather than the institutionalization of alcoholics. Such a program shall also emphasize the coordination and full utilization of existing appropriate community services which pertain to the treatment of alcoholism and/or related disorders."

SPECIAL ASSISTANCE TO FAMILIES OF MEMBERS OF ARMED FORCES IN HARDSHIP CASES; PILOT PROJECTS OF ASSISTANCE FOR THE ELDERLY POOR

SEC. 305. Section 232 of such Act is amended by adding at the end thereof the following new subsections:

"(g) The Director shall conduct projects, either directly or through grants or other arrangements, under which funds available under this section will be used to raise the income levels of families of members of the Armed Forces, when such families reside in the United States and through exceptional circumstances have an income level below the poverty level (as determined by the Director), and preference shall be given to cases of greatest hardship. Projects under this subsection shall be developed jointly by the Director and the Secretary of Defense.

"(h) The Director shall also conduct, either directly or through grants or other arrangements, pilot projects under which funds available under this section will be used to raise the income levels of persons over 65 years of age above the poverty level (as determined by the Director), with preference given to cases of exceptional hardship, in order to examine and evaluate systems of income maintenance for the elderly poor as an alternative to welfare assistance."

TECHNICAL AMENDMENT OF GOVERNOR'S VETO PROVISION

SEC. 306. Section 242 of such Act is amended by striking out the period at the end of the first sentence and inserting: "; *Provided, however,* That this section shall not apply with respect to any application which the State Office has recommended not be approved under section 251(c)(1)."

AUTHORIZATION OF STATE AUDIT

SEC. 307. Section 243 of such Act is amended by adding a new subsection as follows:

"(e) The Director shall take such steps as may be necessary to insure that programs assisted under this title shall be subject to financial audit by appropriate State officials and agencies at the request of such officials and agencies, and he shall direct the governing board of such community action agency to cooperate in carrying out such audits."

PART B—AMENDMENTS TO TITLE VI (ADMINISTRATION)

PROHIBITION OF POLITICAL ACTIVITY STRENGTHENED

SEC. 321. Section 603(a) of the Economic Opportunity Act of 1964 is amended to read as follows:

"(a) For purposes of chapter 15 of title 5 of the United States Code any overall community action agency which assumes responsibility for planning, developing, and coordinating communitywide antipoverty programs, or any agency assuming part or all of such responsibilities (including the administration of components of a community action program) under delegation from an overall community action agency, and receives assistance under this Act, shall be deemed to be a State or local agency."

ANTIRIOT PROVISION STRENGTHENED

SEC. 322. Section 613 of such Act is amended to read as follows:

"SEC. 613. No individual employed or assigned by any community action agency or any other agency assisted under this Act shall (whether or not pursuant to or during the performance of services rendered in connection with any program or activity conducted or assisted under this Act) plan, initiate, participate in, or otherwise aid or assist in the conduct of any unlawful demonstration, rioting, or civil disturbance, and the Director shall take such steps as may be necessary to assure that any individual who violates this provision is removed from his employment or assignment in programs conducted or assisted under this Act."

PROHIBITIONS ON UPWARD BOUND PROGRAMS

SEC. 323. Section 621 of such Act is amended by inserting "(a) after "SEC. 621," and by adding at the end thereof the following new subsection:

"(b) The Director shall give full effect to the intent of Congress that 'Upward Bound' programs, however described, shall be administered by the Commissioner of Education, and the Director shall not carry out or fund any program described in section 222(a)(5) (as in effect on June 30, 1969), or any comparable program, whether under the authority of that section or any other section of this Act, and whether or not carried on by or in a school, institution of higher education, penal or correctional institution, or any other agency or institution."

SEC. 324. Title VI of such Act is further amended by adding at the end of Part A the following new subsections:

"EVALUATION OF PROGRAMS OF THE OFFICE OF ECONOMIC OPPORTUNITY

"SEC. 622. (a) The Director shall—

"(1) at the time of entering into any contract or arrangement with nongovernmental organizations or individuals for the evaluation of programs or projects administered by him under this Act, or entering into any substantial modification of any existing such contract or arrangement, furnish to the Comptroller General of the United States a copy of the contract or modification thereof or a description of the arrangement or modification thereof, together with a statement of the bases upon which he considers the evaluation work involved and the estimated cost thereof justified, and upon which he has determined that it was necessary to contract or arrange with a nongovernmental organization or individual for its performance;

"(2) require each community action agency designated under section 201 of this Act, to advise him of each contract or arrangement entered into by it with nongovernmental organizations or individuals for

the evaluation of programs or projects administered by it under this Act, including information regarding the purpose, cost, scope, evaluation methodology, and organizations or individuals involved in such contract or arrangement; and

"(3) furnish to the Comptroller General of the United States at the end of each calendar quarter a listing of all contracts or arrangements reported to him in accordance with paragraph (2) of this subsection during such calendar quarter, including identification of the program or project, the organization or individual, and the cost involved in each contract or arrangement.

"(b) The Comptroller General shall conduct evaluations of programs carried out under this Act, and upon request by a committee of the Congress, or to the extent personnel are available, by Members of Congress shall (1) conduct studies of existing statutes and regulations governing programs carried on under this Act, (2) review the policies and practices of Federal agencies administering such programs, (3) review the evaluation procedures adopted by such agencies carrying out such programs, (4) initiate evaluation projects of particular programs, and (5) compile data necessary to carry out the preceding functions.

"(c) In carrying out the studies and evaluations herein authorized, the Comptroller General shall give particular attention to the practice of the Office of Economic Opportunity and of community action agencies designated under Section 201 of this Act of contracting with private firms, organizations and individuals for the provision of a wide range of studies and services (such as personnel recruitment and training, program evaluation, and program administration), and shall report to the Director and to the Congress his findings with respect to the necessity for such contracts and their effectiveness in achieving the objectives of this Act.

"(d) The Comptroller General or any of his duly authorized representatives shall have access for the purpose of audit and examination to any books, documents, papers, and records that are pertinent to the financial assistance received by any agency under this Act.

"(e) There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of these sections.

"PREVENTION OF CONFLICTS OF INTEREST

"SEC. 623. The Director shall issue regulations and take such other steps as may be necessary to assure that the Office of Economic Opportunity (or any other agency utilizing funds appropriated under the authority of this Act) shall not contract with, make a grant to, or enter into any other type of financial arrangement with, any individual who has been an officer or employee of the Office of Economic Opportunity or any other agency of the executive branch of the United States Government which administers funds appropriated under the authority of this Act (or with a partner of such individual, or with a firm or business organization in which such individual holds a substantial financial interest or in which he serves as an officer), within one year after such employment, for any service or activity (other than reemployment as an officer or employee of a department or agency of the United States Government) in which such person participated personally and substantially as an officer or employee through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise.

"PAYMENT OF DUES PROHIBITED

"SEC. 624. No funds appropriated under the authority of this Act shall be used for or on behalf of any person, organization, or agency to make any payment in the nature of dues or membership fees in any public or private organization or association.

"NEPOTISM PROHIBITED

"SEC. 625. No person shall be employed (or continue in employment) with funds appropriated under the authority of this Act in a position (1) over which a member of his immediate family exercises supervisory authority, or (2) while he or a member of his immediate family serves on a board or committee which has authority to order personal actions affecting such position, or (3) while he or a member of his immediate family serves on a board or committee which, either by rule or practice, regularly nominates, recommends, or screens candidates for the agency or program in which such position is located. For the purposes of this section, a member of an immediate family shall include any of the following persons: husband, wife, father, mother, brother, sister, son, daughter, uncle, aunt, niece, nephew, father-in-law, mother-in-law, brother-in-law, sister-in-law, son-in-law, or daughter-in-law."

PART C—AMENDMENTS TO TITLE VIII ("VISTA")

RESTRUCTURING ADMINISTRATION OF PROGRAM

SEC. 331. Section 810(a) of the Economic Opportunity Act of 1964 is amended by striking out that part of the first sentence which precedes the numbered paragraphs and by inserting in lieu thereof the following:

"The Director is authorized to make grants to State and local public agencies to recruit, select, train, and assign persons to serve in full-time volunteer programs. Such programs shall be those established by the grantee agency or (upon satisfactory assurance that the work of such volunteers will be supervised by competent individuals) by other public agencies or private nonprofit organizations, which involve the assignment of volunteers to work—"

ASSISTANCE IN LEGAL SERVICES PROGRAMS

SEC. 332. Section 834 of such Act is amended by inserting at the end thereof a new subsection, as follows:

"(f) Persons serving as volunteers under this title shall provide legal services or legal counsel only as a part of a legal services program (and at the request and under the supervision of the directors of such program) supported under section 222(a)(3) of this Act."

AUTHORIZATION OF NARCOTIC ADDICT RECOVERY PROGRAM

SEC. 504. Section 222(a) of such Act is further amended by adding to the end thereof the following new paragraph:

"(9) A 'Narcotic Addict Recovery' program designed to discover and bring about post and/or preinstitutional treatment for narcotic addiction. Such a program shall be community based, with appropriate participation by parents, youth, educators and others in the community, serve the objectives of maintaining the family structure as well as the recovery of the individual addict, encourage the use of neighborhood facilities and the services of former addicts as program workers and facilitate the re-entry of addicts into society. Such a program shall also emphasize the coordination and full utilization of existing community services which pertain to the treatment of addiction and/or related disorders."

Mr. THOMPSON of New Jersey (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the motion to recommit be dispensed with, and that it be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

Mr. GERALD R. FORD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 163, nays 231, not voting 39, as follows:

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Holifield for, with Mr. Hébert against.
Mr. Cowger for, with Mr. Snyder against.
Mr. Watkins for, with Mr. Hall against.
Mr. Cederberg for, with Mr. Watson against.
Mr. Schneebeli for, with Mr. Devine against.
Mr. Pell for, with Mr. Utt against.
Mr. Rostenkowski for, with Mr. Lipscomb against.
Mr. Bob Wilson for, with Mr. Berry against.
Mr. Cahill for, with Mr. Reifel against.
Mr. Matsunaga for, with Mr. Ashbrook against.

Until further notice:

Mr. Abbitt with Mr. Whalley.
Mr. Anderson of Tennessee with Mr. Winn.
Mr. Blatnik with Mr. Sebelius.
Mr. Morton with Mr. Mahon.
Mr. Minshall with Mr. Hastings.
Mr. Brown of California with Mr. Dawson.
Mr. Van Deerlin with Mr. Powell.
Mr. Kirwan with Mr. Hosmer.
Mr. Kluczynski with Mr. Bell of California.
Mr. Fascell with Mr. Fulton of Tennessee.

Mr. DICKINSON changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of House Resolution 734, the Committee on Education and Labor is discharged from further consideration of the bill S. 3016.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. PERKINS

Mr. PERKINS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Motion offered by Mr. PERKINS: Strike out all after the enacting clause of S. 3016 and insert in lieu thereof the provisions of H.R. 12321, as passed, as follows:

That this Act may be cited as the "Economic Opportunity Act Amendments of 1969".

TITLE I—EXTENSION OF AUTHORIZATION

SEC. 101. For the purpose of carrying out programs under the Economic Opportunity Act of 1964 for which there are no separate authorizations of appropriations in such Act, there are hereby authorized to be appropriated $1,563,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971.

SEC. 102. Sections 161, 245, 321, 408, 615, and 835 of the Economic Opportunity Act of 1964 are each amended by striking out "1967" and by inserting in lieu thereof "1969". Section 523 of such Act is amended by striking out "June 30, 1968, and the two succeeding fiscal years" and by inserting in lieu thereof "June 30, 1969, and the three succeeding fiscal years".

TITLE II—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

SEC. 201. Title 1 of the Economic Opportunity Act of 1964 is amended redesignating part E as part F, by renumbering section 161 (as amended by section 102 of this Act) as section 171, and by inserting after part D the followingg new part:

"PART E—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

"STATEMENT OF PURPOSE

"SEC. 161. The Congress finds that the 'Operation Mainstream' program aimed primarily at the chronically unemployed and the 'New Careers' program providing jobs for the unemployed and low-income persons leading to broader career opportunities are uniquely effective; that, in addition to providing persons assisted with jobs, the key to their economic independence, these programs are of advantage to the community at large in that they are directed at community beautification and betterment and the improvement of health, education, welfare, public safety, and other public services; and that, while these programs are important and necessary components of comprehensive work and training programs, there is a need to encourage imaginative and innovative use of these programs, to enlarge the authority to operate them, and to increase the resources available for them.

"SPECIAL PROGRAMS

"SEC. 162. (a) The Director is authorized to provide financial assistance to public or private nonprofit agencies to stimulate and support efforts to provide the unemployed with jobs and the low-income worker with greater career opportunity. Programs authorized under this section shall include the following:

"(1) A special program to be known as 'Mainstream' which involves work activities directed to the needs of those chronically unemployed poor who have poor employment prospects and are unable, because of age, physical condition, obsolete or inadequate skills, declining economic conditions, other causes of a lack of employment opportunity, or otherwise, to secure appropriate employment or training assistance under other programs, and which, in addition to other services provided, will enable such persons to participate in projects for the betterment or beautification of the community or area served by the program, including without limitation activities which will contribute to the management, conservation, or development of natural resources, recreational areas, Federal, State, and local government parks, highways, and other lands, the rehabilitation of housing, the improvement of public facilities, and the improvement and expansion of health, education, day care, and recreation services;

"(2) A special program to be known as 'New Careers' which will provide unemployed or low-income persons with jobs leading to career opportunities, including new types of careers, in programs designed to improve the physical, social, economic, or cultural condition of the community or area served in fields of public service, including without limitation health, education, welfare, recreation, day care, neighborhood redevelopment, and public safety, which provide maximum prospects for on-the-job training, promotion, and advancement and continued employment without Federal assistance which give promise of contributing to the broader adoption of new methods of structuring jobs and new methods of providing job ladder opportunities, and which provide opportunities for further occupational training to facilitate career advancement.

"(b) The Director is authorized to provide financial and other assistance to insure the provision of supportive and follow-up services to supplement programs under this part including health services, counseling, day care for children, transportation assistance, and other special services necessary to assist individual to achieve success in these programs and in employment.

"ADMINISTRATIVE REGULATIONS

"SEC. 163. The Director shall prescribe regulations to assure that programs under this part have adequate internal administrative controls, accounting requirements, personnel standards, evaluation procedures, availability of in-service training and technical assistance programs, and other policies as may be necessary to promote the effective use of funds.

"SPECIAL CONDITIONS

"SEC. 164. (a) The Director shall not provide financial assistance for any program under this part unless he determines, in accordance with such regulations as he may prescribe, that—

"(1) no participant will be employed on projects involving political parties, or the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious workship;

"(2) the program will not result in the displacement of employed workers or impair existing contracts for services, or result in the substitution of Federal for other funds in connection with work that would otherwise be performed;

"(3) the rates of pay for time spent in work-training and education, and other conditions of employment, will be appropriate and reasonable in the light of such factors as the type of work, geographical region, and proficiency of the participant; and

"(4) the program will, to the maximum extent feasible, contribute to the occupational development and upward mobility of individual participants.

"(b) For programs which provide work and training related to physical improvements, preference shall be given to those improvements which will be substantially used by low-income persons and families or which will contribute substantially to amenities or facilities in urban or rural areas having high concentrations or proportions of low-income persons and families.

"(c) Programs approved under this part shall, to the maximum extent feasible, contribute to the elimination of artifical barriers to employment and occupational advancement.

"(d) Projects under this part shall provide for maximum feasible use of resources under other Federal programs for work and training and the resources of the private sector.

"PROGRAM PARTICIPANTS

"SEC. 165. (a) Participants in programs under this part must be unemployed or low-income persons. The Director, in consultation with the Commissioner of Social Security, shall establish criteria for low income, taking into consideration family size, urban-rural and farm-nonfarm differences, and other relevant factors. Any individual shall be deemed to be from a low-income family if the family receives cash welfare payments.

"(b) Participants must be permanent residents of the United States or of the Trust Territory of the Pacific Islands.

"(c) Participants shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, leave, unemployment compensation, and Federal employment benefits.

"EQUITABLE DISTRIBUTION OF ASSISTANCE

"SEC. 166. The Director shall establish criteria designed to achieve an equitable distribution of assistance among the States. In developing those criteria, he shall consider, among other relevant factors, the ratios of population, unemployment, and family income levels. Of the sums appropriated or allocated for any fiscal year for programs authorized under this part not more than 12½ per centum shall be used within any one State.

"LIMITATIONS ON FEDERAL ASSISTANCE

"SEC. 167. Programs assisted under this part shall be subject to the provisions of section 131 of this Act.

"AUTHORIZATIONS

"SEC. 168. For the purpose of carrying out programs under this part, there are hereby authorized to be appropriated $110,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971."

TITLE III—SPECIAL COMPREHENSIVE PRESCHOOL PROGRAMS AND PROGRAMS PROVIDING FOR INTENSIVE FOLLOW THROUGH EDUCATION FOR PRIMARY SCHOOL CHILDREN

SEC. 301. (a) The Economic Opportunity Act of 1964 is amended by adding at the end thereof the following:

"TITLE IX—SPECIAL COMPREHENSIVE PRESCHOOL PROGRAMS AND PROGRAMS PROVIDING FOR INTENSIVE FOLLOW THROUGH EDUCATION FOR PRIMARY SCHOOL CHILDREN

"FINDINGS AND PURPOSE

"SEC. 901. The Congress finds that children participating in Headstart projects and other preschool programs are afforded an increased opportunity for learning and healthy maturation, that more effective and maximum benefits accrue to children participating in preschool programs when special educational programs are provided for such children in the early primary grades immediately following their preschool participation, and that preschool and special educational programs and services provided in the early primary school years afford children with culturally deprived, educationally lacking, or economically distressed family backgrounds an essential opportunity to participate in the economic, social, and political mainstream

activities of American life. It is the purpose of Congress in this title to afford broad authority to the Director, either acting directly or by delegation pursuant to the provisions of title VI of this Act, to broaden the opportunities of the children described in this paragraph for preschool and early primary education, including provisions for parental and home involvement, utilizing to the maximum extent possible existing agencies and organizations and resources to accomplish such purposes.

"AUTHORIZATIONS

"SEC. 902. For the purpose of carrying out the provisions of this title, the Director is authorized to make grants to community action agencies, local educational agencies, or other public or nonprofit agencies with the approval of the appropriate community action agency, or to a local educational agency or other public or nonprofit agency in an area where there is no community action agency. For the purpose of carrying out programs under this title, there are hereby authorized to be appropriated $578,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971.

"ALLOTMENT OF FUNDS; LIMITATIONS ON ASSISTANCE

"SEC. 903. The sums which are appropriated or allocated for the purpose of making grants under this title shall be allotted pursuant to section 225 of this Act and such sums and project assistance shall be subject to the provisions of that section.

"USES OF FUNDS

"SEC. 904. (a) Grants made pursuant to this title may be used for (1) the continuation of programs authorized by sections 222 (a) (1) and (2) of this Act prior to the enactment of the Economic Opportunity Act Amendments of 1969, and known as 'Project Head Start' and 'Follow Through', where consistent with the purposes of this title, (2) planning for and taking steps leading to the development of early childhood programs for the benefit of children with culturally deprived, educationally lacking or economically distressed family backgrounds, including appropriate arrangements with educational agencies for special educational programs and services for the further intensified provision of educational opportunities for such children during the early years of compulsory school attendance, (3) the provision within such programs of such comprehensive health, nutritional, social, and other services as the Director finds will assist such children in gaining their full potential, (4) providing for direct participation of the parents of such children in the development, conduct, and overall program direction at the project operating level, (5) the establishment, maintenance, and operation of preschool and early primary school programs for the children described in this section, including the lease or rental of necessary facilities and the acquisition of necessary equipment and supplies necessary to provide comprehensive programs as described in this section, (6) the provision of comprehensive physical and mental health services for children needing such assistance in order to profit from educational programs, (7) food and nutritional services, including family consultative and educational programs to improve nutrition in the home, (8) special social services to broaden the educational environment in the homes of the children participating in such programs, and (9) other social and educational activities, including summer, weekend, and vacation programs for such children which are deemed by the Director to further the purposes of this title."

SEC. 302. Section 222(a) of the Economic Opportunity Act of 1964 is amended by striking and paragraphs (1) and (2), thereof.

TITLE IV—INTENSIVE PROGRAMS TO ELIMINATE HUNGER AND MALNUTRITION

SEC. 401. The Economic Opportunity Act of 1964 is amended by adding at the end thereof the following:

"TITLE X—INTENSIVE PROGRAMS TO ELIMINATE HUNGER AND MALNUTRITION

"STATEMENT OF PURPOSE

"SEC. 1001. Congress finds that existing programs aimed at providing surplus foods and free meals to needy children and families often are structured so as to have no or little impact on extremely economically disadvantaged children and families; that to reach the many victims of such impoverished circumstances, existing programs must be supplemented and broadened to produce effective results; that supplementary activities, requiring improved delivery services, increased family food subsidies, intensive family and child educational components, and emergency family medical services are required frequently in the homes of the most economically disadvantaged; and that such conditions operate most severely on the elderly and the very young. It is the purpose of this title to provide broad authority to meet such needs expeditiously.

"AUTHORITY TO PROVIDE FOOD AND MEDICAL SERVICES AND SUPPLIES

"SEC. 1002. The Director is authorized to provide, directly or by delegation of authority pursuant to the provisions of title VI of this Act, financial assistance for the provision of such medical supplies and services, nutritional foodstuffs, and related services, as may be necessary to counteract conditions of starvation or malnutrition among the poor. Such assistance may be provided by way of supplemental to such other assistance as may be extended under the provisions of other Federal programs, and may be used to extend and broaden such programs to serve extremely economically disadvantaged families with particular emphasis on the elderly and the extremely young where such services are not now provided and without regard to the requirements of such laws for local or State administration or financial participation. In extending such assistance, the Director may make grants to community action agencies or local public or private nonprofit organizations or agencies to carry out the purposes of this title. The Director is authorized to carry out the functions under this title through the Secretary of Agriculture and the Secretary of Health, Education, and Welfare in a manner that will insure the availability of such foodstuffs, medical services and supplies through a community action agency where feasible, or other agencies or organizations if no such agency exists or is able to administer programs to provide such foodstuffs, medical services, and supplies to needy individuals and families.

"AREAS OF SPECIAL EMPHASIS

"SEC. 1003. The Director shall take steps to assure that programs under this title shall be designed to deal particularly with the incidence of malnutrition, hunger and serious medical needs among persons in economically disadvantaged circumstances who are fifty-five years of age and older and young children. In the conduct of such programs, the Director shall encourage the employment of such elderly persons as regular, part-time, and short-terms staff in programs designed to carry out the provisions of this title.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1004. For the purpose of carrying out programs under this title, there are hereby authorized to be appropriated $92,000,000 for the fiscal year ending June 30, 1970, and such amount as may be necessary for the fiscal year ending June 30, 1971."

SEC. 402. Section 222(a) of the Economic Opportunity Act of 1964 is amended by striking out paragraph (5) thereof.

TITLE V—MISCELLANEOUS

AMENDMENT OF RURAL LOAN PROGRAM

SEC. 501. Section 302(a) of the Economic Opportunity Act of 1964 is amended by striking out "such families, and" and inserting "such families, or".

LIMITATION ON LEGAL SERVICES PROGRAM

SEC. 502. Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out "counseling, education, and other appropriate services" and inserting in lieu thereof "legal counseling, education in legal matters, and other appropriate legal services".

AVAILABILITY OF LEGAL SERVICES TO ARMED FORCES PERSONNEL

SEC. 503. Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following: "Members of the Armed Forces, and members of their immediate families, shall be eligible to obtain legal services under such programs in cases of extreme hardship (determined in accordance with regulations of the Director issued after consultation with the Secretary of Defense). The costs of providing such services shall be reimbursed by the Secretary of Defense."

APPLICABILITY TO TRUST TERRITORY

SEC. 504. Section 609(1) of the Economic Opportunity Act of 1964 is amended by striking out "and title II" and inserting ", title II, title III–A, and title IV".

AUTHORIZATION OF NARCOTIC ADDICT RECOVERY PROGRAM

SEC. 505. Section 222(a) of such Act is further amended by adding to the end thereof the following new paragraph:

"(9) A 'Narcotic Addict Recovery' program designed to discover and bring about post and/or preinstitutional treatment for narcotic addiction. Such a program shall be community based, with appropriate participation by parents, youth, educators, and others in the community, serve the objective of maintaining the family structure as well as the recovery of the individual addict, encourage the use of neighborhood facilities and the services of former addicts as program workers and facilitate the re-entry of addicts into society. Such a program shall also emphasize the coordination and full utilization of existing community services which pertain to the treatment of addiction and/or related disorders."

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "To provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 12321) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 3016, ECONOMIC OPPORTUNITY ACT AMENDMENTS OF 1969

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the House insist upon its amendment to the bill (S. 3016) to provide for the continuation of pro-

grams authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes, and request a conference with the Senate thereon.

The Clerk read the title of the Senate bill.

THE SPEAKER. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and appoints the following conferees: Mr. PERKINS, Mrs. GREEN of Oregon, Messrs. PUCINSKI, BRADEMAS, O'HARA, CAREY, HAWKINS, WILLIAM D. FORD, HATHAWAY, MEEDS, Mrs. MINK, Messrs. CLAY, AYRES, QUIE, REID of New York, ERLENBORN, SCHERLE, DELLENBACK, ESCH, and STEIGER of Wisconsin.

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may have 5 legislative days in which to extend their remarks on the bill just passed and to include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed, with amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 14580. An act to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 14580) entitled "An act to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. FULBRIGHT, Mr. SPARKMAN, Mr. CHURCH, Mr. AIKEN, and Mr. CASE to be the conferees on the part of the Senate.

APPOINTMENT OF CONFEREES ON H.R. 14580

Mr. MORGAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and appoints the following conferees: Messrs. MORGAN, ZABLOCKI, HAYS, FASCELL, ADAIR, MAILLIARD, and FRELINGHUYSEN.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS TO FILE REPORTS ON S. 2910 AND H.R. 12795

Mr. DORN. Mr. Speaker, I ask unanimous consent that the Committee on Public Works may have until midnight tonight to file reports on the bills S. 2910 and H.R. 12795.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. ARENDS asked and was given permission to address the House for 1 minute.)

Mr. ARENDS. Mr. Speaker, I take this time for the purpose of asking the distinguished majority leader the program for the remainder of this week, and the schedule for next week.

Mr. ALBERT. Mr. Speaker, will the distinguished minority whip yield?

Mr. ARENDS. I yield to the distinguished gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, in response to the inquiry of the distinguished minority whip, we have finished the program for this week, and we will ask to go over until Monday upon the announcement of the program for next week.

Monday is Consent Calendar day. There are 22 suspensions, the first of which is H.R. 15095—Social Security Amendments of 1969.

Mr. Speaker, I ask unanimous consent that I may insert the remainder of the suspensions in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object, would it be the plan of the distinguished majority leader to call these bills up in the order in which they are listed?

Mr. ALBERT. Mr. Speaker, I would say, in answer to the inquiry of the gentleman from Iowa that that would be up to the discretion of the Speaker. I would say generally, yes, but I would not want to bind either those calling up the bills or the Chair.

The SPEAKER. The Chair will state to the gentleman from Iowa that he does not intend to depart from the order on the list unless there is some extraordinary situation

Does that answer the question of the gentleman from Iowa?

Mr. GROSS. Yes, Mr. Speaker.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The suspensions are as follows:

1. H.R. 15095—Social Security Amendments of 1969;
2. H.R. 14646—To grant the consent of Congress to the Connecticut-New York Railroad Passenger Transportation Compact;
3. H.R. 10124. To extend the time for filing tort actions by certain persons;
4. H. Res. 661—Commending the American serviceman and veteran of Vietnam for his efforts and sacrifices;
5. H. Con. Res. 454—Calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front;
6. H.R. 14789—Foreign Service Act Amendments of 1969;
7. S.J. Res. 90—To enable the U.S. to hold a conference to negotiate a Patent Cooperation Treaty;
8. H.R. 15166—River Basin Monetary Authorization Act of 1969;
9. H.R. 14464—To insure that certain facilities are accessible to the physically handicapped;
10. S. 3169—To amend the Atomic Energy Act of 1954;
11. S. 740—To establish the Cabinet Committee on Opportunities for Spanish-Speaking People;
12. H.J. Res. 757—To authorize appropriations for the Office of Intergovernmental Relations;
13. H.J. Res. 506—Consenting to an extension and renewal of the interstate compact to conserve oil and gas;
14. H.R. 14086—Community Mental Health Centers Amendments of 1969;
15. H.R. 14790—To extend the authority to make formula grants to schools of public health;
16. H.R. 14733—To extend the program of health services for domestic migrant agricultural workers;
17. H.R. 14289—To place the counties of El Paso and Hudspeth, Texas, in the mountain standard time zone;
18. H.R. 13448—To authorize the exchange of lands at New Orleans, La.;
19. H.R. 13630—To extend certain expiring provisions of law relating to vocational education;
20. H.R. 6971—Vessel Bridge-to-Bridge Radiotelephone Act;
21. H.R. 9366—To change the number of apprentices authorized to be employees of the Government Printing Office; and
22. H.R. 14213—To provide for additional Regents of the Smithsonian Institution.

Mr. ALBERT. Mr. Speaker, Tuesday is Private Calendar day, and the following bills may be called up by unanimous consent.

Mr. Speaker, these are all from the Committee on Armed Services, and I would ask unanimous consent that they may be inserted in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The bills referred to are as follows:

H.R. 8022—To authorize allowances to certain members of the uniformed services for dependents' schooling;

H.R. 8021—To authorize allowances under certain circumstances;

H.R. 386—To provide a family separation allowance in certain instances; and

H.R. 110—Relating to family separation allowances paid to members of the uniformed services.

Mr. ALBERT. Mr. Speaker, for Wednesday and the balance of the week:

H.R. 15091, to lower interest rates and fight inflation, to help housing, small

business, and employment, and for other purposes, subject to a rule being granted;

H.R. 9476, to increase the availability of guaranteed home loan financing for veterans and to increase the income of the national service life insurance fund, subject to a rule being granted; and

H.R. 14944, to authorize an adequate force for the protection of the Executive Mansion and foreign embassies and for other purposes, also subject to a rule being granted.

Mr. Speaker, this announcement is made subject to the usual reservation that conference reports may be brought up at any time, and any further program may be announced later. Of course, we expect to have several conference reports—we hope to, anyway.

Mr. ARENDS. Mr. Speaker, does the distinguished gentleman from Oklahoma have any hope at all that the Senate might finish the appropriation bills next week, and we can act on the conference reports?

Mr. ALBERT. I certainly have hopes. I would hate to lose hope.

Mr. ARENDS. That would certainly be my hope.

I thank the gentleman.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule may be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

ADJOURNMENT TO MONDAY, DECEMBER 15, 1969

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

ACCOMPLISHMENTS OF THE HIGH INTEREST RATE, TIGHT MONEY POLICIES

(Mr. HANNA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANNA. Mr. Speaker, so much has been said about how the high interest rate and tight money policies have failed in terms of meeting inflation, I believe a few words ought to be said about the positive performance of this high interest, tight money.

We are looking into 1970, and I believe we can see that the continuation of the performance of present policy will mean less money for schools all over the United States.

This policy is going to mean less money for States which have programs, like my own State, for developing water interests of the States.

It means less money for cities to do all the things cities must do to undergird the building of the cities. Projects depending upon bonds, such as roads, flood control, water and sewer lines, and government buildings are all now completely frustrated.

This policy also has brought selective unemployment; 17 percent for those who are in minority races, 22 percent for some of the young people.

This policy also has created almost a depression in the building industry.

This policy has put small businessmen out of business and bounced them completely off the borrowing benches of all the banks of America.

So when we say what the policy has not been able to accomplish, let us think of the things that have been accomplished by this policy.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. HANNA. I yield to the distinguished gentleman from Iowa.

Mr. GROSS. Apparently it has been decided that we cannot spend billions on foreign aid and still have them to spend in this country. I do not know how the gentleman voted on the foreign giveaway bill, but somewhere cuts apparently have to be made.

Mr. HANNA. I am glad that the gentleman spoke about the foreign giveaway bill. I remember that one of his cohorts—and I believe he probably agreed with it—talked about a giveaway and how it affected the United States.

I remind the gentleman that when the foreign aid bill was carrying as much as $6 billion the United States never had it so good. We had the greatest growth of the United States after World War II until 1965 the country had ever seen. That is when we had the best foreign aid program we had ever seen.

Mr. GROSS. When we were in debt over our ears.

THE PLIGHT OF THE SHOE INDUSTRY

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. BURKE of Massachusetts. Mr. Speaker, yesterday I reported the closing down of the Victory Shoe Co. at Avon, Mass. Today I want to report another closing that is taking place in Massachusetts in the footwear industry. The B. F. Goodrich Plant at Watertown, which in 1964 employed up to 5,000 persons, expects to have the firm close down by December 19. My distinguished and esteemed colleague who represents that district, the Hon. PHILIP J. PHILBIN, charged the day before yesterday that cheap foreign imports were responsible for the scheduled closing of the B. F. Goodrich Plant at Watertown.

Mr. Speaker, the town of Watertown alone is losing $500,000 a year in real estate taxes from this firm. Five thousand people were employed by it in 1964 and at the end of this year it will be down to zero.

Mr. Speaker, what do we have to do in this country to wake the people up? Here is an industry that is being destroyed systematically in every section of the country. There are 253 Members of this House who have footwear firms located in their districts. Most of these firms are the economic backbone of small local communities.

Before this year is out I will have brought to the attention of this House several other footwear firms that will close their doors.

Mr. Speaker, I trust that the meeting which we had with President Nixon on September 23 will start to result in bringing forth results. So far all we have heard is the forked tongue of the administration. On one side one says he is going to resist cheap labor footwear imports, and on the other hand we have negotiators pushing for more free trade. They call these people "free traders." My assessment of them is that they are not free traders but they are freeloaders.

An article from the Boston Herald of Thursday, December 11, 1969, follows:

TOWN SEEKS BUYERS FOR GOODRICH

U.S. Rep. Philip J. Philbin charged yesterday that "cheap foreign imports" were responsible for the scheduled closing of the B. F. Goodrich plant in Watertown.

Earlier, plant officials announced that some 950 rubber products workers would be dropped by Dec. 19 in a near-final phasing out of the installation.

Some 150 office and warehouse employes will continue to work a few more months, officials said, while the plant is being totally shut down.

B. F. Goodrich manufactured waterproof rubber footwear and flooring at its Watertown facility and, in 1964, employed up to 5000 workers.

With payments of some $500,000 annually, it was Watertown's largest single source of tax revenue.

Town officials have been scouting possible buyers of the 64-acre site since Goodrich officials reported in 1966 they were starting to phase out operations at the plant.

UNDERMINING THE CIVIL RIGHTS DIVISION

(Mr. RYAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. RYAN. Mr. Speaker, yesterday a familiar coalition, a not so silent majority of the House, delivered a devastating blow to the cause of civil rights by rejecting a simple extension of the Civil Rights Act of 1965.

After a decade of progress in civil rights under President Kennedy and President Johnson, a decade in which the Congress met its responsibility by enacting the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the act of 1968, we have entered a period of retrogression. It started immediately when the Nixon administration took office. Defense contracts were awarded to contractors in violation of the Executive order on discrimination in employment. HEW guidelines on school desegregation were abandoned. The Attorney

General appeared before the Supreme Court in opposition to the NAACP on the question of implementing the desegregation decision of 1954. And the Attorney General said that, if the Supreme Court did order immediate desegregation in Mississippi, he would be unable to enforce the order.

The Supreme Court did order immediate action, and apparently the Attorney General is fulfilling his own prophecy.

The latest revelation of the administration's retreat on civil rights was reported in today's Washington Post. The Civil Rights Division of the Department of Justice is already demoralized, but now it is to be dismembered. The responsibility of the Civil Rights Division to enforce school desegregation cases is to be shifted to local U.S. attorneys. All of the work which has been done by Burke Marshall, John Doar, and Stephen Pollak will go down the drain if this is permitted. The fox will truly be in the chicken coop.

Mr. Speaker, if any agency of the Federal Government has been doing its part in preventing the polarization of our society, of which the President's Advisory Commission on Civil Disorders warned, it has been the Civil Rights Division of the Department of Justice.

Mr. Speaker, 1969 has been a year of retreat. I call upon the chairman of the Committee on the Judiciary of the House to begin an immediate investigation into the way in which the Civil Rights Division is being demoralized and undermined.

DANGEROUS EFFECT OF THE IMPORT FLOOD

(Mr. DENT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DENT. Mr. Speaker, we just heard a Member of this Congress talk about some results of the import damage. I might bring the Members up to date a little on something that might interest them.

We are taking up the Office of Economic Opportunity bill today, and I see where there has been a contract let to train 60 unemployed workers into skilled jobs, and the contract amounts to $2,243,000, which is something like $45,000 per man.

There are 650 workers who have just been let out of the glass plant in my community, and they are going to ask for training. Also there are 500 steel workers who have just been let out, and who have now been approved for training, with a payment of $2,232,000 under the import injury clause of the Kennedy round.

Further, we have found out through the figures received from the Department of Commerce that 51 percent of all ladies' handbags in this country are now imported, and that many of the New Jersey plants making handbags have been closed down because when they went out to secure their Christmas orders they found that all of the storerooms of the retail outlets were filled with imported handbags, and now they have a great number of handbags that were made during the off season to keep people working during the lean months.

Mr. Speaker, they say there is something like reciprocity. Maybe we can get some foreigners to buy our handbags.

Mr. Speaker, I advise the House right now, unless we do something quickly in the matter of the flooding of imports into this country from low-wage counties, we are going to face a crisis that all of the OEO bills you could put together will never be able to stave off the poverty in this Nation.

NORTH APOLOGIZES TO SOUTH; OTHER PAPERS PLEASE COPY

(Mr. WAGGONNER asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WAGGONNER. Mr. Speaker, one of the few times in the history of mankind, a major newspaper has apologized to an entire section of the country for their former editorial policy and begged its forgiveness for having distorted and slanted the news and falsely lambasted the South.

It takes guts, Mr. Speaker, for an individual to do this. It takes infinitely more for a newspaper to publish its apology for the whole world to see and I take my hat off to the editor and take it upon myself, as a southerner, to accept the apology and say we forgive you for what you did to us.

The newspaper is the Chicago Tribune and I now believe it has earned the description WGN, "world's greatest newspaper" which has been its trademark over the years. The editorial in question was commented upon by the Shreveport Times in an editorial on December 9 and I take pleasure in inserting it here in the RECORD for my contemporaries and the historians who will follow after us all.

There are other papers far more guilty than the Trib, but I doubt if there is any now willing to make a similar apology. I offer them the opportunity by adding the customary line: "Northern newspapers please copy." If any do, I will be pleased to see that they, too, are printed in the RECORD.

The editorial follows:

AN APOLOGY TO THE SOUTH

The Chicago Tribune calls itself "the world's greatest newspaper" and uses the letters "WGN" as abbreviation for the designation. Years ago, by permission of the Federal Communications Commission, it was allowed to use the letters for its radio station and this permission was repeated later for its TV station.

As a publishing institution, the Tribune doubtless deserves the descriptive adjective "great" and some—perhaps partisans—would even sanction "greatest," but others would raise questions, rightfully. The Trib, as Chicagoans call it, owns newsprint plants and other interests. It will, it has been said, send a star reporter to Timbuktu to look into reports of invention of a new kind of match.

At the turn into the 1920s, The Trib sent its highest paid reporter, Philip Kinsley, to spend three months in Australia and to write articles about that nation—holding that Australia, little known to the world generally at that time, had a greater future than any piece of land its size on earth. It was two to three decades before the forecast began to come true, but The Trib was about right.

The late Capt. Joseph Medill Patterson, its editor at that time, said half the subscribers to The Trib read it to cuss it and half because they liked it. He once instituted a contest, paying $100 a day for the best letter condemning The Trib as the world's worst newspaper and $100 for the best letter contending it was the world's greatest—and published both letters daily for several weeks on page one.

And, for decades, The Trib lambasted the South, falsely—perhaps truthfully once in a while, but rarely. It seemed like The Trib felt its editorial page any day was a failure without an anti-South editorial.

But, now, The Trib apologizes to the South for The Trib's own past. It did so in the following editorial a few weeks ago:

"A SINCERE APOLOGY TO THE SOUTH

"DEAR DIXIE: Can you possibly find it in your heart to accept our sincere apology?

"When there was race rioting in Little Rock, Ark., we were convinced that the cause was callousness. Our public officials and our press in Chicago insisted that the only reasons for Negro restiveness were your segregated schools and your stubborn governor. We in Chicago with integrated schools and a very liberal governor are now writhing with agony of race rioting. And as we seek to set our house in order, we hope your headlines will be kinder to us than ours were to you.

"And when a Mississippi Negro boy was found drowning, we in Chicago called this the inevitable result of a white supremacy tradition. Now a Negro girl, 14 and pregnant, has been shot to death on the front porch of her own home in Chicago—and we are confused and ashamed—and frightened.

"What are we doing wrong that has made eight square miles of our city a battleground? Help us, if you can find it in your own heart to help.

"And Alabama, when your state police were photographed subduing rioters with night sticks, Chicago bold face front pages condemned you for indefensible brutality. Now Illinois state police have resorted to armored cars and cracking skulls and shooting to kill.

"Your governor has alleged that 'Communists are fomenting this strife.' We scoffed.

"Now 13 Negroes on Chicago's west side have been charged with plotting treason. We are sweeping admittedly Communist literature from our littered streets. Forgive us for not knowing what we are talking about.

"Georgia, when you were photographed in the act of turning back crowds of marching children—we could not control ourselves. The very idea, the Chicago press editorialized, that youngsters should be considered a menace sufficient to justify the use of tear gas.

"Now in our own asphalt jungle, we have seen Negro youngsters of 9, 10 and 11 years advance on police with drawn guns or broken bottles—screaming kill Whitey!

"And we used gas and clubs and dogs and guns and God forgive us, what else could we do? Can you, Georgia, forgive us, too?

"We tried the patience we had preached—honest we did. We tried so desperately that seven policemen were shot the other night, two of them through the back. So, in the end, we resorted to methods more brutal than yours. But, don't you see, we had to.

"Dear Dixie, perhaps we have not yet learned to appreciate what you have been trying to do to defeat revolution—but for whatever belated comfort it may be, from our glass house we will not be throwing any more stones.

ROGERS EXPRESSES CONCERN OVER CONTENTS OF ORAL CONTRACEPTIVES

(Mr. ROGERS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS of Florida. Mr. Speaker, the Committee on the Safety of Drugs in Great Britain, otherwise known as the Dunlop Committee, yesterday reported in London, that oral contraceptives containing relatively large amounts of the hormone "estrogen" increase the risk of dangerous blood clots among women taking them.

The Dunlop Committee urged manufacturers to withdraw 21 of 30 brands on the British market because they contain 75 micrograms or more of the hormone. The Committee recommended that oral contraceptive pills not contain more than 50 micrograms.

Mr. Speaker, while 1.5 million British women take the pill, there are 8.5 million American women who do.

Moreover, it is my understanding that at least four U.S. manufacturers of the pill are involved in the production of some of the 21 brands of which the Dunlop Committee urged removal from the market.

Furthermore, there are 37 different oral contraceptive products on the market in the United States and at least 30 of these contain more than 50 micrograms of either "mestranol" or "ethynil estradiol," the two principal estrogens used in the oral contraceptives.

In light of this report of the British committee, I urge the Food and Drug Administration to carefully review the oral contraceptive compounds on the market in the country to determine if the estrogen level is dangerous to the health of American women who are using the pill.

Along these lines, I will be most interested in finding out how FDA, under the new reorganization, plans to handle this matter and other scientific judgments on new drugs, pesticides and foods.

I think the reorganization announced by the Secretary should help greatly in increasing the efficiency of the FDA and that in turn will help protect the consumer.

This move to reorganize FDA is approximately along the lines of what I requested in October and I am pleased that the Secretary has taken such action.

The entire operation at FDA seemed shaky and the lines of communication were very limited. I hope giving FDA direct access to the Assistant Secretary for Health will open those lines of communication. Certainly, the MSG and cyclamate controversies have pointed out the need for communication.

I hope that we will see FDA take on a more aggressive character and will become, as I have said, the lead agency for consumer protection within the Federal Government.

POLITICS AS USUAL

(Mr. DEVINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEVINE. Mr. Speaker, last Tuesday the gentleman from Indiana (Mr. MADDEN) spoke briefly about President Nixon's "threat" to veto the tax reform bill if it contains both the Senate-adopted $800 exemption and the 15-percent social security increase.

Again yesterday Mr. MADDEN broadened his attack, apparently as a spokesman for what he called the Democrat steering committee, in an obviously political attempt to play on the emotions of our retired people and other voting taxpayers.

I cannot let these politically inspired groans of anguish go by without answering, although this is typical of the methods used by some of my liberal friends to garner votes. It is very easy to engage in a popularity contest by promising the people to give them more money and bigger tax exemptions—it is easy so long as you do not face up to the problem about who will pick up the check for these big spenders.

One of the reasons there is a demand today for bigger exemptions and larger social security payments is that my liberal colleagues, including Mr. MADDEN, have for years shown a total lack of capacity to resist demonstrating their great generosity with somebody else's money. It is their votes for deficit spending, it is their disregarding the basic laws of economics, it is their carrot-on-the-stick technique of attracting votes with big spending programs that have, in fact, eroded the value of the dollar to the point where everyone suffers, including those on social security.

Mr. Speaker, all of us recognize the need to care for those who are unable to care for themselves; all of us also recognize that the average workingman is overburdened with taxes imposed largely by liberals to pay for their liberal social welfare schemes. In the last 5 years $100 has become worth $75, and a $600 exemption is really only a $450 exemption. We can thank the gentleman from Indiana and those who share the sympathy of the Democrat steering committee for the situation.

Today we have a President who wants to restore a sound dollar in order that every American can enjoy the fruits of his labor, but the gentleman from Indiana says "No: we will give away more and more cheaper dollars, and if you disagree you are against the poor." This, obviously, is the old shell game, but the American people will not be hoodwinked by such gyrations. Certainly it makes no sense to the President, and fortunately, all the name calling by the gentleman from Indiana is not going to change his mind if the Congress does send such a package to the White House. President Nixon is determined to end inflation.

Testimony by Treasury officials before the Ways and Means Committee revealed that for each $100 the exemption to the taxpayer is raised, revenues are reduced nearly $3 billion. How in the world the gentleman from Indiana and his Democrat steering group expect to pay for all their excesses and deficits which they created by voting for every conceivable type of big spending program, escapes me and I dare say most thinking Members of this Congress. This country will never return to a sound dollar basis as long as the Congress, which incidentally has been controlled by Democrats for 34 out of the last 38 years, continues to spend more of the taxpayers' money without having the courage to enact appropriate measures to collect the money to pay for the programs. I trust the conferees on the tax reform bill will make a major effort to clean it up and resolve the over 150 differences, thus sending a tax reform bill to the President that is indeed a tax reform bill rather than a Christmas tree.

TRAVEL RESTRICTION LEGISLATION

(Mr. ADAIR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADAIR. Mr. Speaker, I am informed that the first contingent of "volunteers" to assist the Cuban Government harvest its 1970 sugar crop has just left from Mexico. Reports state that 90 young Americans left the United States via Mexico on November 30. They are the first of seven groups totaling 600 which will spend 2 months in Cuba harvesting sugar for Castro's Communist government. They left without passports in order to avoid prosecution.

The Venceremos Brigade, as it is known, has, thus, passed the recruitment stage and is now actively engaged in undercutting American foreign policy. For those who doubt this proposition, a recent Cuban radio broadcast made the following observation on the expedition:

> They will come to cut cane with us here, as an expression of solidarity with the Cuban people. This is a friendly gesture which we appreciate very much, for this year's harvest is, historically, the largest of them all and it represents a decisive battle of our people in the general struggle against underdevelopment.

The Cuban Government made numerous other press releases and radio statements regarding the support being given to Castro.

Thus, the most self-defeating aspect of the SDS-sponsored expedition is its furnishing the Cuban and Latin American Communists with propaganda ammunition. The real purpose of the SDS in sending the young radicals to Cuba is not to cut cane, but to make Cuban propaganda hay. In fact, the SDS played down the cane-cutting aspect of the expedition when they explained its purpose last summer:

> We wish to educate people about the international revolution against imperialism, to gain practical understanding of communist principles, and to give support to the Cuban Government.

It is too bad that they are not going to cut cane in earnest as canecutting is hard work and the experience would, no doubt, be educational for many of them. Moreover, their so-called idealism will, no doubt, soon give way to despair when they get a firsthand view of "Communist principles in action." On December 1, Andrew Ferrell, a former Black Panther aide to Eldrige Cleaver who just left Cuba in disgust, stated in part, when he arrived in Paris:

> The Cubans were faking on the world, especially on the revolutionaries and progressive people in the States, to keep their

international support strong . . . We ran into all kinds of dissatisfied Cubans. You know, like people were saying "Hey man, you're crazy. What did you come down here for? Everybody is leaving here and going there (America)". This is insane.

With regard to the actual harvesting of the sugar crop, it should be noted that it is considered critical both for the economy of the country and for the survival of Castro's regime. Although it is doubtful that the canecutters will actually cut much cane, it is absurd to permit such a large group of Americans to lend assistance to the harvesting just when our embargo on trade with Cuba is beginning to achieve the desired result of placing such a burden on the Cuban economy that it is incapable of exporting Communist revolution elsewhere in Latin America.

On November 20, I introduced H.R. 14893 and 14894 which were cosponsored by 34 other Congressmen to prevent such flagrant violation of restrictions placed on travel abroad by the Secretary of State for foreign policy reasons. This legislation is designed to give the Secretary of State the statutory authority, which recent Supreme Court cases say he lacks, to impose and enforce area restrictions on travel. It gives the Secretary of State the power to restrict travel if he determines that the country or area is first, at war; second, one where insurrection or armed hostilities are in progress; third, one whose military forces are engaged in armed conflict with U.S. forces; and fourth, one to which travel must be restricted in the national interest because such travel would seriously impair the conduct of U.S. foreign policy.

If enacted, this legislation will effectively prohibit those who desire to travel to restricted areas and engage in activities that undercut this Nation's foreign policy objectives and, actually, encourage our adversaries. The cane-cutting expedition is a dramatic illustration of the need for this legislation. However, since the recent Supreme Court cases held that the Secretary of State lacked the authority to impose travel restrictions, there have been many other instances of American radicals engaging in activities in restricted countries which undermine the effective conduct of American foreign policy.

For example, Stokely Carmichael in August of 1967, shortly after the Laub decisions denying the enforceability of travel restrictions was handed down, while in Hanoi investigating "savage U.S. aggression" against North Vietnam, stated on Hanoi radio that he "pledged the support of American Negroes for Communist North Vietnam in the Vietnamese war." While in Havana the week before, he called for "total revolution" against the "imperialist, capitalist, and racialist structure of the United States." In August of this year an American antiwar delegation comprised of SDS's leaders, black antiwar leaders, and other militants toured North Vietnam and held a mass rally on August 4 at which time they made speeches condemning the United States, praising the North Vietnamese, and calling for solidarity between the antiwar factions in the United States and North Vietnam.

In September of this year, Elridge Cleaver, head of the Black Panthers, appeared with a delegation of Black Panthers in Pyongyang, capital of North Korea, at the World Conference of Journalists Against U.S. Imperialism and said in part:

U.S. imperialism seeks to turn the entire world into a huge prison under its bloody thumb and under the boots of its troops and puppets. The people of the world must unite and stage a massive, universal prison break against U.S. imperialism.

Most recently, Richard Barnett, who served in the U.S. Arms Control and Disarmament Agency during the Kennedy administration and who is now codirector of the Institute for Policy Studies with Marcus Raskin, and William Meyers, a director of the Lawyers Committee on American Policy Toward Vietnam, traveled to Hanoi to meet with Hanoi officials and called for support of massive American demonstrations against the U.S. aggression in Vietnam.

Many of these individuals and groups who have traveled to restricted countries have deliberately misrepresented American opinion and offered the assistance and cooperation of American organizations to promote the views of our adversaries. I am of the opinion that one of the most important reasons for the intransigence of the North Vietnamese in the Paris negotiations is the blurred picture of the American electorate which has been painted by the fringe minority who have traveled to Hanoi in deliberate violation of the restrictions imposed by the Secretary of State. The Governments of North Korea, North Vietnam, Cuba, and China have made much propaganda out of these visits and offers of assistance. A case in point is the recent buildup that was given to the release of a partial prisoner-of-war list to the antiwar group who met with the North Vietnamese in Paris without consultation with the U.S. Government and in complete disregard of the emissaries appointed by our elected officials. A recently returned POW, Lt. Robert F. Frishman, stated he did not want to be used for propaganda purposes and that the peace groups should not be permitted to travel to Hanoi.

In addition, some have actually engaged in sending supplies and economic aid to our adversaries. The Quaker ship, the *Phoenix*, has made numerous trips in defiance of travel restrictions to deliver medical and other needed supplies to North Vietnam to enable them to carry on their war of aggression against Americans in South Vietnam.

These are but a few of the many recent instances of Americans who have traveled to restricted countries which have been and are carrying on staunch anti-American and anti-free-world policies, including aggression, and have offered their support and confer with them as to how to gain more American support for their anti-American policies. The illogic and undermining character of this activity is readily apparent. Chairman CELLER of the Judiciary Committee has called for departmental reports on H.R. 14893. My colleagues, Congressman MCCULLOCH, the ranking Republican on the Judiciary Committee, and Congressman ZABLOCKI, the ranking Democrat on the Foreign Affairs Committee, have either cosponsored this bill or introduced their own. Consequently, I am hopeful that hearings can be held on this matter as soon as possible in order to return to the Secretary of State the power which he formerly had before the situation grows worse.

THE PROBLEMS OF DRUGS IN THE SIXTH DISTRICT OF MINNESOTA

(Mr. ZWACH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ZWACH. Mr. Speaker, throughout our Nation, the drug problem has increased rapidly. I am concerned with this situation; concerned enough to meet with the city and county law enforcement officials of my district to discuss this growing problem and the experiences and problems of the law enforcement officials in dealing with it.

On Friday, November 28, 1969, at the Kandiyohi County Courthouse in Willmar, Minn., I became aware of how serious the drug situation is in the Sixth District of Minnesota. Please understand, Mr. Speaker, my district is not a metropolitan district, but a rural one.

Mr. Speaker, I have come to the conclusion that there is a serious and growing drug problem in countryside America, and I think my colleagues should be aware of it.

The local law enforcement officials I met with are doing the best possible job they can to stop this growing problem. But they are hampered due to the lack of money, manpower, and enough education on the problem, to adequately handle the problem.

Youngsters 15 and 16 years old are now using marihuana, speed, and LSD. One 16-year-old has been selling marihuana. Students are selling LSD in high school. It is the same story with students in college. These are just a few examples of the problems confronting our society more rapidly than we care to admit.

For members of the law-enforcement agencies, the big problem, in addition to drug use itself, is manpower and funds. They just do not have enough of each to handle the job they want to do. Even though their resources are low, these law-enforcement officials are speaking before all groups regarding the problem of drugs. They are working with the schools in developing successful drug education programs. They are doing, in my estimation, the best job possible with few tools available.

Mr. Speaker, so that my colleagues may know the result of my meeting with law-enforcement officials on the problem of drugs, I conclude my remarks by giving a short consensus of the meeting.

There is a drug problem in the Sixth District of Minnesota and it is growing. There is a lack of money and manpower, at local, State, and Federal levels, to adequately handle a problem that is

growing rapidly. There is a need for better rehabilitation of addicts, as it is felt the present method is not doing the job. There is no question but that the laws regarding narcotics need a thorough study and revision—especially in regard to possession and pushers. Student and adult educational programs have been initiated in some areas with success—there is a need for more such programs. There is a need for more assistance to local law-enforcement officials, for more publications and films on drugs.

Most important, there is a need for all of us to become aware of a growing and dangerous problem.

IS PUBLIC OFFICE BECOMING UNTENABLE?

(Mr. MONAGAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, one of the privileges of the open society is the relative absence of control over individual conduct. This is a great privilege and one that should be highly prized.

In order to be most effective, however, this privilege must be exercised with restraint. Although the individual has the right of dissent, he has no obligation to do so. Unfortunately, today many of our fellow citizens feel that it is incumbent upon them to demonstrate and to create confrontations as a primary matter. Either they do not realize or they do not care that continued turmoil and strife may well result in curtailing or abolishing the very freedoms that they misuse.

One of the results of this irrational conduct is to drive effective public servants from their jobs, whether they be as chief executives of our municipalities or presidents of our universities.

How would you like to serve as mayor of New York or as president of MIT?

By a strange coincidence the distinguished columnist, Alan Olmstead, the Connecticut Yankee, and I became concerned about this problem at the same time. Mr. Olmstead's column in the Waterbury, Conn., Republican of December 6, 1969, discusses this serious problem in a very effective and understanding manner.

Interestingly and ironically, at the very time that I was making my talk, which excluded Danbury from this problem, unknown to me and outside the restaurant where I was speaking militants were struggling with police in their attempt to disrupt the gathering which had been organized to honor the mayor of Danbury.

Columnist Olmstead captioned his column "Public Office Is Becoming Untenable." I include the text of the column which generously quotes Dr. Homer Babbidge, the highly qualified president of the University of Connecticut, who incidentally was drafted to Connecticut from the U.S. Office of Education:

PUBLIC OFFICE IS BECOMING UNTENABLE

(By Alan Olmstead)

One of Connecticut's college presidents discussing the currently rapid turnover in college presidents recently broadened his theme to include the question of leadership in "the larger society" which includes the political and public as well as the academic world.

"What is happening on your campuses by way of testing an established order and by way of effecting change is only a precursor of what is in store for the larger society" said Homer D. Babbidge, of the University of Connecticut, down at the fall convocation of the Yale Alumni Board.

"What is at stake," said Pres. Babbidge, "is not the incumbents. They are obviously expendable. The real question is, who will be willing to succeed them?

"And if I am right, the far greater question is, who will be willing to accede to any position of leadership in a society that on the one hand expects George to do it, and on the other is bent on spilling George's blood?"

We quote Pres. Babbidge's philosophical realism not to help him defend the academic bailiwick, which he does well enough by himself, but to share his concern for the brutality—our word, not his—with which present day society seems to try to make offices of public responsibility "untenable"—Babbidge's word.

Connecticut public life is currently being compelled to focus its attention on one such example of a post—that of Commissioner of Public Welfare—being made "untenable" with the result that one commissioner, who might be regarded as "expendable," has moved out of it, moving the attention of the governor and the people up to the next question, that of "who will be willing to succeed." The temporary trouble seems to be that there is nobody particularly willing to move himself into the meatgrinder a rather, a rather berserk and violent and irresponsible legislative sadism has made of this particular office.

Gov. Dempsey obviously has some sympathetic understanding of what has just happened to a welfare commissioner and what frightens off potential successor commissioners because the governor himself has just been passing through a phase of his career in which he himself was subjected to senseless abuse, as if neither he nor his office were considered entitled to the respect and civil tongue of even his own political party.

But Pres. Babbidge's concern obviously did not halt with such potential Connecticut examples of the rough treatment given leadership. The public and its whip go seeking their boy in the White House, or on the Supreme Court bench, until it is indeed something of a miracle that some are tough enough to survive, others tough enough to want to move forward into the hot spots.

To be a successful and durable public official these days it is not enough to be tough, and it is not enough to be right, either, and not enough to be both tough and right together. An added ingredient is needed, which we would call something in the category of style—some quality of roundness, perhaps, which baffles enemies looking for some kind of grip or leverage.

While Mr. Olmstead's column was being distributed I was discussing exactly the same problem in Danbury, in part as follows:

First let me say that the demands made upon local administration, mayors and first selectmen, of our cities and towns are staggering. In too many cases in this decade of demonstration and dissent, our people take the attitude that mayors are expendable, that they are put up to knock down, and it is certainly significant and worthy of pondering that in many instances mayors of major cities—there are five recently—have seen fit to retire from the arena—even though they undoubtedly would have been reelected—because they could no longer stand the miseries of office in today's climate.

The decade of dissent has seen demonstrations over Vietnam, the draft, taxes, environmental control, law and order, voting rights, civil rights, crime in the streets, and inflation—and yet at the same time, it has been a decade of accomplishment—a decade of full employment and of social progress, of expansion of employment opportunities and civil rights. It has also been a decade of riots and strife on college campuses. A review of the problems of the past decade makes it painfully clear that this is not a time for wishful thinking or appeasement. I suggest, however, that it is a time for restraint in every area of public action, and, particularly, with reference to our fiscal programs.

It is a reason for questioning, as we face up to our major problems, that elected officials are too often automatically looked upon as culprits or loaded with abuse while they not only are faced with the problems of carrying their difficult daily tasks, but also of coping with the continuing and the frustrating techniques of confrontations and discord.

It is indeed unfortunate that captious criticism is not only perpetrated but encouraged. To those who stimulate this criticism, I ask just how much criticism and how many attacks can any individual stand, and will the system continue to function without the public support of elected officials of integrity and ability. This by no means excludes legitimate criticism and prompt and adequate punishment of malefactors.

Our young people especially need to be given perspective, both in the framework of the history of government and through the comparison of the different political systems of the world today so they can judge our system on sound information.

There is need for us to appreciate the values of our own system as well as to understand and remedy its shortcomings. And while we should and do work to bring about remedy and improvement we would do ourselves and the system a great disservice if we emphasized only defects.

MONEY COULD BE AVAILABLE FOR THE POVERTY PROGRAM

(Mr. MADDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MADDEN. Mr. Speaker, I was much interested in the remarks of my good friend Congressman DEVINE to the effect that I did not really have much concern about where the money would come from if we would raise social security payments and if we would enact a $200 Federal income tax exemption. The gentleman should never have asked that question, because I have been here in the well of this House each year when the tax bill is debated explaining where $7 billion or $8 billion dollars would be collected by the Federal Government if we could repeal tax loopholes and compel the large oil companies, real estate foundations, and so forth, pay some taxes. If we could get more help from the Republican side and also more Members on the Democratic side the Government would have plenty of money to take care of all our local problems in-

cluding poverty. Most of these tax dodgers are in about the same tax-exempt status they were before the Senate or the House went to work trying to enact a tax reform bill.

Furthermore, I have spent a great deal of time in the well of the House trying to get some Republican support to cut down the $3.5 billion farm bonanza. I do not know how Congressman DEVINE, my good friend, voted on that, but I and other Members have tried to knock some of the billions off the farm bonanza, but we just cannot succeed. The House limited the annual amount to $23,000 for any one farm operation. There are six farm operations that are getting over $1 million a year just for idle land out in the desert country. And there are about 300 farms getting between $200,000 and $1 million every year for idle land. I have tried to get my Republican friends over here to come along and cut that down. If we did so, we would have plenty of money for the relief of poverty. We would have billions for poverty and other necessary domestic programs if we could repeal only 50 percent of the fabulous loopholes. Some of the Republicans go along on it, but most of them do not. If we could make oil pay a just share of taxes; if we could cut down the farm giveaway bonanza, we would have no trouble on the poverty or other domestic programs.

WHERE DOES THE MONEY GO?

(Mr. KYL asked and was given permission to address the House for 1 minute.)

Mr. KYL. Mr. Speaker, a moment ago the gentleman from Indiana referred to what he called the fraudulent agricultural appropriations.

There is something fraudulent about those appropriations, but only in that they do not accurately reflect how the money is spent.

The gentleman from Indiana must remember there is a billion dollars in the Agriculture Department appropriation for food stamps, for school milk, and for school lunches.

There are other millions of dollars in that budget for foreign aid through Public Law 480.

There is a vast amount of money in the Agriculture Department appropriation to maintain and manage our national forests.

There is other money, millions of dollars, in the Agriculture Department budget for flood control and for soil conservation.

There is other money in that Agriculture Department budget to take care of the needs of other people not living on farms; for instance, for the inspection of foods, meats, and agricultural products.

Let it not be said by anyone on this floor that the $3.5 billion, or whatever it is as an appropriation for the Agriculture Department, is a bonanza for the farmers of the United States. That it certainly is not.

CEMENTING UNITED STATES-JAPANESE RELATIONS

(Mr. WYATT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WYATT. Mr. Speaker, as one of the original members of the informal United States-Japan Parliamentary Conference, I have developed a considerable interest in the relations of our countries. During the past few years, I have become acquainted with the Japan-American Cultural Society in Tokyo. Mr. Jiuji G. Kasai, president of the society, has just been in Washington, in the interests of founding the Abraham Lincoln Cultural Center in Japan.

David Lawrence wrote a revealing article on this subject, which I herewith commend to my colleagues:

[From the Washington Star, Dec. 8, 1969]

JAPAN-U.S. CULTURE CENTER SOUGHT

(By David Lawrence)

How many people know that the United States furnished large amounts of economic assistance for the reconstruction of Japan after World War II—in the occupation period between September 1945 and April 1952? How many people know that the government of Japan agreed in 1962 to pay back $490 million and has already done so? It was agreed also that about $25 million of that sum would be set aside for cultural exchange programs between the two countries.

An organization in Tokyo known as the Japan-American Cultural Society now would like to see at least $12 million of the money used for the founding of an Abraham Lincoln Cultural Center in Japan.

Juiji G. Kasai, president of the Japanese organization, visited this correspondent a few days ago to tell of the new venture to honor Abraham Lincoln. Kasai graduated from the University of Chicago, and has always been friendly to America.

Incidentally, Kasai, who in 1941 was chairman of an important committee of the Japanese parliament, made an earnest attempt in August of that year to prevent war between this country and Japan. At that time, he came to Washington and told this writer that war might break out, that anti-American feeling was building up because of the embargo placed on strategic materials by President Roosevelt, and that reckless militarists in the Tokyo government were pursuing a dangerous course.

Kasai and this correspondent discussed the problem with the Japanese ambassador in Washington for two hours. A conference was arranged for Kasai with State Department officials. Communication in those days with the Japanese military government, however, was not very fruitful, and the attack on Pearl Harbor came 28 years ago yesterday. Ever since that time, Kasai has been constantly seeking to develop friendly relations between the United States and Japan.

Congress has not yet appropriated for the Abraham Lincoln center any portion of the residue of Japanese repayments set aside for cultural exchange. The project has the sympathetic support of the State Department, and the matter will be presented to Congress some time during the January session.

The proposed activities of the Japan-American Cultural Society include the acquisition and maintenance of a comprehensive public library featuring books and articles about Lincoln, and the sponsoring of lectures and seminars in the field of American studies. Special courses would be offered for young Japanese in comparative studies of the history of the United States and Japan, and they would be designed "to inspire them to emulate Abraham Lincoln's ideals, character and achievements." Scholarships would be furnished to enable Japanese students to attend American colleges and universities.

Kasai, in his proposal for the establishment of the Abraham Lincoln Center, says:

"Japan owes her present prosperity to post-war American economic assistance, and our people are enjoying unprecedented peace and security, thanks to the U.S.-Japan security treaty. It is universally recognized, however, that in the immediate future Japan will encounter major issues of paramount importance to the very future of the nation as well as to prospects for world peace.

"Communist infiltration of many segments of the Japanese society, especially the educational system, has produced social and political disturbances which clearly threaten the viability of the democratic form of government in our country. Meanwhile, in the arena of international affairs, questions such as Okinawa and trade liberalization are severely testing the durability of our present friendly and mutually beneficial relations with the United States of America.

"It goes without saying that in Japan the times urgently demand, on the one hand, a vigorous campaign to propagate the principles of liberty, justice and democracy, and on the other hand, a major effort to promote better understanding between the people of the United States and Japan through effective educational exchange, information, and cultural activities."

There is no doubt that Japan can exert a big influence toward the maintenance of peace in the Far East. The recent visit to Washington by Prime Minister Sato resulted in a promise by the United States to return Okinawa. This agreement, it is expected, will placate many of the critics inside Japan.

AMENDMENT TO THE CLEAN AIR ACT

(Mr. TIERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TIERNAN. Mr. Speaker, it is generally agreed upon that air pollution is one of the most pressing problems that we face today. To solve this problem, we need a coordinated effort by local, State, and Federal officials, as well as the active support of every private citizen in this country.

Under the present Clean Air Act, this effort is being hampered. Public Law 90–148 provides that the Federal Government would give two-thirds budgetary grants to approved air pollution enforcement agencies. In an effort to acquire greater regional control, the National Air Pollution Control Administration will give a three-fourths grant if two or more municipalities or communities join to form a regional district, or if two or more States coordinate their efforts under a single agency.

The Clean Air Act adversely affects three States in this country: Arkansas, Louisiana, and my own State of Rhode Island. In each of these areas, the authority for air pollution control enforcement is vested in the State itself, with no enforcement subdivisions, such as regional, municipal, or county control agencies. These three States, while carrying out the Federal philosophy of combating pollution on a broad and coordinated scale, are denied the opportunity to receive anything above a two-thirds grant.

Today Congressmen CAFFERY, HAMMERSCHMIDT, PASSMAN, PRYOR, ST GERMAIN, and WAGGONNER have joined me in introducing legislation which would amend the Clean Air Act to allow single State agencies to receive three-fourths grants. In Rhode Island alone,

the adoption of this bill would have made the State eligible to receive an additional $17,000 in 1969.

Mr. Speaker, it is hard for me to understand the justification behind the present limitation put on single State agencies. Air pollution is a major problem for all sections of each of the 50 States. Certainly, the pollution is heavier and more readily seen over cities than in rural areas. But let us not deceive ourselves, the pollution is there—it is everywhere.

Americans annually spew 150 million tons of pollutants into the atmosphere, and 90 percent of this consists of largely invisible but potentially lethal gas. Moreover, these contaminants are boundless in their effects. The air carries pollution far beyond city or county limits, as do automobiles and out-of-city factories.

In introducing this legislation, I am not implying that the additional money which would be made available to these three States—and any future States which might decide to coordinate their efforts under one State agency—will solve the air pollution problem. Certainly $17,000 additional funds for Rhode Island will not by itself save us from these pollutants, but it is a step in the right direction.

The Government estimates that air pollution damage to animals, crops, paper, cloth, rubber, leather, and stone costs each man, woman, and child in this country $65 a year, and this is excluding damage to human life. Presently the National Air Pollution Control Administration is providing an average of 35 cents per person to fight air pollution. With the gravity of the problem so extreme, this paltry amount is inexcusable.

The burden of proof must also lie with the Congress, for we are the ones who appropriate the funds to NAPCA. We hear the American Cancer Society advertising about matters of life and death. Certainly, air pollution is one of these matters, and it is a blot on the record, and hopefully on the conscience, of the whole Congress that more money is not provided to fight pollution.

Mr. Speaker, above us there is a narrow band of usable atmosphere, no more than 7 miles high, with no "new" air available. Individual States that wish to consolidate their efforts to preserve this atmosphere must not be punished. They should be eligible to obtain three-fourths grants, just as counties or States who coordinate their efforts receive.

I hope that my colleagues will see the need for rectifying this unjust situation immediately.

PROBLEM OF PORNOGRAPHIC MATERIAL

(Mr. HAGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAGAN. Mr. Speaker, in connection with the current study being made by the Supreme Court on the constitutionality of a law under which a person can prevent obscene mail from being mailed to his home simply by asking the Post Office to stop it, I wish to comment on the very serious problem we are facing today regarding the widespread distribution of this pornographic material in our Nation.

In homes across the country our people are receiving a tremendous amount of obscene material that is not only unsolicited and unwelcome but shocking in content. I have received a great deal of mail from my own district complaining of this literature and enclosing samples of the material received. There is no doubt that this is hard-core pornography and extremely objectionable. The realization that this smut is being sent through the U.S. mail to minors, some as young as 10 and 12 years old, makes me wonder if this is not carrying freedom of expression just a little too far. It is time we all stop and remember that some standards of decency—a sometimes forgotten word these days—must prevail, particularly where our young folks are concerned.

When Public Law 90–206, dealing with the prohibition of pandering advertisements in the mails was enacted by the 90th Congress, we believed we had taken a big step forward in preventing this kind of obscenity from getting into homes where it was unwanted. And, I believe it is beginning to have some impact. I sincerely hope the Supreme Court will not see fit to weaken this law. If anything, we need to do more in this area.

Several months ago, out of my concern over this situation, I introduced a bill to amend title 18 of the United States Code, to prohibit the dissemination through interstate commerce or the mails of obscene materials to persons under the age of 18 years, to restrict the exhibition of movies or other obscene matter to such persons and to prohibit the sale of mailing lists used to disseminate by mail obscene materials to such persons.

This bill will make it a Federal crime for whoever knowingly uses the mails for the mailing of any material defined in this act to be nonmailable with a fine of not more than $5,000 or imprisonment for not more than 5 years or both for the first offense and a fine of $10,000 or imprisonment for not more than 10 years or both for each offense thereafter. I do not think smut peddlers should be permitted to use mail privileges to make profits on this objectionable material. The American people should not have to subsidize pornographers.

In connection with the mails, a section is included in the bill stating that it shall be unlawful for any person to sell or offer for sale any mailing list knowing that such list will be used to sell, offer for sale, loan or deliver, through the mails to any minor photographs, films, books, pamphlets, magazines, recordings, or similar matter deemed obscene according to the definitions of this measure. Pornography mailers pay high prices for the names and addresses of young people below the age of 18. This must be curtailed.

Because of the direction our courts have been taking lately, a section has been added to the bill stating that the Supreme Court and courts of appeals shall not have jurisdiction under certain specified sections of the United States Code to review any determination made that any material described, in certain sections of title 18, is designed primarily to appeal to a minor's prurient interests. There has been far too much leniency on the side of what constitutes decency. Too many Supreme Court decisions have judged obvious and flagrantly obscene material to be deserving of the constitutional protection of freedom of speech and press. I believe an individual's right to privacy must also be considered. I do not claim to be an expert on pornography but as a parent, a citizen, and a legislator, I claim the right to protect our children from the smut peddler and unwholesome influence of his wares.

I defend the right of parents to protect their children from this pornographic material. They have spent years educating their children in the moral values of our society and now, we here in Congress, have the opportunity and obligation to help them by enacting responsible and reasonable laws to keep this highly undesirable material from reaching their children through the mails.

I believe that the immediate need for such legislation will become more and more evident as the current hearings on obscenity progress. I urge careful consideration of the many similar bills that have been introduced on this subject, and that we, as a body, do everything we can to stop this traffic in filth that is so destructive to the moral fiber of our Nation.

GERMAN MEASLES VACCINATIONS UNDER THE PARTNERSHIP IN HEALTH PROGRAM

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous material.)

Mr. SMITH of Iowa. Mr. Speaker, the partnership for health program is not working adequately as a vehicle for executing a rubella vaccination program.

There seems to be some misinformation and a considerable lack of complete information concerning the rubella—german measles—control program. As a member of the Subcommittee on Appropriations which recommended appropriations for research on rubella and for this vaccination program, I have been very much interested in this subject matter and believe that a summary of the facts might be helpful.

Rubella, which is commonly called german measles, is one of those communicable diseases which is mild for children. The fact that it is not serious to children reduces the incentive for parents of small children to rush to the doctor's office and pay $6 for a shot for the child and the fact it is not serious to the child makes the possibility of children having a rash for 2 or 3 days seems preferable. However, children carry the disease to adults and the consequences can be very serious to the unborn child of a pregnant woman because the incidence of retardation in such children is greatly increased. Retardation is a very, very serious problem both because it is so exceedingly difficult to even partially overcome but also because it is one of the most costly. It is so much in the interest

of all citizens both financially and socially that any action whatever should be taken which might reduce the number of retarded children.

Outbreaks of german measles seem to go somewhat in cycles and next year is expected to be one of the years when there is an epidemic. Therefore, it is even more important that any control program be executed as soon as possible.

In early February of this year, the National Communicable Disease Center in Atlanta, Ga., which is financed through the National Institutes of Health, reported to our House Appropriations Subcommittee on Health that they were virtually certain that a breakthrough had finally been obtained and that a vaccine for rubella could be licensed. They asked for an emergency appropriation so that they could launch a nationwide vaccination program when and if the vaccine is licensed. The Congress immediately gave them all the funds they had asked for and told them that if more money is needed to come back. I do not believe there was a single dissent in Congress and this is one of the few programs that the administration's Budget Bureau did not reduce.

There are, however, certain problems and limitations upon launching an immediate nationwide vaccination program for rubella. The vaccine, which was finally licensed in June for one company and for another company this past week, is a live virus and it is not advisable that it be given to females who may possibly be pregnant because this would increase rather than reduce the risk of bearing retarded children. Since it is an injected vaccine, rather than an oral vaccine like polio, there are certain problems and it must be given under medical supervision. This is different than the polio pills which were given orally and it did not even hurt if persons received more than one dose of those pills. They could be and were distributed to various groups and handed out almost indiscriminately through schools; but rubella vaccine must be distributed under a supervised program. Due to these limitations it was felt that the limited quantities of vaccine first available should be injected primarily into young school-age children who are the most susceptible and most apt to carry the disease to their mothers who might be pregnant.

Following the polio vaccination episode, it was strongly felt that some kind of a national program was needed in order to distribute on a wide basis the great benefits of health research when a new vaccine is discovered. The Partnership for Health Act was passed. The medical profession and most involved felt that under this new program State health departments and county health departments could be developed and that it would provide the best way to supervise a program such as the German measles vaccination program that is now underway. In my opinion, confidence in such a program meeting the test was not warranted and a much better program must be developed. The so-called Partnership for Health Act provides an allotment of money to the States on a population basis to encourage them to set up State and county health organizations. There are also grants on a population basis for specific projects like rubella vaccination. Some States have responded by more than meeting the Federal grants while other States do not even meet the Federal grants overall—let alone for specific projects like that for rubella. Iowa has been in the latter category along with many other States.

It seems to me that it is almost an impossibility to have a mass immunization program where we depend not only upon 50 individual States but where those States, in turn, also must depend upon about 100 independent county health departments. In Virginia, for example, one county has a good immunization program well underway while the neighboring county medical society or health department said they were not even interested. With the shifting population and mobility of our people, women in the county with the immunization program can be exposed to the disease by children from the neighboring county as they go to the shopping center and as children and families move from one county to the other. In my opinion, the Partnership for Health Act does not provide adequate machinery but it is all we have to work with as of today.

Let us use Iowa as an example and I hasten to say that while many States have a far better record of supporting health programs, there are also some with worse records; $245,000 was allocated to Iowa by the Federal Government for a rubella vaccination program. Iowa, in its application for the money, could indicate that all of it would be used for vaccine or they could divide as they saw fit. Iowa chose to apply most of the Federal money to operating costs and supporting personnel. There is no requirement in the Partnership for Health Act that the money be used for vaccine or that it be shown that the money specifically be spent for additional personnel and cost; therefore, some of the States merely use the money to pay part of the salaries of personnel already on the payroll.

We really have no assurance that allocating additional Federal dollars to the project will secure additional results. In its application, Iowa said they would put up $47,700. But, most or some of this was in "in kind" and other services and might even include services that had already been paid for partly by the Federal Government. Actually more than 50 percent of the cost of operating the Iowa State Health Department, as a whole, comes from Federal funds.

When the rubella program was launched, some States immediately put up more State money than they received Federal money and launched an effective program but many, if not most, were in the category, like Iowa, where they simply did not put up State and local money to complete the Partnership in Health Act and execute this rubella project with the promptness or on the level needed.

Since I have had grave doubts that the partnership for health program would adequately meet the test, I have kept a close eye on this rubella program and the Assistant Surgeon General in charge of the National Communicable Disease Center in Atlanta, Ga., Dr. David J. Sencer, came to Washington for a conference concerning the progress of the program. He personally assured me that he had received from the Congress all of the funds that they feel can be appropriately utilized at the present time. I am not going to dispute him on this and I greatly fear that allocation of additional Federal funds for rubella projects might very well result only in an offsetting reduction in State and local efforts. However, I think the overall program is so important that we should not take any chances and I am going to seek an additional $20 million over what the administration says they need. That will just about double the funds distributed for these project grants. If this merely results in State and local governments having to put up less money, it will not be money lost but rather a shift in the cost of funding State and local health departments.

Meanwhile, I think it is imperative that Congress thoroughly examine the Partnership for Health Act and try to develop some kind of a program where State and local governments become genuine partners rather than the mere recipients of funds based upon population and that we develop the machinery whereby the great benefits of research and the breakthroughs that we expect in the next few years can be distributed nationwide much more rapidly and effectively than they can be under the present setup which so completely depends upon State and county health departments, many of which are so lethargic or so underfunded by their State legislature that they cannot possible meet the needs in a way that will eradicate the communicable diseases.

TELEVISION OPERATION

(Mr. BLACKBURN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks and include extraneous matter.)

Mr. BLACKBURN. Mr. Speaker, it has recently come to my attention that Rev. Everett Parker of the United Church of Christ appeared before the Senate Committee on Commerce, Subcommittee on Communications, concerning S. 2004, a bill that would require the FCC to determine whether a television station was operating in the public interest before reviewing petitions for a competing license.

The first two paragraphs of Dr. Parker's article were extremely interesting in light of the fact that he states that the Internal Revenue Service has threatened his group with the loss of their tax exemption because of their engaging in political activities. I believe that Dr. Parker in his comments did not understand the thrust of the letter which the Internal Revenue Service sent to him.

All churches are exempt from taxation under section 501 C3 of the Internal Revenue Code of 1954. As stated in the code, no group, such as churches, foundations, and charitable organizations, can devote a substantial amount of their

funds toward influencing legislation or issuing propaganda regarding legislation. The basic reason for this is that all groups within the political arena should work under the same set of handicaps. To allow churches involved in political propaganda a special tax-exempt status is to subsidize political activities by these groups. Tax-exempt status for churches was never intended to serve political purposes.

Last June when reviewing Congressional Quarterly, I noticed that certain tax-exempt church organizations had formed a Coalition on National Priorities and Military Policy. This coalition was violently opposed to President Nixon's ABM program. The coalition was financed by funds derived from tax-exempt church organizations. Their activities were in violation of the law. Among the groups that were financing the coalition was the United Church of Christ and the National Council of Churches. I sent a list of these groups to the Internal Revenue Commissioner, Randolph Thrower, requesting that he remove their tax-exempt status. Below is a copy of the letter I sent to Commissioner Thrower and a copy of his response to me. Apparently the Commissioner investigated this matter and requested his district offices to send warning letters to the different church groups informing them of the law. After reviewing these letters, which I will insert into the RECORD, you will see that the IRS' purpose was simply to inform the church groups of their obligation to observe the law.

The coalition began a new propaganda effort after they had been defeated on the ABM issue on September 24 by urging all Members of Congress to vote against the Department of Defense authorization bill. For the information of my colleagues, I am hereby inserting a copy of this letter into the RECORD. Again, I feel that this activity was of the nature prohibited by the Internal Revenue Code. One more fact I would like to bring to the attention of my colleagues is that Dr. Parker stated in his testimony before the Subcommittee on Communications that his group, the United Church of Christ, had not appeared before the Congress since 1952. However, I will be charitable in commenting upon his veracity by observing that he is mistaken. In the Atlanta Journal of June 9, 1969, an article appears stating that Jackie Robinson appeared before the House Appropriations Committee as a representative for the United Church of Christ urging that no funds be appropriated for the ABM project. For the information of my colleagues, I am hereby inserting this article into the RECORD.

On December 9, 1969, I received a letter from Mr. Tilford E. Dudley, director of the Washington office, United Church of Christ, Council for Christian Social Action, regarding the Tax Reform Act of 1969. It is clear that this letter is of a political nature and is an attempt to lobby among Congressmen for certain forms of social action.

One sentence from the letter states: "You will note the comment that 'America needs to spend more' for domestic social service." Also, attached to this letter was a booklet entitled, "Social Action" and it was devoted completely to "Tax Revolt and Tax Reform." I would like to invite your attention to a few of the titles of articles appearing in this booklet: "Tax Revolt and Tax Reform—Editorial," "Tax Exemption of Churches: A Policy Statement of the National Council of the Churches of Christ in the U.S.A.", "The Battle in Congress," and "Tax Restrictions of Foundation."

This group is delving into highly controversial areas of tax reform and I do not believe that this can be considered relevant to the religious functions of a church group. This book is pure propaganda in its approach; it presents only one side of each issue and does this in highly biased and inflammatory terms. Today, I am forwarding a copy of this booklet to the Commissioner of Internal Revenue for his edification since I am sure that he will be interested in knowing of the activities of the United Church of Christ.

I applaud the actions of the Internal Revenue Service in this area. I feel that for far too many years tax-exempt groups have been lobbying for and against legislation which is not directly related to their tax-exempt status. Recently I introduced a bill which would allow these groups to continue their tax-exempt status only if they promote or oppose legislation in direct relation to their tax-exempt status. However, my legislation specifically prohibits them from using tax-exempt funds for lobbying against nonrelated proposals and mounting massive propaganda campaigns in order to influence public thinking.

I feel very strongly that revisions need to be made in the income tax law with regard to tax-exempt organizations and I believe that the recent actions of the Internal Revenue Service point this out most vividly.

The material follows:

COALITION ON NATIONAL PRIORITIES AND MILITARY POLICY,
Washington, D.C., September 24, 1969.

DEAR CONGRESSMAN: We understand that the Department of Defense Authorization bill will be reported by the House Armed Services Committee on Thursday and may come to the floor next week.

We appeal to you to participate in that most vital debate. If you are not already convinced of the need for major cuts, we urge you to give serious consideration to the broad cross section of amendments that will be offered. We ask this because we are deeply uneasy over the fact that last year a comparable bill passed the House in one day with only two hours allocated to general debate.

Surely the House would lay itself open to the charge of irresponsibility if a similar timetable were adhered to now when so many questions are being raised about U.S. priorities and the size and direction of the U.S. military establishment—so many questions, in fact, that the Senate spent two months discussing the bill. Couldn't the 435 Members of the House spend at least two weeks discussing these basic issues which affect so many aspects of their constituents' lives?

The American people are discouraged over the conflicts racking our society. Many are turning away from the legislative process. They need reassurance that their representatives in Congress are willing to come to grips with major problems—including the problems of the ever expanding arms race and the U.S. propensity toward unilateral military involvements. Some of our membership look forward to coming to the gallery and hearing you deliberate over the Department of Defense Authorization bill. Please do not disappoint them.

Most sincerely,

JOSEPH S. CLARK,
Chairman.

COUNCIL FOR CHRISTIAN SOCIAL ACTION,
December 5, 1969.

Re: Tax reform.

To the Members of Congress:

Enclosed is a complimentary copy of our current Social Action magazine. You will see there a comprehensive article by Professors Byron L. Johnson and William S. Vickrey on the "Moral Issues in United States Tax Policy."

The major points of this article were embodied in a Pronouncement adopted last July by the Synod of the United Church, after seven years of study and the circulation of several proposals on tax reform among the local churches. The United Church of Christ is a major Protestant denomination with over 2 million members in over 7,000 local churches.

In terms of the issues now before Congress, the highlights of the article and the pronouncement probably are: a) taxation of interest from State-local government bonds; b) ending the preferential treatment for capital gains; c) replacing the depletion loopholes for oil-gas investors with the usual depreciation provisions; d) normal taxes for church properties and businesses not related to religious pursuits.

The emphasis in the magazine is on *sharing the cost of government fairly* rather than on a reduction in taxes, except for the poor. You will note the comment that "America needs to spend more" for domestic social services.

We hope this magazine will be of use to you.

Respectfully yours,

TILFORD E. DUDLEY,
Director, Washington Office.

U.S. TREASURY DEPARTMENT COMMISSIONER, INTERNAL REVENUE SERVICE,
Washington, D.C., June 30, 1969.

Hon. BEN B. BLACKBURN,
House of Representatives,
Washington, D.C.

DEAR BEN: Thank you for your letter of June 12, 1969, commenting on the activities of certain religious organizations and requesting that the Service investigate these activities.

The Service has been very concerned about the kinds of activities to which you refer. As you may know, we have recently undertaken an expanded program to review the operations of exempt organizations and to take action where we think their activities have gone beyond the appropriate bounds. I am certain you can appreciate that we can only work on these matters in depth where there is a reasonable prospect of a violation of the statute and where we have manpower available for the task at hand. In any event, I am forwarding the information you furnished to the appropriate District Directors for their consideration.

With regard to your reference to the Sierra Club, we did find that a substantial portion of its activities was directed at influencing legislation. Obviously, in each case we can only make a determination after a close audit examination. However, given the principal purpose of the Sierra Club, to promote conservation—which generally requires involvement in legislation, as contrasted with the

principal purposes of the religious organizations, we are not as apt to find in the case of the latter that a "substantial" amount of activity is directed toward influencing legislation.

I appreciate your having brought this matter to my attention.

With best personal regards,

Sincerely,

RANDOLPH,
Commissioner.

U.S. TREASURY DEPARTMENT, DISTRICT DIRECTOR, INTERNAL REVENUE SERVICE,
New York, N.Y., August 8, 1969.

UNITED CHURCH OF CHRIST IN THE U.S.A.,
New York, N.Y.

GENTLEMEN: It has been brought to the attention of this office that various religious organizations have been engaged in lobbying activities or are conducting propaganda in political or legislative areas.

Please note that the Federal income tax exemption granted to a religious organization described in Section 501(c)(3) of the Internal Revenue Code is authorized on the condition that no substantial part of its activities shall be the carrying on of propaganda or otherwise attempting to influence legislation. Such activities are specifically defined in Regulations 1.501(c)(3)–1(c)(3) and include contacting or urging the public to contact members of a legislative body to propose, support or oppose legislation and the advocacy of adoption or rejection of legislation. Any organization carrying on substantial activities of this nature is regarded as not being operated exclusively for exempt purposes and is not qualified for income tax exemption under the requirements of Section 501(c)(3) of the Code.

The foregoing is provided for your information and guidance.

Sincerely yours,

———— ————,
Acting District Director.

HON. RANDOLPH THROWER,
Commissioner, Internal Revenue Service
Washington, D.C.

DEAR MR. COMMISSIONER: Several times in the past few weeks I have discussed with you the need to revise the Internal Revenue Code, Section 501(C), with regard to political activities by tax-exempt organizations.

I am very much aware of the fact that the Ways and Means Committee has taken steps to control political activities by foundations but other groups will not be affected by current recommendations of the Ways and Means Committee.

You are no doubt aware that there is a great deal of debate in the Congress over President Nixon's proposed ABM system. During the past few weeks, a number or organizations which are exempt for purposes other than promoting "social welfare" are engaged in lobbying and other political activities with regard to this proposed legislation. For your information, I am below listing the names of these organizations. They are as follows:

United Methodist Church, Division of World Peace, The National Council of Churches of Christ in the USA, The United Presbyterian Churches in the U.S.A., The United Church of Christ in the U.S., Union of American Hebrew Congregations, Church of the Brethren General Board, The Lutheran Council in the U.S., The United States Catholic Conference, Anti-Pollution League Association of Monterey, California, The Executive Council of the Episcopal Protestants Churches.

As you see, many of these organizations are exempt as church or religious organizations. Therefore, I request that you investigate the actions of the above mentioned organizations and inform them, if you find that they might be violating the law, that their exempt status might be jeopardized by this activity.

Furthermore, when investigating this case, I would appreciate it if you would keep in mind the famous Sierra Club case in which the Internal Revenue Service took away the Sierra Club's C(3) status because it published several ads in the *New York Times* and the *Washington Post* opposing an Administration proposal to build dams near the Grand Canyon.

I would appreciate it greatly if you would inform me of the Internal Revenue Service's position on this matter.

Very sincerely yours,

BEN B. BLACKBURN,
Member of Congress.

STRIKE OUT ABM, SPORT GREAT URGES

WASHINGTON.—Former baseball great Jackie Robinson Monday urged Congress not to appropriate funds for President Nixon's proposed Safeguard antimissile system.

In testimony prepared for a hearing by the House Appropriations Committee, the Negro athlete argued that "an overpreoccupation with a possible future external threat on which we are preparing to spend billions of dollars has blinded us to human misery at home."

He said deployment of the Safeguard would distort national priorities, lead to an escalation of the arms race and ruin any potential arms control agreements with other nations.

Robinson represented the Council for Christian Social Action of the United Church of Christ.

A vice president of the NAACP, Robinson was a Republican and a former aide to New York Gov. Nelson Rockefeller, but last year he endorsed Democratic candidate Hubert H. Humphrey for president.

His testimony comes as the major showdown on the antiballistic missile—ABM—issue is nearing in the Senate.

While some GOP senators have been talking about a compromise delay in ABM deployment, the Senate's Republican leader says he hasn't seen any indication, President Nixon would accept any such proposal.

Sen. Everett M. Dirksen of Illinois termed the compromise proposals "a little flight in semantics."

One of the compromises is expected to be put before the Senate Armed Services Committee which starts Tuesday on its job of working over a $25 billion military procurement authorization bill—including an $800 million administration request for Safeguard.

Dirksen's comments seemed to shoot down proposals being made by the assistant GOP leader, Sen. Hugh Scott of Pennsylvania, and Sen. Edward W. Brooke, R-Mass., that would provide for delays of ABM deployment.

Scott indicated he was sending up a trial balloon when he suggested the Pentagon might hold off ABM development for several months to allow time for arms-control talks with the Soviet Union. Brooke is pushing a proposal to delay actual deployment, using the next year for ABM research and development.

CABINET COMMITTEE ON OPPORTUNITIES FOR SPANISH-SPEAKING PEOPLE

The SPEAKER. Under a previous order of the House, the gentleman from Arizona (Mr. RHODES) is recognized for 5 minutes.

Mr. RHODES. Mr. Speaker, those of us from the Southwest are particularly proud of our Mexican-American heritage. In my State of Arizona, these ties are particularly strong due to our close proximity to the Republic of Mexico.

Today, throughout the five Southwestern States, Mexican Americans account for over 12 percent of the total population and their contributions to the character and development of our part of the country have been far in excess of that percentage.

Nevertheless, the unfortunate fact remains that many of the opportunities afforded by our society have not been extended effectively to large segments of our Mexican-American population. Their problems like those of the American Indian in the Western United States, are often unique and must be addressed as such.

Much of this problem, in my opinion, results from a lack of communication between the government and the people involved—first, in identifying the particular task and second, in delivering an appropriate response. In the area of Mexican-American affairs this communications problem is intensified due to a combination of economic, linguistic, and cultural factors.

With the object of narrowing this informational gap, I joined with a number of my colleagues last March in introducing a bill to establish the Interagency Committee on Mexican Affairs on a statutory basis. In the language of H.R. 9330, the purpose of the bill was "to assure that Federal programs are reaching all Spanish Americans and providing the assistance they need, and to seek out new programs that may be necessary to handle problems that are unique to the Spanish-American community."

I am glad that the House Committee on Government Operations has favorably reported this bill—now renamed the "Cabinet Committee on Opportunities of Spanish-Speaking People"—and hope that the full House will act favorably upon it. While this legislation does not answer all of the problems of Mexican Americans, it is certainly a step in the right direction.

RESULTS OF POLL

The SPEAKER. Under a previous order of the House, the gentleman from Minnesota (Mr. MACGREGOR) is recognized for 5 minutes.

Mr. MACGREGOR. Mr. Speaker, in October I sent to my constituents in Minnesota's Third Congressional District a questionnaire soliciting their views on 14 important issues now under consideration by the Congress. The response was immediate and enthusiastic, and I would like to thank the more than 21,000 citizens who took the time to complete and return this poll.

The results indicate that the great majority of Minnesotans living in Anoka and suburban and rural Hennepin Counties favor President Nixon's major proposals in the field of welfare reform, revenue sharing, direct popular election of the President, and postal reform. Given four possible policy alternatives on Vietnam, more than half of my constituents support the President's efforts to achieve peace through Vietnamization.

The almost even division on the question of deploying an anti-ballistic-missile system parallels the close vote on this issue in the U.S. Senate. This result plus the overwhelming response in favor of increased spending to help cure all as-

pects of our environmental pollution problems reflects the growing desire to apply an increasing proportion of our financial resources to meet our pressing domestic problems.

Knowing that my colleagues in Congress will be interested in the response of thousands of Minnesotans to these vital questions, I include here the tabulated results of this poll:

Results of Clark MacGregor's 1969 constituent questionnaire

(In percent)

1. Should President Nixon's Family Assistance and Workfare Program be set up in place of the existing welfare system?

Yes	74.8
No	11.7
Undecided	13.5

2. Should a percentage of Federal income tax money be shared with the cities and states for use as they see fit?

Yes	70.4
No	25.5
Undecided	4.1

3. Should Federal aid be cut off from colleges and universities who do not discipline rioting students to the satisfaction of Washington officials?

Yes	63.4
No	34.5
Undecided	2.1

4. Should we elect the President by direct nationwide vote of the people?

Yes	87.9
No	10.5
Undecided	1.6

5. Should we amend the U.S. Constitution to give 19-year olds the vote?

Yes	46.7
No	51.8
Undecided	1.5

6. Should we create a self-supporting U.S. postal corporation in place of the present postal system?

Yes	74.8
No	20.6
Undecided	4.6

7. Should we pick draftees from among eligible 19-year olds by random selection (lottery)?

Yes	69.0
No	23.8
Undecided	7.2

8. Should we step up space spending with the goal of putting a man on Mars in the 1980's?

Yes	20.4
No	76.7
Undecided	2.9

9. Do you favor President Nixon's Safeguard anti-ballistic-missile system (ABM)?

Yes	45.5
No	45.2
Undecided	9.3

10. Which course should we take in Vietnam?

(a) Maintain current U.S. force levels and operations while pursuing peace in the Paris talks	10.3
(b) Continue Paris negotiations, but accelerate withdrawal of U.S. troops and their replacement by South Vietnamese forces	52.4
(c) Resume and expand air and sea attacks on North Vietnam	16.9
(d) Withdraw all U.S. forces immediately	13.9
No answer	6.5

11. Should we step-up Federal spending on programs to combat water, air, and noise pollution?

Yes	92.1
No	6.5
Undecided	1.4

12. Should Congress authorize the funds necessary to establish Voyageurs National Park at Kabetogama?

Yes	64.2
No	29.0
Undecided	6.8

13. Should the Federal Government do more than it is now doing to control inflation?

Yes	65.8
No	27.8
Undecided	6.4

14. Should the Congress vote to spend additional money to build the civil Supersonic Transport Airplane?

Yes	21.6
No	75.0
Undecided	3.4

REPEAL OF THE VOTING RIGHTS ACT: A GIANT STEP BACKWARD FOR DEMOCRACY

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. CORMAN) is recognized for 15 minutes.

Mr. CORMAN. Mr. Speaker, yesterday, a coalition of southern Democrats, reactionary Republicans, and the Attorney General worked their will in the House. For the first time since the Congress began passing civil rights legislation in 1957, a giant step backward was taken in guaranteeing constitutional rights to all its citizens.

No one is fooled by the sanctimoniousness of the Attorney General's stated objectives in his substitute bill—to assure the right to vote to all persons in every State of the Union. The essence of the Attorney General's approach to voters rights for all citizens is easily equated with the administration's political "southern strategy."

The right to vote for black Americans who live in the South has been a hard-fought battle against every conceivable obstruction put in their path by a highly developed, skilled "southern strategy" long before the present administration decided where to look for future votes.

This country has just begun—and I repeat—has just begun to see real progress in race relations. The Voting Rights Act of 1965 was fundamental to this progress. Almost 1 million southern Negro citizens, for the first time, were permitted under its provisions to register and to vote in local, State, and National elections. The guarantee of the right to vote is the most basic protection every American—black and white—must have if we are to remain a democracy. But, yesterday, erosion of this progress began here on the floor of the House.

The Southern States should not be permitted to engage in their old tactics of denying the right to vote to their Negro citizens—and this is what is being permitted by the acceptance in the House yesterday of the Attorney General's substitute bill.

One wonders how the Attorney General of the United States, with the power and the responsibility of his high office, can justify an action that would in effect destroy one of the most fundamental rights the Constitution has guaranteed to all Americans because of his desire to strengthen his party's political base in the South.

The most succinct and clear interpretation of the Attorney General's substitute bill was stated yesterday by the ranking Republican on the Judiciary Committee, the gentleman from Ohio (Mr. MCCULLOCH) when he said that the Attorney General's bill "creates a remedy for which there is no wrong and leaves grievous wrongs without adequate remedy." And he then asked, as he did of the Attorney General when he testified before the committee, "What kind of civil rights bill is that?"

Mr. Speaker, the New York Times this morning commented editorially on the "sham substitute" to the simple extension of the Voting Rights Act of 1965, which was reported out of the House Judiciary Committee. I call it to the attention of my colleagues, and ask that it be printed below. Perhaps it will help those Democrats and moderate Republicans who voted against the Attorney General's substitute bill to know—before the Vice President of the United States cites this editorial as another comment of the "Eastern Establishment"—that our efforts are being supported.

The editorial follows:

A DEFEAT FOR VOTING RIGHTS . . .

The Administration's "Southern strategy" has scored another victory in the House by defeating the extension of the Voting Rights Act of 1965. After hectic, last-minute lobbying by White House and Justice Department aides, the Administration's substitute, which has the endorsement of Southern segregationists, won by a narrow 208-to-203 margin.

Although touted by the Republican leadership as "more comprehensive and equitable," the substitute bill is a sham. It is more comprehensive in that it indiscriminately squanders the efforts and the personnel required for the law's enforcement. It is more equitable in that it assumes that those who are not violating the law need as much policing as those who do. The answer to the segregationists who complained that the 1965 act was "regional" because it aimed at those seven states where fewer than 50 per cent of the eligible population went to the polls, clearly should be that the wrong needed righting where it did in fact exist.

Instead of requiring that the states submit voting law changes to the Federal Government for prior approval, the substituted (Administration) bill would put the burden of proof on the Federal Government. Thus, the Justice Department would first have to keep up with all state voting law changes and then initiate suits against any discriminatory ones after they had been made. At best—assuming that the department could keep up with an impossible task—this would often lead to court rulings long after the election; at worst, the courts could tie up or frustrate the law's enforcement.

Since the Senate has not yet voted for extension of the act, there is fortunately still a good chance to prevent a move that could wipe out the substantial gains already achieved in Negro voting rights. The addition of 800,000 Southern Negroes to the voting rolls since 1965 proves the effectiveness of the present law; the Administration's substitute bill represents an erosion of that law and of the rights it protects.

HOW IT LOOKS FROM INSIDE THE MAILBAG

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 10 minutes.

Mr. GONZALEZ. Mr. Speaker, for some time now there has been quite a bit of commotion about the alleged deficiencies in the U.S. postal system. I, for one, have assumed a "show me" attitude because I have always marveled at the system that transmits over 81 billion pieces of mail a year and does it, in my opinion, fairly efficiently, given the fact that Congress has not, and is not now, appropriating the necessary moneys for decent pay for the workhorses of the postal system and does not—and has not—generally appropriated the sufficient moneys for modernization, acquisition of up-to-date equipment, and so forth.

Oh, I am sure that within the intricacies of such a vast and sprawling system there are things that need improvement, but this is true of most everything, including Congress.

The trouble is we take the postal system for granted and overlook the dramatic fact that the U.S. postal system transmits more mail than all the industrialized nations put together.

But when we look up a little history, then we can gain a better perspective.

In 1789, the beginning of our present Government, there were only 75 postmasters in the country. It was estimated that the total receipts of the postal system then were $25,000.

Well, within 11 years there were 903 post offices. The postage on a single letter weighing one-quarter of an ounce was 10 cents from New York to Philadelphia. Newspapers were carried 100 miles for 1 cent. Magazines and printed matter of all kind were not privileged. According to the law prevailing in 1792, they were not received at all, and in 1794 the act was amended to give postmasters discretion as to whether they would take them or not.

So, here on November 28, 1969, Life magazine had a big spread about the U.S. mails, presumably to show that they were beyond hope. However, on page 27 the article gave the most eloquent and gratifying testimonial to the remarkable efficiency of the system. In an article entitled "How It Looks From Inside the Mailbag" the magazine narrated the journey of a letter traveling across the country—all of this for 10 cents in 22 hours—remember that is what it cost in 1800 to send a letter from New York to Philadelphia—that is a one-quarter of an ounce letter. Unwittingly, Life magazine has paid the U.S. system a high tribute, and I place into the RECORD at this point this Life magazine article.

HOW IT LOOKS FROM INSIDE THE MAILBAG

"You've got to try to see things from the letter's point of view."—Postal worker.

In an attempt to do so, a Life reporter recently accompanied an airmail letter on its 22-hour coast-to-coast journey from Boston to San Anselmo, Calif. Here is a letter's-eye view of that trip, with elapsed time in hours and minutes posted at each step.

0:00—Dropped into mailbox in front of John F. Kennedy Federal Building in downtown Boston.

0:14—One minute ahead of schedule, mailman Leonard Sansone opens box, scrapes contents into a dirty canvas bag and tosses it into his truck. He makes 17 stops. In the collection boxes, he remarks, he has on occasion found wallets, bottles, tin cans, sand, snow and obscene postcards.

1:14—Arrive at South Postal Annex, where most of Boston's mail is sorted. Heaved aboard a hand cart and wheeled to a 10-yard-long conveyor belt.

1:30—Dumped onto the belt. Men wearing open plaid shirts over T-shirts sift us with their hands like washerwomen, toss us and cullout the large manilas.

1:31—Ride a steeply inclined belt to the floor above. Then onto a third belt where men search through us for airmail.

1:40—Thrown aboard a higher belt which soon drops me down a chute into a canvas-walled cart against which a fellow named Angelo Itri is leaning while he waits for it to fill. He says that he has been wheeling the same cart for three years.

1:45—Freight elevator takes me down to the airmail section.

1:47—Tossed onto a table in front of a man with busy fingers named Donald Burns. He feeds me into a machine that separates us longs from the shorts. Then through the canceling machine, which thumps letters at the rate of 10,000 an hour. Mr. Burns, who has been at this for four years, says that a good operator can hear the difference in the thump when two of us slip through the machine together. He hears the difference and calls a cheater back. "The little ones go through better than the big ones," he says. "I don't know why."

1:57—My stamp, which has a picture of an old airplane on it, is inked over by a cartoon of a bear in a scout's hat and the legend: "Remember, only you can prevent Forest Fires."

2:02—Pigeonholes. No pigeon alive has been in as many pigeonholes as the average letter. The label reads: "California, 900–961." The numbers include the first three digits of my ZIP Code. In I go.

2:25—Letters from our pigeonhole are hand-carried to another stool where Lawrence Campbell slips me into a hole marked "SCF San Rafael 949." Mail to San Anselmo, a town of 13,000 people, is included in the San Rafael load. "The longer you're at it the better you are," he says. His field of holes numbers 63, but he doesn't know that. "I don't count the holes," he says. "I just throw the letters in and tie 'em out."

3:35—We are bound with rubber bands from top to bottom and side to side, and so become a little bundle bound for San Rafael. We are handed to John LaCorcia, who throws bundles into sacks that hang from metal frames in tightly packed rows. Some of the sacks are yards away, but he doesn't miss. Just before dispatching me into a yellow nylon sack marked "AMF San Francisco" (AMF stands for Airmail Facility), he mentions that he has been throwing mail for maybe 15 years. "You get so you can hit the corner pouch just like a basketball player."

4:12—"Bag off," somebody hollers, and bags are slipped off the frame, tied up, locked and thrown onto the scales. Airmail, flown by various commercial airlines, is paid for by the pound. My bag weighs 14 pounds.

4:20—Slung aboard a cart, wheeled to the loading ramp and dumped into a van for the trip to Logan International Airport.

4:50—We are all loaded into pods—big, silvery metal containers shaped to fit the belly of the plane.

5:35—Airborne for the first time, part of 7,000 to 8,000 pounds aboard American Flight No. 651.

6:50—Land at JFK Airport in New York for transfer to a San Francisco flight. No pods on this trip—bags will be stuffed loose, 15,000 pounds of them, into every cranny.

7:05—A lot of mail goes not to the baggage compartment but to the tourist-class section of the cabin. Because not many people take this night flight—and also because mail pays better than people—30 seats are used for mailbags. But I go into the plane's belly.

7:40—Airborne again. There are canaries in here with the mail, hopping and peeping.

13:30—We land at San Francisco in the rain. The belly pops open. We whir down a mobile conveyor belt and are tossed into a blue baggage cart behind a tractor that pulls us to the airmail department.

13:50—*Hippies handling the U.S. mail!* With a couple of unavoidable exceptions, a Post Office public relations man discourages long-haired workers from handling me while the camera lens is blinking. My bag, dropped down a chute, arrives quickly at a row of men who have before them a conveyor belt and electronic keyboards. They examine our labels and then push buttons that magically direct the belt to dump each bag off at an appropriate chute.

14:20—Dumped out on a shelf manned by a row of girls. Girls don't throw as well as boys, use a somewhat hitchy motion. Our little San Rafael bundle is accurately hurled into a hanging pounch marked "CALF.SCF."

14.30—Our bundle is repouched in "SCF SN RAFAEL 959."

15:25—Thrown into a 2½-ton truck bound for San Rafael.

16:30—Arrive at San Rafael post office, where the bundle is sundered. I am repouched with the label "San Anselmo."

16:40—Slung into another truck bound for San Anselmo.

16:55—Arrive at San Anselmo in pouring rain. I go back to pigeonholes, slipped into one marked "ROUTE 2."

17:50—Route 2 mail is given to mailman Riley Brown. He handles mail for Crescent Road and looks me over. He says I am addressed to the wrong place, because the people have recently moved. I am given to John Cannedy, the mailman on the route where my addressee lives now. He pigeonholes me in 40 Park Way.

20:10—Bound with others by a leather strap, I am taken by truck to a relay station where Mr. Cannedy, who walks his route, will pick me up. Left in locked mail sack in a roofed outdoor hallway.

21:30—Mr. Cannedy, swishing along in gray rain gear, stuffs me into his leather pouch.

22:00—I am placed in a yellow mailbox with flowers pasted on it. I have been handled about 30 separate times and traveled 2,800 miles in 22 hours.

HANRAHAN, POLICE TELL PANTHER STORY

(Mr. ROSTENKOWSKI asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROSTENKOWSKI. Mr. Speaker, much has been said about the State's attorney police raid on the Black Panthers headquarters on the night of December 4, 1969. I am enclosing an article from the Friday, December 12, edition of the Chicago Tribune which is a detailed account of the police position. Furthermore it might be noted that State's Attorney Edward V. Hanrahan in another article in the same paper is quoted as welcoming "an investigation by the Department of Justice because it is a reliable, objective agency."

The article follows:

HANRAHAN, POLICE TELL PANTHER STORY

(By Edward Lee and Robert Wiedrich)

The first eye-witness accounts of state's attorney's policemen who took part in a gun

battle last Thursday with a band of Black Panthers were obtained exclusively Wednesday night by The Tribune.

State's Atty. Edward V. Hanrahan made the policemen available for interviews to refute what he termed an orgy of sensationalism in the press and on television since Black Panther leaders Fred Hampton and Mark Clark were slain in an exchange of gunfire with detectives in a West side apartment building.

Hanrahan and his top aids, Richard Jalovec, chief of the special prosecutions division, and Robert Boyle, criminal division chief, also made available official police photographs which they said conclusively proved the Panthers opened the battle by firing a shotgun blast thru the apartment door.

REASON FOR NO GAS

Hanrahan insisted that his man could not have fired tear gas shells into the flat first since, under the law, they were required to knock at the door in an attempt to serve a search warrant. The warrant was issued on the basis of information that the apartment was a clandestine cache for weapons.

Further, Hanrahan and his men declared that they had no prior knowledge that Hampton and Clark would be found in the flat. In fact, the identities of the two men were not learned until after they had been killed in the gun battle, the prosecutor said.

Sgt. Daniel Groth, who led the raiding party of 14 detectives, furnished the most dramatic description of the battle in which he described how he and his men fought it out with the Panthers in the darkened apartment which later was found to have been filled with shotguns, rifles, hand guns, and ample stores of ammunition for the various weapons.

Groth and Jalovec both said the foray on the Panther arsenal had its beginning Dec. 2, when informants who had previously furnished the prosecutor's office with reliable information reported the cache of guns in the first floor flat at 2337 Monroe st.

Jalovec had received his information earlier in the day, and Sgt. Groth received his from an informant who telephoned his home at 10:30 p. m. The following morning the men met at the state's attorney's office and compared notes.

According to the informants, at least three shotguns had been observed in the flat. Neither, however, made any mention of Hampton's or Clark's frequenting the apartment, Sgt. Groth said.

At noon, Sgt. Groth and Detectives James Davis and Bill Kelly discussed plans for the raid on the flat. This session was held after Sgt. Groth had personally surveyed the building and neighborhood and then dispatched Kelly and Davis to do the same.

REJECT EARLY NIGHT RAID

"At first I thought we'd hit the place at 8 o'clock that night," Sgt. Groth said. "But after talking it over, we decided that would be a bad time, both for our safety and that of residents of the area.

"It's a heavily populated neighborhood, so we feared first for the safety of people on the streets at that hour and secondly we feared such a raid might create an incident in the area, which we knew was the heart of Panther territory. Our object was to avoid an incident."

On this basis, Groth and the other detectives decided to stage the raid shortly before 5 o'clock the next morning, Thursday, Dec. 4.

"This wasn't the first time our squads had gone after dangerous individuals," Sgt. Groth said. "And on the basis of the information we had, it was clear that we might be running up again dangerous individuals."

JUDGE ISSUES WARRANT

At 4:45 p.m. that day, Jalovec obtained a search warrant from Judge Robert Collins of Criminal court, citing the facts obtained from the informants. Then Groth drew a lengthy series of orders for the 13 detectives who would accompany him, spelling out in detail each of their assignments in covering and entering the apartment's front and rear doors. Equipment drawn for the raid included a submachine gun, three shotguns, and walkie talkie radios.

"We didn't take tear gas because of the specific nature of our mission and the fact that we figured we'd have the element of surprise on our side," Groth said. "Under the law, we had to enter that flat and serve the warrant for a search. We couldn't just lob tear gas in there and charge."

Late that afternoon, the other detectives were told to report for duty at 4 a.m., but none other than Kelly and Davis were told what the mission would be.

At 4 o'clock the next morning, Sgt. Groth doled out the assignments which called for five men to enter the front door of the apartment, four to enter the rear, three to stay outside and cover the front exit, and two to perform similar duties at the rear.

The men stationed outside were assigned there not only to prevent anyone escaping thru windows, but to also serve as protection in the event of sniper fire from nearby buildings, Groth said. Included in the party of 14 policemen were five Negroes. The men arrived at the apartment at 4:45 a.m.

Sgt. Groth took Detectives Joseph Gorman, George Jones, Robert Hughes, and Davis to the front door. Meanwhile, Detectives Edward Carmody, John Ciczewski, Philip Joseph, and William Kelly approached the rear door while Detectives John Marusich, Fred Howard, and Lynwood Harris covered the front yard. Detectives William Corbett and Ray Broderick covered the back yard.

EXTRA SQUADS REQUESTED

Just shortly before he arrived at the building, Sgt. Groth said that he radioed from the Chicago police department undercover squad car he was driving, asking that the squad operator dispatch marked cars from the Wood street district to the front and rear exits of the building.

"I told them we were about to attempt to serve a warrant," Groth said.

Once at the building, Groth ascended the front staircase on the exterior with Davis on his left. Behind them were Gorman, Jones, and Hughes. The men entered a small hallway containing two doors, one leading to the 2d floor and the other to the Panther apartment.

Positioning themselves to either side of the apartment door, Sgt. Groth said he reached over and first rapped firmly with his left hand. When there was no response, he pounded again, but this time with his revolver butt.

"I heard a voice inside—a male voice—call out, 'Who's there?'," Groth said. "I replied 'This is the police. I have a warrant to search the premises.' "

Again, there was no response, but Groth said he could hear movement inside. Again he said he pounded on the door, shouting, "Police! Open Up!"

"Just a minute," Groth said the male voice replied.

Suspicious of the delay, Groth said he ordered Davis to kick the door open. Davis kicked and the door slammed open to reveal a small ante-room with another door leading to the apartment's living room. That was shut.

Then suddenly, as the two policemen entered the ante-room, they said a shotgun blast was fired thru the closed living room door, a charge which later proved to have been a solid rifle load deer slug fired from a 12 gauge shotgun.

The slug pierced the door, ripping splinters from the outside of the door as it exited, and narrowly missed the two policemen. Photographs of this door were furnished The Tribune by Hanrahan as evidenced that the Panthers inside the flat fired the opening shot at his men.

PLUNGES THRU DOORWAY

Davis, who at this moment was just ahead of Sgt. Groth, plunged toward the door, smashing it open with his shoulders as he dived into the living room and landed on a mattress just to the left of the center of the room.

"I saw a woman half lying and half sitting upright on a bed in a far corner of the room trying to pump another shell into a shotgun she held jammed against her groin," Davis said. "She was about eight feet away."

"In that moment, the woman fired again, the flash of her weapon illuminating her face for Sgt. Groth who was still at the doorway of the room.

"I figured Davis had been hit when I saw him go down," Groth said. "That second shotgun round went right past me and I hugged the door jamb and narrowly missed hitting Hughes who was behind me. I fired two shots at her."

Almost simultaneously, Groth said he ordered Hughes to summon additional city police on the police radio. He also told him to notify the men at the rear of the building via walkie talkie radio that "these people are shooting in here!"

FIRES AT ARMED WOMAN

Davis said he rolled off the mattress and fired one shot from a carbine at the woman who later was identified as Miss Brenda Harris, 18, of 1848 S. Hamlin av.

"She slumped back against the wall with that shotgun still in her hands and I spun away and half turned, just in time to spot a guy sitting in a chair with a shotgun in his hands," Davis said. "He was directly behind me, hidden behind the door I'd just broken open. Thank God, Groth fired those shots at the woman. The flash of his revolver spotted the guy for me.

"I don't know for sure if he ever got a shot in at me or not. I fired twice and hit him. He stood up and I jumped up, too, struggling with him until he fell. Then I fell across his body."

This gunman was identified after the battle as Clark, 22, a Panther leader from Peoria.

Meanwhile, Detectives Jones and Gorman plunged into the darkened room which was lighted only by the dim glow of a gas space heater in a far corner, opposite of the bed on which Miss Harris was lying. Gorman crouched near the door and threw his flashlight momentarily on Miss Harris, then charged for the bed. The light had shown that she was wounded in her right thigh, altho she still held the shotgun in her hands.

DISCOVERS 3 MORE GUNS

"I yanked the gun from her hands and hurled it behind me toward the door," Gorman said. "In that moment, I also kicked aside a round hassock near the bed on which there were lying three hand guns. The guns spilled onto the floor.

Davis, who by this time had risen to a crouch, looked down the long hallway toward the rear of the flat just in time, he said, to see a man duck in and out of the rear bedroom nearest the kitchen. He had a shotgun.

"By then, the guys had broken down the kitchen door," Davis said. "I saw Ciszewski in the kitchen behind the gunman and hollered for him to duck as the man fired at least one round into the kitchen. Ciszewski ducked and the shot missed.

"Hold you fire," Sgt. Groth said he ordered his men at this point. "Give them a chance to come out!" This was the first of five such orders Groth said he gave during the fierce fire fight.

RESPONSE FROM FLAT

"I had men in both the front and rear of the apartment," he said. "I didn't want anyone getting hit in crossfire. But the words were barely out of my mouth before there was the whomp of a shotgun blast from the front bedroom, directly down the hall from the living room.

"They were firing blind because they didn't know where we were, so the charge slammed into a bathroom door almost directly across the hall."

Hanrahan also produced photographs of the inside of the bathroom door, showing how shotgun pellets had slammed through the wood. The prosecutor said that ballistics experts would testify during any court proceedings against the seven Panthers who survived the battle that the shotgun blast he claims opened the battle had in fact been fired from inside the apartment thru the door at police in the outer hallway.

As the shotgun blast was fired from the front bedroom, Detective Jones was crouching between two wooden dressers along one wall at the mouth of the long hall that stretches the length of the apartment. He said he saw a hand reach out from the rear bedroom and fire a shot with a revolver or automatic pistol at the kitchen where other detectives were crouching.

"SHOOT IT OUT!

"It was just about then," Sgt. Groth said, "That I heard a voice call out from the front bedroom, 'Shoot it out!' This was followed by two flashes from the same room I believe were from a shotgun."

At this point, police resumed firing and then minutes later, or perhaps only seconds, Groth said, he again ordered his men to cease fire and again called out to the Panthers, "Come out with your hands up!"

At the rear of the apartment, Detective Carmody jumped over a wooden door that formed a barricade between the kitchen and dining room as the Panther fire continued. Gorman covered him with submachine gun fire from the living room which he fired thru the connecting wall of the living room and front bedroom and down the hallway.

Carmody fired one round from his .38 caliber revolver as he plunged past the rear bedroom doorway to shelter against a far wall of the dining room.

CEASE-FIRE AGAIN CALLED

Again, Sgt. Groth called out for surrender and a cease-fire and this time, from the rear bedroom, Harold Bell, 23, of Rockford, emerged with his hands in the air. Broderick and Ciszewski, who by then had also jumped over the barricade into the dining room, grabbed Bell and took him to the kitchen where other detectives held him.

But again, gunfire directed at police from the front bedroom broke out and Broderick and Ciszewski fired into both bedrooms from their vantage point in the dining room.

Sgt. Groth called another cease fire and ordered the Panthers to surrender, he said. This time, a voice called from the rear bedroom, "We're coming out. Don't shoot. We've got an injured man back here."

Then Louis Truelock, 39, of 1900 Jackson blvd., walked out with his hands up, accompanied by Miss Deborah Johnson, 18, of 2337 Monroe St. They, too, were hustled into the kitchen.

DETECTIVE FINDS HAMPTON

Carmody ran into the rear bedroom to find a man, later identified as Hampton, lying face down on the bed with his head facing the bedroom door thru which repeated gunfire had been directed at police in the kitchen.

"He was lying with his arms hanging over the foot of the bed," Carmody said. "On the floor at his righ hand was a .45 caliber automatic and at his left a shotgun. I could see he'd been hit, but I didn't know if he was alive or dead. All I knew was that that room was full of shotguns and rifles and ammo.

"So I grabbed him by a wrist and dragged him into the dining room, away from all those guns."

A moment later, as Ciszewski was throwing various weapons out of the back bedroom, he was wounded in his left calf, presumably by a slug fired thru the wall from the front bedroom directly adjacent. He dived for safety in the kitchen.

Meanwhile, while those in the rear of the flat were surrendering, Sgt. Groth again ordered a cease fire.

"I was virtually pleading with those in the front bedroom to come out," he said. "But again they fired so Broderick fired a shotgun five time into that room from the rear of the hallway. And I kept yelling for them to come out, but there was no response."

Gorman approached the front bedroom door with his submachine gun in his hand.

"I slammed thru that doorway, firing a burst into an open closet I spotted out of the corner of my eye directly to the right inside the door," Gorman said. "I saw two beds with the forms of two people rising between them. One had what looked like a shotgun in his hands he was trying to raise clear of the bed.

"As he started to aim, I fired and the gun fell as he did. The second form kept rising in those few seconds and I fired again after I saw something that looked like a hand gun in the person's hand."

The first person wounded by Gorman proved to be Blair Anderson, 18, of 6943 Justine st. The shotgun he was holding was identified as one stolen from a Chicago police department squad last April 6 in the Chicago avenue police district.

BULLET LODGES IN SHOTGUN

Examination of the weapon showed that a .45 caliber police bullet during the gun battle had penetrated the barrel of the shotgun just a few inches above the breach, jamming it with a live round in the chamber.

The second person wounded by Gorman was Miss Verlina Brewer, 17, of 125 W. 107th st.

As Carmody plunged into the room to join Gorman, Miss Brewer and Anderson cried out, "We give up!"

Then police spotted a third Panther member in the room, Ronald Satchel, 19, of 2337 Monroe st., who also surrendered. He also had been wounded.

In both bedrooms, police found large stores of arms and ammunition. In Hampton's back bedroom, four boxes of shotgun shells were found as well as shotguns, a rifle, and hand guns. Similar caches were in the front bedroom, some of it in a flight bag.

THE BATTLE IS ENDED

With the surrender of the last three Panthers, the battle ended.

Hanrahan said he was making public the detectives' eyewitness accounts because of what he labeled the broad publicity given irresponsible statements by people he said had not been present during the battle.

Charges made by such out-of-state persons as Gary's Mayor Richard G. Hatcher were based on similar charges leveled by such Panther leaders as Bobby Rush, deputy defense minister of the Illinois Panthers, a man who didn't witness the battle either, Hanrahan said.

Hanrahan singled out NBC–TV's Channel 5 in Chicago for having furnished what he charged was a platform for Rush to make irresponsible charges not substantiated by any of the evidence.

"They put Rush on the air before he'd even had time to talk with any of the Panthers present during the battle," Hanrahan said.

"There has been an orgy of sensationalism in the press and on TV that has severely damaged law enforcement and the administration of justice."

THE POSSIBILITIES AND IMPLICATIONS OF A FUTURES MARKET FOR STOCKS

(Mr. ROSTENKOWSKI asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROSTENKOWSKI. Mr. Speaker, on December 5, the Wall Street Journal carried a lengthy article about plans of the Chicago Board of Trade for the establishment of what, in effect, is a futures market for stocks. The story in the Journal discusses at some length the possibilities and implications of such a market. This matter has been gone into most thoroughly by the board and the well known Washington consulting firm of Robert R. Nathan Associates studied the proposal closely and gave it a favorable report. Since the newspaper article is a most interesting one, I include it in the RECORD at the end of my remarks.

However, my purpose in calling attention to the plans of the board is not primarily that it may establish a securities market. What I have in mind is to emphasize that this is only one step in a series for revitalization and expansion of the board's activities.

Most of the credit for what I regard as a far seeing and constructive program, goes to the board's president, Henry Hall Wilson. He is a former White House assistant to both President Kennedy and President Johnson, and became the board's head in 1967. Let me briefly outline some of the action which the board has taken since that time. Prior to that time the board offered a futures market for trading in grains and oils and, as I have stated, was the largest commodities exchange in the world. It would have been an easy matter for Mr. Wilson to have proceeded along traditional lines, but instead he has gone outside the field of agriculture. Within the past 18 months, the board has begun trading in three new commodities and two of them, plywood and silver are nonagricultural. The other is iced broiler futures.

I think this venture into commodities outside agriculture is extremely important and shows both imagination and vision. Trading in the grains and to some extent other farm commodities has been hampered on occasion by the operations of the Federal farm programs and the nonrecourse loans which accompany them. At times, the surpluses of wheat, corn and other grains have been so great that the Federal loan actually fixed the price, which then hovered near the loan level. Under such circumstances, the necessity of using the futures market for hedging, a form of price insurance, was greatly lessened.

I do not doubt that there will always be a futures market and a vital one for the agricultural commodities traded in on the board but there is no reason whatever not to diversify and increase the scope of operations. Furthermore, the decline in stock prices has drawn the attention of many investors to the possibilities of the commodities futures market and the results are apparent in increased trading on the board and on other commodity exchanges. One byproduct of this situation is seen in the fact that seats on the board now are selling at around $40,000 the highest price since the alltime high of $62,500 in 1929.

Under Henry Hall Wilson the board has taken other significant steps toward modernizing and improving operations.

A special commission of board members has authorized a major study of the economics of transacting and handling business on the exchange.

A complete review of all grain contracts traded in on the exchange with a view to bringing terms and provisions in line with modern economic requirements is in progress.

Board rules have been changed to permit women to become members and several have done so.

The board has created a new department to undertake long-range planning and market development for the exchange.

The board named Dr. Milton S. Eisenhower, educator and head of the President's Commission on Violence, Joseph L. Block, industrialists, and Charles L. Schultze, former Director of the Budget, as public directors to help advise on the Exchange's assumption of wider responsibilities for agricultural and trade problems outside the scope of futures trading.

The city of Chicago is proud of the board of trade, which has long been an asset to the entire Midwest, and, in fact, the whole country. In 1967, futures trading on the exchange reached the tremendous volume of slightly more than $50 billion, or more than two-thirds of all futures trading in the United States.

I have come in contact with Mr. Wilson on quite a few occasions since he became president of the board. I regard him as a dynamic and progressive leader. I feel that under his direction the board will become an increasingly important factor, not only in futures trading, but in leadership which will help deal with many nation's important economic problems.

CHICAGO BOARD OF TRADE PUSHES PLANS FOR CENTRAL FUTURES MARKET IN STOCKS

(By Jonathan R. Laing)

CHICAGO.—The Board of Trade is pushing ahead with plans to establish a central marketplace for stock options, those estoric trading devices known to practitioners as puts and calls.

The board, the world's largest mart for trading commodity futures, is formally asking the Securities and Exchange Commission for permission to establish what would amount to a futures market for stocks. The board announced last February that it was contemplating such a move.

The SEC consideration is likely to be lengthy. The Board of Trade, itself, has yet to work out some of the fine details that would have to be submitted for approval. It's unlikely, therefore, that any central option market could be established for at least a year.

Should it come, though, it could open a broad new market for institutional investors eagerly casting about for ways to improve their stock-market performance and hedge their massive portfolios. And it could entice more small traders to the intricacies of option trading, which has been growing in recent years but which still ranks as a gnat when matched against the giant volume of the New York Stock Exchange.

Among institutions that have been attracted to option trading are American General Insurance Co., Houston, and Lincoln Consolidated Inc., the Houston-based holding company for Lincoln Liberty Life Insurance Co., First National Bank of Chicago and Connecticut General Life Insurance Co., Hartford, Conn., have let it be known they, too, are planning to begin option trading next year.

Other institutions may follow if the Board of Trade establishes its exchange. The treasurer of one large Midwestern university ventures that a market sanctioned by the board "will make options respectable enough for me to go before my trustees and propose that we use endowment money for both writing and buying options."

Still other tax-free institutions say they are holding back only until they can win tax-exempt treatment for profit reaped on options trading.

The profit, or loss, result from speculating which way the price of a stock is likely to head over a stated period of time.

With a call option, a trader acquires the right to buy 100 shares of a stock within a specific period at an agreed "striking price," which usually is at, or near, the market price at the time of the option purchase. For that right he pays a "premium," usually 5% to 20% of the value of the underlying stock.

If the market price of the stock rises above the striking price and the premium paid for the option, the holder profits by buying the shares at the lower striking price and promptly reselling them at the higher market price.

If the market performance fails to meet expectations, however, the option buyer need only allow his rights to expire. His maximum loss is the premium he paid to acquire the option.

PUT OPTION REVERSE

A put option works the other way. Again for a premium ranging from 5% to 20%, the buyer of a put option has the right to sell, or put, 100 shares of a stock within a specific period at an agreed price. He profits when the market price drops enough below the striking price to cover his investment in the option premium. He buys the stock at the cheaper market quote and then resells at the higher option price.

According to one study conducted by the SEC in 1961, the typical option buyer paid a 14% premium to enter the option market. The typical option period, to qualify for treatment as long-term capital gains, was six months and 10 days.

Option sellers customarily have been wealthy individuals, or large securities holders, including, of late, insurance companies and other institutions. They profit on the premiums they receive from the options they sell. And they can profit handsomely if the market's performance discourages option holders from exercising their rights. Such returns can run as high as 40% annually if the option sellers can write a number of options successively on the same shares.

There are hedge advantages, too, in option selling. Because the seller receives a 5% to 20% premium for the option right, be it a put or call, he's protected by that amount whichever way the market turns. If the value of his shares declines, his loss is the decline in paper value of his securities minus the premium received for the option. If the value rises, the option seller has profited at least by the premium received.

Despite the appeal to some speculators, however, turnover in such options has been comparatively light. According to the Put and Call Brokers and Dealers Association, a dealer group, put and call options were written on a total of 30.3 million shares last year. That's up from 23.8 million shares the year before. But the New York Stock Exchange, by contrast, last year traded almost 13 million shares on an average day.

Currently, about 70% of these puts and calls traded in the U.S. are handled by about 20 broker-dealer concerns that deal exclusively in such options. These include Thomas, Haab & Botts, Filer Schmidt & Co., and Godnick & Son Inc. Most are in New York.

TWO STUDIES MADE

The rest of the option volume is handled by such New York Stock Exchange member firms as Goodbody & Co. and Donaldson Luf-Kin & Jenrette Inc.

Henry W. Wilson, the Board of Trade's president, first disclosed the exchange's interest at the mart's annual membership meeting last February.

A Washington consulting firm, Robert R. Nathan Associates, gave the proposal a close scrutiny and issued a favorable report. An 11-member independent advisory committee, comprising representatives of the investing and academic worlds, also took a look at the idea and it, too, declared the contemplated market showed a "high promise for improving upon the relatively inefficient market that exists today."

Understandably, many put and call dealers have a different view. "They won't get enough traffic on the few stocks they will list to survive," says Bert Godnick of Godnick & Sons. "Besides, I don't think you can standardize option contracts like the board plans to do."

Lawrence Kotkin of Kotkin Associates, the only publicly held options dealer, predicts that the board's market "will fall flat on its face." He scoffs that "puts and calls are too sophisticated for a bunch of grain traders in Chicago."

SOME 20 STOCKS AT FIRST

As currently envisioned by Board of Trade planners, initially about 20 stocks will be listed on the board. "Our stocks will be high-quality issues which have large share floats outstanding, active trading volume, and price volatility," a board official says.

The contract unit for each option will be 100 shares. For each stock there will be five maturity dates open at all times, with the most distant maturity 15 months away. Options will expire on the fifth from the last business day in January, April, July and October.

There are also a host of market mechanics, rules and surveillance procedures that have to be worked out by the board in conjunction with the SEC. "Our market involves a form of trading that wasn't even contemplated in the 1934 Securities Exchange Act so, no doubt, we have a long road ahead of us with the SEC," a board spokesman says.

One question could be especially delicate: Should options traded on an exchange be individually registered as securities? Board officials are concerned that a ruling requiring registration could hopelessly snarl an options exchange.

The study by Nathan Associates, in advancing the market proposal, contend that a central market for options would remedy a number of defects of the existing market. According to the report, a competitive, auction market would expedite options transactions and would cut costs.

In addition, a central market would result in tighter regulation of options trading and public reporting of transaction prices. Also, the report asserts that a centralized market would have "greater depth and continuity," thus enabling the options market to better accommodate large-block transactions.

Finally, according to the report, the board's proposed market would include a secondary market in which the buyer or seller of an option could liquidate his position at any time prior to the expiration of the option, thus making options more liquid and flexible as investment instruments.

According to the Nathan Associates report, transaction costs would be reduced because of the lower costs of originating and liquidating options. Instead of a dealer spending as long as a week matching up option buyers and sellers, and charging a dealer spread, the central auction market would allow single-step transactions to be struck on the exchange floor.

In addition, the secondary market would allow holders of puts and calls to liquidate option positions without incurring the additional costs of buying or selling the underlying stock.

For the Board of Trade, a market in stock options would recall a day long since past. The board was certified as a stock exchange in 1934 and trading in securities continued, albeit slowly, until the 1950s.

A return to securities dealings also would represent for the board another step in a continuing diversification program. In the past 18 months, the 121-year-old grain-future market has started futures trading in iced broiler chickens, silver and plywood as trading volume slumped in the exchange's primary commodities of corn, wheat and soybeans.

CULTURAL EXPLOSION

(Mr. HANNA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HANNA. Mr. Speaker, I wish to bring to the attention of my colleagues some of the interesting and exciting events taking place in my home district, and the man responsible for these "happenings."

On an earlier occasion it was my pleasure to report about Allen Parkinson and his imaginative Movieland Wax Museum in Buena Park, Calif. Most men would be content with one outstanding and successful creative expression. Allen Parkinson is a different breed. Mr. Parkinson views his past success as merely a challenge for future endeavors.

His efforts have produced a cultural explosion in southern California. The many hundreds of thousands who have already had the opportunity to see and appreciate Mr. Parkinson's efforts I am sure will agree with me when I say they are both an enriching and entertaining experience.

Some of Mr. Parkinson's more recent endeavors include giving southern Californians a chance to see the Grand Champion Andulsian horse from Spain. He has also added an excellent sea circus to his already creative and exciting Japanese Deer Park.

I am sure I speak for all those who have already enjoyed, and those who will enjoy, Allen Parkinson's Wax Museum, Palace of Living Art, and Japanese Deer Park, when I extend my gratitude to him for making our daily routine a little brighter and a little richer. We are looking forward to the fulfillment of Allen Parkinson's future plans and wish him well in all his efforts.

At this point in the RECORD, I would like to add an interesting biographical sketch of Mr. Parkinson. I commend it to all my colleagues in the House.

BIOGRAPHY OF ALLEN PARKINSON

Allen Parkinson is a man who has accomplished what millions of people only dream of doing—he's a man who has achieved phenomenal success by doing something he enjoys personally. What's more, by fulfilling his own dreams and ambitions, he has contributed to the enjoyment and recreation of millions of others.

Parkinson, an entrepreneur of leisure time activity, is the Founder and Director of Movieland Wax Museum, Palace of Living Art and Japanese Village and Deer Park, three of the fastest-growing entertainment attractions in Southern California. All are located in Beuna Park and are part of the famous Orange County entertainment belt, which also includes Disneyland and Knott's Berry Farm.

Parkinson was born in Rexburg, Idaho, on January 26, 1919, and was raised in Salt Lake City. He attended high school there and for a short time was enrolled at Utah Agricultural College at Logan. During his school days he became captivated by movies and spent every spare dime to watch films.

Like many people, he became so engrossed in the movie that he almost literally took part in them—he rode wild Arabian stallions with Rudolph Valentino and teetered on skyscraper parapets with Harold Lloyd. But unlike others, who forgot the films shortly after they saw them, he relived them over and over again in his mind.

His favorites were Laurel and Hardy, and he would watch their movies as often and as many times as possible. Beyond that, he liked them all; all the stars of the screen were his friends in his dream world.

After leaving school he was a sample case carrier for a jewelry salesman, then became a full-fledged salesman when his merchandising ideas resulted in orders and continued up the ladder.

In 1939 he joined the U.S. Merchant Marine and served five years, spending much of the time transporting war materials to the Far East.

After the war he took a job as salesman for Mercury Records and worked his way to International Sales Director for the U.S., Canada and Mexico, a position that took him to New York. Disenchanted with New York, he resigned from Mercury and returned to Southern California and a job with Piuma Wines as sales manager.

Parkinson was an insomniac and realized there probably were millions of others who also had sleepless nights. He searched for a formula and developed a product called "Sleep-Eze." He produced it, marketed it and turned it into one of the most successful companies in the pharmaceutical industry. In 1959 he sold it and retired temporarily.

He had experienced travel in his earlier years and now wanted to do so again. He began a series of leisurely trips; and during one of his visits to London, he toured Madame Tussaud's wax museum. It was then that the idea that developed into Movieland Wax Museum struck him. A wax museum would be a welcome attraction in Southern California; but instead of including all kinds of famous people, he would limit it to only movie stars, the ones who had given him so much pleasure during his youth.

He launched a search for wax sculptors. The first one he found in Hong Kong was commissioned to do Laurel and Hardy. Parkinson's own personal favorites. Parkinson supervised the work himself to make certain it was exactly what he wanted.

In 1962, with kleig lights and fireworks, the Movieland Wax Museum was opened in ceremonies not unlike those of the world premiere of the motion picture industry's highest-budgeted films. A star-studded list of celebrities, headed by Mary Pickford, attended the dedication; and the museum was an instant success.

Parkinson then turned toward other endeavors. He had long been an admirer of fine art and had spent many hours touring the great museums of the world. Standing in the Louvre one day, he wondered whether he could create the art he was seeing in dimension to show exactly what the artist must have seen as he was painting or sculpturing his masterpiece.

He immediately envisioned the technique used in his Movieland Wax Museum, and the idea for the Palace of Living Art was born. A building was erected adjacent to Movieland, and 40 of the world's greatest paintings and sculptures were duplicated in authentic replica. Alongside each is sculpted in wax the figure of the model wearing the exact same costume and facial expression that the original model wore.

To see such works of art as the "Mona Lisa," "Blue Boy," "The Last Supper," "Venus" and Van Gogh's self-portrait almost breathe with life gives one a new understanding of what the creator of each work was attempting to say or show. Palace of Living Art creates a greater appreciation for art in general; and many who have had only a superficial interest in art prior to their visit have kindled a new interest in finding out more about what they have just seen.

Parkinson had just enjoyed success with the Palace of Living Art when his interests turned in other directions.

He had visited Japan several times and was captivated by the Deer Park in Nara. He returned several times to feed the deer that nuzzled against him and to experience the peace and tranquility of the Deer Park.

He talked with officials of Nara and concluded arrangements whereby Nara would make a gift of deer to him if he would duplicate the Deer Park in California. Parkinson found a 29-acre site near the Movieland Wax Museum, started construction on a Deer Park and immediately found the concept growing into an entire Japanese Village.

Today it is the largest Japanese cultural and recreational center in the Western Hemisphere; it is still growing. A 2,500-seat aqua-theater was recently completed surrounding a 2 million gallon sea waterway; and a complete sea circus with dolphins, sea lions and water clowns perform regularly.

Thirteen bears were a gift of the Nabori Betsu Bear Gardens in Hokkaido, the northernmost island in Japan; and two of them play basketball. They pick the ball up between their paws, take careful aim and toss a shot at the rim. They hit an unusually high percentage of shots, too.

A pool of seals, gifts from Sapporo, also on Hokkaido, greets visitors as they enter the Village; and black swans and golden carp from the City of Ube glide through the many lagoons within the Village. Japanese architecture prevails. All employees wear traditional and authentic Japanese costumes. A tea house serves Japanese and American food, and Japanese music plays throughout the Village.

The Village now has more than 200 deer, and visitors to the Deer Park take delight in feeding them as they stroll through the sunken deer compound. White dove in a special walk-through pavilion also eat out of guests' hands.

What's next for Parkinson? He plans to continue expanding the Japanese Village. There are many more aspects of Japanese culture he wants to bring to this country, and his long-range plans call for full utilization of the 29 acres.

Not everyone can visit the Orient personally, he says; and if the Japanese Village can give its visitors the feeling of having actually been in Japan, even if for only a few hours, its purpose will have been fulfilled.

As long as Allen Parkinson keeps finding things that he enjoys, the American public will continue to benefit.

STATEMENT OF POSITION OF THE NATIONAL SKEET SHOOTING ASSOCIATION

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, the National Skeet Shooting Association has rendered valuable service to law-abiding sportsmen's groups and to legitimate anticrime proposals. This organization has been a leader in the efforts to provide sound programs by heping to make needed facts on these important subjects available to the public. Recently, the organization has prepared a statement of posi-

tion which I am pleased indeed to submit for reprinting in the CONGRESSIONAL RECORD for the benefit of the Members of the Congress:

STATEMENT OF POSITION OF THE NATIONAL SKEET SHOOTING ASSOCIATION

Few domestic problems are causing such great concern as the skyrocketing incidence of lawlessness and armed crime in this Nation. While the impact of increasing crime is primarily felt in the major urban areas, it is not confined to any one State or locality. And, whenever armed crime is discussed, the subject of "gun controls" as a solution to it almost invariably arises.

At the outset this Association submits that the term and concept of "gun controls" is a misplaced one. What we should be talking about is "crime control," for it is the misuse of firearms in crime, by persons who have no regard for the rights of others, not the lawful ownership of firearms for self-defense or lawful sporting purposes, which is causing the concern to this Nation. It is the criminal and socially irresponsible element, not the law abiding—which should be curtailed.

In this regard, our Association wishes to make crystal clear one point: Virtually, every law-abiding citizen owning a firearm, including those in this Association, shares an overriding desire to reduce armed crime and senseless death from dangerous instruments. No dollar cost is too high; human suffering and lives cannot be measured in dollars. Those who legitimately own and use firearms are outraged over their misuse by the irresponsible and criminal element; it is unfair to represent them as callous to crime or interested only in their inconvenience. If this association believed that the currently advertised panacea of "gun controls"—that is, the registration of all firearms and the licensing of their owners—was a reasonable and effective crime deterrent, it would then support them. It does not. It believes there are far better ways to curtail armed crime and senseless death from dangerous instruments, such as firearms. It is in this vein that this association offers its recommendations for the control of armed crime:

First: Stiff minimum mandatory penalties should be imposed (by the States as well as the Federal Government) for crimes committed with deadly weapons, including firearms. For the first conviction, there should be a minimum sentence of not less than one year nor more than fifteen years, with right of parole and judicial discretion to suspend the sentence (for here we may be dealing with someone other than a habitual criminal), for the second conviction there should be a minimum sentence from fifteen years to thirty years without right of parole or suspension or probation of sentence; for the third conviction a minimum of thirty years to maximum of life, without right of parole or suspension or probation of sentence. These sentences should be *in addition* to, and *not concurrent* with, any sentence imposed for the crime. And, most importantly, our judicial and prosecutorial machinery should be expedited to bring about the swift administration of justice.

Studies reveal that a large percentage of armed crime is committed by habitual criminals and repeaters. A prime deterrent to the habitual criminal is the fear of spending actual time in prison or subject to correctional authorities. With a minimum sentence law on the books of our States and Federal Government the habitual criminal will think twice before he engages in armed crime. At the very minimum, we can remove him from lawful society.

Second: Bail should be automatically revoked for any criminal who has in his possession a deadly weapon while awaiting trial for a serious felony. Similarly parole should be revoked where the parolee is transporting or carrying a weapon. Studies have shown there is a relatively high incidence of the commission of armed crime by a criminal while he is out on bail awaiting trial, or while he is on parole after having been convicted and serving a part of his jail term for earlier crimes.

Third: A substantial bail should be required in all felonies involving the carrying or use of a dangerous weapon. Our present bail system has been too soft with criminals accused of committing armed crimes. Again we should have a sliding scale which makes it progressively more expensive for repeat offenders to make bail. Those who habitually commit crimes with deadly weapons are dangerous to society—they should not be allowed to roam freely about upon nominal bail or personal recognizance.

Fourth: We should pass laws, patterned after the *Federal Firearms Act of 1933* which make it illegal, *per se*, for drug addicts, lunatics and convicted felons to transport or carry about firearms or other similar dangerous weapons. A disproportionately high incidence of crimes with deadly weapons is committed either by (1) persons addicted to or under the influence of drugs, or (2) persons who have been previously convicted of felonies. Certainly this element, which is unstable at best, and criminally vicious at worst, should not be allowed to transport or carry about dangerous weapons.

Instead of trying to achieve this goal in an indirect way by licensing the law-abiding and registering the firearm of the law-abiding, the burden should be placed squarely where it belongs—on the lawless and unstable. Provision should be made, however, for permission to be granted by an appropriate public official to allow a truly reformed felon, a cured addict or a person recovered from a mental disease, who has demonstrated his reliability and usefulness to society, to own and use sporting weapons.

Fifth: Firearms safety and hunting safety courses for our population should be encouraged. The States requiring completion of hunter safety courses have shown a marked decrease in hunting accidents. There is no reason why firearms accidents in the home cannot also be curtailed by such programs.

Sixth: We oppose the registration of firearms and the licensing of their owners—(sometimes referred to as an identification card system). At last estimate there were some 200 million firearms in this Nation, mostly rifles and shotguns. The overwhelming majority of these are lawfully owned and responsibly used. Some 50 million sales or exchanges of firearms occur each year—again virtually all between honorable citizens. Neither these people nor their firearms constitute any danger to society and they should not be regulated as if they were potential criminals.

On the other hand, it is just plain foolishness to expect that the felons, assassins, paranoids and other social misfits who should not own guns will step forward to turn in their weapons or incriminate themselves under any such registration and licensing laws. If this class of miscreants believed in law and order, we would not have a crime problem. Indeed, the Supreme Court has ruled that such undesirables cannot be compelled to come forward to incriminate themselves.

The evidence from the jurisdictions having both registration laws and licensing laws (Washington, D.C.; Chicago, Ill., and San Francisco, Calif.) has revealed no significant reduction of crime has occurred. To the contrary, armed crime has increased in those jurisdictions. Similarly, the majority of the jurisdictions having either an I.D. card law (e.g. Massachusetts, Illinois and New Jersey) or pure gun registration laws have experienced no reduction in crime. In short, these programs have been costly failures (for the criminals simply ignored them) as anti-crime measures. There have been, however, numerous reports of unjustified oppression of law-abiding citizens by over zealous governmental authorities administering such laws.

Moreover, the cost of registering the lawful firearms and licensing their owners, and monitoring the lawful transactions is staggering. It would run into billions, and would force the creation of another huge governmental bureaucracy. We would far prefer these billions spent on slum clearance, job programs for the underprivileged, more and better police, better jail systems and similar projects which have a proven history as a deterrent to crime.

In conclusion, we stress that we, in this Association, are not afraid of identifying ourselves, we are not ashamed of our sport or of our love of the outdoors. Since our sport began we have stressed the importance of safety and individual responsibility in the ownership and use of firearms. We, too, are deeply concerned over rising armed crime. But, on the evidence thus far presented, we simply do not believe that a multi-billion dollar anti-gun registration-licensing program aimed at the law-abiding will have any real impact in deterring armed crime or reducing violent deaths. Our Association believes there are far more effective ways to curtail armed crime and armed violence without resorting to regulation of the law-abiding. As the French proverb says: "If poverty is the mother of crime, then want of sense is its father" (Jean de la Bruyere, 1688).

OMEGA PSI PHI OUTSTANDING CITIZEN OF THE YEAR—THE HONORABLE SHIRLEY CHISHOLM

(Mr. RYAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, I would like to congratulate Omega Psi Phi fraternity for its annual sponsorship of National Achievement Week, which was observed by chapters throughout the Nation from November 2 to November 9.

The purpose of National Achievement Week, during which the presentation of Omega Psi Phi Outstanding Citizen of the Year Award is made, is to give recognition to outstanding persons in public life whose outstanding achievement and service to the country have been exemplary to others.

Also during National Achievement Week, awards are made to high school seniors who have written the best essays in a contest which tests their creative writing ability on contemporary problems. This year's topic was "Student Protest And Revolt—Helpful or Harmful?" The authors of the two most thoughtful and best written entries will receive scholarships to the colleges of their choice; and there is a $500 first prize and a $200 second prize.

The Outstanding Citizen of the Year Award is made to nationally prominent persons in private and public life. The award has been given in the past to such leading citizens as the late Reverend Dr. Martin Luther King, Jr.; Senator EDWARD BROOKE; Chief Judge William Hastie, the first black judge to sit on the Federal bench; Robert Weaver, the former Secretary of Housing and Urban Development; Benjamin Mays, president of Morehouse College; George Weaver, Assistant Secretary of Labor for International Affairs; Dr. James Nabrit, president of Howard University.

This year, the award was presented to Congresswoman SHIRLEY CHISHOLM, who represents the 12th District of New York. Mrs. CHISHOLM is the first black woman

to serve in the U.S. Congress, and her service in the House of Representatives has been characterized by the same devotion and determination as her previous work in public service.

Her concern for the problems of the people of her district and of all disadvantaged Americans is untiring. She has brought to the House the qualities of courage, hard work, and dedication which bring credit to the House, her constituents, and to the Nation.

Her choice as Omega Psi Phi's outstanding citizen of the year is certainly deserved. Her contributions to public service should inspire young Americans from all walks of life to serve their fellow citizens through civic responsibility.

JOHN P. COLLINS, NATIONAL CHAIRMAN OF THE AMERICAN IRISH NATIONAL IMMIGRATION COMMITTEE, URGES FAIR IMMIGRATION

(Mr. RYAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, on December 10, John P. Collins, national chairman of the American Irish National Immigration Committee, appeared before the Subcommittee on Immigration and Nationality of the Judiciary Committee to testify on experience under the Immigration and Nationality Act of 1965. He was accompanied by representatives of chapters of the American Irish National Immigration Committee from all across the Nation—from New York to San Francisco, including Chicago and Dayton in the heartland of America, all of which have urged Congress to act to overcome unanticipated and inequitable effects of the Immigration and Nationality Act of 1965.

John Collins is no stranger to the subcommittee for he made an equally eloquent statement before it on July 3, 1968—3 days after the 1965 act went fully into effect.

Almost 2 years ago, I introduced legislation in the 90th Congress to make additional visas available to nationals of those countries where the average immigration had sharply declined as a result of the 1965 Immigration and Nationality Act.

This year, on the opening day of Congress, I again introduced this legislation as H.R. 165. Seventy-seven Members of the House are either cosponsors of the bill, or its companion bills, or have introduced identical bills. A list of sponsors will be appended at the conclusion of my remarks.

H.R. 165 makes sure that no nation would suffer a severe reduction in its level of immigration to the United States as a result of the provisions of the Immigration and Nationality Act of 1965. The bill provides that a "floor" would be established for every nation, based on its average level of immigration to the United States during the decade prior to the enactment of the 1965 act; that is, during the years 1956 through 1965. The floor would in no way be based on the former quota, but only on the actual numbers which came in during these years. The bill provides a floor equivalent to 75 percent of the annual average level of immigration during the 1956–65 base period, or 10,000 individuals, whichever is less. To the extent that immigration falls below the floor for a given fiscal year, extra numbers of visa spaces—above and independent of the worldwide quota—would be provided the following year, so that total immigration reaches the established floor.

I wish to emphasize again that H.R. 165 is not in any way a return to the old national origins quota system—which quite properly was abolished in 1965.

Under the 1965 act, however, the immigration preferences are drawn in such a way that much of the potential immigration from Western European countries cannot meet the qualifications of various categories, particularly those involving labor certification. This is no more equitable than the national origins quota system, which screened out people from sections of the world such as Africa and Asia.

In the case of Ireland, which sent an average of 7,000 immigrants during the base period 1956–65, about 5,300 places, or 75 percent of the base period average, would be established as the floor for Irish immigration. No country whose immigration levels had improved as a result of the 1965 act would be adversely affected.

As predicted, Irish immigration has continued to decline. In fiscal year 1969, only 538 preference and nonpreference visas were issued in Dublin to immigrants born in Ireland. Yet, in 1965, when the new Immigration and Nationality Act was being considered in the Congress, the Department of State assured Congress that under its provisions Ireland would be able to qualify for approximately 5,200 places per year. If the State Department projections had been accurate, it would not be necessary to take remedial action.

The need for corrective action is apparent. H.R. 165 would effectively achieve that corrective action. The widespread support for this legislation evidenced by the fact that there are 77 cosponsors makes it also apparent that many Members of Congress are concerned that remedial action be taken. H.R. 165, by correcting the deficiencies in the present law, would insure continuance of new seed immigration, not only from Ireland, but from every other nation which has suffered a decline as a result of the 1965 act. It would equalize our immigration policy, the imbalances of which have produced the precipitous decline.

So that my colleagues will understand the need for prompt congressional action, I include at this point in the RECORD the very persuasive, and ably presented, testimony of John P. Collins, national chairman of the American Irish National Immigration Committee:

STATEMENT BY JOHN P. COLLINS

Mr. Chairman, Distinguished Members of the Congress,

One year ago we appeared before this Committee to offer testimony on Irish experience under the 1965 U.S. Immigration and Nationality Act. If we were to briefly sum up what that experience has been, we would have to say it has been a tale of shock and sadness.

On October 3, 1965, the new U.S. Immigration and Nationality Act was signed into law by the President of the United States. It was signed in New York Harbor on Liberty Island beneath the Statue of Liberty. The Emma Lazarus inscription on the base of the statue reads partially—

"Give us your tired, your poor, your huddled masses yearning to breathe free. . . ."

This inscription seems very odd indeed today, when we realize that for the first time in U.S. history, the doors of this nation have been effectively shut to the Irish. This is sad indeed when we contemplate all that Ireland has contributed to our nation in the arts sciences, religion, government, business, labor and sports.

In a little known speech delivered by George Washington's adopted son, Custis, at the city hall, Washington, D.C., on June 20, 1826, he declared: "When our friendless standard was first unfurled for resistance, who were the strangers that first mustered round its staff, and when it reeled in the fight, who more bravely sustained it than Erin's generous sons? . . . I cap the climax of their worth, when I say, Washington loved them, for they were the companions of his toils, his glories, in the deliverance of his country."

The part the Irish played in the American Revolution was told in the Irish House of Comomns on April 2, 1784, by Luke Gardner, when he said: "America was lost to England by Irish emigrants."

The major part of George Washington's army was composed of Irish, and the Irish language was as commonly spoken in the American ranks as English. It was their valor determined the conquest.

Well might Lord Mountjoy have declared in the British Parliament: "You have lost America by the Irish." We all know of the magnificent work done on sea by Commodore John Barry, Father of the American Navy. That brilliant Irishman, Richard Montgomery, was the first American General to fall.

Matthew Thornton, James Smith, and George Taylor—all Irish born—signed the Declaration of Independence and five other signers were of Irish blood, namely Edward Rutledge, Thomas Lynch, Thomas McKean, George Reed and Charles Carroll of Carrollton.

Andrew Jackson, "Old Hickory," the first American President who rose from the rank and file was the son of an Irish exile. Another typical Irishman, "equally great in peace and war," was General James Shields. He was the hero of two wars—the Mexican War and the Civil War—a Judge of the Illinois Supreme Court, a Governor of Oregon and Senator from three States. The terrible famine in Ireland in 1846–47 sent hosts of Irishmen to this country, and it is not too much to say that had they not come our Union would have been rent in twain by the Civil War. They and their sons fought heroically to save the Union in the thickest of the wilderness, at the bloody battle of Gettysburg, on the crimsoned field of Chancellorsville and elsewhere. Who can tell the services to America of Sheridan, O'Brien, Meagher, Corcoran, Mulligan, Ford, Meade, Coppinger, and Trilley.

In the battle of Antietam the bloodiest one battle of the Civil War, the Sixty-ninth Regiment, New York Volunteers, Meagher's Irish Brigade lost in killed and wounded 61.8 percent. For more than two hundred years the Irish have been among the pathfinders and builders of the American Nation.

If the handiwork of the Irish were painted green, the average American city would be splashed in all sides with emerald hues. Yet

there are few who are aware of this. A New Yorker for example, may rise in the morning, bathe in water that comes from Croton Dam, built by James Coleman, then take the subway, built by John B. McDonald, pass the College of the City of New York, built by Thomas Dwyer and then Cable to Alaska over a line laid by David Lynch.

It is safe to say that all that the Irish have done for America has never been fully told. As Americans of Irish blood, we are proud of our ancestors and proud too that it was through their efforts that this country became the most prosperous country in the world, but despite these facts we now find that the restrictive new immigration law has drastically reduced the issuance of immigration visas to Irishmen. I ask the committee as a newspaper in New York recently asked, "Are their deeds forgotten?"

Certainly the 1965 U.S. Immigration and Nationality Act in its effect on Ireland does not demonstrate the thanks of a grateful nation. In its effect the present 1965 U.S. Immigration Law is neither fair nor just to Ireland but is beggarly and miserly.

IS THERE A PROBLEM

We were told in 1966, that no problem existed. Then in 1967, we were told by the Labor Department, that the problem laid with the Congress and by the Congress that it laid with the Labor Department. Finally, the State Department admitted that there was a problem and so informed the Congress. The Congress replied that it would solve itself within the three year adjustment period. Of course Ireland did not adjust. Now we are told by some, wait another year—Ireland will adjust and by others that there is no problem at all. Well we've come the full circle, haven't we. We reply that Ireland will not adjust because it cannot adjust under the terms of a law which prevents adjustment. One year ago we made the projection before this very committee that less than 500 Irish would receive preference and non-preference visas in Dublin during fiscal year 1969. We were not very far from wrong. 538 received such visas.

ONE YEAR LATER

Before 1965, 5,000 to 7,000 Irish came here each year. In fiscal year 1969, under the new law only 1,407 Irish entered the U.S. As best we could, we explained the problem to you last year and our testimony is a matter of record. We come here today at your invitiation not only to affirm what we have already said but also to offer the firm hand of cooperation.

We now know that the Irish immigration situation is far from better one year later, And I can assure you that if these invitations to testify continue to be on a yearly basis, no year will come when the Irish immigration situation will be solved if no legislation is forthcoming.

THE PROBLEM OF DISCRIMINATION

No one can deny that many nationalities were the victims of discrimination as a result of past U.S. Immigration policy. We know that many nationalities had no quotas or small quotas which were consistently oversubscribed while Ireland had a large quota which for the most part went unused. However, neither Ireland nor the American Irish asked for the quota.

The law was changed in 1965 to provide equality for all. On its face the law does this and I'm sure we all remember those famous State Department statistics of 1965 which assured you that the law would be fair to Ireland in allowing in over 5,000 persons to enter each year. But we also know now that the law, however, well intentioned it was, is far from fair in its effect on Ireland and some other nations.

THE REASONS

The new immigration law eliminated the national origins quotas, promoted the reuniting of families and protected American labor with a few strokes of the pen. Each of these aims is good and is worthy of our support.

Ireland, England and Germany enjoyed a privileged position in U.S. immigration prior to 1965 partially because of the number of immigrants contributed by them in earlier years. Now all nations will have to compete equally for U.S. immigration numbers. This is good, except that the terms for competition are fairer to some nations than they are to others.

It is now evident that when the new law was drafted, there was a failure to anticipate the effect that the new law would have on the formerly so called "privileged countries" and in particular Ireland. Overlooked was the sociological pattern of immigration in these countries and the history of the country's immigration.

THE FAMILIAL PREFERENCES

The new law provides for a system of preferences based on family relationship and skills. These are of little help to Ireland, while they are of much help, particularly the family relationship preferences to other nations.

Ireland's immigrants to the U.S. have traditionally been of the non-preference unskilled variety. Had the present law been in effect some years ago, many of the members of the Congress would not be present in the U.S. today. Analyzing Irish families, one finds that a few brothers and sisters from the family emigrate while others remain at home. The mother and father remain at home. The Irish emigrant is generally young, unmarried and hence brings no spouse or children. It is the rare case in recent times when a whole Irish family emigrates to the U.S. Thus Ireland's sociological pattern of immigration does not permit it to compete equally with some other nationalities for family preferences.

THE PROFESSIONAL PREFERENCES

In fiscal year 1969 under the new law only 122 Irishmen qualified for a visa preference as a professional or a needed skilled worker.

This is in part due to training and to economy of the country. In this area Ireland is the hardest hit of the three formerly "privileged countries".

Thus these two preferences, the third and the sixth, are of little help to Ireland. Of course, it may well be better that professionals and skilled workers remain at home in Ireland as in *any* technologically developing nation.

SECTION 212(A) (14)

The majority of Ireland's contribution of immigrants has always been in the unskilled labor area and will continue to be. They came here to better their lives economically and in turn hopefully they bettered the nation. We know that they contributed heavily to the independence and security of this nation down to this very day in Vietnam.

Until December 1965, the Irish unskilled immigrant had little trouble in entering the U.S. He or she could enter unless the Secretary of Labor said no. Now under the revised Section 212(a) (14) the immigrant can't enter unless the Secretary of Labor says yes. American Irish long active in labor unions as well as all Americans are desirous of protecting American labor and want to see no American worker put out of a job as the result of any immigrant coming into the U.S. But is Section 212(a) (14) necessary in its present form and is it accomplishing its intended purpose? We think not.

Immigrants add but a tiny fraction to the total U.S. labor force, so our government officials tell us. In fiscal year 1968, 58,954 of the total U.S. immigrants were of the non-preference variety. This is certainly a small number considering that close on 34,000 American born workers enter the labor force every four days. At the same time up to 158,000 immigrants in the preference categories can come into the U.S. each year and are free of any labor restrictions. They can take any job they want and put any American worker out of a job. The law seems overconcerned with the small remainder. This small remainder must comply with Section 212(a) (14). New seed immigration is being eliminated and the U.S. will be the loser.

SCHEDULES A, B, AND C

The jobs that the Irish traditionally took when they came here are on Schedule B, the prohibited entry list. One can seriously question whether there is an actual nationwide oversupply of workers of all jobs listed on Schedule B. One can also question the method and procedure by which such jobs come to be listed on this schedule. Certainly supply and demand for jobs may vary from locality to locality and from time to time. It can now be clearly demonstrated that the jobs listed on Schedules A and C are not by any means the sole ones for which there is a demand for workers.

THE DEFINITE JOB OFFER REQUIREMENT

The obvious truth is that employers do not want to hire workers sight unseen. Our country was built with new seed immigration—individuals who had no close relatives here but who were willing to come here and work hard for a better life. If an applicant desires to come here and work in a job category which has no oversupply of workers, then he should not be required to do the impossible to find an employer who will hire him sight unseen.

Three out of the five reasons given by the U.S. Embassy, Dublin for the decline in immigrant visas issued, dealt with the definite job offer requirement, labor schedules and labor certification. ". . . there is no doubt that Section 212(a) (14) of the Act has caused a decrease in Irish immigration to the United States. As many Irish visa applicants are unskilled or semi-skilled workers, they are unable to qualify under Section 212(a) (14) as amended."

Over two years ago we demonstrated to the staff of this Subcommittee and to the various government agencies that the bulk of prospective Irish immigrants were of the non-preference variety and would always be so. We were told at the time that the reason for this was that under the quota system the Irish never had need to use the preferences but that that would all change in due time. Mr. Chairman, in fiscal year 1968 out of 3,561 Irish visas issued 2,730 were still of the non-preference variety. In fiscal year 1969 out of 538 visas issued in Ireland, 220 were of the non-preference variety. There has been no change. Those are the government's statistics not ours.

How many more Irish want to come but cannot? They have few relatives here, they have no special skills, they have some education. They are similar to my father and mother and to the fathers and mothers of many members of my committee and of this Congress. They're the kind of people that helped found this nation and they're the kind of people that were once allowed into the U.S.

Irish men and women want to come here but they can't. Instead to England, Canada and Australia they are going. We say they should have the right to come here the same as any other nationality. Evidence that they want to come won't be found by making a short visit to Ireland or by sitting in the American Embassy in Dublin, the Consul's office in Belfast, a government minister's office or on the streets of Dublin. But if you want demonstration of the fact that the Irish want to come, I'll be glad to accompany any of you to parts of County Mayo, Galway, Cork, Kerry, Leitrim, Donegal and parts of occupied Ireland where you will get that evidence.

Something must be done, Mr. Chairman Action must be taken.

THE CHALLENGE

I believe that every one of you agrees that a solution must be found. Over two years ago Congressman William Ryan came forward with a solution now embodied in H.R. 165.

Simply explained, it places a "floor" on immigration from each country. This "floor" would be equal to 75 per cent of a country's annual average immigration during the 10 year period 1955 to 1965 with a maximum floor limit of 10,000 for any country. In the case of Ireland, this number would be 5,390; for example, if in 1969, 1,000 Irish immigrated under the present—under the new formula an additional 4,390 Irishmen could immigrate to the United States in 1970 and they would not be subject to the present labor restrictions.

Seventy-eight Congressmen have co-sponsored this bill. They came from both political parties and many different political persuasions. They regard it as do a number of labor unions as a fair solution and so do we. If enacted it would provide a fair U.S. immigration law for the nation.

Our problem is one that requires a permanent solution. Those many other bills pending which provide only a temporary answer are of no merit. Stopgap legislation is no answer. One other bill H.R. 13999 must be considered, that offered by yourself, Mr. Chairman. In that it offers a permanent solution, it has merit. However this modest proposal offers questionable and at most minimal benefits in comparison to the Ryan bill which we prefer.

OUR COMMITTEE

From Boston to San Francisco, from New York to Los Angeles, from Cleveland to Hartford, our committee exists. It is composed of representatives of every major Irish organization in the United States. It consists of Irish born and American born men and women, Protestant, Catholic and Jew, government leaders, clergymen, businessmen, union leaders and ordinary individuals who have been the backbone of this country. They are present here today and available for testimony should you desire to hear them.

Our committee is in existence for one purpose only, to right a wrong, to preserve the right of the Irish to enter the U.S. not to encourage Irish immigration and certainly not to deny other nations the right to come here. To the chagrin of many it is still in existence and I assure all it will be until justice is achieved.

Our heritage tells us that we're children of a fighting race that's never yet known disgrace and we represent that heritage and the interests of generations of Irishmen, some yet unborn. The claim of these Irishmen on the U.S. was once spelled out by John Boyle O'Reilly, a great civil liberatarian, a great American, a great Irishman when he said:

"No treason do we bring from Erin
Nor bring we shame nor guilt
The sword we hold may be broken
But we haven't dropped the hilt.

"The wreath we offer to Columbia
is fastened of thorns not bought
And the hearts we bring are saddened
by the thoughts of sorrowful days.
But the hearts we bring for freedom
are washed in a people's faith
outliving a thousand years."

Mr. Chairman, Members of the Congress, we believe we're entitled to a better day and a better law. We regard each of you distinguished members of the Congress as being sympathetic to the plight of the prospective Irish immigrant. We beg you now to channel that sympathy into an effective solution.

CHART NO. 1—IRISH IMMIGRANT VISAS ISSUED

(By fiscal year, July to June)

	Total	Portion of that total issued in Dublin
Old law 1962	5,345	4,076
Old law 1963	6,237	4,618
Old law 1964	6,328	4,914
Old law 1965	5,378	4,232
Old law 1966 (July to November)	2,375	[1] 1,979
New law 1966 (December to June)	696	[1] 585
Total 1966	3,071	2,564 [2] 2044
New law 1967	2,665	[1] 2,120 [2] 2,203
New law 1968	3,619	2,764
New law 1969	1,407	795

[1] U.S. Embassy.
[2] Visa Office.

NOTE.—A discrepancy exists between the figures issued by U.S. Embassy and Visa Office.

PRESIDENT NIXON'S MESSAGE TO CONGRESS ON THE ARTS AND HUMANITIES

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, I take this time to congratulate President Nixon on the splendid message he sent to Congress December 10, "expressing the American spirit," concerning the role of the arts and humanities in the life of our country.

I believe that the President's statement represents a most constructive and encouraging response to the Nation's need for greater support of our cultural resources.

As chairman of the Select Education Subcommittee of the House Committee on Education and Labor, with jurisdiction over the legislation which authorizes the Arts and Humanities Foundation, I was particularly pleased to see that President Nixon has called for approval by Congress of $40 million in new funds for the National Foundation in fiscal year 1971, virtually double the level of funding for the current year.

The President's message reflects an awareness of the crucial role that the arts and humanities play in American life, and I share the President's conviction that, in his words, "the attention and support we give arts and the humanities—especially as they affect our young people—represent a vital part of our commitment to enhancing the quality of life for all Americans."

I am particularly gratified, Mr. Speaker, that the President in his message has drawn attention to the grave financial plight of museums and symphony orchestras, and that he has also expressed his concern about the need to redress the imbalance between the sciences and the humanities.

I would like as well, Mr. Speaker, to observe that State arts councils are becoming much more active as a result of the Federal arts program and to note that for each Federal dollar, States have come up with $3 from local, State, and private contributions to arts programs.

I was pleased today to join the distinguished ranking minority member of the Committee on Education and Labor, the gentleman from Ohio (Mr. AYRES), in cosponsoring the bill recommended by the President, which extends the life of the National Arts and Humanities Foundation over 3 years beyond the present expiration date of June 30, 1970. I have consulted with the distinguished ranking minority member of the subcommittee, the gentleman from New York (Mr. REID), who has been a most effective champion of the arts and humanities programs, and we intend to begin hearings on the bill shortly after the start of the session of Congress.

Mr. Speaker, at this point in the RECORD, I insert the text of President Nixon's message to Congress on the arts and humanities:

EXPRESSING THE AMERICAN SPIRIT

Americans have long given their first concerns to the protection and enhancement of Life and Liberty; we have reached the point in our history when we should give equal concern to "the Pursuit of Happiness."

This phrase of Jefferson's, enshrined in our Declaration of Independence, is defined today as "the quality of life." It encompasses a fresh dedication to protect and improve our environment, to give added meaning to our leisure and to make it possible for each individual to express himself freely and fully.

The attention and support we give the arts and the humanities—especially as they affect our young people—represent a vital part of our commitment to enchancing the quality of life for all Americans. The full richness of this nation's cultural life need not be the province of relatively few citizens centered in a few cities; on the contrary, the trend toward a wider appreciation of the arts and a greater interest in the humanities should be strongly encouraged, and the diverse culture of every region and community should be explored.

America's cultural life has been developed by private persons of genius and talent and supported by private funds from audiences, generous individuals, corporations and foundations. The Federal government cannot and should not seek to substitute public money for these essential sources of continuing support.

However, there is a growing need for Federal stimulus and assistance—growing because of the acute financial crisis in which many of our privately-supported cultural institutions now find themselves, and growing also because of the expanding opportunity that derives from higher educational levels, increased leisure and greater awareness of the cultural life. We are able now to use the nation's cultural resources in new ways—ways that can enrich the lives of more people in more communities than has ever before been possible.

Need and opportunity combine, therefore, to present the Federal government with an obligation to help broaden the base of our cultural legacy—not to make it fit some common denominator of official sanction, but rather to make its diversity and insight more readily accessible to millions of people everywhere.

Therefore, I ask the Congress to extend the legislation creating the National Foundation on the Arts and Humanities beyond its termination date of June 30, 1970, for an additional three years.

Further, I propose that the Congress approve $40,000,000 in new funds for the National Foundation in fiscal 1971 to be available from public and private sources. This will virtually double the current year's level.

Through the National Foundation's two agencies—the National Endowment for the Arts and the National Endowment for the Humanities—the increased appropriation would make possible a variety of activities:

We would be able to bring more productions in music, theatre, literature readings and dance to millions of citizens eager to have the opportunity for such experiences.

We would be able to bring many more young writers and poets into our school system, to help teachers motivate youngsters to master the mechanics of self-expression.

We would be able to provide some measure of support to hard-pressed cultural institutions, such as museums and symphony orchestras, to meet the demands of new and expanding audiences.

We would begin to redress the imbalance between the sciences and the humanities in colleges and universities, to provide more opportunity for students to become discerning as well as knowledgeable.

We would be able to broaden and deepen humanistic research into the basic causes of the divisions between races and generations, learning ways to improve communication within American society and bringing the lessons of our history to bear on the problems of our future.

In the past five years, as museums increasingly have transformed themselves from warehouses of objects into exciting centers of educational experience, attendance has almost doubled; in these five years, the investment in professional performing arts has risen from 60 million dollars to 207 million dollars and attendance has tripled. State Arts agencies are now active in 55 States and territories; the total of State appropriations made to these agencies has grown from $3.6 million in 1967 to $7.6 million this year. These State agencies, which share in Federal-State partnership grants, represent one of the best means for the National Endowment to protect our cultural diversity and to encourage local participation in the arts.

In this way, Federal funds are used properly to generate other funds from State, local and private sources. In the past history of the Arts Endowment, every dollar of Federal money has generated three dollars from other sources.

THE FEDERAL ROLE

At a time of severe budget stringency, a doubling of the appropriation for the arts and humanities might seem extravagant. However, I believe that the need for a new impetus to the understanding and expression of the American idea has a compelling claim on our resources. The dollar amounts involved are comparatively small. The Federal role would remain supportive, rather than primary. And two considerations mark this as a time for such action:

Studies in the humanities will expand the range of our current knowledge about the social conditions underlying the most difficult and far-reaching of the nation's domestic problems. We need these tools of insight and understanding to target our larger resources more effectively on the soltuion of the larger problems.

The arts have attained a prominence in our life as a nation and in our consciousness as individuals, that renders their health and growth vital to our national well-being. America has moved to the forefront as a place of creative expression. The excellence of the American product in the arts has won worldwide recognition. The arts have the rare capacity to help heal divisions among our own people and to vault some of the barriers that divide the world.

Our scholars in the humanities help us explore our society, revealing insights in our history and in other disciplines that will be of positive long-range benefit.

Our creative and performing artists give free and full expression to the American spirit as they illuminate, criticize and celebrate our civilization. Like our teachers, they are an invaluable national resource.

Too many Americans have been too long denied the inspiration and the uplift of our cultural heritage. Now is the time to enrich the life and the mind and to evoke the splendid qualities of the American spirit.

Therefore, I urge the Congress to extend the authorization and increase substantially the funds available to the National Foundation for the Arts and Humanities. Few investments we could make would give us so great a return in terms of human understanding, human satisfaction and the intangible but essential qualities of grace, beauty and spiritual fulfillment.

RICHARD NIXON.

CHARITY NEWSIES

(Mr. DEVINE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DEVINE. Mr. Speaker, for over 20 years, I have been a member of a charitable organization in my community made up of businessmen that were formerly newspaper carriers in their youth. This is known as the "Charity Newsies."

The second Saturday in December of each year is set aside for the Charity Newsies to conduct their annual paper sale, and the approximately 200 Newsies are on the street corners of the Greater Columbus, Ohio, area from 6 a.m. to 6 p.m.

The 1969 sale has been scheduled months ago for Saturday, December 13. In order to keep faith with the needy children of my community, I intend to be on my corner tomorrow.

Incidentally, the proceeds of the sales are used 100 percent for the needy children. Accordingly, Mr. Speaker, if debate is not concluded on the current OEO legislation at a reasonable time this Friday, I will by necessity be required to miss the vote in the interest of providing funds for this very worthwhile and longstanding local charity. My current intention, subject to persuasion in the debates, would be to support the substitute under the presidential concept of new federalism, as set forth in the remarks of the gentleman from Ohio (Mr. AYRES) yesterday and the substitute bill which is set forth on page 38547 of the CONGRESSIONAL RECORD of December 11.

THE HYPOCRISY OF DISSENT

(Mr. BELCHER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BELCHER. Mr. Speaker, under leave granted, I wish to insert in the RECORD the following editorial entitled "The Hypocrisy of Dissent" which appeared in the Tulsa Tribune of December 1, 1969:

THE HYPOCRISY OF DISSENT

If a few soldiers in Vietnam don black armbands on Moratorium Day, that's dissent, American-style. If students, spurred on by professional agitators, picket the Pentagon and shriek epithets at police, that's just constitutionally-protected dissent.

Comes now Major James Rowe, a Special Forces officer who escaped after five years as a prisoner of the Viet Cong. He has been telling members of Congress that the spirit of American prisoners of war was adversely affected when their Red captors began quoting anti-war statements by U.S. senators and by various publications in the United States.

You might say he's dissenting with the dissenters. But it's not so, according to Sen. Stephen Young, D-Ohio.

It's all a plot by public relations men in the Pentagon, he tells us. And he declares, "Major Rowe should be silenced or assigned to some other post of duty outside Washington. A tour in the Aleutian Islands or some post in remote Turkey might cause his mouthings to be silenced."

The logic becomes clear. If you speak out against the war, you're a patriot looking out for America's best interests. If you speak for the other side, you're in trouble.

The Senator Youngs can't have it both ways. Dissent is dissent and you don't have to get prior approval of opinions.

To smear those who hold opposing views is an old tactic. But there's real danger implicit in Sen. Young's inexcusable attack.

On the assumption that Major Rowe is a professional, career soldier in whom the United States has a sizable investment in training and experience, there's a real chance that his career could be ruined. If generals and admirals can get in trouble with Congress, a major is even more vulnerable.

This cannot be permitted to happen. If someone is to be sent to "remote Turkey" to silence "mouthings," we could come up with a rather lengthy list of other people.

TAKE PRIDE IN AMERICA

(Mr. MILLER of Ohio asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, there are 126,445,110 church members in the United States comprising 63.2 percent of our population. Our 321,076 churches are staffed by 360,092 clergymen.

TRIBUTE TO FORMER KANSAS CONGRESSMAN BY WINT SMITH

(Mr. SHRIVER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SHRIVER. Mr. Speaker, a beautiful and eloquent tribute has been penned by a distinguished former Kansas Congressman, Wint Smith, of Mankato, honoring the memory of the late Edward H. Rees, a Member of the House of Representatives from Kansas who died on October 25, 1969.

Wint Smith, who served the people of Kansas in this House from 1946 to 1961, was privileged to work with Ed Rees and to know him both as a friend and colleague. Like Ed Rees, Wint Smith was one of Kansas' finest Members of Congress and is a Christian gentleman.

Ed Rees was my predecessor in Congress. He represented the Fourth Congressional District of Kansas with honor and distinction for 24 years. He retired from the House in 1960 to return to his native home in Emporia.

Under the leave to extend my remarks in the RECORD, I include the moving eulogy written by Wint Smith following the funeral of Ed Rees in Emporia on October 27, 1969:

A TRIBUTE

Emporia, Kansas, has long been known as one of the "show places" of Kansas, from early pioneer days to the present. It is a city of colleges, beautiful tree-lined streets, and has borne a general air of respectability in all of life's aspects and endeavors. For a peroid of 40 years, William Allen White put Emporia, Kansas, on the map with his short, terse prose on the issues of the day.

Then Emporia furnished another nationally known man by the name of Edward H. Rees, whose name was a household word when thinking of post offices and Government Civil Service, because for over 20 years he served as leading member of the Post Office and Civil Service committees in the U.S. House of Representatives.

For several weeks prior to October 27th the weather had been dismal, dreary and rainy. But on October 27th, 1969, the day was ideal, bright, sunny and warm. As one drove around the residential area with its shady streets, one noted that the street trees as well as trees along the Cottonwood and Neosho River Valleys were beginning to show their bright, varied colors of the autumn season. Just nature's preparation for the dark, drab winter season that was sure to follow.

One also observed that the Stars and Stripes were being flown in front of and on the porches of several well kept homes. The occasion, of course, was in honor of Teddy Roosevelt's birthday.

Toward 2 o'clock, one saw many people from all walks of life slowly entering a church. Many of these people had lost their youthful step. But their faces showed very plainly that these elderly people were performing a duty they owed to the memory of someone they deeply respected.

Many, many years ago—many people

came from the distant, far-off, hilly, brush-clad hills of Wales—the home of the sturdy Welsh men. These settlers of hardy strength and resolute moral fiber settled as early pioneers in these valley and hills along the Neosha and Cottonwood. Today many of the descendants of these early pioneers, along with ex-governors, ex-congressmen, ex-supreme court justices and many present day state of Kansas officials came to the church in Emporia, Kansas, on this 27th day of October to pay tribute and their last respects to Edward H. Rees, who, in over 40 years of Public Service, achieved a reputation for honest, hard and efficient work for the ideals of his Welsh ancestors and his Kansas kinfolk.

If there ever lived a man who typified and qualified for the teaching of this age old quotation, it was Ed Rees.

"The vision you glorify in your mind, the ideals you enthrone in your heart, this you will build your life by, that you will become."

Someone has said that a good public office holder should have five qualities—ability, clean hands, patience, impartiality and ability to work. Ed Rees had all of these—and one more—loyalty to the belief that honest work is the foundation of all organized society.

Ed Rees gained fame in his own County, in his own State and in the Congress of the U.S. for 24 years as an office holder. He was always humble with grace and quiet dignity; he full well knew to be humble was just a duty; and to be courteous to his inferiors was dignity. Many preach humility, but Ed Rees practiced it throughout his life. True humility, he full well knew, was not an abject grovling, self-depriving spirit, but simply the right estimate of ourselves as God sees us. Humility to Ed Rees was proof of Christian character—the root—mother, nurse, foundation, and bond of all true virtue.

Throughout his life he never sought the grandeur or the handclapping praise so often associated with high public office.

Few people knew that Ed Rees was a close, personal friend of President Herbert Hoover and often spent hours with him—after his term of the Presidency had expired.

I am sure at the end of his earthly journey, he simply wanted his friends, acquaintances and supporters to say, "Your work has been quietly well done. You are a distinct honor to your forebearers in Wales, to your ancestoral settlers in Kansas, and above all else, to your own immediate family.

To the oncoming descendants of Ed Rees, his picture on the wall or table will only tell some physical details, but inwardly each should know that Edward H. Rees, to the men of his own time, was a saintly, humble, capable man, who grappled with his day's problems with a humble spirit and a Mona Lisa smile.

And as hundreds of cane-bearing oldsters and friends came to pay their last respects as the casket was laid beneath the golden-leafed maples, the colorful oaks and the ever protective elms from summer's heat and winter's snows, all present knew that the virtues and kindly endeavors of Edward H. Rees would long be praised and remembered in the Valleys of the Cottonwood and Neosha—also to hundreds of his acquaintances, both high and low, throughout Kansas and even to the distant halls of the Congress in Washington, D.C., because Edward H. Rees kept his poise and good sense while lawless powers and brainless mops stormed at the citadels of the virtues he cherished, respected and obeyed. Congressman Rees had inserted in the Congressional Record these lines, "When a Celtic missionary in Wales was asked by the Druid King, 'what would he gain by being a Christian', the reply was not he should be happier or richer or more contented, but rather 'when you become a Christian man you will behold wonder upon wonder and every wonder true'."

We honor the name of Edward H. Rees, one of Kansas' finest members of Congress, and above all else a Christian gentleman.

Long live his memory.

TOY SAFETY

(Mr. O'HARA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. O'HARA. Mr. Speaker, I have just received from the National Commission on Product Safety a letter endorsing the purposes of House Joint Resolution 1010, one of a number of identical resolutions introduced in the House about 2 weeks ago, and designed to make the Toy Safety Act effective immediately.

When the Toy Safety Act originally passed the House, there was a general feeling that it would be a wonderful step forward to clean unsafe toys off the shelves before the big toy season at Christmas. It would be a splendid thing to be able to go through one Christmas season feeling that there might be a few less stories about children being electrocuted or burned or poisoned or accidentally stabbed to death with the Christmas toys we buy and put under the trees as expressions of our love for our children.

But, Mr. Speaker, the calendar moved inexorably on, and by the time this bill became law, the effective date fell after the Christmas season.

I do not believe it is too late to act. I think if the joint resolution to which I refer is considered at once by the parent committee, it should be brought to the House floor and passed on the Consent Calendar. It would not be as effective as we had hoped much earlier when we passed the bill, but it would save a few lives. One life saved would be worth the cost.

The National Commission on Product Safety, created by act of Congress, agrees with this intention. I am today sending a copy of the Commission's letter to the members of the Commerce Committee, with the hope that they will act on House Joint Resolution 1010 or one of its companion resolutions.

The letter follows:

NATIONAL COMMISSION ON
PRODUCT SAFETY,
Washington, D.C., December 11, 1969.

Hon. JAMES G. O'HARA,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE O'HARA: I am in receipt of your letter of December 8, 1969, requesting our comments on the availability of unsafe toys this Christmas season.

The Commission has found that many toys which were referred to as unsafe at our hearings, toys with similar characteristics, and toys which were referred to in an interim report recommending enactment of the Toy Safety Act are still available in stores this Christmas season. Unfortunately, because of staff limitations, we were unable to conduct a detailed investigation.

You included with your letter a copy of H.J. Res. 1010 which would give immediate effect to the provisions of the Toy Safety Act. Since the Commission favors the greatest possible protection for consumers from unsafe household products, we endorse the purposes of the Joint Resolution.

Yours very truly,

ARNOLD B. ELKIND,
Chairman.

THE LEE FAMILY

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, the unusual situation of four generations of a family living together in one household in Newtown, Conn., a town in my congressional district, has recently been publicized in the daily press. The story of this heartwarming establishment in the family of Mr. and Mrs. Harry G. Lee appeared in the New York Times on November 27. With the current tendency toward the breakup of family units the existence of this group is particularly noteworthy and their unique arrangement is worthy of being passed on to a wider audience. It follows:

WHERE FOUR GENERATIONS OF A FAMILY BRIDGE THE GAP TOGETHER

(By Lisa Hammel)

NEWTOWN, CONN.—Nestled under a wooded hill in the outer reaches of Fairfield County is a simple brick and shingle house. Inside the house is an interesting atavism: four generations of a family living together in comparative amity.

"Elasticity—from both ends. I guess that's the answer to the whole thing," said Mrs. Harry G. Lee.

Living in the house with Mr. and Mrs. Lee are their daughter, 16-year-old Cynthia, whom everyone calls Cindy, and Mrs. Lee's mother, Mrs. Edna Swinden, who is 75, and grandmother, Mrs. Hattie Myers, who will be 93 next month.

The Lee's 20-year-old son, Gregory, is away working and auditing courses at a community college in Middletown, N.Y.

This old-fashioned hierarchical family had not always been this way. As a matter of fact, they got together under the same roof only a year ago, after several households had been broken up because of deaths in the family.

COMFORTABLE HOMES

"My mother and grandmother," said Mrs. Lee, who is 40 and teaches grade school in Newtown, "have always been homemakers, with warm, comfortable homes. It would have been a strange thing for them to go into some kind of public facility. And we are just not the kind of people who can turn our backs and say, 'Let someone else do it,' or let them go into an old age home."

"But I don't think it can be done comfortably in a little tiny house," she continued. "There is a time when everyone needs to be alone. I think generations can get together when you have enough room. Of course, it gets rough at times. But it's bound to when you have all these different personalities living together."

While the Lee's shiny new "raised ranch" ("It's really just a plain two-story house," Mr. Lee said) is not huge, it is divided well for the members of the family.

SPECIFIC DUTIES

Everyone in the household has specific duties. Mr. Lee's is mostly to earn a living, which he does weekdays as an executive at a commercial printing plant in Stamford and on weekends doing free-lance advertising.

"Cindy and I take care of the upstairs completely," Mrs. Lee said, "while mother takes care of the downstairs and I do heavy cleaning there periodically.

"I put the wash in the washing machine every morning; mother takes it out and puts it in the dryer and does all the ironing. Cindy and I do all the shopping. Mother generally starts dinner, but I plan it."

"And I bake cookies," Mrs. Swinden added. "Loads of 'em. Truckloads of 'em."

Mrs. Myers makes her own bed every morning and takes care of her own personal needs.

She is also, along with her 75-year-old daughter, the family's official crocheter. The two women estimate they have crocheted several dozen afghans in the last few years and Mrs. Swinden complains that she is now running out of people to give them away to.

EXQUISITE LACE

"But grandmother can't do the really fine work any more," Mrs. Lee said. "Like this tablecloth she made two years ago." Mrs. Lee pointed down to the exquisitely worked white cotton lace cloth that covered the large dining room table.

While the arrangement works well now, Mrs. Lee doubts it would have 10 or 15 years ago.

She explained that she was so concerned about the needs of her husband and her two small children then that she could not have paid as much attention to the needs of other relatives in the house.

She added that she would probably also have worried about "having the children's affections weaned away" by doting grandparents or great-aunts who had more time to indulge the children, or would have been concerned that the children were being spoiled by them.

The Lees maintain that even if the four generations had all started out together under the same roof, it would not have been the same as 100 years or so ago, when "each person had a place in the household and everybody had to do their part in order to survive."

Technology, mobility, increasing affluence and an emphasis on individuality, they pointed out, have made crucial inroads on the viability of the multigeneration family.

With the generations isolated from one another, Mr. Lee said, the older people "sit around all day watching to see who's in the next hearse," while the youngsters think "there's no existence except today's."

He believes that the sense of history and continuity that is provided by having under one's roof "a woman who was born not too long after Lincoln was shot" is an enlarging thing for young people.

And Mrs. Lee sees a reassurance and strengthening both for herself and her grandchildren in learning from grandmother or great-grandmother that "things keep happening in cycles and that "the world isn't going to blow up" because something has gone awry. As for Cindy, she feels sorry for people who "only have their parents." Grandmothers and great-grandmothers, she indicated, have wonderful ways with stories and in providing comfort when that is necessary.

"But nothing against you guys," she said, flipping back her long blond hair and smiling at her parents.

THE TRUTH AT LAST ON VOTING RIGHTS—THE RADICAL LEFT TIPS ITS HAND

(Mr. RARICK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RARICK. Mr. Speaker, during the course of the debate yesterday on the extension of the Voting Rights Act of 1965, I had occasion to comment that the measure was nothing more or less than a political retribution, designed to destroy the sovereignty of the southern people and return them to the infamous "conquered province" status of the radical Republicans of a century ago during the Reconstruction.

A revealing letter to the editor of the local Washington Post, published this morning, speaks with remarkable candor of the political expediency and utterly shameless demagoguery involved in the initial enactment of the measure and in the desperate attempts to keep it operative and unaltered this year.

The simple truth is that the radical left of the North manipulated the national concern of the decent people of the entire Nation over the assassination of their President, into a despotic and totalitarian power play. Calculations were made of the number of puppet voters necessary to capture the governments and the electoral votes of the Southern States, and emergency measures were undertaken to procure the prompt registration of the required number of robots. To a very small extent this power play bore fruit for there are in public office today several individuals who would not have been elected by an "unpolluted" electorate.

But the conspiracy did not totally succeed, as is evidenced by the presidential election of 1968. On the contrary, people throughout the country have awakened to the truth, and have reacted in typical American fashion, at polls, by removing from public office some of the loudest exponents of this chicanery.

So now the radical left is in trouble. And this is the desperate cry of the conspirators—that above all, the power base which they have attempted to build on the bones of a destroyed freedom in the unyielding South must be finished, because the people of the North, seeing their true purposes, are about to throw the rest of them out of office.

Without federally financed radical puppeteers to pull the strings, the nonwhite vote in the South will be about what it was last month here in Washington, D.C.—about 2 percent of the potential. See my remarks, page 38511 of the CONGRESSIONAL RECORD, December 11.

I include the letter to the editor as part of my remarks as best evidence of the overall plan.

[From the Washington Post, Dec. 12, 1969]

VOTING RIGHTS PROBLEM

The Voting Rights Act of 1965, the Magna Charta of Negro enfranchisement in the South, is due to expire in a few months. The justice and need of its extension, from the point of view of the Southern Negro, are obvious enough.

In a time, however, when interest tends to center on the Northern urban ghettos, it ought to be pointed out with all possible vigor that the extension of this act is of the most vital concern, not only to Southern Negroes, but to Northern people as well. The chain of reasons leading to this conclusion is both short and unbreakable.

The so-called Southern Strategy for the election of the President is a *white* Southern Strategy. The great mass of Southern Negro votes will be votes telling against the success of this Southern Strategy. Since it is sure that at least some attempt would be made to re-disenfranchise many Southern Negroes if the act should expire, and that some of such attempted re-disenfranchisement would succeed, it is as safe as anything can be to predict that the expiration of the act will make success of the Southern Strategy more likely, and that it will, therefore, make more likely the election of the Presidents of the sort at whose election the Southern Strategy aims. All this is absolutely certain.

It is equally certain that the election of Presidents of that sort is one of the worst possible things that could happen to Northern black people.

To sum up, it is quite clear that Northern blacks and their friends should be just as interested as Southern blacks and their friends in the extension of this act. In the past, Southern Negroes have needed the votes of Northern Negroes and Northern antiracists. By a paradoxical but quite predictable shift, Northern Negroes and Northern antiracists now need the votes of Southern Negroes, in order to prevent the success of a presidential election strategy, the success of which will be highly deleterious in the North.

To this, of course, it may be added that redisenfranchisement of Negroes in the South would result in a deterioration of the quality of congressmen and senators coming from the South, with the expectable effect on racial affairs in the North.

It is the plain consequence of all the foregoing that extension of this act is a *national* problem, prime and immediate, and that all people who are interested in the destruction of racism, North as well as South, ought forcefully to oppose the allowing of this act to expire.

CHARLES L. BLACK, JR.,
Luce Professor of Jurisprudence, Yale University.
NEW HAVEN.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. MATSUNAGA (at the request of Mr. ALBERT), for today and Saturday, December 13, on account of official business.

Mr. HALL, for 12 days, on account of official business in Seventh Congressional District of Missouri.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MILLER of Ohio); to revise and extend their remarks and include extraneous matter:)

Mr. RHODES, for 5 minutes, today.

Mr. LUKENS, for 1 hour, December 17.

Mr. CONTE, for 60 minutes, December 16.

Mr. MACGREGOR, for 5 minutes, today.

(The following Members (at the request of Mr. ALEXANDER) to address the House and to include extraneous matter:)

Mr. CORMAN, for 15 minutes, today.

Mr. GONZALEZ, for 10 minutes, today.

Mr. LEGGETT, for 60 minutes, on December 17.

Mr. MCCARTHY, for 60 minutes, on December 17.

Mr. ECKHARDT, for 60 minutes, on December 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SIKES in five instances and to include extraneous matter.

Mr. ADAIR.

Mr. EDMONDSON in three instances.

Mr. HAGAN in two instances.

(The following Members (at the request of Mr. MILLER of Ohio) and to include extraneous matter:)

Mr. ZION.
Mr. BROYHILL of Virginia in two instances.
Mr. SCHWENGEL in three instances.
Mr. MORSE in two instances.
Mr. CARTER.
Mr. CONTE.
Mr. MCKNEALLY.
Mr. DUNCAN in two instances.
Mr. WOLD.
Mr. WYMAN in two instances.
Mr. LUJAN.
Mr. MCCLORY.
Mr. NELSEN.
Mrs. HECKLER of Massachusetts.
Mr. DERWINSKI in three instances.
Mr. LANDGREBE.
Mr. CRAMER.
Mr. BROCK.
Mr. BLACKBURN.
Mr. MICHEL.

(The following Members (at the request of Mr. ALEXANDER) and to include extraneous matter:)

Mr. POWELL.
Mr. OTTINGER.
Mr. FRIEDEL in two instances.
Mr. DADDARIO in five instances.
Mr. KYROS in five instances.
Mrs. HANSEN of Washington in two instances.
Mr. BURLISON of Missouri.
Mr. WRIGHT in two instances.
Mr. EDWARDS of California in two instances.
Mr. HUNGATE in two instances.
Mr. FEIGHAN in four instances.
Mr. CULVER.
Mr. O'HARA in two instances.
Mr. RODINO in two instances.
Mr. BINGHAM in five instances.
Mr. MAHON.
Mrs. CHISHOLM in two instances.
Mr. ALEXANDER.
Mr. BOLAND.
Mr. BLATNIK.
Mr. BIAGGI.
Mr. ADDABBO in two instances.
Mr. DENT in two instances.
Mr. DORN in two instances.
Mr. TIERNAN in two instances.
Mr. GONZALEZ in two instances.
Mr. SCHEUER.
Mr. STUBBLEFIELD.

SENATE BILLS AND CONCURRENT RESOLUTIONS REFERRED

Bills and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2102. An act for the relief of Percy Ispas Avram; to the Committee on the Judiciary.

S. 1389. An act for the relief of Alex G. W. Miller, to the Committee on the Judiciary.

S. 2809. An act to amend the Public Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public health, project grants for graduate training in public health and traineeships for professional public health personnel; to the Committee on Interstate and Foreign Commerce.

S. Con. Res. 47. Concurrent resolution authorizing the printing of the report of the proceedings of the forty-fourth biennial meeting of the Convention of American Instructors of the Deaf as a Senate document; to the Committee on House Administration.

S. Con. Res. 50. Concurrent resolution authorizing the printing of additional copies of the 1969 report of the Senate Special Subcommittee on Indian Education (Senate Report 91–501).

ENROLLED BILLS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2208. An act for the relief of James Hideaki Buck;

H.R. 4560 An act for the relief of Sa Cha Bae;

H.R. 5133. An act for the relief of Pagona Anomerianaki;

H.R. 6600. An act for the relief of Panagiotis, Georgia, and Constantina Malliaras;

H.R. 7491. An act to clarify the liability of national banks for certain taxes;

H.R. 9163. An act to authorize the disposal of certain real property in the Chickamauga and Chattanooga National Military Park, Ga., under the Federal Property and Administrative Services Act of 1949;

H.R. 10156. An act for the relief of Lidia Mendola;

H.R. 11503. An act for the relief of Wylo Pleasant, doing business as Pleasant Western Lumber Co. (now known as Pleasant's Logging and Milling, Inc.);

H.R. 12964. An act making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes; and

H.R. 13763. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 2208. An act for the relief of James Hideaki Buck;

H.R. 2238. An act to provide for the relief of certain civilian employees paid by the Air Force at Tachikawa Air Base, Japan;

H.R. 4560. An act for the relief of Sa Cha Bae;

H.R. 5133. An act for the relief of Pagona Anomerianaki;

H.R. 6600. An act for the relief of Panagiotis, Georgia, and Constantina Malliaras;

H.R. 7491. An act to clarify the liability of national banks for certain taxes;

H.R. 9163. An act to authorize the disposal of certain real property in the Chickamauga and Chattanooga National Military Park, Ga., under the Federal Property and Administrative Services Act of 1949;

H.R. 10156. An act for the relief of Lidia Mendola;

H.R. 11503. An act for the relief of Wylo Pleasant, doing business as Pleasant Western Lumber Co. (now known as Pleasant's Logging and Milling, Inc.);

H.R. 12964. An act making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes; and

H.R. 13763. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes.

ADJOURNMENT

Mr. ALEXANDER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 26 minutes p.m.), under its previous order, the House adjourned until Monday, December 15, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*Omitted from the Record of Dec. 11, 1969*]

1407. A letter from the Comptroller General of the United States, transmitting a report on questionable pricing of contract negotiated for urgently needed bomb bodies, Department of the Navy; to the Committee on Government Operations.

1408. A letter from the Assistant Secretary of the Interior, transmitting a copy of a proposed concession contract providing for the rental of saddle and pack animals, and related facilities and services for the public within Zion, Bryce Canyon, and Grand Canyon (North Rim) National Parks, Utah and Ariz., for a 10-year period beginning January 1, 1970, pursuant to the provisions of 67 Stat. 271, as amended (70 Stat. 543); to the Committee on Interior and Insular Affairs.

[*Submitted Dec. 12, 1969*]

1409. A letter from the Secretary of Commerce, transmitting the 89th quarterly report on export control, covering the third quarter, 1969, pursuant to the provisions of the Export Control Act of 1949; to the Committee on Banking and Currency.

1410. A letter from the Comptroller General of the United States, transmitting a report on improvements suggested in accounting methods used in establishing fees for reimbursable testing and related services, Food and Drug Administration, Consumer Protection and Environmental Health Service, Department of Health, Education, and Welfare; to the Committee on Government Operations.

1411. A letter from the Assistant Secretary of the Interior, transmitting a copy of a proposed concession contract under which the Cavern Supply Co., Inc., will provide facilities and services for the public within Carlsbad Caverns National Park, N. Mex., from January 1, 1970, through December 31, 1989, pursuant to 67 Stat. 271 and 70 Stat. 543; to the Committee on Interior and Insular Affairs.

1412. A letter from the Chairman, Federal Power Commission, transmitting copies of regional maps entitled "Principal Electric Facilities, 1968"; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DAWSON: Committee on Government Operations. U.S. AID Operation in Indonesia (Rept. No. 91–749). Referred to the Committee of the Whole House on the State of the Union.

Mr. FALLON: Committee on Public Works. H.R. 14464. A bill to amend the act of August 12, 1968, to insure that certain facilities constructed under authority of Federal law are designed and constructed to be accessible to the physically handicapped; without amendment (Rept. No. 91–750). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 9476. A bill to increase the availability of guaranteed home loan financing for veterans and to increase the income

of the national service life insurance fund; with an amendment (Rept. No. 91–751). Referred to the Committee of the Whole House on the State of the Union.

Mr. FALLON: Committee on Public Works. H.R. 12795. A bill to amend the act entitled "An act to provide better facilities for the enforcement of the customs and immigration laws," to increase the amount authorized to be expended, and for other purposes; with an amendment (Rept. No. 91–752). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRASCO:

H.R. 15223. A bill to amend the Federal Food, Drug, and Cosmetic Act to include a definition of food supplements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FARBSTEIN:

H.R. 15224. A bill to amend title 10, United States Code, in order to improve the judicial machinery of military courts-martial by removing defense counsel and jury selection from the control of a military commander who convenes a court-martial and by creating an independent trial command for the purpose of preventing command influence or the appearance of command influence from adversely affecting the fairness of military judicial proceedings; to the Committee on Armed Services.

By Mr. FEIGHAN:

H.R. 15225. A bill to provide for a coordinated national boating safety program; to the Committee on Merchant Marine and Fisheries.

By Mr. McCLOSKEY:

H.R. 15226. A bill to encourage the development of novel varieties of sexually reproduced plants and making them available to the public, by making protection available to those who breed, develop, or discover them, thereby promoting progress in the useful art of agriculture; to the Committee on Agriculture.

By Mr. MELCHER:

H.R. 15227. A bill to amend the Interstate Commerce Act in order to give the Interstate Commerce Commission additional authority to alleviate freight car shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PHILBIN:

H.R. 15228. A bill to encourage the growth of internationl trade on a fair and equitable basis; to the Committee on Ways and Means.

By Mr. STAGGERS (for himself and Mr. SPRINGER):

H.R. 15229. A bill to assist consumers in evaluating products by promoting development of adequate and reliable methods for testing characteristics of consumer products; to the Committee on Interstate and Foreign Commerce.

By Mr. TIERNAN (for himself, Mr. CAFFERY, Mr. HAMMERSCHMIDT, Mr. PASSMAN, Mr. PRYOR of Arkansas, Mr. St GERMAIN, and Mr. WAGGONNER):

H.R. 15230. A bill to amend section 105 of the Clean Air Act to authorize increased grants to be made to certain air pollution control agencies not now eligible therefor; to the Committee on Interstate and Foreign Commerce.

By Mr. ANNUNZIO:

H.R. 15231. A bill to amend the National Foundation on the Arts and the Humanities Act of 1965, as amended; to the Committee on Education and Labor.

By Mr. BENNETT:

H.R. 15232. A bill to amend title 37, United States Code, to provide for the payment of special pay to certain officers of the Medical Service Corps, and for other purposes; to the Committee on Armed Services.

By Mr. BIAGGI:

H.R. 15233. A bill to amend the Marine Resources and Engineering Development Act of 1966 to establish, with the Department of the Interior, a comprehensive and long-range national program of research, development, technical services, exploration and utilization with respect to our marine and atmospheric environment; to the Committee on Merchant Marine and Fisheries.

By Mr. FRASER:

H.R. 15234. A bill to amend the Defense Production Act of 1950 to prevent dislocation of normal distribution of scare and critical materials; to the Committee on Banking and Currency.

H.R. 15235. A bill to authorize the sale of metal purchased by the Secretary of the Treasury for coinage under the Coinage Act of 1965; to the Committee on Banking and Currency.

By Mr. FUQUA:

H.R. 15236. A bill to create a national commission to study quality controls and manufacturing procedures of medical devices, surgical instruments, artificial organs and limbs, therapeutic instruments and devices, and other medical and hospital equpiment; to determine the need for and the extent of Federal regulation of such medical devices; to determine the need for clarification of the definition of medical devices in Federal laws; and to recommend to the President and to the Congress methods for determining constructive minimum performance standards and feasible methods for Federal regulation; to the Committee on Interstate and Foreign Commerce.

By Mr. MILLER of Ohio:

H.R. 15237. A bill to amend the act of August 1, 1958, to authorize restrictions and prohibitions on the use of insecticides, herbicides, fungicides, and pesticides which pollute the navigable waters of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. MORSE:

H.R. 15238. A bill to permit State agreements for coverage under the hospital insurance program for the aged; to the Committee on Ways and Means.

By Mr. OLSEN:

H.R. 15239. A bill to set aside certain lands in Montana for the Indians of the Confederated Salish and Kootenai Tribes of the Flathead Reservation, Mont.; to the Committee on Interior and Insular Affairs.

By Mr. ROGERS of Florida (by request):

H.R. 15240. A bill to require the posting of performance and payment bonds by persons contracting with the United States for the dismantling, demolition, or removal of any public building, public work, or abandoned vessel; to the Committee on the Judiciary.

By Mr. ADAMS:

H.R. 15241. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. BIAGGI:

H.R. 15242. A bill to establish a Joint Committee on Enivronmental Quality; to the Committee on Rules.

By Mr. CORMAN:

H.R. 15243. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. DOWNING:

H.R. 15244. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. ECKHARDT:

H.R. 15245. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. EVINS of Tennessee:

H.R. 15246. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mrs. GRIFFITHS:

H.R. 15247. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. HANNA:

H.R. 15248. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mrs. HANSEN of Washington:

H.R. 15249. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. KARTH:

H.R. 15250. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. LENNON:

H.R. 15251. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. McCLOSKEY:

H.R. 15252. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. MOSS:

H.R. 15253. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. OTTINGER:

H.R. 15254. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. PICKLE:

H.R. 15255. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. REES:

H.R. 15256. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. REUSS:

H.R.15257. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. SAYLOR (for himself and Mr. GOODLING):

H.R. 15258. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. SCHEUER:

H.R. 15259. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. O'KONSKI:

H.J. Res. 1032. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. FRASER:

H. Con. Res. 468. Concurrent resolution expressing the approval of the Congress for the loan of 10,000 tons of nickel held under the Strategic and Critical Materials Stock Piling Act; to the Committee on Armed Services.

H. Con. Res. 469. Concurrent resolution expressing the approval of the Congress for the disposal of 10,000 tons of nickel in accordance with section 3 of the Strategic and Critical Materials Stock Piling Act; to the Committee on Armed Services.

By Mr. KEE:

H. Con. Res. 470. Concurrent resolution calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front; to the Committee on Foreign Affairs.

By Mr. SPRINGER:

H. Con. Res. 471. Concurrent resolution expressing the sense of Congress with respect to North Vietnam and the National Liberation Front of South Vietnam complying with the requirements of the Geneva Convention; to the Committee on Foreign Affairs.

By Mr. BROTZMAN (for himself and Mr. DINGELL):

H. Res. 751. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. HAMILTON introduced a bill (H.R. 15260) for the relief of Dr. Ester T. Hizon, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

355. The SPEAKER presented a petition of George B. Maus, Binghampton, N.Y., et al., relative to pensions for veterans of World War I, which was referred to the Committee on Veterans' Affairs.

EXTENSIONS OF REMARKS

THE NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

HON. OGDEN R. REID

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. REID of New York. Mr. Speaker, I am pleased to be able to join in the introduction of President Nixon's legislation to extend the National Foundation on the Arts and Humanities for 3 years and to make certain technical changes.

I share President Nixon's conviction that—

> The attention and support we give the arts and the humanities . . . represent a vital part of our commitments to enhancing the quality of life for all Americans.

In my view, the President's request for $35 million in public funds and $5 million in matching money for the arts and humanities in fiscal year 1971 is a most significant development. By doubling the amount we are spending on the arts this year, we are, at long last, giving meaningful recognition at the highest levels of government to the important role of the arts in determining the quality of our life.

President Nixon made a number of cogent observations about the role of the arts and humanities in America in the message that he sent to the Congress yesterday. He said:

> The full richness of this nation's cultural life need not be the province of relatively few citizens centered in a few cities; on the contrary, the trend toward a wider appreciation of the arts and a greater interest in the humanities should be strongly encouraged, and the diverse culture of every region and community should be explored.

Indeed, participation in cultural activities by as many Americans as possible at the local level is the ultimate aim of the arts and humanities legislation. The President's commitment and the greater funding should make it increasingly possible for State and local arts groups to have the support they deserve and to become economically viable.

Over the past several years, State arts councils have become much more active, principally as a result of the Federal program. For each Federal dollar, States have come up with $3 from local, State, and private contributions for arts programs.

This, I believe, is what President Nixon meant when he said in his message:

> The Federal Government cannot and should not seek to substitute public money for these essential sources of continuing support. . . . The Federal role would remain supportive, rather than primary.

For example, in fiscal year 1968, the National Endowment for the Arts made grants totaling $8.6 million; but this $8.6 million generated $27 million from other sources.

The principal reason for Federal support of the arts, so that all citizens may benefit from the enrichment they offer, is that virtually every major symphony, opera, dance, and ballet company is running at a deficit. Theaters, large and small—on Broadway and in cities around the country—have to face annual cost increases that threaten their continued operation.

President Nixon recognized this crisis in his message:

> There is a growing need for Federal stimulus and assistance—growing because of the acute financial crisis in which many of our privately-supported cultural institutions now find themselves, and growing also because of the expanding opportunity that derives from higher educational levels, increased leisure and greater awareness of the cultural life.

What are the dimensions of this crisis? Overall, in the performing arts, there is a deficit of about 30 percent; of perhaps 60 percent in the ballet; and perhaps 40 percent in symphonies. Of our major symphony orchestras, only about 12 have a reasonable hope of remaining alive financially. Similarly, there are only five or six major opera companies in the country today, and about an equal number of significant dance groups. Of all the existing performing arts groups, it is quite clear that only a handful can take their survival for granted.

One of the goals of President Nixon's extension of the National Foundation on the Arts and Humanities, and of the increased funds to be available, is "to bring more productions in music, theater, literature readings and dance to millions of citizens eager to have the opportunity for such experiences." I am hopeful that our commitment to preventing financial disaster from overtaking some of these organizations will help reach that goal.

I agree, as well, with the other aims of the President in supporting this vital program:

> We would be able to bring many more young writers and poets into our school system, to help teachers motivate youngsters to master the mechanics of self-expression.
>
> We would be able to provide some measure of support to hard-pressed cultural institutions, such as museums and symphony orchestras, to meet the demands of new and expanding audiences.
>
> We would begin to redress the imbalance between the sciences and the humanities in colleges and universities, to provide more opportunity for students to become discerning as well as knowledgeable.

The bill I am introducing today would extend the life of the National Foundation on the Arts and Humanities for 3 years, through fiscal year 1973, authorizing such sums as may be necessary. It would also make a number of technical changes, including: First, provision for an executive committee in each council in order to facilitate the work of the council between meetings; second, provision for continuity in leadership between expiration of the terms of the two Chairmen and announcement of new appointments; third, authority for the National Foundation on the Humanities to make contracts, as well as award grants; and fourth, adjustments in the per diem of council members to the level given other citizens in similar positions.

Mr. Speaker, the gentleman from Indiana (Mr. BRADEMAS) the chairman of the Select Subcommittee on Education which has jurisdiction over this legislation, has indicated his intention of holding hearings in late January. I am hopeful that we will be able to act thoughtfully and expeditiously on this important measure.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the Danville, Va., Register, the Richmond Times-Dispatch, and the Virginian-Pilot, in the State of Virginia. The editorials follow:

[From the Danville (Va.) Register, Sept. 25, 1969]

NEVER UNDERESTIMATE

The Trucking Industry may rue the remark of one of its spokesmen who told a national publication that if the women of the nation want their new hats on time "they'll just have to live with trucks."

And by living with trucks, he meant those 80,000-pound 70-ft. behemoths which the truckers are asking the Congress and some of the state legislatures to make legal.

The Virginia General Assembly at its 1968 session was about to turn down—something rarely done in Virginia—the truck lobby on the highway freight trains it wants legalized. Rather than face defeat, the truckers turned to the authorized study alternative, and this body will recommend authorization of twin-trailers behind a single tractor on multilane highways, which means on the arterial and interstate and throughways or toll roads. That is where they will start. But just as soon as they are accepted on any Virginia roads, the truckers will want to use all roads.

The current drive for highway motor freight trains already has run into the opposition of the General Federation of Women's

Clubs. At the national convention of the GFWC at the Greenbrier in White Sulphur Springs, Mrs. Walter Varney Magee, president of the federation, declared that "no statistics can allay our concern that our fears would be intensified if even vehicles of 70 feet, and particularly double-bottomed ones, were permitted on our highways and streets." She urged the clubwomen to oppose legalization of such vehicles on public highways.

And as for those hats, Mrs. Magee said, "We don't need trucks 70-feet long carrying 80,000 pounds to get our hats. It is not possible to get them by balloon," as the trucker spokesman implied.

Now the truckers really are in trouble. When the women are aroused legislators listen, if they are wise.

[From the Richmond (Va.) Times-Dispatch, Aug. 31, 1969]

NO HEAVIER TRUCKS

Legislation to permit wider and heavier trucks on the interstate highways was approved by the U.S. Senate last year, but it ran into a roadblock of adverse publicity in the House and failed to pass.

The trucking and transit industries, or segments of those industries, are trying again this year. A House committee has been holding hearings on proposals similar to those defeated in 1968.

The 1968 bill would have permitted the States to raise the present 32,000-pound tandem weight limit to 34,000, the single axle weight from 18,000 pounds to 20,000, and the gross weight from 73,280 pounds to a sliding scale which would have permitted considerably heavier vehicles. And the maximum vehicle width would have increased from 96 to 102 inches.

Virginia law permits the present maximums listed above, except that the gross weight limit is 70,000 pounds. If the 1968 federal bill had passed, state laws would still have prevailed, but the pressure on states to go up to the federal limits would have been tremendous, especially after one or more states had changed to those limits.

One of the witnesses who has appeared before the committee this year in opposition to the proposed weight and width hikes was Virginia's Highway Commissioner, Douglas B. Fugate.

Appearing in his capacity of first vice president of the American Association of State Highway Officials, Fugate said, among other things, that an increase in load from 18,000 pounds to 20,000 pounds per axle could result in a loss of pavement life of 25 to 40 per cent.

The increased safety hazard from heavier and wider vehicles was cited by spokesmen for the American Automobile Association and the General Federation of Women's Clubs.

(The weight and width changes being considered by the House committee are not related to the twin-trailer proposal now under study in Virginia. A Virginia commission is considering whether or not to recommend that the permitted length of vehicles on certain state roads be increased from 55 to 65 feet. The twin-trailer proposal does not involve any weight or width increases.)

The preponderance of the evidence appears to be against changing the federal law. From the standpoints of safety and road maintenance, the present limits should be retained.

[From the Norfolk (Va.) Virginian-Pilot, Aug. 12, 1969]

THE TROUBLE WITH DOUBLE RIGS

Three surveys released recently on the advisability of permitting twin-trailer trucks on Virginia highways should themselves be subjects of questions at the public hearings in Roanoke tomorrow and Richmond Friday.

A cooperative study by the Virginia Highway Safety Division, the Highway Research Council, State Police, and the Highway Department indicated that highway safety would not be imperiled by twin trailers. More than 93 per cent of all motorists observed passing an experimental double rig said "there was nothing different nor unusual about the passing maneuver."

But the report neglected to note that in the experiments a truck never exceeded 55 miles an hour, whereas tractor trailers cruise along interstate highways at 65 to 70 miles. J. T. Timmons, executive director of the Tidewater Automobile Association, has commented that the report also failed to consider the hazard when the double rig is doing the passing.

"They come barreling down on you, horns blowing, and that scares you, and after they go by, the wind and suction are unnerving," observed Mr. Timmons.

The Virginia commission studying the impact of twin trailers should review testimony of the American Automobile Association before the Roads Subcommittee of the U.S. House of Representatives Public Works Committee, which is considering a bill to permit longer, heavier trucks.

The AAA found that half the accidents of carriers reporting to the Bureau of Motor Carrier Safety involve collision with passenger cars. Such collisions account for 66 per cent of the fatalities and 64.5 per cent of the injuries. Of the 993 persons who died in the accidents, 22, or about 2 per cent, were drivers of heavy trucks. The other 98 per cent were, for the most part, passenger-car drivers and occupants.

A study for the Automobile Manufacturers Association disclosed that the fatality rate in accidents rises with truck size. There are 0.3 fatal injuries per 100 persons in collisions between passenger cars and pickup trucks. The rate jumps to 7.1 per 100 when the collision is between a passenger car and a tractor-trailer combination. When the collision is between a passenger car and a tractor-two-trailer combination, the rate increases drastically to 13.3.

In estimating the wear and tear of the twin rigs on the roads, the State Highway Department said that as long as there were no change on present load limits (18,000 pounds for single axles, 32,000 pounds for tandem axles, 70,000 pounds in gross weights), pavement strength would not have to be increased for twin trailers. But the Department overlooks the frequent violations of the load limits. Its own spot check of 1,516 vehicles with five or more axles in July-August 1967 found more than 17 per cent overweight.

The Highway Department also should consult testimony of Virginia Highway Commissioner Douglas B. Fugate before Congressional committees. Last year, testifying before the Senate Roads Committee, Mr. Fugate said that a bill to increase the axle weight of trucks to 20,000 pounds single and 36,000 double would require the replacement of 1,430 bridges on the State's primary system at a cost of $151 million. He has said that the bill now before the House subcommittee is slightly less objectionable in proposing an axle weight of 34,000 pounds tandem and a length limit of 70 feet, rather than none at all, but the gross weight formula would still produce loads that would overstress most bridges off the interstate system. He stands by his estimate of $151 million for bridges on the primary system and adds that the cost of strengthening 10,000 bridges on secondary roads would be astronomical.

The Congressional bills are germane to the State study, because in 1968, when the General Assembly killed a bill that would have permitted twin trailers on the State's roads, it also had to dispose of a companion measure providing that Virginia weight limits and lengths would automatically increase to the levels of new Federal regulations. Pressures by the trucking industry are being applied to State and national legislatures—and ought to be rejected in both quarters.

LET HIM EAT THE TRUTH

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. SCHERLE. Mr. Speaker, Mr. Nick Kotz of Cowles Publications and the Des Moines Register Washington News Bureau has recently written a book charging that the U.S. Congress has been delinquent and insensitive in assisting the poor and disadvantaged. He alleges that there is widespread "hunger" throughout the United States and places the blame for this "condition" at the doorstep of this legislative body.

The facts dispel the fallacies of these charges. I call my colleagues' attention to the following book review of Mr. Kotz' "work of art":

LET HIM EAT THE TRUTH

During the past few years there has been a dedicated effort by some political writers to influence Federal legislation by writing articles and books appealing to cheap emotionalism and inflammatory demagoguery.

A forerunner in this field of "twisted facts and misleading innuendos" has been Nick Kotz of Cowles Publications and the Des Moines Register Washington News Bureau. His "exposé" on allegedly unwholesome meat in this country was sharply criticized and exposed by the respected "National Observer" newspaper.

Kotz has recently written a book implying that "hunger" is rampant throughout the United States. He charges that Congress has been delinquent and insensitive in assisting the poor and disadvantaged. This is not true.

For years the Congress has provided free food for hungry people both at home and abroad. The House Agriculture Committee developed the first food stamp program, the first school lunch program, the school milk program and school breakfasts. Within the last month, the Agriculture Committee almost doubled the authorization for the operation of the food stamp program.

After charges were levied that there were hundreds of counties arbitrarily classified as "hunger counties," the Agriculture Committee sent a letter to Health officers in each of these counties and received almost unanimous responses that the charges were grossly exaggerated.

Representative Edith Green, a liberal Democrat from Oregon, cited a hypothetical situation where a family of four could draw up to $11,513 a year in Federal grants and services while a family of eight could collect a maximum potential of $21,093 a year.

Kotz bases his conclusions in part on the testimony of a Dr. Donald Gatch of Bluffton, South Carolina, whom he describes as "an outspoken rebel physician who has challenged the medical establishment of the Nation to view the wretched poor and help them."

However, the public should be aware of the fact that the "rebel physician" is presently being charged with major narcotics violations. Law enforcement authorities have charged Doctor Gatch with using drugs for personal use, failing to keep proper records of drugs received and dispensing drugs without proper prescriptions.

What this country needs is less sensationalism and hypocritical pontifications from certain members of the Fourth Estate and

more calm evaluation of how our present programs may effectively operate to insure that all Americans have an opportunity to fulfill their potential.

UNITED STATES SOVIET INTERDEPENDENCE

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. RARICK. Mr. Speaker, submission to UNO policies proves exceedingly perilous to the United States.

As a result of UNO directives and policies our country is now dependent on Russian imports for critical materials essential to our national defense.

I include Willard Edwards' column from the December 11, 1969, and a report from Ordnance magazine for November–December 1969, at this point:

[From the Chicago (Ill.) Tribune, Dec. 11, 1969]

UNITED STATES IS DEPENDENT ON RULES IMPORTS

(By Willard Edwards)

WASHINGTON.—It will come as a shock to most Americans to learn that the United States has permitted itself to become increasingly dependent upon Russia for imports of critical war materials.

The misgivings accompanying this disclosure will be intensified by the discovery that Russia planned it that way, taking advantage of the "bridge-building" policy which became popular in the mid-'60s under the Johnson administration.

All the evidence suggests that the United States has fallen into a trap prepared by Russian strategists and given the label of the "weak link principle" in an analysis by Maj. Gen. A. N. Lagovskiy of the Red army, a leading soviet specialist in economic warfare.

A translation of Lagovskiy's text for study in the soviet armed forces has been made the basis for a perceptive study by A. C. Sutton of the Hoover Institution on War, Revolution, and Peace at Stanford university. It appeared in the December issue of Ordnance, a journal devoted to industrial preparedness for national defense.

Discussing foreign trade as a weak link in the economy during a war, Gen. Lagovskiy noted the great dependence of modern warfare on certain war materials—such as chrome and platinum—and the lack of major deposits of such materials in the United States and other capitalist countries.

He advocated the encouragement of a potential adversary, such as the United States, to accept imports of such "weak link" strategic minerals from the Soviet Union.

A United States military jet airplane, he emphasized, cannot be produced in the United States by utilizing only domestic raw materials. He gave these startling figures: the United States must import 92 per cent of the chrome, 97 per cent of the nickel, 76 per cent of the raw aluminum, and 88 per cent of the cobalt needed for such an aircraft.

Russia's success in exploiting this strategy must have amazed its sponsors. In a recent typical 6-month period, 84 per cent of United State imports from Russia have been in materials related to the "weak link" strategy—not only chrome ore but industrial diamonds, platinum, palladium, rhodium, nickel, and titanium.

How and why did the United States get itself into this fix?

First, it voluntarily cut itself off from supplies of chrome ore from Rhodesia by joining in United Nations sanctions against that small nation. This political decision gave Russia, the only other major source of the ore, a virtual monopoly.

Second, it began to rely on Russia for other critical metals under the "bridge-building" programs of the Johnson administration. The idea was that Russia would respond to trade benefits by reducing supplies to North Viet Nam and the middle east conflict.

Russia happily accepted the profits of trade but the "reciprocity" expected never materialized. It even stepped up its logistic supply of world revolution.

The psychological effect on Soviet planners contains a degree of danger, Sutton noted. From their viewpoint, the situation means United States weakness and as such can be considered a sufficient invitation to initiate aggression.

It makes little sense, he concluded, to spend vast sums on a defense against Soviet missiles without, at the same time, taking steps, at little cost, to remove the nation from the "potentially dangerous corner" into which it has maneuvered itself.

[From Ordnance magazine, November–December issue]

SOVIET EXPORT STRATEGY

(By A. C. Sutton)

NOTE.—A. N. Lagovskiy, "Strategiya i Ekonomika" (Moscow: 1957) first Russian edition. A translated version of a second edition (1961) is "Strategy and Economics" (JPRS: No. 19,700 of June 17, 1963). There is significant difference between the two editions, and the material used here was largely added by Lagovskiy to the second (1961) edition. References are then to the second (translated) edition.

Maj. Gen. A. N. Lagovskiy of the Red Army, a doctor of military science and a leading Soviet specialist in economic warfare, is also author of "Strategiya i Ekonomika"—a text on economic warfare recommended for study in the Soviet armed forces. Given Lagovskiy's considerable status and wide influence, it is conceivable that the strategies outlined in "Strategiya i Ekonomika" constitute, at least in part, the basis for the operational directives of Soviet foreign economic policies.

The purpose of this article is to relate one Lagovskiy principle—the "weak-link principle"—to the pattern of recent U.S. trade with the Soviet Union and thus to test a stated Soviet strategic principle against empirical observations.

In a section discussing foreign trade as a weak link in the economy during a war, Lagovskiy notes the great dependences of modern warfare on certain raw materials—such as chrome and platinum—and, simultaneously, notes the lack of major deposits of such raw materials in the United States and other capitalist countries.

As a consequence, he suggests, "the strategic material situation continues to be an urgent problem in war production for the U.S.A."

TABLE I—*Critical materials in a U.S. military jet airplane (from Lagovskiy)*

[Percentages of material imported]

Material:	
Chrome (3,659 pounds)	92
Nickel (2,117 pounds)	97
Alumina (bauxite) (46,831)	76
Cobalt (436)	88

A clear distinction in drawing by Lagovskiy between such "weak-link" strategic minerals and machinery with a technological component. Application of Lagovskiy's principle would require the Soviet Union to avoid import of weak-link mineral commodities—while simultaneously encouraging a potential adversary, such as the United States, to accept such exports from the Soviet Union.

On the other hand, the Soviet Union would deny exports of its own technology embodied in machinery and equipment, while maximizing imports to a potential adversary's technology.

As for the technological side of U.S.-Soviet trade, there is no question that export of worth-while Soviet technology to the West (or even to fellow socialist countries) is virtually nil, while Western and East European export of technology to the Soviet Union is not only both historically and currently of immense proportions but also of critical importance to Soviet economic and military development. Therefore, it is only the "weak-link"-import aspect which is now of interest.

Except for synethetic rubber, the Soviets do not import such mineral commodities from the United States; i.e., they have avoided any strategic dependence on their own part. In distinct contrast, the U.S. is a remarkably heavy importer of "weak-link" commodities from the U.S.S.R.

Let us first review the argument in detail.

Lagovskiy takes an American jet plane as his principal example and lists the amount of critical materials required in construction of a single aircraft (see Table I).

It is therefore clear, says Lagovskiy, that a jet aircraft cannot be produced in the United States by utilizing only domestic raw materials, "since domestic production of the most important types of raw materials for it amounts to only 3 to 24 per cent of requirements." This example of dependence on imported materials for military aircraft is followed by a listing of United States imports of these materials (see Table II).

Many, but not all, of these raw materials, do have imperfect substitutes; synthetic rubber, for example, rather than natural rubber, is more important to industry in the United States, and butyl synthetics are equal in physical properties to natural rubber. It is rather the Soviet Union that is dependent on natural rubber, as its own development of synthetics (it has no natural rubber) is backward.

Percentage imported by United States

Natural rubber	100
Tin	100
Industrial diamonds	100
Chrome ore	99
Platinum	99
Manganese	95
Cobalt	80
Tungsten	72
Bauxite	70
Mercury	66

On the other hand, although substitution is possible for materials like chrome, manganese, and tungsten, such substitution is not complete and would be difficult to undertake on short notice. It is in U.S. imports of these minerals that Lagovskiy's argument has some force.

It is interesting that Lagovskiy avoids any further discussion of rubber but devotes a full page of discussion to U.S. dependence on imported chrome and emphasizes that "the U.S.A. has almost no chrome in its own country."

Chrome is required for production of alloys for jet engines, gas turbines, guns, and armor-piercing projectiles; it is used in both aircraft and motor vehicle manufacture. The United States accounts for about two-thirds of the entire Western-world consumption. Lagovskiy points up as a "weak link" the "enormous geographic disparity" between world production and consumption regions:

"The imperialist countries, considering the enormous significance of chrome in war production and the lack of deposits of it in places where it is consumed, do not spare funds for the development of chrome re-

serves. However, this does not free them from the necessity of importing chrome ore in wartime as well."

Amount of U.S. imports from U.S.S.R.

Weak-link commodity:	
Chrome ore	$3,433,000
Diamonds, cut but unset	5,681,000
Platinum	518,000
Palladium	15,540,000
Rhodium	2,348,000
Nickel	1,092,000
Titanium	899,000
Lagovskiy's "weak links"	29,501,000
Total U.S. imports from U.S.S.R.	35,359,000

Source: U.S. Department of Commerce, *Export Control,* 85th Quarterly Report, p. 19.

Clearly, then, Lagovskiy lays great faith in his "weak-link" theory, and he might be expected to recommend its use in Soviet economic relations with the United States.

Although we have no direct way of knowing whether the Soviets have indeed made use of the principle, we can examine the structure of U.S. imports from the Soviet Union to determine if the structure conforms, or does not conform, to Lagovskiy's theory.

If it does not, then either the Soviets have made no attempt to utilize the principle, or—conversely—they have attempted to do so, but the United States, aware of its potential weaknesses, has avoided dependence by diverting its purchases elsewhere. This is possible, as there are free-world as well as Soviet sources.

Table III contains U.S. imports of Lagovskiy's "weak links." While Lagovskiy lists "platinum," the table includes "platinum group" metals. Nickel and titanium are not in Lagovskiys listing, but fulfill the Lagovskiy criteria.

This table contains data for the first half of 1969 (latest available in the Quarterly Reports on Export Control). U.S. imports of weak-link commodities constituted no less than $29 million out of a total import from the Soviet Union of $35 million of all goods. *A remarkably high percentage—84 per cent—of our total imports from the U.S.S.R. fall within the very narrow range of commodities covered by the Lagovskiy weak-link principle.*

If the comparison is extended to cover the previous full year (1967), 65 per cent of our imports from the U.S.S.R. fall into the category.

In brief, our import structure is almost unbelievably consistent with a principle of economic warfare that is advanced by a general of the Red Army.

The next relevant question concerns the proportion these imports from the U.S.S.R. constitute of U.S. *total* imports from *all* sources for specific commodities. In 1966 about one-third of U.S. chrome ore imports came from the Soviet Union.

In the same year, about one-half of palladium imports and just less than one-third of the rhodium imports came from the U.S.S.R.; in the case of other platinum-group metals, the Soviet proportion was somewhat less. However, it cannot be argued that the relative dependence is in any way a minor matter.

In general, it may seem improbable that the dependence is critical. Alternate sources of supply are available, stockpiles presumably are adequate, substitution is possible—and in time of war there would be diversion from considerable civilian end uses to military end uses.

But the Soviets, in case of war, also could divert these Russian deposits (developed with the aid of Western equipment and peacetime purchases) to their own military use. Such diversion would be relatively more important to them, as civilian uses in the U.S.S.R. are much smaller and they do not have the same range of substitution options. Further, free-world sources are in areas earmarked for "liberation" by the Soviets—Rhodesia, for example.

It cannot be argued that this coincidence between a Soviet strategic principle and its implementation is accidental. The Soviets have a foreign trade monopoly and can bring about, by manipulation of price and quantities marketed, a militarily desirable pattern of trade.

Any trade pattern therefore must reflect a conscious objective on the part of the Soviet Union. It has not resulted from the free play of market forces in international commerce.

The evidence suggests that the Soviets adopted the weak-link theory and have endeavored to put it into practice. Private American firms then responded (as they have every right to do) to the lower Soviet prices and more favorable offers. This pattern was encouraged by the Johnson Administration when Rhodesia was cut off as a source of supply for chrome.

The United States therefore is becoming increasingly dependent on Soviet raw materials of a critical nature. The only valid conclusion is that this was a conscious effort on the part of the Soviet Union as part of a wider scheme. If not, the pattern of U.S. imports from the U.S.S.R. would be distributed far more widely.

This also explains why the Soviet Union continued to ship chrome and manganese to the U.S. after the 1948 embargo and during the current Vietnamese war—*i.e.,* as a long-range effort to increase U.S. dependence. A few U.S. observers have noted the continuing import of Soviet chrome and concluded it is a sign of Soviet benevolence—a completely mistaken interpretation, inconsistent not only with Soviet strategy but also with our own defense posture

For example, J. M. Chambers, testifying before the U.S. Senate Subcommittee on Banking and Currency (May 1969), argued: "The metallurgical-grade chrome consumed in the United States normally comes from two main sources; Rhodesia furnishes one-third, Russia one-third, and the balance from the rest of the world. With Rhodesia under sanction we cannot rely on them for any chrome and therefore the . . . availability of chrome ore from Russia is essential . . .

"Since the importance of these materials to our industries is well known to the Russians, I think that some of those who worry about our 'national interest' should take heart that Russia has continued to supply us . . ."

There are indeed two ways of looking at dependence on the Soviet Union for strategic materials. One way—put forward in the early 1960's in the Rock report—is to accept a strategy of interdependence as leading to peace.

Unfortunately, it has never been explained how interdependence between two countries leads to absence of conflict. Indeed, the argument is refuted by Soviet actions and their reasons for these actions in Vietnam.

Examination of the trade history of the past decade suggests certain firm conclusions. As the "bridge-building" policy took hold in the mid-1960's, the Soviets had an opportunity to make a reciprocal response according to the prevailing theory of "graduated reciprocation in tension reduction." How did they respond?

If Soviet actions had been guided by responsive reciprocity, they would have increased neither their trade in weak-link commodities nor their logistic supply of world revolution. They would have made a determined and conscious effort to deemphasize any action capable of misinterpretation, and so have marked their intentions to reciprocate.

Given the monopoly of foreign trade in the Soviet Union, such a policy could have been effected very readily, and it would have shown up long before 1966–1967.

The facts presented complement the evidence provided by Soviet logistic support of the Vietnamese war and the Middle East conflict—that the Soviets not only made no effort at reciprocity, but also seized the opportunity to further an over-all offensive strategy, an *economic* strategy with *military* objectives.

It appears that the United States, under the illusion that it was making an initial invitation for reciprocal disarmament and trading for peace, actually may have traded and reciprocated itself into a potentially dangerous corner.

The coincidence between Soviet strategic objectives and our imports from the Soviet Union is too great and has continued for too long a period of time to be dismissed as accidental. There is little question that Soviet offers have been attractive enough to U.S. firms to induce such a dependence.

In "Strategiya i Economika," Lagovskiy makes explicit reference to this question: "Our strategy is a strategy of bold daring, always realistically considering the material, moral, and political capabilities of its accomplishment. In the Soviet Union, where economics and strategy are developed in an indissoluable dialectical unity under the leadership of the Communist Party, where the planned system of economy dominates, there is no expenditure of resources without plan, and never can be . . ."

It is the psychological effect on Soviet planners that contains a degree of danger. Although given to great realism, Soviet planners cannot help but observe the significant fulfillment of a strategic objective. If this be so, then it must weigh in the scale in consideration of future hostilities with the United States.

From the viewpoint of a Soviet planner it is a distinct signal of United States weakness, and as such is generally considered a sufficient invitation to initiate aggression. It makes little sense, then, to defend ourselves at a cost of $X billions against Soviet missiles, without accompanying this move by the logical action—taken at the almost negligible cost of shifting supply sources—to remove a potential source of Soviet miscalculation.

THE CONCEPT OF ATLANTIC PARTNERSHIP AND THE GEORGETOWN CONFERENCE OF THE AMERICAN INSTITUTE ON PROBLEMS OF EUROPEAN UNITY BETWEEN OCTOBER 17–19, 1969

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PATTEN. Mr. Speaker, as a member of the board of trustees of the American Institute on Problems of European Unity, it gives me pleasure to join my distinguished colleagues ably led by the gentleman from Illinois in analyzing the concept of Atlantic partnership in the light of the recent conference of our institute at Georgetown University which was attended by 44 American and European scholars and research experts.

The institute was founded in the summer of 1968 mainly at the behest of my good friend, Dr. Z. Michael Szaz, at that time associate professor of political science at Seton Hall University, South Orange, N.J., who has since assumed the executive directorship of the organization and devoting his full time to it.

One of the most interesting panels at

this conference has been the one devoted to Germany and the concept of Atlantic partnership, both in view of the geopolitical situation of that divided nation and the past experiences which that nation and Europe underwent during the totalitarian Hitler period. The institute has assembled a distinguished panel, though two German representatives could not come in the last minute, due to the fact that the election of the new Chancellor took place a day after the close of the conference.

Those attending the panel included the professor who has been dubbed as the "German Gallup" for his wide and successful research work on German public opinion and polling procedures and who holds a chair in political sociology at the University of Mannheim, Rudolf Wildenmann. Another internationally known scholar in attendance was Prof. Wolfram Hanrieder from the University of California at Santa Barbara who is teaching this year under a NATO faculty fellowship at the University of Brunswick in West Germany and who has written the best English-language study on West German foreign policy. Other distinguished professors included were Franz Gross, P.M.C. Colleges, the chairman of the political science department at George Washington University, Wolfgang Kraus, the former American Military Government official and author Kurt Glaser from Southern Illinois University, the head of the Conference Group on German Politics of the American Political Science Association, Dr. Charles Foster from the U.S. Office of Education. The Institute for Defense Analyses provided the able chairman, Walter F. Hahn and the analyst on German strategy, the able László Hadik. Professor Maurice Czikann-Zichy provided his special knowledge of German economics, and James H. Wolfe from the University of Maryland the expertise on German-Czech relations.

Mr. Speaker, at this point I would like to insert the report of this distinguished panel, especially as it deals with the coming trends in Germany under the new regime of Chancellor Brandt:

AMERICAN INSTITUTE ON PROBLEMS OF EUROPEAN UNITY

CONFERENCE ON THE CONCEPT OF ATLANTIC PARTNERSHIP

German panel chairman's report

Panel Members: Walter Hahn, Institute for Defenses Analyses (Chairman); Professor Maurice Czikann-Zichy, Immaculata College; Dr. Charles R. Foster, U.S. Office of Education; Professor Kurt Glaser, Southern Illinois University; Professor Franz B. Gross, P.M.C. Colleges; Laszlo Hadik, Institute for Defense Analyses; Professor Wolfram Hanrieder, University of California (Santa Barbara); Professor Wolfgang Krauss, George Washington University; Professor Rudolf Wildenmann, *Universität Mannheim,* and Professor James H. Wolfe, University of Maryland.

The discussions of the Panel were overshadowed by the change of government in the Federal Republic of Germany. As a result of the September elections, for the first time since the birth of the Federal Republic, West Germany is to be ruled by a predominantly Socialist government. The questions which dominated the sessions of the Panel were thus urgently speculative ones. Given the basic options open to West German foreign policy, as well as the likely opportunities and constraints bearing upon that policy, in which direction is the new government likely to move? Specifically, what will be the likely priorities as between the Federal Republic's continued engagement in Western Europe and the Atlantic Community on the one hand, and Bonn's growing ambitions in the east on the other?

West German shift as a gradual and progressive phenomenon

There seemed to be agreement in the Panel that the eastern emphasis in West German policy is not a new phenomenon, nor can it be attributed exclusively to the predilections of the Social Democratic Party which now has assumed power. Rather, the change began gradually in the waning years of the Adenauer Administration, became more conspicuous in the policies of Chancellor Erhard and Foreign Minister Schroeder, and gathered momentum under the Grand Coalition of Kiesinger and Brandt. A variety of the interrelated causes were adduced for this shift:

(1) The sobering recognition in Bonn that basic U.S. national interests did not necessarily coincide with West German or Western European interests. This recognition, more than anything else, triggered the incipient change of West German policies under Adenauer, beginning in 1962, and has underlain the quickening search in the FRG for fundamental policy alternatives since that time. The recognition has been fueled by such developments as the deepening U.S. preoccupation with Asia, linked with an apparently declining U.S. interest in the affairs of Europe, and perhaps more significantly by the rising priority assigned by the United States to the objective of stabilizing the U.S.-U.S.S.R. relationship.

(2) The corollary trend of a progressive liberation of the foreign policies of the Federal Republic from the previously overwhelming domination of the United States. This sense of emancipation from U.S. tutelage in the FRG has been abetted by a new form of materialistic nationalism in West Germany, which draws from West Germany's economic successes and momentum.

(3) The dimming of the Adenauer Conception of West Germany's integration into a politically unified Europe as a result of stark setbacks in the movement toward unification and de Gaulle's reinjection of nationalism into the West European political arena.

(4) The gradual undermining of the Adenauer Conception, also, at the hands of interest groups within the Federal Republic which, although they paid homage to the Adenauer idea, nevertheless cast longing eyes toward the East (particularly toward Eastern markets).

(5) Security and economic considerations, which will be touched upon below.

The likely dimensions of the new Ostpolitik

Professor Wildenmann presented to the Panel the results of opinion polls and sociological investigations in West Germany, which suggest that the new government under Willy Brandt enjoys an unprecedented level of potential popular (and particularly elite) support, and can translate this support into a broad range of freedom of action in domestic and foreign policies. This finding is notwithstanding the results of the September elections, in which the Christian Democratic Union garnered the largest percentage of national votes. A plurality of West German voters favored the CDU in terms of personalities represented in the Party (epitomized by the respected image of Kiesinger). Yet, a majority of West Germans considers the SPD as the more capable party in a collective sense. This confidence attaches particularly to domestic policies—Brandt prevailed primarily because of his proffered program of domestic reform—but extends also to foreign policy.

There was agreement in the Panel that *Ostpolitik* would probably loom more prominently in the policy priorities of the new government than comparable efforts in the arenas of Western European unification and Atlantic Partnership. This emphasis by the new government on policies toward the east is not likely to clash with popular and elite predilections. According to Professor Wildenmann's findings, a large majority of West Germany's elite continues to assign highest priority to the task of Western European integration and unification. But almost an equal priority, or implicit desire, is attached by elite opinion to progress in effecting a West German detente with the east.

The targets and tactics of the *Ostpolitik* of the new Administration are not likely to be the same ones that flavored the policies of the Kiesinger-Brandt coalition. The traumatic lesson of Czechoslovakia for the Federal Republic was that any effort to fish in the Kremlin's troubled waters (e.g., Rumania and Czechoslovakia) tends to be counterproductive and dangerous. In the light of this lesson, the main thrust of *Ostpolitik* will henceforth be directed at Moscow, with the objective of engendering a broad detente with the Soviet Union. In pursuit of this objective, the new government will probably sign the Nonproliferation Treaty.

In this quest, also, the Brandt government will probably aim at a comprehensive modus vivendi with the German Democratic Republic. The modus vivendi will in all likelihood stop short of full, internationally legal recognition of Pankow by Bonn (full recognition is still opposed by an overwhelming majority of West German popular, if not elite, opinion). The rationale of a normalization of relations with the Ulbricht Regime will not be to advance the cause of German reunification; indeed, it is generally recognized in West Germany that an upgrading of the state-to-state relations between Bonn and East Berlin will probably set back the goal of reunification. Rather, the policy toward the GDR is likely to be couched in the more modest aims of overcoming the "Pankow hurdle" obstructing Bonn's approach to the U.S.S.R. and East Central Europe, as well as that of casting some human and cultural links over Ulbricht's wall. The policy of the new government toward the remainder of East Central Europe will probably be characterized by small and relatively inconspicuous steps, contrasting with the somewhat "louder" initiatives of West German *Ostpolitik* prior to Czechoslovakia. The West German perspective of East Central Europe continues to be animated by the hope that tides of reform in the Communist countries will in time bring in their wake a transformation of the Socialist camp and a meaningful East-West confluence in Europe.

The question was raised and debated as to how long the honeymoon between the new West German government and popular opinion would last with respect to *Ostpolitik*—whether setbacks in the East might not quickly crumble the popular base of support. There was no clear answer to this question beyond the recognition that, depending upon the degree of expectations and commitment which the new government will vest in *Ostpolitik*, the Soviet Union and the East Central European countries, notably Pankow, could play a carefully manipulative "hot-and-cold" game vis-a-vis Bonn.

West German engagement in West European Unification and Atlantic Partnership

The question was raised: Given *Ostpolitik* as the dominant impulse in the new West governmental constellation, how will this reflect upon the Federal Republic's role and efforts in the Western arena?

The notion was advanced that, West German ambitions in the East notwithstanding, the continued participation of the Federal Republic in Western institutional arrangements is almost predetermined by the legacy of the past 20 years and by the institutions

created by this legacy. The integrative features of the Common Market are a fact, and at least in the realm of economics West Germany is enmeshed to the point where the Federal Republic could not severe its Western links in favor of a categorical embrace with the Soviet Union and the East. Powerful commercial circles in West Germany, at the very least, have too much at stake in the EEC. The task remains to translate economic links into political bonds.

It was pointed out, also, that leading personailties in the new government—e.g., Willy Brandt himself and Defense Minister Helmut Schmidt—are essentially pro-Western in basic orientation. Moreover, at least in terms of its fundamental philosophical outlines and basic objectives, the new *Ostpolitik* contemplated by the new Administration in Bonn should not clash intrinsically with the objectives of Western European unification and Atlantic Partnership, and of West Germany's participation in these processes. The avowed effort in the East, after all, will be aimed not at the restoration of the pre-war German nation or other territorial and political ambitions, but rather at a general conciliation with the East based roughly upon the current status quo. To the extent that a successful *Ostpolitik* might thus rid the Federal Republic of the stigma of irredentism, Bonn's credibility in the Western unification project might also be strengthened commensurately.

It was pointed out, however, that while there may be no inherent conflict between the objectives of *Ostpolitik* and *Westpolitik* in the abstract, the means and tactics invoked by Bonn in support of these policies might very well clash. In short, there is a potential conflict of policy instrumentalities which may harm West Germany's engagement in the West European and Atlantic arenas.

In its West European policies, moreover, West Germany continues to face obstacles both in the objective environment of Western Europe and in its inherent freedom of movement. Thus, the opportunities for meaningful Franco-German cooperation have not risen perceptibly in the wake of de Gaulle's departure from the scene. Moreover, West Germany is chronically reluctant to take the initiative in Western Europe because of the "fear of triggering fear"—the anxiety that any display of German political muscle will heighten apprehensions elsewhere in Western Europe that Bonn is out to dominate the European scene. If anything, West Germany's demonstrated economic strength has exacerbated the dilemma.

The optimism was expressed, nevertheless, that a number of factors may push the new government toward a more effective West German role in Western Europe. One is the imperative of continued economic momentum, which represents the principal mandate to be met by the Brandt government if it wants to remain in power. Another is the prospect of an effective CDU opposition in the Bundestag once the ousted party recovers from its shock and settles into an as yet unfamiliar role.

The security factor

It was brought out in the Panel that a paradox pervades West German perceptions of military security. On the one hand, the estimate of direct military threats to West Germany's security is relatively low (Czechoslovakia notwithstanding), and on a popular level at least there is implicit belief in American protection. At the same time, however, there are fears for the future. To a large extent, Ostpolitik is animated by the desire to find alternatives (and supplements) to the current security arrangements.

It was suggested, also, that the continuing debate in NATO on security issues is to some extent a dishonest one. This is so because a fairly profound sense of security in NATO generally permits the luxury of contending strategic arguments. This tendency is encouraged by the fact that the principal organized forum of the Atlantic Alliance is a military one, and the dialogue tends perforce to be couched in military and strategic terms. In reality, military arguments and different strategic perceptions reflect more complex political and national concerns.

There was agreement, nevertheless, that, whether or not the security debate is reflective of deeper political meanings, some security interests divide Europe, and particularly Germany, on the one hand, and the United States on the other. Briefly, they are the following:

The United States in its own interest of ultimate survival, has endeavored to contrive as broad as possible a range of options for the defense of Europe; therefore, the American emphasis on such concepts as conventional defense and flexible response. The Europeans, and particularly the Germans, on the other hand, have endeavored to narrow U.S. options in order to tie the United States nuclear guarantee integrally and credibly to the defense of Europe.

The United States, in the same national interest, has been endeavoring to defuse and stabilize its relationship with the Soviet Union—in the case of Europe, on the basis of the status quo. Europeans, and particularly Germans, view the growing U.S.-Soviet bilateral relationship—reflected in the Nonproliferation Treaty, SALT talks, etc.—as a freezing of the status quo in Europe by superpower fiat (the ultimate expression of Yalta), thus barring political change and confluence on the continent.

Largely because of these trepidations, plus underlying political factors, the key problem of the Alliance—and one that must be resolved before a meaningful U.S.-West European partnership can be cast—is that of nuclear decision-making in the Alliance. This problem weighs particularly heavily upon West Germany, which recognizes that it can never muster its own national resources requisite to its defense. On the one hand, an effective West German conventional defense is not a feasible alternative: there are already pressures for reducing the Bundeswehr, which is bedevilled by growing hostility and disrespect from the German populace and is uninspired by any real sense of mission. On the other hand, a national nuclear option is impossible for the Federal Republic.

In short, some solution to the nuclear decision-making problem was deemed by the Panel a key not only to U.S.-German relations, but to the broader problem of U.S.-Western European partnership. In this context, there was some discussion regarding the alternative of an independent European nuclear deterrent. It was suggested that, if politically feasible and militarily effective (and doubt was expressed on both scores), such a European nuclear deterrent force might offer, in the longer run, a more credible deterrent against deliberate aggression from the East—and perhaps a politically more comfortable alternative for the Europeans—than the present arrangement, which is keyed to American decision-making power. It was recognized, at the same time, that the creation of such a deterrent force would not necessarily cater to the requirements of U.S.-Western European partnership—that, indeed, the emergence of Europe as an independent nuclear power might render the United States even more reluctant to link its destiny with that of the continent.

Economic factors

The discussion in the Panel of the important topic of economic factors bearing upon West Germany's potential role in Atlantic Partnership was unfortunately limited by time. The following basic points were discussed:

The Federal Republic's Ostpolitik is fueled also by powerful economic motives. West Germany suffers today from the malaise of prosperity in the form of a capital surplus which, by being denied outlets, feeds inflationary pressures in the domestic economy.

One short-term solution to West Germany's dilemma might be domestic reinvestment in the neglected realms of German infrastructure and education. It was recognized, however, that eventually such reinvestment (assuming that it can be effectively channeled) will feed back once again indirectly into the producing engines of the economy.

The Federal Republic must find outlets for investment capital abroad. The flow of such capital westward continues to be impeded by institutional barriers—in the United States by anti-trust laws, and in Western European countries by legal constraints bearing upon investment imports and licensing of foreign corporations. At the same time, the opportunities for German investment capital in developing countries have turned out to be relatively unattractive.

East Central Europe and the Soviet Union thus beckon all the more alluringly as fertile areas for West German investment. The agreement, currently being negotiated, between Siemens and the Soviet Union for joint construction of an oil pipeline leading from the Soviet Union to Western Europe epitomizes the opportunities which West German investors discern in the East. It was suggested in the Panel that, given such rising expectations in the West German business community and government circles, the Soviet Union could add some powerful economic bait to a cat-and-mouse game with West Germany.

In any event, the question was raised as to how West German economic potential can be turned more meaningfully westward. A number of suggestions were made in this respect, including the creation of a common West European currency. There was agreement, however, that the fundamental solution to the problem resides in the elimination of institutional and legal barriers, and the encouragement of free flow of capital within the Atlantic Community.

BENJAMIN COHEN: ROOSEVELT BRAIN TRUSTER

HON. JOHN A. BLATNIK

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. BLATNIK. Mr. Speaker, If ever the title "Architect of the New Deal" could be conferred upon one person, Benjamin Cohen would stand high on most everyone's list for that honor.

"Isaiah in Modern Dress" he was called in a recent Washington Post editorial when the American Jewish Committee selected him to receive its highest honor, the Isaiah Award, "for his search for justice and efforts on behalf of the oppressed."

Others have recognized him as one of the early prophets who foresaw tragic consequences from our involvement in Vietnam and who voiced his opposition on philosophical and moral grounds long before our commitment in that tragic land grew to the massive proportions we see today.

A revealing article in Thursday's Washington Star treats us to another view of Benjamin Cohen: the warm, decent, brilliant, but unassuming human being who is both loved and respected by

those who know him well. Perhaps it is from this very font of humility and humanity that he draws the inspiration for his penetrating commentary on the great issues of our times. The article follows:

ROOSEVELT BRAIN TRUSTER: BENJAMIN COHEN STILL ISSUE-ORIENTED

(By Duncan Spencer)

When Benjamin V. Cohen was President Roosevelt's top brain during the New Deal, keeping abreast of the currents of the world was for him a manageable task. Now he finds it hard to keep up—there are too many problems that engage his attention, he says.

Cohen, one of the most important policy-makers of the Roosevelt era, still at 75, devours information at an enormous rate. The easy chair in his apartment is flanked by clipped newspapers and the kind of periodicals that don't use girls on the cover. The room is lined with books.

Cohen, slightly stoop shouldered and somberly dressed, took on a recent interview with a warning: "I don't know what you want to know, exactly . . . I'm not too interested in going over the past."

That might be called a typical comment from the lawyer who was once called the most modest man that ever came to Washington. He lives on Massachusetts Ave. NW with his dog, Mr. Tweed, and struggles with ideas, an occupation that has keep him quiet and retiring amid politicians little known for those qualities.

But Cohen's career with Roosevelt and before, when he served in a succession of important but obscurely named government posts, made the public limelight shine on his sad and scholarly face. He made an indelible impression because his powers seemed mysterious.

It was Cohen who was the intellectual partner of the legislative and persuasive team of Corcoran and Cohen, the best-known of Roosevelt's "brain trust." He became the President's trusted adviser, but he now wonders about his real influence. "As the years go along, people tend to ascribe to you more power and influence than you actually had," he says.

He was responsible for shaping much of the New Deal's legislation—such legal landmarks as the Tennessee Valley Authority, the Federal Housing Administration, and the Wage and Hour Law, provisions that limited stock market operations, and the lend-lease policy at the beginning of World War II.

Thomas G. (Tommy the Cork) Corcoran was Cohen's partner in these activities, as unlikely a match as can be imagined. The free-wheeling, party-going pressure politician Corcoran and the gentle, meticulous shy Cohen shared the same brick house on R Street NE and were known as the "gold dust twins" after a popular soap powder advertising slogan of the time.

Now his thoughts focus on the Vietnam war, and he is one of the few who can honestly say that he was against America's involvement from the beginning. He says it over and over with notes of sadness.

"It was a war we had no business to enter into under our UN commitments, without first at least in good faith trying to see what could be done to heal the situation through the UN," he says. He feels the government dishonestly kept the situation secret and allowed the Pentagon to gradually insinuate itself into policy and budget decisions.

He estimates that scholars will be hashing over now-secret documents 50 years hence and finding little comfort in them. "We hire others to do the fighting, and then we do become involved, and we find it difficult to explain," he says.

Cohen is not all gloom over Vietnam. He finds a ludicrous irony in young draft protestors who flee the country, "a country to which their forefathers came themselves to avoid the draft." And he sees a new and healthy questioning attitude toward the Pentagon.

Cohen's quiet life is rounded out with a little speechmaking and walks around Dupont Circle with Mr. Tweed, a miniature schnauzer. He dines infrequently with friends and cooks for himself in his small quarters.

But he is not yet out of the business of making large plans for his country. He is working, for instance, on a scheme to make the vice presidency a popularly elected post (he takes it as an article of faith that the presidency will soon be so), but it is not something he has been able to move people about.

"I think it would have a most wholesome effect on the parties in selecting a vice president," Cohen says, shortly after explaining that it was an idea no one was interested in. "Too frequently they select a vice president merely to have the opposite wing of the party represented, so that the man who succeeds in the event of death is not the man most likely to carry out the same policy.

"Also, if there is a real question about the ability of the vice president, the people should have a right to choose who they want . . . I don't mean to cast aspersions on Mr. Agnew, but I think in light of reservations expressed by members of his own party at the time, many people had the feeling they would have preferred someone else for vice president, and it might have been a healthy thing if they could vote that way."

Cohen's quiet voice makes it easy to conjure him explaining things to bemused legislative aides. As he talks, an idea becomes clear and necessary, nothing that reasonable men could not accept readily.

A feeling of frustration emanates from the old insider, though, and it is not all connected with his long years out of official power.

"I don't say I don't miss it and sometimes don't feel the futility of having views on things when you're not in a position to do much about it," he says. Comparing the role he and Concoran once had with the present, he says: "We were given credit for a lot of things we didn't do and were blamed for a lot of things we didn't do. It so happens that we differ now, for example, on the Vietnam war. If he happened to agree, he would have been able to move mountains, and though I can only refer to the fact I was against it from the beginning, that's evidence of my impotence more than anything else."

The feeling of impotence is joined by thoughts of the waste of the war. The war, he says, is stalling practically everything, domestic policy, foreign relations, business progress.

One gets the worrisome feeling that Cohen sees some coming disaster, but hesitates to mention it. "We express our dedication to those other things but we are unable to do much about them. Because of the inflationary pressures and the demands of the Vietnam war, we haven't the resources to do anything about them."

But Cohen seems able to put the world aside; he may have a strong faith in its durability, even on a dying winter day, and on the downward slope of his own long, self-directed life. He offers no cosmic knowledge. "I find it always easier to talk about specific issues," he says.

"Mr. Tweed was spending the day at the dentist," Cohen explains suddenly. "I'm sorry he's not here to greet you." He has the respect of the whole neighborhood; he has an aristocratic air that I don't have.

"When I walk down the street everyone admires him. He's a very handsome dog; lovely—young ladies stop and pet him—it's too bad I can't run him for President."

LAMEST EXCUSE OF THE YEAR—NOMINATION IS SECONDED

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. DULSKI. Mr. Speaker, a Washington columnist and satirist has put into words my exact feelings on the incredible turnabout by the Nixon administration on legislation to control mailing of unsolicited credit cards.

This recent practice, which has become so prevalent, has caused considerable inconvenience—and, in some cases, unnecessary embarrassment—to many of our citizens because of the loss or theft of credit cards which the listed individual never sought or wanted in the first place.

Credit cards are an accepted feature of today's economy and no one is arguing against this means of doing business where both parties—the merchant and the customer—are voluntary participants.

However, increasing numbers of businesses have been making the practice of picking names from mailing lists and even telephone books, then sending out credit cards without first ascertaining if the individuals want them.

LEGISLATION IS IN ORDER

Our Subcommittee on Postal Operations has held hearings on this problem and has accumulated evidence of the evils of these unsolicited mailings. Legislative action clearly is in order to impose Federal controls.

The administration first gave its basic support to control legislation. Then administration spokesmen did a sudden turnabout. The logic of their new position is incredible:

That it would give an unfair advantage to companies which already have flooded the mails with unsolicited—and usually unwanted—credit cards.

Bill Gold, columnist in the Washington, D.C., Post, today nominates the new administration for the 1969 award for the "Lamest Excuse of the Year." I second the nomination.

Mr. Speaker, following is the text of Mr. Gold's remarks in "District Line":

WHITE HOUSE "REASON" WINS AWARD

(By Bill Gold)

Congress has been attempting to write legislation that would put a stop to unwanted credit cards flooding the mails and falling into the wrong hands.

At first, the White House said it favored a prohibition against mass mailing of credit cards. But that stirred the credit cards lobbyists into action, and now the White House has done an abrupt about-face.

A White House spokesman explained this week that to ban the practice now would leave the firms that have already engaged in it with an unfair advantage. He wants to let everybody else do it before we consider prohibiting it.

If we accept his "reason" for the administration's change of heart, then no doubt we ought to rescind the SEC regulations that guard against shady stock deals. There may be a few swindlers left who would like to make their fortunes at the public's expense, just as the manipulators did in the old days.

LOGICAL FOLLOW-ON

Similarly, the White House would no doubt be opposed to banning the mass mailing of razor blade samples to millions of unsuspecting "Occupants" and their children. Some razor blade companies haven't used this technique yet; to prohibit it now leaves their competitors with an advantage. If a few children get cut up, meantime, that's too bad. We have to be fair.

One of the worst things we've done recently is forbid trick installment contracts and loans that hide the true rate of interest. That law ought to be repealed. There are many honest lenders who haven't taken advantage of the gimmick yet.

The truth-in-packaging laws were a terrible mistake. They work to the disadvantages of companies that never tried to cheat. The prohibition of dangerous drugs and additives left some companies without their share of the loot. Let's bring back thalidomide until everybody gets a fair crack at the profits.

THEN ANOTHER STUDY

After every enterprising entrepreneur has had his fair chance to make a buck, we can have a committee study the question in depth. If the committee finds that the practices in question are widespread, it will be obvious that nothing can be done about them.

I like your thinking, Mr. White House Spokesman. You can tell your boss for me that whatever he's paying you, it's not enough. Any man who has to defend this kind of "reason" for continuing what is acknowledged to be an unwholesome practice is being underpaid.

Meantime, this column awards to you, sir, its hand-knitted bathtub, symbolic of your having won our 1969 award for the Lamest Excuse of the Year.

MY COLLEAGUE, HON. GUS HAWKINS, REPORTS TO HIS DISTRICT

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. CLAY. Mr. Speaker, the report of my colleague, the Honorable AUGUSTUS F. HAWKINS, to his congressional district in California, has just come to my attention. In his report, Congressman HAWKINS has pointed up the urgent concerns of the Nation. His feeling for the needs of the people and his pursuit in Congress of programs to meet those needs make GUS HAWKINS a most respected and highly valued Member of this body. I am proud to serve with him on the House Education and Labor Committee—and I know why the people of the 21st District of California are proud to have him represent them in Congress. He serves them well as a conscientious legislator and a courageous spokesman for human rights.

I commend the January 1970 report of our colleague, Congressman HAWKINS, to the attention of the Congress:

YOUR CONGRESSMAN, AUGUSTUS F. (GUS) HAWKINS, REPORTS FROM WASHINGTON

PROGRAMS TO MEET THE GOALS OF THE 1970'S

More jobs, higher incomes, better schools and health care—these are the basic goals we must achieve in our community as we enter the new year, 1970.

These goals must be achieved in opposition to the "hard time" policies of the Nixon administration which are increasing unemployment and welfare rolls, and creating racial strife and urban disorders.

Frankly speaking, we are disgusted with Nixon's statements that minorities and the hard-core unemployed are going to find jobs in private industry at some future but unspecified date.

Again, menial, low-paying, and dead-end jobs are not the answer. If the private sector is willing to hire the unemployed even if it means providing the necessary training and other supportive services so that the cycle of poverty can be broken and persons can truly become self-supporting with dignity, we are most anxious to cooperate, and in recent letters to the National Alliance of Businessmen, the Chamber of Commerce, and, the Los Angeles Merit Employment Council, I have so indicated my willingness to work with them on a factual survey of the actual hardship conditions and creation of special programs to get people on payrolls and into meaningful training programs.

But beyond that we cannot wait. The hard-core unemployed need good jobs now. Adult males need adequate wages to support their families in decency and to keep them together. Nor should mothers who head families be forced into jobs which require them to neglect their children.

What is badly needed then is a combination of programs to provide employment, training, basic education . . . and all the supportive services needed to get people into good paying full-time jobs. And if private industry cannot fully accomplish this, it is the responsibility of the Federal government, our State, and cities to meet the need.

This they can do by employing thousands in our schools, hospitals, in social service, recreation, and with law-enforcement agencies. Also, they can expand skill centers, employ local residents in anti-poverty programs, and qualify more minorities for civil service jobs.

We must break the vicious cycle of poverty. We must end the bitter rivalry between our black and brown brothers fighting each other over poverty "crumbs." We must meet the crisis of our cities plagued with poverty, deteriorating schools, and disunity. And finally, we must end the war in Viet Nam so that we can regain our moral balance and make available to domestic programs and worthy purposes the billions of dollars now being wasted.

To these goals this newsletter is dedicated.

More Eyoa funds will be made available if final approval is given to the Hawkins amendments to the O.E.O. (Anti-Poverty) bill in Congress. These amendments, added in the House Education and Labor Committee, will provide $295 million for jobs, Headstart, and other community action programs . . . and will allow more money to be used for such programs as Teen Posts and NAPP. These local groups, whose marching support for more local program funds won the initial victory, deserve high praise. Final approval must await House and Senate action.

WELFARE AID NEEDS CHANGING

Everyone—recipients, taxpayers, and officials—seems to agree our present welfare system is inadequate, degrading, and keeps people in poverty.

Two recent proposals to change the system have been advanced.

President Nixon advocates an annual cash payment of $1600 for a family of four. Food stamps, however, would be continued. Individuals and childless couples would not be covered.

The other proposal ("The Heineman Report") advocates a minimum of $2,400 annually. Unlike the Nixon proposal, this benefit would not be limited to families.

Both proposals recommend that part of additional earned income be retained (50 cents for each dollar earned) so that families will be removed from aid altogether when incomes reach a certain total amount ($4800 under the Heineman plan and $3920 under Nixon's.)

The major difference in the two plans is the Nixon's requirement that family heads accept training and job offers. This can mean any job refusal will result in the cash aid being cut off, even if it be for good reason such as a low-paying, dead-end job or the unavailability of child care or even transportation.

The Heineman report says it like it is, that until jobs are actually available and training what it should be, such "work incentives" are meaningless.

Personally, I am opposed to this so-called work incentive feature for this and other reasons. It smacks, in my view, of becoming a slave-labor gimmick used to cut people off of aid altogether. Likewise, I believe the cash payment, even at $2400, is too low for a family of four. The amount should not be any lower than enough to keep a family in health and decency.

In this regard, my views are similar to those of the National Welfare Rights Organization whose chairman is Mrs. Johnnie Tillmon, a resident of our Congressional District and a great fighter for civil rights.

ACTION PLANS—NEEDED NOW

Two recent government reports on economic and educational deficiencies in the South-Central Los Angeles area showed severe unemployment and critical school problems at a crisis stage.

Unemployment, the Bureau of the Census reports, has risen from 13.2 percent in 1965 to 16.2 percent now. The jobless rate for Negro teenagers is 42.9 percent.

In a national survey of the schools, the children in our area scored well below the average in reading. Actually our schools were among the worst, not because the children can't learn but for some unexplained reasons were not achieving their capability.

Alarming as these reports are they should not panic us into disunity or misdirected community response. They do deserve, however, our immediate attention and concerted action.

Since 1963, millions of dollars have been spent on anti-poverty programs and compensatory education in our areas. Federally-assisted manpower training, skill centers, vocational and adult education are available to disadvantaged persons, as well as multi-purpose service centers and such unique programs as Teen Posts and the Neighborhood Adult Participation Project (NAPP).

Great claims of success have been made by the National Alliance of Businessmen that jobs in private industry have been found for the hard-core unemployed—both with and without federally-subsidized training.

In addition we have succeeded in obtaining Federal money for numerous projects, the construction of which as well as the operation, involves the employment of substantial numbers and the delivery of special benefits and services. These include:

1. The Martin Luther King Hospital
2. Wrigley Field Development
3. UJIMA Housing and Community Village at El Segundo and Avalon
4. A $40 million postal facility to be located in the UJIMA Complex
5. A new Postal Station "K" for Vernon and Central
6. The Comprehensive Community Health Center in Watts
7. Imperial Industrial Park near the Willowbrook-Enterprise-Compton Area.

Why, then, despite all this activity should high rates of unemployment and what appears to be deteriorating schools prevail? Did the benefits go to persons other than local residents? Do those who get the jobs move away? Is local administration faulty? Are community people adequately involved? Why do we have so many school dropouts, unem-

ployed adult males, and families headed by women?

No longer can we tolerate excuses and explanations, more studies, and promises that lack substance and implementation. We need now both factual answers and action programs.

This month I will be meeting with the various Federally-supported groups in Los Angeles to get definitive answers and to promote action programs—those that will actually employ and serve local residents—and which will train, educate, and meet the various needs of our people. I will report on this activity through the local press and broadcasting stations, and more fully in my next newsletter.

ADEQUATE COMPENSATION FOR DISPLACED HOMEOWNERS

While our many urban renewal, highway building, and other federally financed construction projects have been of great benefit to our nation, they have inadvertently created the American equivalent of the "displaced person." These citizens are homeowners and small businessmen who are displaced to prepare for a project that promises to bring the "good life" a little closer to reality. But for those citizens who are forced to move—usually the elderly or the poor—the good life seem ever so remote.

The trauma of the relocation is sometimes personal but in many instances it is compounded or even caused by inadequate relocation payments that are far below what is necessary to purchase a comparable home or business.

A number of proposals to provide relocation assistance to displaced persons have been introduced, but they have not been accurately focused on the central problem of relocation—the inadequacy of the relocation payment. These existing relocation payments do not allow the uprooted citizens to finance a comparable home or business.

We are proposing a measure entitled the Comprehensive Relocation Assistance Act, that will attempt to solve this problem. This measure will base the relocation allowance on a formula which is the difference between the acquisition payment for federally acquired property and the cost of acquiring a house comparable in size and convenience to the one taken. We feel that this is the only equitable method of computing the true cost to a person whose home is taken.

BLACK EDUCATION COMMISSION

At the request of my office a varied group of citizens concerned about the educational outcome of black youth by the Los Angeles City School System commenced on October 18, 1969, exploration of ideas for improving school services in their schools.

After several grueling weekly meetings a proposal for a Black Education Commission was organized. Its purpose is to focus on school problems e.g. attribution rate, low-motivation, student disenchantment, school drop-out, suspensions, under-achieving, etc.

It is proposed that the Commission will be comprised of twenty-four representatives of the Black community with the following distribution:

Three educators.
Three businessmen.
Two clergymen.
Five parents.
Five students.
Three professionals.
Three from the community at large.

The Commission proposes to assist the Los Angeles School System in various ways as follows:

1. Assume responsibility for the implementation and success of programs which it recommends to the Board.

2. Define the scope of its work and utilize whatever resources necessary to successfully facilitate the services of the Los Angeles School System.

3. Monitor the performance of the programs in the target schools.

4. Develop progress reports for submission to the Board of Education and the Black community at large.

WHO SPEAKS FOR THE SILENT MINORITY IN VIETNAM?

Many speak for what they want to believe is the Silent Majority but few speak for the very real Silent Minority, our Black fighting men in Vietnam.

They bleed, they die, and hunger for home but their voices are not really heard. They ask such questions as these: How fair was the draft board that tapped me on the shoulder and sent me away?

Am I in Vietnam only because I am Black and poor?

Is there no sound of my voice in high places where policy is made and destiny determined, in the President's Cabinet or at the Pentagon?

He hardly had an opportunity to raise such questions in unfamiliar and often unfriendly induction centers nor would the answers have satisfied him.

The statistics, had he known them, would have revealed: Had he come from Mississippi, the odds he would face a Negro member on his draft board was one in three hundred. In any one of three other states (Alabama, Arkansas, and Louisiana) not a single black face would have participated in the judgment to draft him . . . although in these states, Negroes constitute almost a third of the total population.

And the same 100 percent exclusion of blacks from draft boards would have been true in twenty other states. As a matter of fact, in only three states would the percentage of Negroes on draft boards have been higher than 3 percent. Even in California it adds up to a mere 1.6 percent.

What of the Pentagon where policy is made and the military conducts the war?

Only three Negroes are included in the 523 supergrade positions and this silent black trio is like prisoners "inside the walls" but not a part of "the establishment."

So the black fighting silent minority serviceman in Vietnam fights on . . . a little weary perhaps but with still other unanswered questions on his mind.

Why doesn't the President speak out against the injustice against him?

When will the Congress get around to real draft reform and making things better back home? And if he is really fighting for self-determination for others in far away places, why not for himself?

And so our brave fighting man goes on without the answers, in jungles whose names he never heard in the all-black schools he attended . . . silently fighting for a freedom he himself never enjoyed.

IMPAC

The South Central Improvement Council, Inc., is a nonprofit organization founded for the specific purpose of engaging in activities designed to strengthen the social, physical, and economic fabric of South Central Los Angeles. IMPAC convened this meeting of the Banking Committee, Board of Education, officials from various schools, and the Economic Development Administration. The purpose of the meeting was to initiate a training program for the Small Business Administration.

CONCENTRATION CAMPS FOR BLACK AMERICANS?

Concentration camps for Black Americans who fight for their constitutional rights may seem unbelievable . . . as far away as Hitler's Germany or America during World War II when Japanese-Americans from our neighborhoods were swiftly trucked away "for their safety."

The bitter cold fact is there is a Federal law, the Internal Security Act of 1950, which says (under Title II) the Attorney General (in times of emergency declared by the President) may hold in "detention centers" persons whom he believes "probably will engage in . . . acts of espionage or sabotage."

But just what is sabotage, for example? And what set of circumstances suggests the "probability" one will engage in it?

Some Federal officials believe any who fight militantly for civil rights, or who engage in open dissent and protest, are not only "dangerous agitators" but "probably" will engage in acts they define as against the government, meaning of course anti-law and order as enforced by racists.

Our fate conceivably could rest in the hands of two unfriendly persons who happen to be in office at a certain time—a President and his Attorney General.

It is highly possible, for example, these could be a Spiro Agnew and a Strom Thurmond whose lack of compassion for and understanding of race relations and the civil rights movement are generally recognized.

This law, the Internal Security Act, is a vicious law because it vests in certain persons the supreme authority to round up people and jail them without a trial. I have pending in the Congress a bill to repeal it. (H.R. 13452).

Ramsey Clark, former Attorney General under President Johnson, assailed preventive detention in a recent speech before members of the Southwest chapter of the American Civil Liberties Union.

To thousands of young blacks and still more thousands of the nation's poor, preventive detention is a promise of concentration camps, he said.

To endorse preventive detention is to own up to the fact that our present system of justice has failed.

The whole question of preventive detention, he noted, brings to light the essential need for judicial reform in this country.

The country should address itself to move toward rehabilitation if "we are serious about (ending) crimes," he said.

The present system of making subjective judgments about an individual's future, he noted, could be alleviated by scientific supervision of the individual until he can live in the community.

Preventive detention, Clark said, diverts from the need for speedy trials and jail reform.

To the poor, bail has always been "a tax on freedom" to which only those with money were entitled, he said.

Through effective jail and judicial reform, he said, the problem of the repeating offender would be alleviated.

Certain ironies exist in the move toward preventive detention. For instance, he said, the bill does not apply to juveniles who commit proportionately more crimes than any other age group.

There are 26 capital crimes for which bail cannot be set—so there is no need for pretrial detention, Clark noted.

In the meantime, it is well that we begin to oppose what is already happening in this administration, especially in the Justice Department. The Attorney General is on record as opposing effective enforcement of court orders pertaining to civil rights in education, and recently his Deputy (Richard Kliendienst) was charged with saying: "If people demonstrate in a manner to interfere with others, they should be rounded up and put in a detention group."

It seems the so-called "law and order" boys are not opposed to violating the constitutional rights of minorities when it helps to pay their political debts to southern politicians.

It all adds up to this: They are opposed to dissent, protest, and civil rights demonstrations; meaningful action and self-determination; citizen involvement in community affairs; and legal services for the poor.

NEEDED: BETTER RURAL AIRLINE SERVICE

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. NELSEN. Mr. Speaker, the problems that progressive rural cities are having in obtaining adequate airline service are clearly revealed in an editorial by Ray Stougaard, which appeared in the December 2 issue of the Fairmont Sentinel, Fairmont, Minn.

Mr. Stougaard describes the great difficulties that have been encountered by three of the major cities in my congressional district: Fairmont, Worthington, and Mankato. He suggests:

The CAB, through encouragement of Congress if necessary, needs to re-examine its policy towards communities our size and come up with a program that both the airlines and our communities can live with.

I agree thoroughly with this assessment. The Congress has authorized the expenditure of millions of dollars to build up airport facilities in the countryside to meet existing needs and to encourage industrial growth. This effort is a key to relieving urban congestion. But new jet plane designs have contributed to making our existing rural airfields increasingly obsolete. So there is a great need to reexamine our policies and programs to assure that adequate airline service can be provided to the rural sections of our country.

I include Mr. Stougaard's thoughtful commentary at this point in the CONGRESSIONAL RECORD:

OUR FEARS COME TRUE

(By Ray Stougaard)

One year and 19 days after Fairmont and Worthington were told that Fleet Airlines would be good for our communities, Fleet Airlines folded.

The air taxi company announced last Wednesday it was "terminating its operations immediately." No explanation was offered. But really none is needed.

What happened is what our communities were concerned about. Fleet couldn't make it financially.

It was Nov. 7, 1968 that Central Airlines and Fleet officials came here with the proposition that Fleet take over North Central's two daily round trip flights to the Twin Cities. North Central said it was losing money but that Fleet, a third level airline, with its lower operating costs could give us better service and make money.

Alarmed Fairmont and Worthington people said no, and North Central gave up its plans, temporarily at least.

Meanwhile, Mankato whose airport wasn't big enough to accept the North Central Convair, agreed to the Fleet substitution at least while its new airport was being completed.

That new airport will be in service probably in January and it will now be interesting to see how North Central follows through in resuming service to that community.

North Central in its pitch to Fairmont and Worthington said it would immediately come in and resume service if Fleet was inadequate or pulled out.

Fleet has pulled out and when Mankato's new airport opens, North Central will have no reason for not resuming service. However, the comments of a North Central airlines official sound less than encouraging.

Saying his airline has offered its help, the spokesman went on to say it is "possible" but not definite that it will resume service to Mankato. That sounds quite a bit different from the positive "we'll resume service" statements made to the Fairmont and Worthington groups.

However, the long range solution of the problem facing North Central and communities of our size lies with the Civil Aeronautics Board.

The CAB in past years decided that communities our size deserved good commercial air service just as much as the large cities. And it encouraged local airline carriers such as North Central to seek such routes. Part of the encouragement was subsidy money. However, in recent years, the CAB has decided it wants airlines to be self-supporting and has been cutting down the subsidy. This plus the ambitions of North Central to become a trunk carrier has prompted its attempt to abandon such routes as ours.

The CAB, through encouragement of Congress if necessary, needs to re-examine its policy towards communities our size and come up with a program that both the airlines and our communities can live with.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the Yakima, Wash., Herald Republic; the Seattle, Post-Intelligencer; and the Seattle Daily Times, in the State of Washington. The editorials follow:

[From the Yakima (Wash.) Herald Republic, Aug. 6, 1969]

ONE HUNDRED-FOOT TRUCKS?

We suspect the Washington State Highway Commission has not yet heard the full voice of opposition to a plan to allow 100-foot-long truck rigs on the state's highways.

In a 90-day test begun on June 30, the commission is allowing the big rigs—30 feet longer than the previous 70-foot-maximum—on Interstate 5, the north-south highway through the Puget Sound metropolitan area.

The 120,000-member Automobile Club of Washington, an AAA member group, has launched organized opposition to permanent approval of the longer rigs. Nine of the rigs are in operation, some of them triple-trailer outfits and others with two elongated trailers.

Last year, when the AAA and the Scripps-Howard newspaper chain launched a publicity campaign against federal legislation allowing the larger trucks, an American Trucking Associations spokesman scoffed at the charges of "triple-trailer trucks." Jack N. Neal, the spokesman, said the newspaper chain distorted the states' part of the picture, and that there was no "guarantee" that such multiple-unit rigs would be given permission to operate.

After the measure—S. 2658—passed easily through the Senate, the opposition campaign brought quick stoppage in the House.

Truckers, through the ATA, and bus operators argued vehemently for the larger size units, especially for a width of 102 inches compared to present width limits of 96 inches. Their argument about greater economy, greater safety and better distribution of weight may be based on hard facts. But in our view, greater length is an entirely different set of hazards, even on the multiple-lane interstate highways.

It seems to us it is frightening enough, under present limits, to meet or pass one of those overpowering, roaring, highway freight trains. Even 70 feet is a forbidding challenge for a motorist either to pass or to speed along in front of, when a trucker is pouring on the fuel. But 100 feet—and a triple-trailer?

Supposedly the federal law would restrict the big rigs' operation to interstate highways. Yet it seems to us Sen. John Sherman Cooper of Kentucky put it wisely when he said it "is impractical to think that these heavier trucks will just travel on the Interstate System."

It is no secret that the trucking lobby is a powerful organization. Its weight in Olympia during a legislative session is obvious. Opposition to allowing any federally-approved truck rigs on secondary state highways would be hard to generate in the State Legislature. That is not supposition; it is a political fact of life.

Even so, it seems to us the common ordinary motorist has a lobby of his own, and may turn its full power on the Highway Commission when those ordinary drivers find themselves confronted by a 100-foot, triple trailer outfit. Time will tell.

[From the Seattle (Wash.) Post-Intelligencer, Aug. 5, 1969]

AUTO CLUBS PUSH BATTLE AGAINST 100-FOOT TRUCKS

Organized automobile clubs yesterday shifted into high gear in their battle against having longer trucks on the state's highways.

The Post-Intelligencer last Friday revealed that the State Highway Commission has approved a 90-day test period in which 100-foot-long truck rigs are traveling on Interstate 5.

Some of the rigs are triple-trailer outfits; others have two elongated trailers. Present length limit for trucks in the state is 70 feet.

Russell W. Van Roohy, executive vice president of the 120,000 member AAA Automobile Club of Washington, said his group will oppose permanent approval of the longer rigs.

The 30,000 member AAA Inland Auto Association of Spokane will join in the fight against the longer trucks, William Merry, director of public affairs for the ACW, told The P-I.

Merry declared:

"These tests make guinea pigs of motorists. If the Highways Commission wants to test public opinion, they ought to ask for it. They didn't in this case.

"The problem of trucks in traffic is the second most common complaint we get from motorists. We're watching the 90-day test (which began June 30) and will vigorously oppose permanent approval of the longer rigs on the highways."

Merry said the AAA here already has received a number of complaints against the test vehicles and has relayed its concern about the situation to the Highways Commission. Some of the complaints are from truck drivers, who, he said, consider the longer rigs unsafe on the highways.

The group's board of trustees will map an opposition campaign at a meeting here Thursday noon, Merry added. AAA officials here met for two hours on Sunday to formulate opposition strategy.

Nine of the rigs, operated by eight truck companies, now are using Interstate 5 during the test. Merry contended this highway doesn't provide a true test—that the longer rigs should be tested on mountain roads, where they would be more likely to affect traffic.

[From the Seattle (Wash.) Daily Times, July 25, 1969]

THE TRUCKERS TRY AGAIN

(Issue: Larger trucks could transport more goods at lower cost, but are the economic factors cited in favor of proposed trucking legislation worth the safety risks involved?)

Trucking interests are trying to find a detour around a roadblock of public opinion that was erected last year against federal legislation to allow bigger and heavier trucks on the nation's highways.

Provisions of two measures now before Congress are nearly identical to a bill that nearly slipped through in 1968 before it fell under attack by highway-safety groups and the general public.

The truckers seek increases in the allowable width and weight of their highway behemoths—six inches wider and 35 per cent heavier—to make their motor-freight operations more profitable. They are supported by the passenger-transport industry, which wants to put wider busses on the road.

As in last year's bill, the effect would not be an automatic increase in truck size on interstate routes, but individual states could raise their limits to new federal maximums.

Once the federal measure were approved, however, the influential trucking lobby soon would be applying its pressures upon the various state legislatures.

Fortunately, the motoring public is gradually becoming aware of the fresh campaign in Congress. Spokesmen for the American Automobile Association have reminded a House public-roads subcommittee that while super-sized trucks might be accommodated on the modern interstate system, it is obvious that truck trips do not begin or end on interstate highways.

The giant rigs share the whole network of highways, roads and bridges with the millions of motorists who have paid the bulk of the system's cost. Along with greater safety hazards, the average motorist knows that increased axle loadings would reduce the life of pavements now in use and require huge new expenditures to repair old road surfaces and construct new ones.

Trucking-industry spokesmen say the new bill is more palatable than last year's proposal because it contains a "limit" on truck length. But the suggested 70-foot limit is beyond what now is allowed in most states. To pass a truck-trailer combination of that length would be equivalent to getting around two passenger cars and a compact traveling bumper-to-bumper.

In essence, the 1969 bill is just as objectionable as its unsuccessful predecessor and the roadblock established last year must be kept intact.

RABBI PHILIP SIGAL'S HANUKAH MESSAGE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. RODINO. Mr. Speaker, last Sunday I was privileged to join with the congregation in services commemorating the 50th anniversary of Temple B'nai Zion in Bloomfield, N.J. The temple's rabbi, Philip Sigal, has long been a progressive and dedicated leader in our civil as well as religious community, and I would like to call to the attention of my colleagues the following article on "The Relevance of Hanukah in our Troubled Times," which appeared in the Bloomfield Independent Press. We would do well to take the rabbi's message to heart. It follows:

THE RELEVANCE OF HANUKAH IN OUR TROUBLED TIMES

(By Rabbi Philip Sigal)

Matthew Arnold, the great English essayist once wrote, that western civilization is basically composed of two systems of thought and society, Hellenism and Hebraism, the products of ancient Greece and Judea. Were it not for Hanukah, however, Hellenism, as the culture of the majority, protected by power and wealth, would have submerged Judaism.

Antiochus Epiphanes, the Seleucid Emperor of Syria and the East attempted to bring homogeneity to his Empire by establishing uniform cultural and religious forms through his Empire. When Antiochus sought to establish his paganism over Jerusalem by edict and physical force, the Jews were confronted with no choice but to resist. It was then that the famous Maccabees arose and conducted what was without doubt the first struggle for the freedom of religion in human history.

The victory of the Maccabees saved Judaism and out of this preserved faith arose Christianity and the Western democratic tradition which we hold so dear. Hanukah therefore, has valid universal significance. It can be commemorated by anyone, anywhere, who believes in the freedom of religion and in the consequences of that struggle—the preservation of the values we hold sacred in our Bill of Rights, all of which may be traced to the Bible.

In our days, however, there are many who question our traditional Biblical-Democratic traditions. Our society is often accused by the young of being hypocritical. There can be no question that we are often guilty of sham and of pretense. Confession would be good for our souls. Penitence could take the form of greater social concern. Synagogues and Churches ought to declare a moratorium on luxury-spending with the vast millions thereby saved being applied to significant projects among the poor and the elderly. The deepest relevance that Hanukah—or Christmas—can have in the 1970's can come from applying the traditions of the faith of the needs of the hour, by utilizing the spirit that undergird the occasions for the expansion of freedom, the deepening of peace and goodwill.

Hanukah was won by a determined group of people who believed the future of civilization depends upon the preservation of Judaism. We must be as determined to save our western democratic values today, which are rooted in that same tradition. America in the 1960's has been caught in a quagmire of racial conflict and the ugliness engendered by our activity in Vietnam. It is past the time for recriminations. It is past the time for pinpointing blame. The time has come for a comprehensive effort at surmounting our serious problems, for confronting our future with seriousness and for dedicating ourselves to the salvation of our society.

For when all is said and done there is another side to the American coin. We are a free people who can protest our government's policy, a land where even the president cannot impose a Supreme Court Justice. We are a compassionate people who distribute billions of dollars throughout the world for nonmilitary purposes. We are a humane nation concerned for the well-being of the world community. We are a moral people shocked and abhorred by the possibility of immorality perpetrated under our flag. There is much good to preserve.

The agony and the nightmare of the 1960's will depart. We need the statesmanship displayed by Thomas Jefferson when he was inaugurated on March 4, 1801. The country was so filled with animosity and militancy between 1797 and 1800 that the people could not even elect a President. The election was thrown into the House of Representatives. It took thirty-six attempts before Thomas Jefferson was elected. Animosity, despair and turmoil was the mood of Inauguration Day. But Thomas Jefferson rose to noble heights and he pleaded for confidence in American principles. "Let us, then, fellow-citizens unite with one heart and one mind . . . and should we wander from them (American principles) in moments of error or of alarm, let us hasten to retrace our steps and regain the road which alone leads to peace, liberty and safety".

As we gaze at the lights of Hanukah we ought to see reflected therein the radiant message of the worthwhileness of our western democratic values rooted in the Judeo-Christian religious tradition. These Hanukah candles symobilze what the late President Eisenhower meant when, in his famous "Atoms For Peace" speech before the United Nations in 1953, he said, ". . . my country's purpose is to help us move out of the dark chamber of horrors into the light, to find a way by which the minds of men, the hopes of men, the souls of men everywhere, can move forward toward peace and happiness and well-being".

AND ROME FELL

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PUCINSKI. Mr. Speaker, the following words were spoken by Captain Diodorus in a speech to the Roman Senate during the fall of the Roman Empire:

AND ROME FELL

He rested his hands on the lecturn and looked at the Senators. He smiled, not pleasantly but with rage. "You, Romans, friends, countrymen, have heard me before. I shall speak today in the name of Rome for the last time. Then I shall be silent." He drew a deep breath and his breast filled with passion and strength. "I come not to honor Rome but to bury her."

A voice shouted, "Treason!"

Diodorus smiled again and bent his head. "It is always treason to speak the truth."

"In this very senate, not many years ago, a Senator was done to death because he spoke the truth. Not by knife or sword or spear was he murdered, and not by honest stones. No honorable hand struck him down, for there was no honest hand here. He spoke of Rome. He cried out that Rome was no longer a Republic, and that she had become a bloodthirsty empire, ruled not by men of wisdom and not by law, but by Caesar and his legions, and his generals and his rapacious freedmen and his palace politicians. The Senator stood on this very podium and he wept for the Republic. He wept that emperors were not elected by the people, but by infamous legions and the idle and the ravenous mobs who wished only to devour the fruits of the granaries and the treasuries and be amused by charlatans and mountebanks, and singers and gladiators and pugilists . . . at public expense."

The Senators fell into a hard but intent silence, but some of the older men bent their heads, remembering their shame, and were enraged against the tribune that recalled their shame to them. The soldiers paced slowly at the doorway and listened, and turned their faces toward Diodorus, and some were young and patriotic and their hearts beat faster.

"For greed, that young Senator cried to you, the mobs in this city supported evil Caesars, who lusted only for power, because those Caesars promised them loot from the public treasuries. Venal Senators supported those Caesars, for profit and power. The lying Caesars spoke to the mobs and told them that our country could not defend itself against the barbarians without allies, who must endlessly be bought, cajoled, and flattered. And traitorous Caesars plotted against their nation, mad with the lust to be gilded like gods by the whole world, and to be acclaimed by millions of thieves and beggars and wrestlers and freedmen and the pusillanimous who never felt a pulse of patriotism in their vultures' hearts."

"Those are not my words, though I have said them before to you. They are the words of the Senator you did to death in this very chamber."

"Rome was conceived in faith and justice, and in the worship of God, and in the name of the manhood of man. Return our country to the rule of law and strike down the rule by men. Restore the treasuries. Withdraw our legions from foreign lands which hate us, and will destroy us at a moment's notice when it serves their purpose. Repeal the taxes which crush those who work hard and industriously. Tell your multitudes that they must work or they shall starve. Drive from the Palatine the puny freedmen who say 'yes, yes' to Caesar, and bow before him as though he were a god and not human flesh! Cleanse this chamber of rascals and mountebanks and demagogues who declaim in rounded phrases that the welfare of the people is close to their hearts, but who really mean that they will do the will of the mob in exchange for vile plaudits and power and bribery!"

Diodorus lifted his hands in an attitude of importunity, and his fierce eyes filled with tears as he surveyed the motionless Senators.

"Romans! In the name of God, in the name of Cincinnatus, the father of his country, in the name of heroism and peace, of manliness and freedom and justice, I beg of you to restore yourselves as the guardians of Rome, to cast out the usurper of the powers which rightfully belong to you, to impeach and punish those who seized those powers in order to pervert the laws of our fathers! Let your Roman hearts speak and your Roman spirits cry out against the expedient and the corrupt, against the vainglorious and the traitors, against Caesars who anoint themselves as gods and hold court for the depraved and ambitious and those who would dissipate the strength of our people, our constitution, and our traditions! If you turn from your country, then she will die, and a thousand legions shall not save her, and a thousand bloody Caesars will vainly shout to the wind!"

NLRB NEEDS A TRANSFUSION

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. FISHER. Mr. Speaker, if there is any agency in the Government that is in need of new blood it is the National Labor Relations Board. It is believed that no openminded person can study the decisions that have been made by that Board without coming to that conclusion.

The present administration will soon fill a vacancy on the NLRB, a position now held by Sam Zagoria. The President will also determine the next Chairman of the Board. Let us hope that before making a decision in this instance the President will strive to pick an appointee who will give the NLRB a better balance. The President is pursuing that objective in filling vacancies on the Supreme Court. The power of the NLRB is awesome and many of its actions are in reality hardly subject to meaningful review.

Everyone knows that the present members of that agency are predominantly prounion. Indeed the present Board has been referred to as an adjunct to the AFL–CIO. And scores of decisions seem to warrant that criticism. If a balance with respect to ideology on that agency is desired, it would seem imperative that the President fill Mr. Zagoria's place with an objective-minded appointee.

NLRB AND J. P. STEVENS CO.

A glaring example of prolabor bias on the part of the NLRB is found in the repeated actions by that agency as applied to efforts to unionize the J. P. Stevens Co. As is well known, from the very beginning that company has insisted on fair, supervised elections by employees to decide whether they wanted to be represented by a union. The Textile Workers Union has left no stones unturned in its determination to organize Stevens' 50,000 workers. In pursuing this course the union has time and again been aided and abetted by the NLRB. It has been a sad, lopsided treatment of an issue.

Recently newspaper stories appeared which referred to a denunciation of J. P. Stevens Co. by Judge John R. Brown, chief judge of the Fifth Federal Circuit, in holding the firm guilty of an unfair labor practice. The case grew out of an attempt to unionize Stevens employees and involved the discharge of three or four employees, allegedly for union activities.

Judge Brown referred to the tenacity with which the employer—Stevens—persists in deep-seated antiunion activities. He referred to four other similar cases which Stevens had lost in the courts.

The judge's gratuitous remarks, however, did not affect the fact that the Stevens case glaringly illustrates the persistent and startling bias repeatedly shown by the NLRB in favor of attempts to unionize employees—with or without their approval.

The fact that Stevens lost seven cases before the NLRB and five in the Federal courts since 1963 as a result of the controversy has been widely reported. But other facts have not. The truth is that the Textile Workers Union has lost a whole series of elections where Stevens employees voted on whether to organize.

Moreover, the unions had all the advantages in these elections. They could, in effect, choose the time and place. The NLRB ruled—and was upheld by the courts—that Stevens had to furnish a list of workers, with addresses, who were eligible to vote. The union had tremendous resources at its command, including millions in the AFL–CIO treasury, in addition to its own resources. And it had professional organizers and skilled propagandists.

In addition, the NLRB at one time ordered Stevens officials to convene the workers and to read what amounted to a confession of guilt at one of its plants. To sum up, the NLRB used every weapon and resource at its command to force Stevens to surrender. It is a tribute to the courage of J. P. Stevens and other Stevens officials, that they stood their ground. It will be recalled that Mr. Stevens as a former Secretary of the Army made a distinguished record in that capacity.

STEVENS HAS FOUGHT FOR RIGHTS OF EMPLOYEES

The propaganda war unleashed against Stevens has been sustained and successful to an extent. It has probably led some to think of Stevens as defiantly antiunion when in fact the main thrust of his policy from the beginning has been to protect the employees in the exercise of freedom of choice. It is true the firm has on occasions informed its employees that the advantage of joining the union was questionable. It has the right to so state, although the NLRB takes a dim view of the rights of management to present its side of the case. Time and again those employees have voted against unionization.

It will be recalled that during the Johnson administration the AFL–CIO put tremendous pressure on the President to cancel defense contracts held by the Stevens Co. on unfounded grounds Stevens was in violation of the law. This effort failed.

The present administration surely owes no political debt to the extremists in the labor movement. It must be assumed, therefore, that President Nixon being committed to a concept of "balance" in the composition of such tribunals will act accordingly in filling the vacancies which arise on the NLRB. The terms of four of the five NLRB members expire prior to 1972. This presents a great opportunity for President Nixon to select replacements who can be counted on to exercise impartiality in dealing with the important issues that arise in labor-management relations.

I repeat, Mr. Speaker, that the record is replete with instances where the NLRB has gone to extreme lengths in pursuing the vendetta against Stevens. In case after case that board has accepted the flimsiest evidence to sustain the union and has rejected the most convincing evidence in favor of the company. The Board, and its trial examiners, have indulged in the most fantastic reasoning to justify this practice.

In one instance a trial examiner, Boyd Leedom, when confronted with testimony of several hundred reputable citizens whose reputation for veracity was unassailable, used this strange doctrine to justify his decision to discount and ignore such testimony:

> And so either believing or rationalizing that their position is just, they (the witnesses) engage in the common error of fighting real or pretended "evil" with evil. A dual standard of conduct—that is, one standard for the individual and another for an organized effort—has been recognized and applied throughout the history of mankind. War, out of which national heroes are born and are greatly honored by us all, is the prize example.

This explanation is simply weird. Here Mr. Leedom portrays the witnesses for J. P. Stevens as a fanatical group of people who are so convinced that their cause is just—whatever that means—that they, apparently, were impelled by group hypnosis to lie in unison. This is, of course, preposterous. One could just as easily conclude that the witnesses for the union, convinced that their cause was just also lied in concert. That is, if the same reasoning is applied.

Yet, it is on the basis of just such findings that Stevens has been ruled guilty in five court cases growing out of the alleged unfair labor practices, one of the cases leading to the castigation by Judge Brown.

Unfortunately, the courts seem to defer to the so-called expertise of the NLRB and its staff in so many of their decisions. They are not disposed to go behind NLRB actions to find out what the real facts are. Bearing on that point, let me quote from a recent exchange between Senator ERVIN and Judge Haynsworth:

Senator ERVIN. I would like to make one thing plain. That is, the way in which factual decisions are made in the courts and the way in which factual decisions are made by the National Labor Relations Board are based upon different legal principles; are they not?

Judge HAYNSWORTH. Yes. The fact as found by the Board the court must accept if there is support in the record for them.

Senator ERVIN. In other words, courts in making factual decisions are required by law to base those decisions on what we lawyers ordinarily call the greater weight of the evidence?

Judge HAYNSWORTH. Yes, sir.

Senator ERVIN. However, the National Labor Relations Board is the sole judge of the evidence and any decision which it makes on a question of fact cannot be reviewed by the courts except upon the allegation that it is not supported by substantial evidence?

Judge HAYNSWORTH. That is correct, sir.

Senator ERVIN. *Often I, as a lawyer, have wondered what is substantial evidence—whether it is 5 or 10 percent or what of the evidence. But whatever it may be, if it be, say, 5 percent and the National Labor Relations Board bases a finding of fact on that 5 percent of the evidence and the finding of fact is inconsistent with 95 percent of the evidence, the courts are bound by it; are they not?*

Judge HAYNSWORTH. *They are.* (Italic supplied.)

Senator ERVIN. So when the court approves the finding of the NLRB, it doesn't necessarily do so on the basis that it is the proper finding on the evidence but because the court is bound by the statute giving the National Labor Relations Board the power to find the facts?

Judge HAYNSWORTH. Well, we would accept the findings of the Board whether we think we would have found the facts the same way or not.

Senator ERVIN. Yes. In other words, courts in many cases do actually support and uphold and implement the findings of the National Labor Relations Board notwithstanding the fact that the court itself believes those facts as found by the National Labor Relations Board were erroneously found?

Judge HAYNSWORTH. Oh, yes.

With all due regard to Judge Haynsworth, I am of the opinion that the NLRB and the courts also have emasculated all attempts by Congress to restore and maintain balance in labor legislation. In 1947, with the passage of the Taft-Hartley Act, Congress tried to take away some of the awesome power given the unions by the Wagner Act. Again, in 1959, with the passage of the Landrum-Griffith Act, Congress tried to do the same thing. The NLRB is contemptuous of the law and Congress, in my judgment. Deliberately and cynically, the agency ignored the statutes in order to side with the union officials, for oftentimes union officials give the workers very poor representation indeed.

The NLRB and the courts have muzzled employers, while giving union spokesmen the right to speak as they please. The secret ballot to decide union representations has been altered until the card system, in which workers generally sign cards given them by union organizers, has been substituted in many instances. How a card system can be substituted for the secret ballot provided by law is beyond me. Many of the rulings by the NLRB in favor of unionization are so one sided that they are incredible, and, if language means anything, contemptuous of the provisions in the law. Some of the rulings by the Supreme Court itself genuflect before union officials and seem to regard the workers as subject completely to the orders of the labor bosses. Some decisions have been widely criticized, even by the liberal press and liberal judges.

One notable instance was the NLRB against Allis-Chalmers Manufacturing Co. a couple of years back. In a 5-to-4 opinion, delivered by Justice Brennan, the Supreme Court held that a union could fine a member who continued to work during a strike called by the union. This was too much for Justice Black, who indignantly said that the effect of the decision was to put the rights of the union to control its members ahead of the rights of the individual worker. The Washington Post denounced the decision and, in effect, called for remedial legislation.

Later, the Supreme Court went even further and decided that a union had the right to fine a member who exceeded the productivity quota set by the union. It is strange that a court which has had so much regard for the individual rights of criminals and Communists over the years has had so little regard for the rights of workers.

Now, another reference to the Stevens case. The NLRB decided recently that the Textile Workers Union of America, AFL–CIO, had been elected bargaining agent for workers at the Black Hawk Warehouse unit of J. P. Stevens at Greenville, S.C.

This is a smelly ruling and followed 2 years of litigation. To reach the desired result, the NLRB counted 17 challenged ballots. The agency decided that 14 of those ballots were for the union and three were against, bringing the total vote to 36 for the union and 27 against. But listen to what a Stevens spokesman had to say about the NLRB action:

The Board concedes that a majority of employees working in the warehouse voted against the union. Now it has counted ballots of persons not working at the warehouse when the election was held. And upon such additional ballots the Board declares that a majority has voted for the union.

The Board has done this while the very question of the voting eligibility of these additional individuals is still pending before the U.S. Fourth Circuit Court of Appeals. While the court still has before it the question of whether these votes are valid, the Board goes ahead and counts them and declares that the union represents all the warehouse.

The Board's approach is to take action while it is still arguing before the court as to the validity of such action. The fact is that the labor board has little regard for anything except to put the union in.

Let me give you another example of the ruthlessness and high-handedness of the NLRB in its dealing with Stevens. At the company's Statesboro, Ga., plant, the agency this year ordered Stevens to bargain with the union on the basis of authorization cards signed by the workers and presented by the union in early 1968. Yet, afterwards, the Board conducted an election which the union lost by a sizable majority. Despite this result, the NLRB fell back on the cards previously presented. This is what a Stevens spokesman said of this action, and let me say I heartily concur in his sentiments:

The Labor Board was set up for the purpose of protecting the rights of employees. At the request of the union, the Board conducted an election to determine whether the employees of the Statesboro plant wanted a union or not. The employees voted decisively against the union. Now the Board reverses its own election and rules that the union shall come in, regardless of how the employees voted.

It seems to us that the Labor Board has completely lost sight of its duty and is violating the very law which it is supposed to be carrying out.

IT IS TIME FOR A CHANGE

Mr. Speaker, the President has an opportunity to make court appointments and other appointments which will affect our entire system for years to come. The American people undoubtedly want these changes made, the courts and the agencies put in proper balance, and a return to sanity in the administration and interpretation of our laws. Already we know, from the encounter in the Haynsworth nomination, that attempts to change the pattern is not an easy course to follow. But let us hope that the President will persevere, because democracy cannot endure if power resides largely in the hands of a few powerful groups. We can be assured of one thing: the American people want a change.

And as I have said, no agency of the Government is in more urgent need of a change than is true of the NLRB. As one man put it: Any employer today who is charged with an unfair labor practice by a union goes before the NLRB in the unenviable position of a man charged with horse theft before a vigilante committee in the Old West.

I repeat that we must assume that in pursuance of the President's policy of achieving balance in decisionmaking tribunals, he will fill Mr. Zagoria's vacancy with a man the American people can trust to be impartial—neither prounion nor promanagement—in the discharge of his duties. That will be a significant step the effect of which will be strengthened by replacing other members of the NLRB as their terms expire. A transfusion in that agency is imperative.

NEW CAREERS, 1968–69

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. SCHEUER. Mr. Speaker, there are numerous ways in which we can fill the unmet needs of our community for education, health, welfare, and law enforcement and at the same time find job opportunities for the underemployed and unemployed.

One of the most imaginative and successful job-training programs has been the New Careers programs. Since its inception in 1966 as an amendment I sponsored to the Economic Opportunity Act, it has provided thousands of citizens with an excellent chance to gain both economic security and job satisfaction.

For the benefit of my colleagues, I would like to insert a recently published report on the purposes and progress of the new careers programs written for the Ford Foundation by Mr. Alan Gartner. I wish also to place in the RECORD a more specific report by Mr. Sumner Rosen, a study of a Labor Department-funded program for establishing an upgrading program for nurses aides in New York City. This training program has achieved a noteworthy success in little more than a year.

The reports follow:

NEW CAREERS, 1968–1969—A REPORT TO THE FORD FOUNDATION

(From New Careers Development Center, New York University; Frank Riessman, director; Alan Gartner, associate director)

WHAT IS THE STATE OF NEW CAREERS

Are there jobs for new people?

Large numbers of community people have been hired by schools, anti-poverty agencies, and increasingly health and welfare programs.

Are jobs restructured, careers available?

The "Scheuer" program has moved several thousand people ahead, and the new Office of Education Career Opportunities Program promises to do the same. But most paraprofessionals are still in dead-end jobs.

Are new careerists organizing?

A National Association has been established, and local groups are developing, but a clear national movement has yet to evolve.

Is there acceptance within the Government?

An Office of New Careers has been established in HEW; upgrading expanded into the entire Public Service Careers Program of the Labor Department; Headstart now requires career development in all programs.

Is there acceptance by agencies?

The use of paraprofessionals has quite clearly been established; their upgrading is less firmly so, and the development of new work even less. Agencies have not been reorganized, and professional work remains largely unchanged.

Is there acceptance by employee associations?

Some unions—AFSCME District Council 37, Local 1199 of the Hospital Workers, AFT—and some professional groups—NEA, NASW, APHA—have begun to give significant attention to paraprofessionals.

What about credentials, licensure, and civil service?

These all continue to be impediments. Some states—Massachusetts, California, New York, New Jersey, Minnesota—have made changes in each of these areas but no sharp changes anywhere.

What has been the legislative impact?

Most proposed manpower programs contain significant new careers language and components, *viz.* the O'Hara Manpower Act, Carl Perkins' new education bill. Presently, some 100 grant-in-aid programs require or allow the implementation of some or all of the new careers system components.

What are colleges and universities doing?

Many of them are admitting people whom they had not previously, some are giving credit for new activities such as work experience, a few are restructuring entire courses of study, a handful are engaging community and agency people as faculty.

What are new directions for New Careers?

Increasingly programs are addressing themselves to the relationship between new careers and such efforts as community control and new systems of accountability.

Where is it at?

There is, as yet, no fully developed new careers system. Components are being implemented, new concepts developed, new constituencies enlisted. Perhaps, one can say that new careers is at the "take-off" stage.

This has been a decisive year for new careers—a year of new actions, new programs, new institutions, and, indeed, of new definitions.

It is, perhaps, these new definitions which are of the most fundamental and far-reaching consequence. The change—or more exactly shift—in the definition of new careers has come to add two dimensions, implicit in earlier conceptualizations but not fundamental. *The two new foci are concerned with service delivery and relationship with community control issues.*

NEW DEFINITIONS

The original new careers design of meeting the human service agency manpower shortages by looking to the large numbers of people in poverty had an underlying concern with the quality and character of the agency's service—health, education, community development, etc. But it is in the past year that these issues have come to the fore. Increasingly not only is it asked whether an agency's personnel vacancy is filled or a career made available to a poor person, but *what does the hiring of a person as a paraprofessional contribute to the work of the agency, and to the services received by its consumers.*

Questions of accountability have been joined with issues of community control where new careers programs are seen as part of a community participation process. Not simply that community people are hired as paraprofessionals, but they come increasingly to play community leadership roles and the movement of community people up a career ladder may become one of the ways to bring the human service agency into closer harmony and rapport with the community it is to serve.

Illustrative of these two developments are the draft guidelines of the new Career Opportunities Program of the Office of Education. Essentially a new careers in education program, and although authorized under a training act (the Education Professions Development Act), it nonetheless lists as its first objective the improvement of the learning of low-income children, and prescribes as its primary evaluation issue the effect of the program upon the children's learning.

New careers is construed within the context of community control with the incorporation of the demand for such programs in Harlem's I.S. 201, Brooklyn's Ocean Hill-Brownsville district, Boston's Roxbury, Detroit's Miller District, and East Palo Alto's Community School.

OFFICE OF NEW CAREERS

Major new developments have taken place at the federal level. On July 10, 1969, the establishment of the Office of New Careers, within the Department of Health, Education and Welfare, was announced by the White House. The establishment of such an office within the federal department most concerned with the delivery of human services and within the office of Assistant Secretary James Farmer is illustrative of the two new definitional areas noted above—service system delivery and community control. Within the DHEW, three major program activities are also getting underway: the previously noted Career Opportunities Program; concentration by Assistant Secretary Egeberg upon returning servicemen, especially paramedics, to meet the health manpower shortage; and programs of new careers within HEW for that Department's more than 100,000 employees.

The Labor Department has expanded new careers concepts in the most recent cycle (MA5) of the JOBS private sector program, as well as in the new *Public Services Careers Program.* Both of these programs incorporate the concepts of job first, training built in; career advancement; use of indigenous persons as support personnel; and the packaging in a single comprehensive program the full array of services needed.

The Office of Economic Opportunity has played a leading role in the new careers programs through the employment, training and upgrading of paraprofessionals employed in community action programs.[1]

Among the activities undertaken by OEO have been:

Implementation of the Career Development Program in Headstart with special and additional funds set aside for upgrading.

CAP's attention to career advancement with two major national technical assistance contracts, and a pending revision of community action agency personnel requirements which will require career advancement programs in all CAP agencies.

The Comprehensive Health Services Program grants to develop new staffing models, along with Legal Services' funding a study of new uses for paraprofessionals.[2]

LEGISLATION

Pending legislation carries forth the thrust already underway. The current situation is highlighted by the examination of all existing federal legislation and the issuance of a compendium[3] of the more than 100 different grant-in-aid programs administered by eight departments and agencies which require or permit new careers activities.

The "Manpower Act" proposed by over 100 Congressmen explicitly incorporates new careers ideas in terms of upgrading the role of the government as an employer, and career opportunities.

The President's special manpower message states that jobs alone are not enough, and that careers are necessary.[4]

The "Nationwide Education Excellence Act," introduced by Congressman Perkins at the behest of the American Federation of Teachers and based upon a study by Leon Keyserling proposes one aide for every two teachers—a nearly ten-fold proposed leap from the present 188,000 aides in schools to some 1.5 million by 1973.

MOVEMENT

New Careerists and their supporters have come together in a variety of groups, to forward the program and counter efforts to dilute or subvert the program's designs.

The National Association of New Careerists was established, as was the National Council for New Careers; both organizations co-sponsored a Washington Action Conference in September to focus attention on new careers issues.

Groups of new careerists are coming together—on a statewide basis in California and North Carolina, in community chapters in New York City, across two counties on Long Island, as the Association of New Professionals in Pittsburgh, in some 30 cities.

Dramatic action was taken by new careerist groups in Topeka, Kansas, and at Lincoln

Footnotes at end of article.

Hospital in the South Bronx, to put forth their demands for real careers and meaningful services from the agencies where they work.

Unions are recognizing the opportunities and challenges presented by these new workers—District Council 37 (AFSCME) and UFT Local No. 1 have vied for the right to represent the aides in New York City's public schools; Chicago's Teachers Union demanded and won an additional 1,800 aides as part of its most recent contract; and Local 1199B brought national attention to Charleston with its organizing of nonprofessional hospital workers there.

Professional groups have undertaken a variety of supportive activities. These include the American Bar Association, the American Public Health Association, the National Education Association, the National Association of Social Workers, the American Medical Association, the Council on Social Work Education, the Joint Commission on Correctional Manpower, and the National Academy of Sciences.

RESEARCH

Research activities are beginning to look at new careers programs, their results, and consequences.

A national survey of the "Scheuer Amendment" new careers program gave evidence of the program's holding power, commitment of agencies to career ladders, and ability of the programs to recruit, hold and provide salary increases for disadvantaged people.[5] This finding of program holding power, increased income, useful work is corroborated by an in-depth follow-up study of over 100 persons trained by the National Committee on Employment of Youth. Similarly, this study affirms the absence of major breakthroughs in the credentials barrier.

The University of Minnesota has produced a series of reports on the new careers program in Minneapolis addressing such issues as recruitment, dropouts, the work done, the effect of professionals upon the paraprofessional, college admissions, curricula, and supportive services, etc. Particularly striking is the finding that the new careers participants, rather than losing their ties to the community as some feared, have in fact come to identify more closely with the community during the course of their participants in the program.[6]

The New Careers Training Laboratory has conducted a survey of OEO funded community action agencies throughout the country. The most significant findings include the report that over 90% of the CAA's have some professional positions occupied by persons who first came into the agency's employ as a non-professional; nearly one-fifth of the professional positions are occupied by persons who had been non-professionals; and some 66% of the CAP agency employees had been poor when hired.

The New Careers Development Center issued a broad ranging report, "Do Paraprofessionals Improve Human Services: A First Critical Appraisal of the Data," examining reports of paraprofessional workers in education, health, mental health, social services, research, legal services, and senior citizen programs.

CREDENTIALING

Changes have been made in credentialing and civil service programs. Civil service agencies at the federal, state and local levels have developed new classes, while state boards of education have established procedures for the use of paraprofessionals in instructional as well as supportive activities.

New York State and California have passed new laws authorizing the performance of classroom instructional activities by paraprofessionals.

In several states, including Colorado, Minnesota and New York, state departments of education have issued new regulations encouraging the employment and upgrading of paraprofessionals in a career ladder program.

In Massachusetts and Washington procedures are underway to establish new systems of teacher certification of all levels. In both states primary emphasis is to be placed upon performance in the classroom as opposed to sole reliance on courses taken.

In California, Massachusetts, Minnesota and New York civil service system changes have been instituted. In Massachusetts a new civil service classification, special service assistant, has been established. In California, a statewide Career Opportunities Program was established by order of the Governor.

And in the new Career Opportunities Program (USOE), state departments of education are committed to endorsing not only the use of paraprofessionals but also the establishment of career lattice programs.

COLLEGES

College and universities are admitting new students, granting credit for new activities, establishing new courses, engaging new people in a faculty role, and giving courses at new sites.

Over 200 colleges—most involved in "Scheuer Amendment" programs and Headstart Supplementary Training Programs—are admitting persons without normal preparation, including many who lack a high school diploma.

A recent study[7] reports that at least 60 colleges now grant credit for work activities. For example, in a new degree program at the University of New Mexico, two-thirds of the required credits are granted for work experience.

And at the University of Minnesota, persons who came to the General College as students as part of the new careers program are, while continuing their own undergraduate work, acting as co-teachers in a series of graduate courses on urban affairs.

NEW ADVANCEMENT PROGRAMS

While employment of paraprofessionals is widespread—an estimated 400,000 in various human agencies—career advancement is less broad. However, career development programs in OEO's CAP and Headstart programs, as well as the Office of Education's Career Opportunities Program, are all designed to advance those presently in paraprofessional positions.

Nearly one-fifth of the professional positions in community action agencies are held by those who had been non-professionals.[8]

In New York City's hospitals a model has been set up so that persons can move from aide or orderly to LPN to RN, as a built-in part of the job.

A nationwide survey of "Scheuer Amendment" programs indicates that participants had average incomes over $4,300, compared with the average annual income prior to entering the program of $2,100 for the 11% who were employed, while the remaining 89% were either unemployed (61%) or on welfare (28%).

In Oakland, the entire New Careers Program is administered by those who had been new careerists themselves, and nationally the Career Opportunities Program plans to upgrade some 8,000 persons in its first year.

NEW SERVICE ROLES

New careers programs have often in fact meant old careers for new people. However, new service roles are beginning to appear, in health, social service and educational programs.

The Hunts Point (Bronx, N.Y.) Health Center now engages a person as a "Health Advocate," while the role of Physician's Assistant and Nurse Practitioner is gaining attention. A survey conducted by HEW has identified some 30 such programs.

The thrust to separate income transfer from social services in welfare programs has led to new paraprofessional roles in both areas.

At the Highland Park Free School (Roxbury, Mass.), a "Community Teacher" operates as a partner of the traditional teacher. Reports from a nationwide study,[9] indicate that not only are new roles developing for aides, but their introduction into the school leads to new roles for teachers. As a report from Greenburgh, New York, indicates,[10] the teacher must become a "diagnostician." And the guideline for OE's Career Opportunities Program, calls for new professional roles including diagnostician, manager, or orchestrator of learning, resource teacher, etc.

THE CENTER'S WORK: AN OVERVIEW

The New Careers Development Center has been an initiator of as well as reflected and responded to these new developments. Its technical assistance, reports, papers, newsletters, conceptualizations have all been part of these developments.

Technical assistance is the most extensive way in which NCDC affects new careers developments. This technical assistance has occurred at the federal, state and local levels, in education, health, social service, community development and anti-poverty activities, to unions and professional and paraprofessional associations, colleges and private industry.

At the federal level, assistance has been provided to the Office of the Secretary, DHEW, in the establishment of the Office of New Careers; to the Office of Education in the Career Opportunities Program and in Vocational Education; to the Public Health Service; to the Labor Department re. the Public Service Careers Program; to OEO's CAP, Headstart, Legal and Health Services programs.

At the state and local level, assistance has been given to New York and California, Philadelphia and Cleveland, Nassau County and San Francisco.

In health, help has been provided to New York City's Hunts Point, Washington Heights-Inwood and NENA comprehensive Health Centers, the California State Department of Health. The American Hospital Association, unions such as Local 1199 and District Council 37, the Johns Hopkins University Health Study Group, the UCLA Allied Health Professions Curriculum Project Mound Bayou (Mississippi) Health Center, the NYU Institute of Rehabilitative Medicine, National Planned Parenthood-World Population, the Yale School of Nursing, the New York City Health Department on a dental careers program.

In education, work has been done with the Gary (Indiana) public schools, OEO's Career Opportunities Program, Detroit's Miller School District Parent's Council, New York City's IS 201 and Ocean Hill-Brownsville District, the Highland Park Free School (Roxbury, Massachusetts), the White Plains (New York), New York City, Philadelphia and Bristol (Pennsylvania) school districts, the New York State University, and the Nassau County (New York) vocational education programs.

In social services with the National Association of Social Workers, the Cleveland, Detroit, Westchester and Nassau County Health and Welfare councils, the Jacksonville (Florida) Neighborhood Service Project, the New York Social Work Recruitment Center, the State of Washington New Careers Program, the National Day Care Council and its New York City affiliate, the Institute on Gerontology (Gainesville, Florida), the Child Study Association, the American Public Welfare Association, and the United Fund.

In housing, there has been a study of new career opportunities in planning and community development work, and a project to demonstrate new career opportunities for poor people to build homes for other poor families.

Among colleges work has been done with Cleveland College, Columbia University and

Footnotes at end of article.

Lehman College, the Cornell School of Labor, Purdue and Indiana Universities, the University of Miami, NYU's Center for the Study of the Unemployed, the University of Minnesota, and Kent State University.

There has been work with civil service departments in Philadelphia and New York City, and the states of California and New Jersey.

Special attention has been given to Nassau County working with the County Executive, the Health and Welfare Council, the OEO, and the public schools, relating to establishing a county Manpower Development Office, conducting the planning for a demonstration Guaranteed Employment Program, proposing new designs for vocational education programs; and to Cleveland working with the Mayor's Office, the Health and Welfare Council, the CEP, and Cleveland College.

Assistance has been provided to paraprofessional groups in Syracuse, Philadelphia, Topeka, Cleveland, Pittsburgh, New York, Detroit, Nassau and Suffolk Counties, and on a statewide basis in North Carolina and California.

Other technical assistance activities have included TVA, the Meat Cutters Union, the 4–H, the Midas Corporation, the McGraw-Hill Company, the New England Trade Union Training Program.

A score of different papers has been issued on education, health, gerontology, manpower, social welfare, model cities, adult education, colleges, training, funding resources—all told exceeding 100,000 copies, as well as the "New Careers Newsletter," which now has a press run of over 15,000.

Key papers have included the "New Careers Funding Manual," a paper "Do Paraprofessionals Improve Human Services: A First Critical Appraisal," two papers reviewing the prospects in the health field, "New Careers in the Hospital" and "New Careers Beyond the Hospital"; a review of the status of new careers programs in education, "The Instructional Aide: Current Developments."

Papers by staff persons have been published or republished in a dozen professional journals.

The "Newsletter" has been expanded in terms of distribution and scope of coverage, and its format sharpened. An evaluation study, including a canvass of readers, assisted in these developments.

Testimony was presented before various federal and state legislative bodies including the Senate Committee on Labor and Welfare, the Senate Special Committee on the Aging, the House Education and Labor Committee, and the New York State Joint Legislative Committee on Employment.

Upgrading Nurses' Aides—A Career Development Success Story

(By Sumner M. Rosen)

Results to date indicate that the upgrading program for nurses' aides in the New York City municipal hospitals will end up a smashing success. Under a grant from the U.S. Department of Labor, 422 nurses' aides completed a 14-month training program to enable them to become licensed practical nurses. The program combined work and study; students worked 20 hours per week at their regular jobs, and attended classes and clinical training sessions for 25 hours per week. To make this work-study combination possible, the full-time LPN curriculum, which normally is completed in one year, was stretched to 14 months.

Most LPN training is for young high school graduates. This program was designed to provide an opportunity for upward mobility to those already at work, including persons who did not possess high school diplomas or equivalency certificates. Trainees ranged in age up to 61, with up to 21 years of service as a nurses' aide. They were trained in three groups, each cycle spaced at three-month intervals. The first cycle began in September 1967; the third group graduated two years later. The total group included by design 94 trainees chosen despite the fact that their academic credentials and test scores fell well below the standard normally required for LPN training in New York.

The results to date are impressive:

Of a total of 463 enrolled, 422—91 percent—successfully completed training. Some who had to leave training re-enrolled in later cycles. Of the 41 who withdrew and did not finish, 24 did so for personal or job-related reasons. Only 17 of the 463—17 percent—were academic failures.

In the special group of 94, 75 successfully completed training, or 80 percent. With more remedial and tutoring help, this percentage would have been higher. Among those who passed the course, success in the state licensure examination has been equal to that achieved by the larger group.

In the first cycle, 85.6 percent passed the state licensure examination the first time; of the remainder, 18 of 21 passed on their second try. This means a licensure rate for the group as a whole of *97.9 percent*; the second cycle achieved a licensure rate the first time of 89.2 percent, so one can expect at least as high a success rate for the entire group.

The program was enormously attractive to workers; for 450 funded slots, there were over 3,000 applicants. If this program is refunded on a continuing basis—as it should be—significant numbers of the working poor will find a new opportunity to upgrade their skills, status, earnings, and contribution to patient care. It is in this direction that new strategies must be developed to deal with the problem of serious shortages in professional help in health, hospitals and the other areas of human service need.

The program stimulated the City of New York, through the Health Services Administration, to develop a companion program, now under way, which will enable LPN's to be trained to become registered nurses. Some graduates of the original program will be included in this new phase, thus demonstrating the possibility of a career ladder which stretches from the unskilled, entry-level job up to the fully professional-level.

Originally highly skeptical that this program could succeed, the top officials of the municipal hospital system have now adopted career development as a major program priority for the future. They recognize not only the direct effects of dealing with shortages, but the larger effects on morale and motivation which the existence of career opportunities exerts on all workers.

The program demonstrated the positive results which can be achieved when union and management agree to cooperate in the resolution of common problems. The initiative in this program was originally taken and energetically pursued by the union—District Council 37, American Federation of State, County and Municipal Employees (AFL–CIO)—and accepted, with considerable ambivalence at the outset, by management. The difficulties, which have been detailed elsewhere,[1] stemmed from two basic factors:

(1) union officials who made the proposal were seen by management and the nursing professionals as unqualified to deal with matters which they considered their special areas of competence and responsibility;

(2) a union-sponsored program, in which the two parties would share responsibility, was seen as a threat to the integrity of managerial prerogatives.[2] This resistance was successfully overcome.

The program has spread beyond the municipal system; it impressed union and man-

[2] Sumner M. Rosen, "Building Career Ladders in Health Occupations—Opportunities and Obstacles," and "Union-Management Cooperation—Is There an Agenda for Tomorrow?"

agement in the voluntary hospitals sufficiently that in their 1968 collective bargaining agreement they agreed to establish a jointly-operated training and career development program, funded by employer contributions, to provide a wide range of career advancement programs for employees in the New York voluntary hospitals.

Training was done by an accredited school of practical nursing. In the interests of a fully developed career system, future programs should utilize the resources of two-year and four-year colleges, so that training will include the acquisition of credentials needed for further advance up the career ladder.

The program has proven that working adults, normally excluded or neglected from many manpower programs, offer first-class potential if the training program is integrated with their work, permits them to preserve their income and support their families, and leads *directly* to higher status and income. Trainees in this program persisted because the city had *guaranteed* them jobs as LPN's if they successfully passed the state licensure examination. Their pride in their achievement and in their having proved their ability to move up the career ladder was what most impressed their teachers, union representatives, supervisors, coworkers, project staff, and anyone else who came in contact with them. By enabling entry-level workers to move up, such programs make room for new entrants who will find themselves not in the traditional dead-end job but at the first step in a career system which has been shown to work for people like themselves.

Support for programs of this sort badly needs expansion. Despite diligent effort, the Department of Hospitals and District Council 37 have not yet been able to secure assurances of continued funding of programs of this sort. It is of the utmost importance to the future effectiveness of the nation's manpower effort that this kind of support be provided.

RECOMMENDATIONS FOR GENERAL FARM LEGISLATION

HON. GRAHAM PURCELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PURCELL. Mr. Speaker, I would like to take this opportunity to present the following list of recommendations for general farm legislation which was submitted to me and the other members of the House Agriculture Committee when we were on a tour of the farms and ranches in the 13th Congressional District of Texas.

Our committee has been studying problems faced by the agricultural industry for a long time, and I have found that this list of recommendations has been an invaluable aid, not only to myself, but to the entire committee in coming up with some good, sound improvements in farm legislation. I have been deeply impressed by the similarity between this list and the voices raised by farmers and ranchers from all over the country. I must commend this group for providing an accurate summary of what is on the minds of rural Americans.

I am presenting the list to share with my colleagues the sincere efforts of the members of the farm industry to come up with sound, creative, and positive solutions to the problems of rural areas. It is encouraging, and certainly a milestone in the history of farm legislation, to see farmers, farm groups, and businessmen in the agricultural industry working diligently with each other and with those of us in Congress as we all strive to strengthen and support what we consider to be the very backbone of our economy.

The recommendations follow:

GENERAL RECOMMENDATIONS

Reinstate the Agriculture Act of 1965 with modifications and additions.

Modifications to the Act by commodity are:

1. Cotton:

A. Maintain competitive one-price cotton with flexible supplemental programs that would increase the offtake and eventually achieve full utilization of the U.S. capacity to produce.

B. Provide for a loan level of 90% of the world price with the determination of such price being made in a manner which will accurately reflect market conditions for the immediately preceding year or years.

C. Provide for dependable supplies of American cotton which are fully adequate to meet the requirements of modern competition at home and abroad.

D. Provide that an anniversary type loan be adopted and that the release of government stocks may occur only at price levels, clearly defined by legislation, which will allow the marketing system to function effectively in adjusting supply-demand relationships between the different qualities of cotton, and which will permit farmers to make maximum use of normal trade channels in selling their current crop.

E. Establish an acreage allotment system aimed at providing the production actually needed each season for domestic consumption, some form of "open end" production plan for exports, and a carry-over adequate for an expanding offtake.

F. Facilitate the sale and lease of allotments by urging: a. that no limit be placed on the acreage allotment which may be transferred from farm to farm within a county; b. that the period during which transfers are permitted be as long as practicable.

G. Recognize that the industry's most urgent problem is to reduce production and marketing costs; and place maximum possible emphasis on a crash program of research and education to overcome that problem and permit the industry, within a reasonable time, to achieve self-sufficiency in meeting price competition.

H. Recognize that in the immediately foreseeable future some form of cost adjustment must be provided in order for producers to sell at a competitive price and receive a reasonable return for labor, management and investment.

I. Provide that such cost adjustment be made to the commodity rather than to the producer.

J. Strengthen the crop insurance program to provide adequate protection for high cost, high risk crops such as cotton.

K. Strengthen to the greatest extent possible industry advice and participation in the administrative decisions made with respect to the cotton program.

L. Small acreage allotments should not be penalized for failure to plant their allotments.

M. Subsidy payments should be based on actual production without a dollar ceiling, rather than projected production.

N. Loan or support prices should be designed to prevent disaster rather than to operate as a market for crops thus building surpluses that depress market prices as long as they exist or at times are dumped by the USDA.

O. Agricultural products should be marketed through established trade channels and not bartered or dumped by less well qualified Federal agencies.

P. In our national accounting Federal donations of food and fiber should not be charged to agriculture; instead it should be charged to the many forms of relief or anti-poverty programs.

Q. Acreage should be controlled on soybeans.

2. Wheat:

A. Congress should terminate the International Wheat Trade Agreement.

B. Put production of wheat back in the hands of the commercial wheat farmers where it belongs with a mandatory clause or amendment.

C. Require that the miller pay the certificate in full.

D. Repeal the rule of use of U.S. ships to export wheat.

E. Endorse the sale, lease or exchange of wheat allotments similar to the cotton program.

F. Allow for some kind of return on diverted acres to be made. At present the care and cost of this acreage is even more expensive to maintain in a proper way than it would be to harvest a crop.

3. Feed Grain and Wheat: In the sale and leasing of feed grain base acreage, allow full substitution of wheat allotment acres and feed grain acres and vice versa.

4. Alternate Crops: Castor beans, flax, guar, safflower, sesame and sunflowers.

A. Permit crops in short supply to be harvested from (a) Long term retired acreage, (b) Conserving base acreage, (c) Base crop diverted acreage (mandatory and voluntary).

5. Dairy: The import system is fine as is but should only be increased in proportion to population increase.

6. Cattle: Limit all cattle and meat product imports to protect U.S. producers but allow a provision for increase commensurate with population increase.

ADDITIONAL GENERAL RECOMMENDATIONS

1. The group was opposed to any land retirement program.

2. Continue present ACP and SCS programs including the Great Plains program.

3. The U.S. Agriculture Department should support and conduct an all out research program of mesquite eradication.

4. We are opposed in principle to limitations of payments on any farmers benefits under government farm programs.

5. Farmers should be compensated for compulsory diversion of land, or in lieu of payment, should be allowed to harvest alternate crops.

ATLANTIC PARTNERSHIP

HON. DONALD E. LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 10, 1969

Mr. LUKENS. Mr. Speaker, my distinguished colleague from Illinois and many others participating in this special order have ably analyzed many of the findings of the conference on the concept of Atlantic partnership of the American Institute on Problems of European Unity, Inc., which was held between October 17 and 19, 1969 at Georgetown University.

At this point, as a member of the board of trustees of this scholastic organization I would like to add a few words about the organization and its work for the past 15 months. Besides the conference on the concept of Atlantic part-

nership which has seen the assemblage of many first-class academic and research experts on both sides of the Atlantic at Georgetown University, the institute also conducted other studies and projects. In July 1969 it finished a 110-page study on "American Policy Alternatives Toward East Central Europe," a project on which eight professors and one U.S. Representative cooperated; they are Profs. James D. Atkinson, Georgetown University; Brutus Coste, Fairleigh Dickinson University; L. A. D. Dellin, University of Vermont; Jerzy Hauptmann, Park College; Vladimir Reisky de Dubnic, University of Virginia; William H. Roberts, Catholic University of America; James H. Wolfe, University of Maryland; and Z. Michael Szaz, now the executive director of the institute, and also the distinguished gentleman from Illinois. The findings of the report which have not yet been published in print were at that time circulated among the interested Government agencies and departments.

Two other studies of the institute are just about completed. They are a 400-page manuscript on the "Strategy and Tactics of the Hungarian Communist Party, 1918–48," planned as volume 1 of a two-volume study of the Hungarian Communist Party, written by Prof. Z. Michael Szaz and Prof. Maurice Czikann-Zichy from St. Joseph's College in Philadelphia, Pa. The manuscript is being submitted to the Johns Hopkins University Press for publication purposes this month. The second is a 10-article symposium on "Hungary and Central Europe," including both professors and researchers from U.S. universities, some of them Hungarian, others of non-Hungarian origin, including the senior fellow of the Council on Foreign Relations and former member of the State Department planning staff, Dr. John C. Campbell. This manuscript, which also includes a contribution by my distinguished colleague from New York (Mr. HALPERN), is being submitted to St. Martin's Press in New York for publication in paperback form.

In addition, the institute sponsored luncheons and panels on important issues in European politics and strategic affairs. Some of my colleagues attended the luncheons held at the Rayburn dining room in June which featured Prof. Edward Teller on European security and the American ABM decision on June 17 and the February 26 luncheon featuring the French counselor Jean-Pierre Cabouat on French policy toward European integration. In New York, the institute sponsored a panel with the founder of the European integration movement, Count Richard Coudenhove-Kalergi as the main Speaker, and Profs. O. Carlos Stoetzer, Z. Michael Szaz, Edward Lilly, and the dozen of Hungarian politicians-in-exile, Dr. Tibor Eckhardt, former vice president of the Pan-American Union, as members.

Ambassador Kenneth B. Keating, a close friend of the institute though not officially connected with it because his judicial functions before his assumption of ambassadorship, was given a very successful farewell reception by the institute on May 13 at the Madison Hotel where 160 friends of the Ambassador and the institute met the departing Ambassadors, including dozens of House and Senate Members.

The institute has further research and conference plans for 1970. A second conference on the concept of Atlantic partnership to be held in Paris with the cosponsorship of the Centre d'Etude de Politique Étrangere is now under consideration for June, and active plans are being made for a major research project on East Germany with the help of outstanding American and West German professors.

May I at this time congratulate the leadership of the institute, Mr. John Chamberlain, syndicated columnist; and Dr. Z. Michael Szaz, the executive director whose initiative led to the establishment of the institute and who helped to coordinate the activities of the research advisory board and hope that the institute which has only a short past, will continue to grow and provide us with studies not only of academic, but also policymaking interest.

BIAFRA MAKES GREAT NATIONS LOOK SICK

HON. JACK H. McDONALD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. McDONALD of Michigan. Mr. Speaker, on February 5, I joined with a number of my colleagues in cosponsoring House Concurrent Resolution 127 urging an immediate ceasefire in Biafra. Unfortunately, the killing and starvation continues with no end in sight. I am appalled and embarrassed by the lack of concern that is expressed over this deplorable situation.

In the December 8 issue of the Detroit News, columnist John Chamberlain made some dramatic and poignant observations about the Biafra conflict. I wholeheartedly commend his article to my colleagues for their consideration.

The article follows:

BIAFRA MAKES GREAT NATIONS LOOK SICK

(By John Chamberlain)

The late Senator Robert Taft was critical of the Nuremberg trials, arguing that the prosecutor should not also be the judge. One can see why Taft was concerned. No nation ever emerges from a war with clean hands.

If the Allies had lost World War II, they surely would have had trouble in court trying to justify the bombing of Dresden. The Soviet could have been hung for the massacre of the Polish officers in the Katyn Forest. Pearl Harbor was a moral blot on the Japanese but Hiroshima stains our own record.

And now, if the prejudgment stands up, there is My Lai to put against Hue.

The great powers, seeking political advantage from the moral lapses of others, turn to a diplomacy of hypocrisy. The case of Biafra makes all the great nations look sick. It is almost too much to comprehend. Maybe one has to be touched by personal tragedy to have feelings about it.

At any rate, the strongest voice speaking out in the U.S. Senate on the Biafra tragedy is that of Senator Edward Kennedy. The Russians and the British have supported the central Nigerian government in its efforts to end the secession of Biafra. The United States, not wishing to offend either London or Moscow, has followed a hands-off policy.

The UN, as Kennedy has said, "chooses silence over leadership." Hypocrites, all of us.

Before the hand-wringing began over My Lai, Kennedy tried valiantly to spark some senatorial action on Biafra. For months, he reminded his colleagues, the survival of three million persons, mainly women and children, in Biafra had depended on mercy airlifts operated by the International Red Cross and Joint Church Aid.

But since last June the Red Cross has not been able to get into Biafra. Joint Church Aid sticks at it but can't do much. The combatants can't arrive at a mercy agreement.

So, as Kennedy says, the death rate "stands at nearly 2,000 a day, according to some reports." The "2,000 a day" have to be added to the 1,500,000 persons who have died from starvation since 1968 in this totally unnecessary struggle.

Kennedy says he is "distressed to learn that what we are prepared to do is apparently measured more by what the federal Nigerian government is willing to tolerate than by the maximum capabilities of Joint Church Aid in delivering food and medicine into the Biafran enclave."

It is hard to know why the British and the Russians care whether Nigeria is one country or two countries. If the Biafrans want to live by themselves, or to work out a federated arrangement with neighboring African states, why not let them?

Can oil diplomacy be behind the British engagement on the Nigerian side of the struggle? Recently there were reports of Biafran attacks on the Shell-British Petroleum consortium that has been extracting most of Nigeria's oil.

Do the Soviets need Nigerian docks to service the ships they send around the Cape of Good Hope to help sustain the North Vietnamese in their fight to end the freedom of South Vietnam?

If oil and naval rights explained the British-Soviet united front against independence for Biafra, what explains the U.S. refusal to speak out in the United Nations?

Kennedy is specially concerned about some of the projects in our AID requests for Nigeria. The AID requests for fiscal 1970 include "the rebuilding of key road sections" as part of "short-term rehabilitation assistance to federal Nigeria."

The road repair would enable the Nigerian government to move troops more easily against the Biafran enclave. Is this our business? Must we help prolong one war while we are so desperately trying to terminate another?

ARTS AND HUMANITIES

HON. MARVIN L. ESCH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. ESCH. Mr. Speaker, I am pleased to join my distinguished colleague (Mr. AYRES) in introducing the administration's proposal to extend the life of the National Foundation on the Arts and the Humanities for an additional 3 years. I consider it a privilege to associate myself with Mr. AYRES' remarks and to call attention, once more, to the President's fine message to the Congress on this matter today.

One passage from the President's message seems particularly significant to me:

Too many Americans have been too long denied the inspiration and the uplift of our cultural heritage. Now is the time to enrich the life of the mind and to evoke the splendid qualities of the American spirit.

I believe that an appreciation of the arts, participation in the creative process, and an understanding of the humanities are fundamental requirements in our effort to improve the quality of life for all Americans. The President's commitment to this effort is an indication that this administration is determined to encourage the arts and humanistic studies in every area of our country.

The work of the two endowments which make up the National Foundation on the Arts and the Humanities has had an impact in every State of the Union. I note with considerable pride the projects undertaken by the two endowments in my own State.

In Michigan, for example, the National Endowment for the Arts has made special grants to a large number of programs which can have a lasting effect on the lives of the people, not only in my district but throughout the State.

This year, for example, three major modern dance companies—Alwin Nikolais, Alvin Ailey, and Jose Limon—made a number of appearances in Michigan under the auspices of the coordinated residency touring dance program of the national endowment. The program, administered by State arts councils in the region, involves not only public appearances by the companies but also a concentrated program of workshops and seminars with dance teachers and students. Among the communities in which the companies appeared were Ann Arbor and Ypsilanti and reports from sources there indicate that their appearance was highly successful and productive.

The Arts Endowment has provided assistance, also, for experimental theater through the professional theater program at the University of Michigan, a training ground for new playwrights, directors, and actors which can be a creative investment in the future of the theater in our country.

The Goldovsky Opera Co. has toured in our State with its production of Bizet's "Carmen" and the Detroit Symphony Orchestra, a major cultural resource for our State, has been given a recent grant for the development of a special project.

In the field of the humanities, several grants for special studies and fellowships have been made to teachers and students at the University of Michigan. Grants in this area have totaled $81,813 since the beginning of the National Foundation on the Arts and Humanities 4 years ago. Most recently a grant of $9,878 was given by the Humanities Endowment in support of a conference series for the Center for Comparative Ancient and Modern Studies at the University of Michigan.

Perhaps most significantly, from Michigan's standpoint, has been the highly effective growth of the Michigan State Council on the Arts. The council's programs, supported in part by annual grants from the National Endowment for the Arts through section 5(h) of the act, have brought projects in every arts field to more than 300,000 Michigan residents during the past year—fiscal year 1969. Total support by the National Endowment to the Michigan Arts Council during the past 4 years has exceeded $110,000.

Included in the endowment's grants was one for $6,700 which enabled the Michigan State Arts Council to fund an "artrain"—converted railroad cars which have been turned into a traveling museum. The indications are at present that the "artrain" will reach every community in our State where railroad tracks and siding are still usable. The project has been hailed by professional artists, museum directors, and critics as one of the most innovative and imaginative in recent times.

Quite clearly, the Endowment for the Arts and the Endowment for the Humanities have used small amounts of money to encourage and initiate creative, imaginative programs.

It is equally obvious that, in the case of either endowment, these small amounts of money have been used to stimulate private and non-Federal support in a variety of ways.

In the case of the Endowment for the Arts, for example, each dollar provided from Federal funds has produced an estimated $3 from private, business, State, and local government sources.

As "seed money," the National Foundation on the Arts and the Humanities' appropriations have been productive and profitable. I commend the President for his message on this small but highly important agency.

I urge my colleagues in the House to study the message sent by the President. It is a compelling indication that the Nixon administration intends to work closely with private sources, State governments, and communities in a concerted effort to make possible a better way of life for all Americans.

JOE KEENAN'S PRIDE

HON. JOHN A. BLATNIK

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. BLATNIK. Mr. Speaker, I wish to share with my colleagues a tribute paid to Joe Keenan, a true statesman of organized labor, which appears in today's Washington Evening Star. Joe's distinguished career epitomizes the very best ideals and aspirations to be found in the labor movement, and his interest in the well-being of all workingmen is properly acknowledged in this exceptionally well-written article:

KEENAN'S PRIDE

(By John Herling)

Joe Keenan's pride is trade unionism. Just like that. He does not lend himself to fancy talk, doesn't pretend to be a labor statesman, is often bemused by the complicated language wheeled into action in labor-management relations. But, in or out of government, people want Joe Keenan to be on their side.

What shines thru in this veteran trade union leader is dedication to his cause, loyalty to his associates and integrity of personality. An electrician by trade, he became a local union officer about 47 years ago, then was elevated to the secretaryship of the Chicago Federation of Labor, historically one of the great and stormy labor movements.

He has played a significant role at various stages in the development of the labor movement in the past thirty years. He carries so much strong but gentle muscle that when a tough job needs to be done, the call goes out for Joe Keenan. The certainty is that he will never turn down a difficult assignment, the kind of task that many of his associates might consider suspect because it requires a re-examination of their own ideas and practices.

This has happened in the field of civil rights where Joe Keenan has been able thru his earnestness, his sympathy, his identity with fellow trade unionists, to win them around to a steady abandonment of anti-minority practices. The fact is that Joe Keenan relieves the memory of the struggles which his own people have had to endure to reach a place in the community, recognized and comparatively secure. He has felt the wet thru his shoes, remembers the scorn of the complacent and he'll simply be damned if he ever gives up on people, of any color or creed, white or black.

In 1940 he came to Washington as the AFL representative on the National Defense Council, where he served with the late Sidney Hillman, and then became associate director of the War Production Board. By this time it had become known that Joe Keenan was the man who could—if anybody could—build bridges to CIO unions and in his labor advocacy would excite admiration rather than hostility.

It was logical therefore for Joe Keenan to be sent to post-war Germany as General Lucius Clay's labor advisor. For nearly three years Joe Keenan helped educate some of his associates in aims of the labor movement, and he became a sensitive comrade and guide to the German trade unionists who were remaking their trade unions, one of the earliest casualties of the Hitler regime.

When the American Federation of Labor decided to move into the political arena in an organized way in 1948, Mr. Keenan became the director of Labor's League for Political Action. Then he was chosen secretary of the Building and Construction Trades Department and is now the secretary of the prestigious, 900,000-member International Brotherhood of Electrical Workers. As a member of the AFL–CIO Executive Council, Vice President Keenan becomes the man President Meany inevitably taps for service. He is on President Nixon's Task Force on Low Income Housing, he works with John W. Gardner on the Urban Coalition Committee, and when the strike fund was established for the General Electric strikers, Joe Keenan became a rock on which to build.

I've never met a man in whom religious faith operates so uninterruptedly. He projects kindness as well as purpose. When Joe Keenan is in motion, people want to move along with him.

WELFARE EXPLOITATION

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. RARICK. Mr. Speaker, there have been despicable movements—but undoubtedly the National Welfare Rights Organization is the most contemptible of all. The NWRO, an activist organization of welfare recipients, admittedly is organized to extort larger welfare checks, coerce charity, and make more provisions for its members and potential re-

cruits. It is not certain that the membership is limited to welfare recipients, although it does appear that the officers of the organization live elegantly off the welfare rights movement.

The head welfare righter is a Dr. George Wiley—holder of a Ph. D. degree and an able-bodied young male. There would seem no reason physically or mentally for this person to be in need of welfare relief, so one must assume that he has other reasons and motives for his organizational activities.

Presenting himself as a helper of the poor he exploits the poor to further other purposes—his own or his superiors. Knowing that most people of good will cannot refuse help to those in need, Dr. Wiley is able to use his little army—wrapping himself in the sympathy accorded the unfortunate—to shake down foundations, businesses, and even politicians. His army is very mobile, thanks to the beneficent Supreme Court's guarantees of instant housing, instant welfare, and soon instant voting.

During the November 15 Washington moratorium, Wiley's welfare rights women manned the mobile field kitchens to feed Hanoi's fifth column friends who marched in the Nation's Capital. Feeding marchers is apparently one assignment for Dr. Wiley's units. It is not clear where the welfare children were, or who was feeding them.

Last Friday, at a gala convention by a splinter segment of the Democratic Party, Dr. Wiley is reported to have crashed the party, commandeered the microphone, and pressed his demands for the $5,000 annual minimum wage and distribution of free food stamps to all. It was not clear whether he was making his pitch for his "poor" or for Hanoi's street marchers.

The politicians present were shaken down to defray the travel expenses of Dr. Wiley and 30 organized welfare mothers. It was not clear who was doing the babysitting while the mothers were politicking.

Conventional armies advance behind artillery, supported by tanks—this guerrilla band and its recruiters advance behind the camouflage of poverty supported by psychological weapons.

Several related clippings follow:

[From the Washington Evening Star, Nov. 16, 1969]

CROWD AT MONUMENT SWAYS TO SONGS

(By Christopher Wright)

THE REVOLUTIONARY DIET

At half a dozen places amid the crowd the National Welfare Rights Organization set up metal horse tubs full of water on cinder blocks with fires underneath. Manned by heavy women, they supplied an endless number of soft drinks, hot dogs and rolls, apples and potato chips, the staples of the revolutionary diet.

[From the Washington Post, Dec. 5, 1969]

HAPPENING GREETS DEMOCRATIC STUDY GROUP

(By Mary Wiegers)

The liberal Democratic Study Group had all kinds of entertainment plans for its "glorious" 10th anniversary fund-raising dinner last night at the Sheraton-Park Hotel. And it also got all kinds of unplanned entertainment.

The Democratic Study Group is composed of liberal members of the House of Representatives. It was formally organized in September, 1959, but its origins date back to January, 1957, when House members organized the group to "counterbalance the conservative coalition" in Congress.

Last night the 1969 members of the DSG held a $100-a-plate 10th anniversary banquet. They had asked Mayor Charles Evers of Fayette, Miss., to be the main speaker before the crowd of 700 persons.

This, together with the appearance of Democratic presidential hopefuls, they hoped would provide an entertaining evening for all.

But the DSG got more than it bargained for.

As the dinner-goers drove up to the door of the Sheraton-Park, they were met by pickets from the Emergency Committee on the Transportation Crisis, who described themselves as fighting against freeways and for rapid transit. The committee was mad because at least one member of the DSG, had voted for the combined Three Sister Bridge and subway proposal.

The pickets held signs reading "DSG—damn silent group." And "stronger than dirt but can't stop pollution."

When the 700 guests filed into dinner, they were serenaded during their lobster and crabmeat cocktail by the pickets who sang their own version of "America the Beautiful."

"Oh beautiful for spacious roads,
That spread from slum to slum.
The smog is gray, the homes decay,
But see the profits come.
Suburbia, suburbia, there is profit there to glean.
Pollute the air but they don't care,
They're selling gasoline."

After scattered applause for that rendition, the guests were addressed by Dr. George Wiley of the National Welfare Rights Organization, who had just spent the week attending the White House Conference on Food and Nutrition. He was introduced by the chairman of DSG who allowed him to take the podium to make a brief statement.

Wiley told the guests that it was 30 organized welfare mothers who turned the conference around and "made Richard Nixon's conference relevant."

"Can you do less than support the position that Richard Nixon's finky conference did," Wiley challenged the DSG.

He was talking about the NWRO's demand for a $5,000 yearly annual minimum wage and distribution of free food stamps to all.

——— asked the DSG diners to contribute cash to "defray the expenses of delegates" from the NWRO who came to the conference.

After that it was time for the regular entertainment.

[From the Evening Star, Dec. 8, 1969]

ONE HUNDRED DISTRICT OF COLUMBIA POOR TO GET CREDIT FROM WARDS

About 100 of Washington's poorer residents will receive credit from Montgomery Ward under a national agreement between the firm and the National Welfare Rights Organization.

Each will receive up to $100 in credit during the next year for purchases in the stores and through the catalog.

The 100 local residents are among 3,000 NWRO members who will take part. Welfare recipients and other poor people are included in the welfare rights organization.

WILL STAMP OUT CROOKS

Mrs. Etta B. Horn, chairman of the NWRO Credit and Ways and Means Committee, today hailed the agreement as a "great thing. This is something we have been fighting for. We feel like it's going to work."

Mrs. Horn, who also is chairman of the Citywide Welfare Alliance, said credit with a firm like Montgomery Ward "will stamp out the credit crook."

Edward S. Donnell, president of Montgomery Ward, said that "a pilot program to provide credit to responsible welfare recipients is a worthwhile step to make Ward's services uniformly available to all financially responsible consumers. We believe that our mutual efforts in this pilot program will demonstrate that large numbers of welfare recipients will be able to enjoy the same credit account benefits as other customers."

One Washington department store is carrying out an experiment in credit for poor people in cooperation with the United Planning Organization, the local antipoverty agency.

Ashley D. DeShazon, credit vice president of Montgomery Ward, said the program will be inaugurated as fast as Ward's and NWRO chapters are able to clear credit applications. NWRO members in Baltimore, Detroit, Cleveland, Chicago, Kansas City, Los Angeles, Fort Worth, Dallas and Oakland also are taking part. Several additional locations may be added early in 1970.

Those taking part will be issued a Ward's credit card that will be honored at all stores, with a revolving credit limit of $100. The usual Ward procedures for billing and repayment schedules for credit accounts will be used.

CHILDREN'S PRAYERS

HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. ROUDEBUSH. Mr. Speaker, each week I am inserting five children's prayers into the CONGRESSIONAL RECORD for the benefit of the Nation's public schools.

The Supreme Court has outlawed all prayer and Bible reading in our public schools and this incredible decision is strongly opposed by the vast majority of Americans.

Our Nation's schools can recite these prayers inserted in the RECORD at their morning devotionals without interference from the Supreme Court because prayer has not been banned in the Congress.

Until a constitutional amendment is passed reversing these damaging decisions, our children must be allowed to offer a prayer if they so desire.

The children's prayers follow:

1.

Lord, let us learn from the experience of today the lessons which Thou meanest today to teach.

2.

He who directs the sparrow's tender flight,
And sees him safely reach the heartless ground,
Guide thee in all thy passages aright,
And grant thy course be sure, thy resting ground.

3.

My Lord, I am ready on the threshold of this new day to go forth armed with Thy power, seeking adventure on the high road, to right wrong, to overcome evil, to serve Thee bravely, faithfully, joyously.

4.

Bless all who worship Thee, from the rising of the sun unto the going down of the same.
Of Thy goodness, give us;
With Thy love, inspire us;
By Thy spirit, guide us;
By Thy power, protect us;
In Thy mercy, receive us now and always.

5.

Thine is the day, O Lord, and Thine is the night, grant that the Sun of Righteousness may abide in our hearts to drive away the darkness of evil thoughts.

ATLANTIC UNITY STRESSED

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 10, 1969

Mr. HORTON. Mr. Speaker, today I am joining my colleagues ably led by the distinguished gentleman from Illinois in discussing the concept of Atlantic partnership and the work done by the American Institute on Problems of European Unity at its October conference at Georgetown University.

The institute is a recent development, it was founded only in the summer of 1968. Its research advisory board consists of 21 well-known professors and research experts from various universities, one of them even from my area, Prof. William G. Andrews, who also served as the chairman of the French panel at the conference. The work of the institute is divided between research studies and conferences on Western Europe and east central Europe and its research board includes experts in both fields.

The conference was devoted to trends in Atlantic partnership and European integration for the next 5 years assuming that some progress would be reached enabling the Western European nations more and more to speak with a united voice on global politics and regional security. The underlying assumption of the panels was that Europe forms a cultural and historical unit which transcends the present partition of the continent and that no true integration in Western Europe is possible without some reattachment of the countries of east central Europe.

In this regard past work of the institute has been very informative. Mid-July a report was written up with the participation of eight professors and the distinguished gentleman from Illinois which was sent to interested governmental departments entitled "American Policy Alternatives Toward East Central Europe."

The present report deals with Atlantic partnership. This is an area in which Congressman FINDLEY and I have shared a deep interest by cosponsoring a resolution aimed at convening an Atlantic conference to discuss future economic, political and cultural integration of the Atlantic community.

Thus, I join Mr. FINDLEY in welcoming the interest and the work of this institute in the fields of Atlantic partnership.

A SERIOUSLY SICK SOCIETY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. RODINO. Mr. Speaker, last week two bright young gentlemen, one from Riga and one from Moscow, were in Washington as guests of my good friend FRANK BRASCO. These gentlemen had indeed been quite lucky since they were allowed to immigrate to Israel. They, however, left thousands and thousands of Jewish comrades who remain locked in the Soviet Union persecuted because of their culture and religion and unable to leave. This unbelievably inhumane situation appears to be worsening as Soviet society tends to take on more and more the coloration of Stalinist days.

In this regard, Mr. Speaker, Jewish News of Newark, N.J., published the following hard-hitting and forthright editorial:

[From the Jewish News, Dec. 5, 1969]

A "SERIOUSLY SICK SOCIETY"

Because of our preoccupation with Soviet anti-Semitism and the Kremlin's venomous policies in the Middle East we sometimes tend to pay scant attention to other aspects of life in the USSR which reveal the nature of that harsh, totalitarian society. This is unfortunate, because if we fail to understand, for example, what is currently happening to the writer, Aleksandr I. Solzhenitsyn, and other intellectuals who are regarded as intolerably dangerous by the regime, we will lack essential perspective.

Harassment of cultural and political dissidents testifies to the fact that the Soviet Union is indeed a "seriously sick society," to use Solzhenitsyn's phrase. And he should know. His works have not been printed in Russia for four years because the Kremlin obviously fears the impact of his novels. Thus, two of his books, "The Cancer Ward" and "The First Circle," are best-sellers in western countries but are unavailable to Russian readers. The reason? They sharply criticize Stalinist practices such as the confining of millions of political prisoners in slave labor camps and other brutal aspects of life in the USSR.

The Russian Writers Union, a complete tool of the regime, is presently defaming Solzhenitsyn in the same general terms as those employed against Kuznetzov and others who strive to write and speak honestly. They are variously accused of being traitors, of slandering their country, of selling out to the imperialists, of being mentally incompetent—in which case they are clapped into lunatic asylums rather than prison camps.

The awful tragedy of it all lies in the fact that there is really nothing strange about the foregoing, at least not in Russia. Abuse of Jews, writers and intellectuals who are brave enough to speak out is part of a tradition that goes back to the days of the Czars. Similarly, Czarist imperialism in its present-day guise under the Red Banner has swallowed up much of Eastern Europe and has resumed its historic thrust and probings into the Middle East, Asia and Africa.

The Bolshevik Revolution, culminating in the triumph of the paranoiac, Stalin, whose evil policies have been perpetuated since his death, changed relatively little in Russian life. As a matter of fact, many reputable scholars believe that Russian progress in certain areas such as space technology and science would have been achieved even if there had been no Revolution. As always, the people of that unhappy land are the principal victims of tyranny and repression.

It is in the above context and in this perspective that realism compels us to analyze and understand Soviet aims and techniques which appall us with their utter cynicism and bizarre cruelty.

KENT H. SMITH IS HONORED

HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. MINSHALL. Mr. Speaker, as far as Kent R. Smith is concerned there is no substitute for excellence. He brings that quality to every task he undertakes. It is a hallmark of his character, his personality, his tireless endeavors for the Cleveland community in which he lives. He is a rare and wonderful human being, deserving of the many honors he wears so modestly and well.

The latest tribute came last Sunday evening, December 7, when he was presented by the Jewish Community Federation of Cleveland with its highest honor, the Charles Eisenman Award. As the Plain Dealer put it editorially, Kent Smith "properly fits the Eisenman Award pattern: The unostentatious community leader who quietly volunteers and does a tenacious and excellent job for his town."

All of us who hold Kent Smith in warm regard are very proud of his newest recognition as an outstanding American.

The material follows:

[From the Cleveland Press, Dec. 8, 1969]

KENT H. SMITH WINS EISENMAN AWARD

(By Julian Krawcheck)

Lifelong involvement in community affairs as both general and foot soldier has won Kent H. Smith one of Cleveland's most coveted awards.

Smith, retired founder of the Lubrizol Corp. and former head of the Greater Cleveland Associated Foundation, was presented the Charles Eisenman Award at the Jewish Community Federation's 66th annual meeting in Park Synagogue last night.

In presenting the award, Fred N. Hauserman paid tribute to Smith as "a quiet, scholarly man who shuns publicity but whose life has been dedicated to his community and his fellow man."

Hauserman, president of the Cleveland Community Fund, was head of the award committee also comprised of Tom Boardman, editor of The Press; Robert M. Ginn, president of the Welfare Federation; Mrs. Alex Miller, a trustee, and Lloyd S. Schwenger, president of the Jewish Federation.

The formal citation presented to Smith, together with a check for $1000, called attention to his "extraordinary creative involvement in the affairs of this community" and noted that "achievement is his way of life."

In a brief acceptance talk, Smith paid tribute to the Jewish Federation as a symbol of "the real strength of Cleveland" and returned the check to that group to be used in one of its programs.

The 1969 Eisenman Award winner is a native Clevelander who attended East High School and earned science degrees at Dartmouth and Case Tech. He served two years as acting president of Case and is or was a trustee of Holden Arboretum, Cleveland Institute of Art, Euclid-Glenville Hospital and the Museum of Art.

Last night's principal speaker, Sol M. Linowitz, said an antidote must be found "to the poisons of dissension, distrust and dis-

respect that strain relations between races and generations."

Linowitz, head of the American Education Council's Committee on Campus Tensions and former U.S. ambassador to the Organization of American States, called for "a thoughtful analysis of our social ills . . . which have led people to American Education Council * * * transform the quest for individual freedom into ugly outbursts of mob violence."

Silver medallion awards were presented to Alfred A. Benesch, M. E. Glass, Samuel Goldhamer, L. W. Neumark, Rabbi Israel Porath, Leonard Ratner and William C. Treuhaft.

[From the Plain Dealer, Dec. 8, 1969]

JCF HONORS KENT SMITH OF LUBRIZOL

The Jewish Community Federation of Cleveland last night presented its highest honor, the Charles Eisenman award, to Kent H. Smith, founder of the Lubrizol Corp. The award came at the federation's 66th annual meeting.

Before a crowd of about 500 at Park Synagogue, the federation's awards-committee chairman Fred N. Hauserman cited Smith for his "extraordinary creative involvement in the affairs of his community."

The award was established in 1923 in memory of the federation's first president. The winner is selected by a panel of federation and community leaders.

Smith, 75, of Woodstock Road, Gates Mills, founded Lubrizol in 1928. He was an acting president of Case Institute of Technology and a trustee or director of numerous educational and cultural institutions in Greater Cleveland.

The keynote speaker of the meeting, former industrialist and past U.S. ambassador to the Organization of American States, Sol. M. Linowitz, told federation members America has had enough of violence—on and off the campus.

Linowitz, chairman of the American Council on Education's Special Committee on Campus Tensions and former board president of Xerox Corp. said, "It is time to find an antidote to the poisons of dissension, distrust and disrespect that strain relations between races and generations."

Federation President Lloyd S. Schwenger, in the annual president's report, called on members "to bring to bear timeless Jewish principles on the timely concerns that press upon us."

He praised young American Jews, saying their elders must take note of their demands for more social action by Jewish institutions.

Schwenger called for continued and increased efforts by the federation to aid the inner city. "Suburbs exist only if the central city remains alive and vital," he said. "Rot and decay cannot be limited within corporate limits."

Six women were among 54 nominees to the federation's board of trustees. Schwenger said that is the largest number of women accorded the honor in the federation's history.

Receiving silver medalions, a special award in recognition for service to the organization, were Alfred A. Benesch, Myron E. Glass, Samuel Goldhammer, L. W. Neumark, Rabbi Israel Porath, Leonard Ratner and William C. Treuhaft. All are life trustees of the federation.

EISENMAN WINNER

Kent H. Smith, tireless worker in the vineyard of civic improvement, has won the Charles Eisenman Award, given yearly by the Jewish Community Federation.

Smith, 75, founder of the Lubrizol Corp., has poured his energy as well as other resources into philanthropy, the arts, museums and natural history and botanical and educational institutions of Cleveland over a long stretch of years.

One of his alma maters, Case Institute of Technology, chose him at one important juncture to be its acting president. The other, Dartmouth, has conferred on him an honorary doctor's degree.

Smith properly fits the Eisenman Award pattern: The unostentatious community leader who quietly volunteers and does a tenacious and excellent job for his town.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorial for today is from the Burlington, Vermont Free Press, in the State of Vermont. The editorial which was published July 22, 1969, follows:

AUTO ASSOCIATION POINTS OUT HAZARDS OF HEAVIER TRUCKS

WASHINGTON.—Bigger, heavier trucks on the highways would result in premature damage to pavement and bridges and would constitute a major hazard to others using the traffic lanes, the American Automobile Association told Congress.

In testimony to the House roads subcommittee, George F. Kachlein Jr., AAA executive vice president, said this was an "anti-safety bill" almost identical with the big-truck bill which failed of passage last year.

Basic research into the accident hazards posed by larger, wider trucks is lacking, Kachlein charged. "It does not seem logical to us," he said, "that Congress should be called upon to make a decision on this important matter without the factual information enabling it to estimate the safety effects of that decision. The lives and property of more than 100 million drivers are involved in such a decision and we cannot ask them to be guinea pigs by increasing the sizes and weights and then researching the effects. The research should be done first."

Public opinion as reflected in the news media, was strongly against last year's bill, he said. A review of editorial comment, he told the subcommittee, leads to the "inescapable conclusion that Americans were not last year, and are not this year, ready to accept the proposition that bigger trucks are good for them."

Kachlein quoted trucking industry statistics showing heavy trucks account for only 1.54 percent of vehicle registrations and 5.33 percent of total mileage, but are involved in 11.6 per cent of fatal accidents.

"When a truck collides with a passenger car, it is the operator and passengers in the smaller vehicle who are most likely to be killed," the AAA official said.

He reported there are 0.3 fatal injuries per 100 persons in collisions between passenger cars and a tractor-trailer combination, but "When the collision is between a passenger car and a tractor-two-trailer combination—a vehicle encouraged by the 70-foot length limit in this bill—the rate increases drastically to 13.3."

On the basis of extensive studies of the effect of heavier loads and axle weights on pavements and bridges, the AAA official said: "Men who have been charged with the responsibility of constructing and maintaining our highway plant at both the state and federal level have made it known that the increases in axle loadings permitted by the legislation will not only reduce the life of pavements in use, but will also necessitate the expenditure of billions of dollars for reconstruction of older pavements, and additional costs in highways yet to be constructed."

CHICAGO POLICE DEPARTMENT—THE FINEST IN AMERICA

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PUCINSKI. Mr. Speaker, recently it has become popular in our country to declare open season on the policemen of America. One gets the feeling that all over this Nation there is a concerted effort to discredit the police departments and I confess I am unable to suggest any valid reason for this phenomenon. But I do say that if those who discredit the police institutions of this country should succeed, the very survival of our Republic as an institution of freedom will be jeopardized as never before.

Right now there is widespread discussion about a tragic shootout which took place in Chicago last week when two members of the Black Panthers' organization were killed by police as an attempt was made to search their apartment. The police had search warrants and in the exchange of shots fired, the two individuals were killed.

We shall leave to subsequent investigation the determination of all the facts involving this shooting, but I fear that with the growing tensions under which our police departments operate, such shootings may very well substantially increase.

Our list of policemen killed in the line of duty is constantly growing and all over this Nation policemen are beginning to realize that under certain hazardous circumstances, if they stop long enough to ask a question, they are dead before they can hear the answer.

Society must try to find a better way to protect both our policemen and the citizens they serve.

We can find no comfort for an easy solution to this problem in the recent report on the causes of violence issued by the National Commission appointed by President Johnson. The Commission warned that America faces anarchy if selective disobedience of law is tolerated.

It is for this reason that I am today placing in the RECORD an excellent series which recently appeared in the Chicago Tribune and was written after exhaustive research by Mr. Casey Banas, one of the Tribune's outstanding writers.

Perhaps in better understanding the problems of the policeman and the methods he is using to cope with his day-to-day problems of mounting crime and social unrest, we can start a dialog on how better all of us can help in improving the situation. Chicago has developed the finest police force in America and it would be a gross mistake to judge the police on the basis of one or two heavily publicized incidents. It is the day-to-day effort of our police to curb lawlessness that makes Chicago's police force the best in the Nation.

Mr. Banas and the Chicago Tribune have performed a notable service in bringing this in-depth study to our attention.

The Chicago Tribune series follows:

CITY POLICEMAN: IS HE A FRIEND OR FOE FOR YOU?

(By Casey Banas)

Just around the corner may be a disturbance requiring a Chicago policeman to make a split second or hair-splitting decision which may have a profound effect on the lives of citizens he is charged to serve and protect.

His response to the disturbance confronting him may result in the saving—or the ending—of a human life. Or his initial reaction to a volatile situation may spell the difference between peace on the street or an outbreak of violence and pillage.

The experts disagree on how well he is performing. But they do agree that his task is one of the most difficult in society, and that it is becoming tougher day by day.

KERNER COMMISSION COMMENTS

Of today's urban policeman, the Kerner commission said:

"He must deal daily with a range of problems and people that test his patience, ingenuity, character, and courage in ways that few of us are ever tested. Without positive leadership, goals, operational guidance, and public support, the individual policeman can only feel victimized."

One of society's myths is that the policeman only enforces the law and does not sit in judgment of his fellow man. That supposedly is solely left to the courts.

But the Presidential Crime commission observed:

"Law enforcement policy is made by the policeman, for policemen cannot and do not arrest all offenders they encounter. It is doubtful that they arrest most of them. A criminal code, in practice, is not a set of specific instructions to policemen but a more or less rough map of the territory in which policemen work. How an individual policeman moves around that territory depends largely on his personal discretion."

QUESTIONS TO BE ANSWERED

If it is shocking to read that policemen do not arrest all the offenders they encounter, ask yourself these questions from the commission's report:

When does "noise" become "disorderly conduct?"

At what point does a "quarrel" become a "criminal assault?" When one man pushes another? Or when he punches him in the nose?

Every policeman, however complete or sketchy his education is an interpreter of the law, the commission said. And often, his judgment requires the wisdom of a Solomon, as in this theoretical case outlined by the commission:

A boy hurling a rock through a school window obviously is committing the crime of vandalism. But it is not quite clear whether the community will be served better if the boy is arrested or if he is taken home to his parents.

Will his parents properly chastise him? Can they control him? Has the boy, unbeknown to the policeman, broken many windows?

But the policeman catching the boy in the act—at say 10:16 p.m.—must make his decision on the spot.

Lawyers take months to contemplate what a policeman must decide in a split second, observed Capt. Richard Lionhood, commander of the police department's task force.

And now the policeman finds himself in a relatively new crossfire described by the Kerner commission:

"One side, disturbed and perplexed by sharp rises in crime and urban violence, exerts extreme pressure on police for tougher law enforcement. Another group, inflamed against police as agents of repression, tends toward defiance of what is regarded as order maintained at the expense of justice."

Spokesmen for the latter group will often charge that the police is "an army of occupation in the ghetto."

COMMUNITY SUPPORT NEEDED

Underscoring this idea, the Kerner commission said:

"It is axiomatic that effective law enforcement requires the support of the community. Such support will not be present when a substantial segment of the community feels threatened by the police and regards the police as an occupying force."

Further complicating the law enforcement process is the seemingly growing public practice of winking at crime and injustice. The Presidential Crime commission observed:

"Each time a citizen fails to report an offense, declines to take the common sense precautions against crime his police department tells him to, is disrespectful to an officer of the law, shirks his duty as a juror or performs it with a biased mind or a hate-filled heart, or refuses to hire a qualified man because he is an ex-convict, he contributes his mite to crime."

The law enforcement task for Chicago's 12,174 policemen is becoming increasingly difficult because of what Police Supt. James B. Conlisk calls "the permissiveness of society." Veteran police watchers, such as Virgil W. Peterson, executive director of the Chicago Crime commission, agrees with Conlisk that lack of respect for police is on the upswing, particularly among young people.

ANTAGONISM, DERISION COMMON

"The minute police are required to perform a proper police function," Peterson said, "they often meet with antagonism, derision, or even violence. Whenever a confrontation involves police, the immediate tendency is to place the blame on the policeman. People start out with the premise that the police must be wrong."

In some ghetto areas, the police and some elements of the community are at war with each other.

In one example of less than three weeks ago, three policemen were trapped in a burning elevator in a near north side housing project while investigating a report of a rape. Someone short-circuited the elevator, trapping the men, police said.

The officers said that when they tried to escape by climbing out of the top, residents pelted them with bottles, garbage, and finally, flammable liquid which started the fire. The policemen said their attackers fled when reinforcements arrived.

PHYSICAL FORCE SUPPORTED

Some policemen will even argue that physical force is necessary when ghetto residents heap verbal abuse upon them. Four policemen, three white and one black, told a reporter they do use force to repulse some taunts. If they did not, they contended, the same antagonist might come at another policeman the next time with a knife or a gun instead of with his words.

Jay A. Miller, executive director of the Illinois division of the American Civil Liberties union, said citizens "are at the mercy of the policeman's best or worst judgment. He has no restraints."

Police officials quickly dispute Miller's charge. They point to the internal investigations division which orders a probe of every complaint brought against a policeman. But they do not give details on the number of police brutality charges.

Miller does not blame the individual policeman for his plight. The policeman—who reflects "the establishment"—is left frustrated because "society is unwilling to deal with the causes of crime and disorder," he said. "If society dealt with the causes of crime, we would only have left a few professional criminals."

The Presidential Crime commission offered this analysis on why crime is highest in the slums:

"The conditions of life there, economic and social, conspire to make crime not only easy to engage in but easy to invent justifications for. A man who lives in the country or in a small town is likely to be conspicuous, under surveillance by his community so to speak, and therefore, under its control.

"A city man is often almost invisible, socially isolated from his neighborhood and therefore incapable of being controlled by it. He has more opportunities for crime. At the same time in a city, much more than in a small community, he rubs constantly, abrasively, and impersonally against other people; he is likely to live his life unnoticed and unrespected, his hopes unfulfilled."

Today, a new type of policeman is needed for Chicago, Miller said. "He needs a tremendous amount of sensitivity and must be a social anthropologist as well as knowing techniques of police action," he emphasized.

"The police officer must have a greater background in social philosophy," agreed Conlisk.

POLICE TRAINING INCREASED

In the view of many, Chicago's police department took its biggest leap forward in training at the beginning of 1969. It increased its academy program from 14 to 31 weeks. Much of the new training is college-level instruction in the behavioral sciences.

The new recruits will need the added training to cope with a society in turmoil because their profession is growing increasingly dangerous. In 1968, 41 Chicago policemen were wounded in the line of duty. This year, that mark was passed during August.

Altho the new training program places an unprecedented emphasis on the value of college-type education, top Chicago police officials oppose any suggestion to start a management training program to attract college graduates into law enforcement careers.

Regardless of educational qualifications, the new policeman begins at the lowest rung of the ladder of a patrolman. There is no entry part way up the ladder as in business.

Top officials interviewed were unanimous in contending that a management training program would have a devastating effect on morale. They all reached the top by starting from the bottom. And of the 70 top policemen, less than half have college degrees, Conlisk said. He is among the "less than half" group.

TECHNOLOGICAL REVOLUTION

Like other metropolitan police departments, Chicago has not fully tapped technological resources to fight crime.

The National Commission on the Causes and Prevention of Violence said: "The technological revolution which has affected nearly every aspect of our life has largely bypassed law enforcement; the principal reason is the low priority we as a people have placed on crime prevention research compared in other technological goals."

And the Presidential Crime commission observed: "More than 200,000 scientists and engineers are helping to solve military problems, but only a handful are helping to control the crimes that injure or frighten millions of Americans every year."

UPDATED TRAINING TURNS OUT A NEW BREED OF POLICEMAN

(By Casey Banas)

Chicago's police recruits study in a 112-year-old building, but the training program is an up-to-date effort to develop a new breed of policeman that is psychologically equipped to deal with a society in turmoil.

The Chicago Police academy, 720 O'Brien st., one block from the fading Maxwell street market, is housed in a building once branded unfit for school children. But the program is undergoing rapid change as the police department continues its philosophical shift

about training from just vocational instruction to vocational instruction plus liberal arts education.

Last January, training of police recruits was increased from 14 to 31 weeks, or from 490 to 1,085 class hours. For several years, Capt. Robert McCann, academy director, has been trying to gain approval for more emphasis on what he calls the "real people" subjects. He finally has succeeded.

MOSTLY SERVICE CALLS

Only 26 per cent of citizens' requests for police are for criminal-type calls. The other 74 per cent are service calls—such as family spats—where the handling of people may be the key ingredient for restoring peace. Until this year, the academy had given little training in instructing Chicago's future policemen on understanding the people and cultures that will confront them.

"When I became a policeman 23 years ago, I had only two weeks of training," recalled Lt. Stephen Flaherty, academy training director.

"Most recruits expect to learn how to write tickets, use handcuffs, shoot a revolver, and direct traffic," explained Lt. Gerald J. Pierce, another academy officer. That's just a very, very small part of their training.

When a recruit in Chicago completes the nation's longest police training course, he will be instructed in 146 subject areas. In addition to the traditional types of police vocational training, he will have had a variety of experiences ranging from how to deliver a baby to a philosophical discussion of the Kerner Commission report.

FIVE-WEEK FIELD TRAINING

Five weeks is devoted to field training with the recruit spending two weeks with the patrol division, and one each with the detective and traffic divisions and in a district station. The recruit will work side-by-side with a beat patrolman, lockup keeper, desk officer, and detective.

For many, the experience is an eye-opener, like the recruit who recalled answering a disturbance call with a veteran patrolman. Some in the crowd threatened the recruit, who blurted out: "What are you doing? I'm a policeman!"

Recruits spend 35 hours in the driver simulator trailer, sharpening their skills behind the wheel. The academy does not assume that a recruit is a good driver, and trains him thru the technique of driving in a mock-up car while viewing films of traveling along streets.

"Look at how slow they are on the brake," grumbled Patrolman Gus Banakis, the instructor, as a class of recruits failed to respond fast enough when a car cut in front of their "auto" on the screen. "What will happen when they get in a patrol car?" he asked.

Other innovative training sessions are the all-day crime scene and mock trial. In the crime scene exercise, recruits watch as an outdoor armed robbery is staged. Two detectives chase and catch two suspects, cornering them after shooting at the suspects [blank cartridges, of course) The scene is moved indoors for interrogation.

At the mock trial, recruits observe actual attorneys and judge to learn, then analyze in detail, what happens in court.

But the most intriguing part of the intensified program is in the social science unit, increased from 37 to 287 class hours. Now, recruits study the equivalent of 12 semester hours of college-level courses, including two in law enforcement and two in behavior science. They also are in an experimental course in applied psychology totaling 70 class hours.

The key move in the new training came last year when McCann and Oscar Shabat, City college chancellor, worked out a program for 12 City college instructors to teach 25 per cent of the 31-week course. Recruits study at length the role of the policemen in urban society, current social problems, and the philosophical and historical background of contemporary law enforcement.

KERNER REPORT DISCUSSED

Robert Stout, assistant professor of political science at City college's Loop branch, said the hottest discussion in this behavioral science class developed the day recruits took up the Kerner report. For discussion purposes, he asked the recruits to assume as true the Kerner report charge that white racism is the root of the nation's social problems.

"Then," Stout suggested, "shouldn't only black policemen be in the ghetto?" Most recruits vigorously disagreed.

"When you hear police lament, 'We're not appreciated,' what they're really saying is that they want more respect and status in society," Stout said at another session. He exposed the recruits to a generous portion of anti-establishment views.

"In the police subculture," Stout continued, "the police tend to enforce laws that the dominant part of society wants enforced. Policemen tend to be instruments of those benefitting from the status quo.

CRIME STATISTICS QUESTION

"There's a tendency on the part of police to negate all criticisms. It is said that part of the police's role is to produce statistics to show they are doing their job. There's a big battle about the significance of crime statistics. There is suspicion that statistics are controlled. . . ."

During the class, one recruit was visibly upset with the textbook, a paperback on the sociology of a policeman. Finally, he rose and charged the author was anti-police, then added, "Some of this stuff implies that police aren't much more than morons." Stout disagreed, and the pair had an animated discussion.

In a class on law enforcement, Capt. John Ascher, retired chief of detectives, lectured on police history. The recruits were told that for years the ward committeeman had control of half the detectives in his area. They heard how the spoils system affected police department appointments until the civil service system of competitive examinations brought change.

McCann's most innovative project is to refine a New York police training experimental course on family crisis intervention to meet Chicago's needs.

PILOT PROGRAM DEVELOPED

A sociologist found that 22 per cent of policemen killed in the line of duty were answering disturbance calls. So New York developed a pilot program to train policemen in a Harlem district on what to do when answering a call involving a family fight. The result has been no police fatalities from such disturbances in that district.

This is the academy's applied psychology course, but McCann has expanded the content to include what a policeman should do in other disturbances, such as barroom brawls and fights between motorists at accident scenes. Over the years, policemen have learned that combatants may suddenly join forces to turn against them upon arriving on the scene.

McCann is even considering inviting black militants and gang members as guest speakers at academy classes to help the recruit understand what's in store. But he emphasized such a move would need to be handled "pretty gingerly."

That would mean discussions on militancy and gangs before and after the speaker's appearance. These subjects are topics in other areas of the training program now.

COP TRAINING COMPARED

Here's how the curriculum of the police academy has changed since the switch from a 14- to 31-week program:

	Hours
Instructional area, old:	
Administration	39
Criminal law unit	91
Firearms and drill unit	50
Physical training unit	36
Police operations unit:	
Department standards	13
Field procedures	138
General and special studies	26
Investigation	73
Staff services	23
Social science unit	37
Total	490
Instructional area, new:	
Administration	85
Criminal law unit	120
Firearms and drill unit	92
Physical training unit	62
Police operations unit:	
Department standards	28
Field procedures	305
General and special studies	32
Investigation	46
Staff services	28
Social science unit	287
Total	1,085

MORE SENSITIVE POLICEMEN?

Will this new type of training produce a more sensitive policeman attuned to current urban needs?

McCann emphasized the difficulty of the academy to change a human being in 31 weeks that society has been molding for 20 or more years. But he added that the younger the recruit is, the more likely the training will make him sensitive.

"It's quite difficult to change a man's attitude after 26," he explained.

"We try to tell recruits, 'Don't act according to how you feel, act according to what the law says.' But in a pressure situation on the street, they may forget what they learned here."

Who are the men who become policemen and what measures are taken to insure they are fit to wear their badges!

RECRUITS MOSTLY WHITE

Police officials made available results of questionnaires completed by six classes of recruits. Average age: 23.3 years. Of 183 recruits, 150, or 81.9 per cent, were white, and 27, or 14.2 per cent, were black. Six were from other races.

Officials said the number of Negroes applying is declining, ostensibly because of the growing view in black communities that black policemen are "Uncle Toms" and traitors to their race. Five years ago, the department made specific efforts to recruit Negroes, but is not doing so now. The reason given is a huge backlog of applications.

Of the 183 recruits, only nine are college graduates, altho 97 did attend college at some time. In most cases, this was one or two years in a junior college. In a class of 35 recruits, usually one, or at best two, is a college graduate. Academy officials eagerly pointed to one class with six college graduates, a rare exception.

Previous jobs of recruits included truck drivers, machinists, stock clerks, construction workers, bank tellers, bartenders, office managers, salesmen, police cadets, and Chicago transit authority policemen.

PASSING SCORE OF 70

Of every 100 men who apply to take the civil service examination for policemen, only eight will enter the academy. Candidates must receive a passing score of 70 on the test.

"We try to get policemen with an intelligence quotient of 105," explained John C. Bucher, police department personnel director. "This insures, we hope, they will have the intelligence to take the training."

Along with the civil service test, candidates

take three psychological exams. Results are evaluated by a psychological consultant firm, then are forwarded to detectives to help in background checks. Candidates, meanwhile, will have been given medical examinations, and 50 per cent fail.

The background check results in elimination of another 40 per cent of remaining candidates. Detectives interview former employers, teachers, and neighbors to determine if the candidate has personality and character flaws that might make him unfit to be a policeman.

Even after a candidate is accepted for training, academy instructors look for psychological problems. They have held sessions with a psychiatrist to learn how to spot signs of mental and emotional problems.

If an instructor suspects a recruit has such a problem—and this does happen—he tells the academy director. The recruit is ordered to report for an interview with a three-member psychiatric board, and he might be dismissed after the session.

But 92 per cent of recruits beginning training graduate from the course. In 1968, 1,163 recruits successfully completed training from the 80 instructors.

The physical setting for the classes can be most charitably described as deplorable. When asked about the building's age, officials quickly point to the concrete slab over a second-floor window which proclaims, "Foster School 1857."

JOKE ABOUT CONDITIONS

"You can still hear the wailing of the suffering from Camp Douglas," wryly noted Capt. Ascher. Camp Douglas was a Civil war camp on the south side, and the academy building was used as a hospital for its wounded.

The roar of the trucks from the adjacent Dan Ryan expressway often drowns out lecturer and recruit during classes. And the smoke wafting into classrooms from the Vienna sausage factory across the street is a standing joke among recruits and academy officials.

And one recruit, asked what part of the training he disliked the most, replied: "The day we went to the fire academy to see their modern, air conditioned facilities."

RADIO DISPATCHERS CALL THE SIGNALS FOR POLICEMEN ON PATROL

(By Casey Banas)

The unsung hero—and the quarterback—of the Chicago police department is the radio dispatcher.

He is the link between the citizen calling POlice 5–1313 for help and the patrolman on the street in the squad car. During peak week-end evening hours, he will talk nonstop until relieved, attempting to keep up with the citizen calls.

But the dispatcher is frustrated because of the mounting number of noncrime calls for which he must, by department directive, assign a patrolman.

In 1966, citizens dialed POlice 5–1313 a total of 2,817,804 times. The figure for 1967 was 3,105,292 and in 1968 there were 3,261,738 calls. And statistics show that the increase for the first eight months of 1969 exceeds the increase for all of 1968.

INSTANTANEOUS INFORMATION

With computerized services at their fingertips, the dispatchers can provide near instantaneous information to the policeman on the beat. Three examples:

A policeman detaining a suspect wants to know if the man is wanted for any other offenses. At the dispatcher's side is a "computer inquiry terminal" with a screen and keyboard. Information about the suspect is typed out, and the computer will flash back information on the suspect's background.

A motorist stopped for a traffic violation cannot prove he owns the car. The patrolman calls the dispatcher, who calls the "hot desk" in an adjoining room. The "hot desk" clerk has four by five inch microfilm cards, each with information on 1,000 automobiles. By projecting the card on a screen, the clerk can find the license plate number, owner's name and address, serial number, and make, year, and model of the car. If the car is not listed on the microfilm card, the clerk has a direct teletype link to the secertary of state's office.

A suspect arrested says he just came to Chicago from Florida. The "hot desk" has a teletype link to the National Crime Information center in Washington.

A clerk typing the suspect's name and description receives a reply within seconds that he is wanted in Florida. The computerized answer even confirms the suspect has tatoos of two panthers and a girl on his back. Information on all persons arrested is routinely checked with N. C. I. C. Nearly every day, the computer finds someone wanted out of state.

But overshadowing the technological abilities of the communications center is the issue of whether the police should respond to all calls of citizens. During times of normal loads, a police car will be sent when a citizen calls—regardless of how trivial the request is.

Noisy ball games in streets, injured squirrels, and family quarrels are among the types of noncrime calls that police must answer.

Dispatchers interviewed were unanimous in urging that the police department institute a policy of screening calls. "People constantly call on stuff that doesn't amount to a hill of beans," said one supervising sergeant in the communications center.

PLAGUE OF FALSE ALARMS

Just as the fire department is plagued with false alarms, so is the police department the target of phony calls. While a reporter was monitoring calls from the public, a citizen called to say a policeman was being beaten at a south side corner. The dispatcher immediately issued a "policeman needs help" call. Three cars responded, but there was no activity at the corner.

Two separate high level studies on improving police operations will recommend that the police department screen calls to determine whether a policeman really is needed. But screening faces an uphill struggle.

Police Supt. James B. Conlisk is dead set against it.

"I think it would be a mistake to do this," Conlisk said. "I think we are responding to the most important thing in the mind of the caller."

PUBLIC RELATIONS CITED

Conlisk candidly admitted that a second reason for his stand is the public relations aspect to answering calls for service. He noted that "too frequently, the contact with a policeman is unpleasant." So getting that cat out of the tree or chasing the noisy teenagers off the corner helps the police image with the citizenry.

The close attention to the service function of the police became department policy after O. W. Wilson became police superintendent in 1960. Conlisk has intensified the policy. During the Wilson era, a squad car would not be dispatched unless the caller gave his name.

Now the caller is asked, "Would you like to give your name?" If he declines, a squad car still is dispatched to check out the complaint.

"Compare this to a little snowball," one dispatcher said "When it gets to the bottom of the hill, it's monstrous. We can't handle all the calls. It's beautiful to have public relations, but this is ridiculous."

A WEST SIDE SHOOTING

During one hour, only one call handled by the dispatcher involved a crime. A man was shot on the west side. The others were a variety of domestic and teen-age disturbances.

The policy of providing service often backfires when no cars are available to answer bonafide emergencies. One high police official revealed that on an August week-end, 240 emergency calls went unanswered because policemen were too busy.

The communications center keeps a log of times when districts have no cars available because of the flood of calls. The "no cars available" report for the 4 p.m. to midnight watch on Aug. 18 showed 26 entries, including periods of up to one hour, 34 minutes when a district had no squad cars free for assignment.

Activity is so hectic on a Friday or Saturday evening that overworked dispatchers will assign calls to squad cars in pairs. A policeman will be told to check on teen-agers in an alley, then a domestic disturbance. When he's finished, there's a backlog of other calls to answer.

COMPLAINT MAY BE FILED

If a dispatcher fails to send a police car to answer a citizen's call, the citizen may file a complaint. The internal investigations division must initiate an investigation. The dispatcher, his supervising sergeant, the watch commander and the communications center director all must answer to the complaint of why the squad car was not sent out.

Last July 4 during an eight-hour period the communications center answered 8,186 calls on POlice 5–1313. Most were complaints about open fire hydrants and fireworks.

When disturbances erupted in the wake of the assassination of Dr. Martin Luther King Jr. in April, 1968, Mayor Daley announced a 7 p.m. curfew for people under 21 years of age. The police received 19,000 calls about the curfew. People asked whether the curfew applied to them. Among the callers was a young man who said, "I'm big for my age."

Several dispatchers asked a reporter: "Have you heard about Detroit?"

DETROIT PROGRAM DESCRIBED

In 1965, the Detroit police department formed a communications committee. A prime objective was to recommend some action to insure vital police service was available when needed. Calls for service had been increasing 50,000 a year.

The committee recommended that calls be screened. In the first year of operation, the number of times a police car was dispatched decreased from 765,095 to 658,617. Detroit has specific guidelines on when a policeman should not answer a citizen's call.

"Family trouble is basically a civil matter," the order said. "It is not a police function to arbitrate or undertake negotiations in marital difficulties." So the Detroit dispatcher has the names and telephone numbers of agencies to refer the caller. In Chicago, a policeman will be sent to the scene.

FIVE-YEAR PLAN CONSIDERED

The Detroit guidelines include instructions on where to refer citizens calling about injured or dead animals, minor traffic accidents, misdemeanor assaults, destruction of property, larcenies, landlord-tenant troubles, and sick or injury calls. A Detroit policeman is not sent to the scene except in specified unusual circumstances.

The Chicago police department has formed a communications committee to develop a five-year plan to improve operations. The key recommendation for the first phase under consideration is to equip all beat patrolmen in squad cars with portable radios next year so they can call for help if emergencies arise while answering calls. An experiment of the portable radio concept is undergoing testing in the Town Hall district.

The tentative recommendation for the second phase—for 1971—is a policy of screening calls. A program similar to Detroit is envisioned by some police communications officials.

But high police officials said the only way a screening policy will be accepted by the

public is if top city officials work diligently to show the public it will be served better if more policemen are available to respond in emergency situations. Only the concerted efforts of the mayor and the police superintendent could persuade citizens that screening is in their best interest, policemen said.

ANTIQUATED SYSTEM UNTIL 1961

In seven inner city police districts and in the communications center, the department has a "power shift." Extra men and extra cars are on the street in the peak hours from 6 p.m. to 2:30 a.m. But still the need far outstrips the manpower.

Police communications have made giant leaps forward in the last decade. Before the present communications center went into operation in 1961, the ability of police to respond to any call—much less an emergency—was severely limited by an antiquated system.

If you called a decade ago, here's what would have happened:

The person answering the call would have written the necessary information on a card. The card would be routed on a conveyor belt into another room to one of three dispatchers.

Perhaps 30 minutes later, the dispatcher would assign a squad car to respond to your plea.

CRIME "LOST" ON FLOOR

Even worse, police officials admitted, the card might have fallen off the conveyor, and a crime would have been "lost" on the floor. Periodically, someone would look on the floor for lost cards.

Asked how rapidly a citizen can now expect the police in an emergency, Conlisk replied: "We aim for two minutes." The routine call may take an hour or more to answer, but priority is given to the emergency call.

If your call is not answered within 12 seconds, it goes to an auxiliary desk. If it's not answered within 30 seconds, the call is automatically switched to a third position. More than half the calls are answered within 12 seconds, and only 8 per cent result in waits of more than 30 seconds.

In the communications center, the city is divided into eight zones. These correspond to eight groupings of telephone exchanges so a citizen's call is automatically routed to a console serving his zone.

EIGHT ZONES IN CITY

Calls are routed directly to dispatchers at three-man consoles. Two take the citizens' calls and the third assigns cars to answer those calls. When a citizen starts talking, the dispatcher will write the information on a card.

An illuminated map above the console shows the boundaries and numbers of all patrol car beats. If the car is patroling the beat, the light is on; if the policeman has been assigned to answer a call, the light is off. At a glance, the dispatcher can see what cars are available for assignment.

Each assignment card is stamped three times in a time clock: when the person calls, when a car is assigned, and when the policeman reports he has completed the call. All conversations between citizen and dispatcher and policeman and dispatcher are recorded. Tapes are kept for 30 days.

The police department thus has both a written and oral record of all calls for service and what has been done about them.

Fighting Crime Is Just Part of Policeman's Job

(By Casey Banas)

What is your first mental impression when the word "policeman" is spoken?

A callous, tough-looking man ready to swing a club? Two men in blue with revolvers drawn chasing two fleeing robbers down the street? Someone writing out a ticket for that red light which you obviously did not run? Or that of a dedicated public servant?

A Chicago policeman devotes only 26 per cent of his time to crime-related activities. The remainder is spent providing services to citizens.

The policeman patroling the streets in his squad car, said Capt. Robert Woodburn, 16th district commander, becomes much more than a policeman. He's a priest, a judge, and a social worker.

"Take a family quarrel. He wants her arrested, she wants him arrested. The policeman must be a Solomon to know which way to go. If at all possible, he doesn't arrest either."

ON PATROL IN 2 AREAS

On successive Fridays, this reporter rode the 4 p. m. to midnight watch in two contrasting areas—the beats covering the Addison-Harlem area on the far northwest side and the Madison-Kedzie neighborhood on the west side.

Tomorrow's editions will include an account of an evening in Fillmore, the police district with the highest crime rate. Today's story is about a ride with a policeman in the Jefferson park district, which has the least amount of crime in Chicago. This is how it went:

Patrolman Howard Hagen, 25, is the relief driver for beat 1610, the squad car patroling the 2.5 square mile area bounded by Central, Belmont, and Oriole avenues and Irving Park road.

Hagen scans the district's crime report for the last 24 hours. It has only six items—two stolen cars, three thefts of various articles from autos, and a burlgary of a radio and record player from the educational building at Chicago State hospital.

ASSIGNED TO CITIZEN'S CALL

"I'll start with a cup of coffee," Hagen says leaving the station for what is expected to be a leisurely pace. But after eight minutes on the street, he is assigned by a radio dispatcher to answer a citizen's call about "a theft from auto."

Six minutes later, a business man is telling Hagen that a stereo tape recorder had been taken several hours earlier from a convertible with its top down. He interviews the citizen, looks over the car, then leaves.

While sipping a cup of coffee, Hagen fills out the first report of the watch, only to discover he failed to get the license plate number of the convertible. Returning to the scene, he finds the car is gone, but the reporter notices 150 feet away what appears to be an abandoned auto.

All tires on the 1957 model car are flat, the windshield is smashed, and the interior is slashed. The squad car's appearance creates the biggest crowd of the watch for Beat 1610—six adults and seven children.

A state driver's license examiner comes out of his house to complain that the car has been there for six weeks. A tow sticker was put on the window several weeks ago, but nothing was done. The owner of a nearby cleaning establishment says that one of his workers is sore because the car has occupied his usual parking space. Others tell how teen-agers sleep in the car at night and use it for necking sessions.

Hagen checks with his dispatcher to determine if the car is stolen [it isn't], places another tow sticker on the window, and fills out an abandoned auto report. The process takes 28 minutes.

Back on patrol, Hagen waits for a light to change at Addison street and Laramie avenue. "There goes a car thru a red light," he exclaims, and gives chase eastbound on Addison. Two blocks away, at Lavergne avenue, the car is curbed.

The motorist has a Texas driver's license, which cannot be used as bond on a ticket. So Hagen instructs him to follow the squad car to the station. He is not permitted to tell the driver the amount of cash bond he must post at the station [it is $25, and the man won't find out until more than 30 minutes later.]

On the way to the station, Hagen observes another driver running a red light, but ignores the offense. He can't pursue him because "one person is my primary responsibility," and that person must not be abandoned.

Once at the station, Hagen calls the "hot desk"—the records and inquiry section—at police headquarters to find out if the driver has any other warrants outstanding against him. But the "hot desk" computer has broken down, and it takes 26 minutes for someone to check manually and report to Hagen that the man has no record.

Meanwhile, the man, his wife, and fidgety 3-year-old daughter stand and wait. At last, the policeman at the desk, Sgt. George Murphy, asks the driver: "Do you have $25 United States currency with you?" The man finally learns the amount of his bond, posts it, and leaves the station. Hagen urges him to tell his side to the judge at his court appearance.

"Most cases going to Traffic court are dismissed," Hagen said, "It bugs me, but sometimes that piece of paper [the traffic citation] makes a better driver."

AUTO CURBED BY POLICEMAN

Driving on Central avenue near Giddings avenue, Hagen sees gas spilling out a tank of the auto ahead. He curbs the car, is told by the driver that the gas tank cap has been stolen, then instructs the man to buy a new cap promptly.

Twenty minutes later, Hagen is directed by radio to answer a "damage to property" call. On the way, four children in an adjoining car wave and offer a cherry, "Hi, policeman." The squad arrives on the scene nine minutes after receiving the call. That will turn out to be the longest elapsed time of the seven calls of the watch.

A woman takes Hagen to her rear porch and points to a ripped screen. She says she spotted a young man reaching inside the screen to open the back door. Upon confronting the intruder, she quoted him as asking, "Is Bob here?" Then he ran into the alley and disappeared.

After six minutes of talking with the woman, Hagen writes the report. It takes 17 minutes.

"What's that crowd doing here?" Hagen asks, as his squad car approaches Hutchinson street at Daramie avenue. Moments later, he sees one car smashed against an apartment building and another wrapped around a tree. Bystanders say that a woman and two children were seriously injured, but were taken away by ambulance.

Back on patrol, Hagen recalls a burglary two days before when a diamond ring was taken from a bedroom while a woman was mowing her front lawn. He wonders if the young man asking for Bob and the ring thief are the same person.

Then comes another call: "Ball game in street at 4100 Parkside avenue."

Who called? "Probably some older people who want peace and quiet," Hagen answers.

BALL GAME NOT FOUND

There was no ball game at 4100 Parkside av. "Would you believe a 2 E-Edward?" Hagen asked the radio dispatcher. [In police code, "2" stands for "disturbance, teen-age" and "E-Edward" for "perpetrator gone on police arrival."]

Four hours of patrol have gone by and Hagen pulls into a restaurant at Addison and Harlem for dinner. But he spots three teenagers frantically trying to smother with a blanket a carburetor fire in a car parked in the alley.

Hagen reaches for his fire extinguisher and motions the boys away. But the fire extinguisher doesn't work. A teen-ager races across

the street, comes back with another fire extinguisher, and quickly puts out the blaze. Fifteen teen-agers gather, and most express dismay that the fire is out.

Back on patrol 37 minutes later, Hagen is directed by radio to assist Car 1611 on a call about "a vicious man in a store." For the first time, he switches on his blue bubble light and flashes his spotlight to and fro to warn cars ahead to the curb. In five minutes, he drives 3½ miles to the scene.

But there's no disturbance. The patrolman driving Car 1611 is being told by a supermarket manager that a man was "lurking around the safe for 10 minutes at closing time." He called the police because he wanted to be "safe rather than sorry." The man left by car moments before Car 1611 arrived.

Only eight minutes elapsed after leaving the scene before the next assignment, "theft of bicycle." A mother told how her son won an $80 bicycle by selling 300 boxes of candy in a Boy Scout contest. Usually the bike was stored in the garage, but it was left out that night for a special reason.

The mother, clutching a pack of party invitations, explained her son was going to deliver them to notify her daughter's friends of a surprise birthday party. But somebody stole the bicycle from the back yard. The bike had been registered with the police department. Hagen explained that the police recover hundreds of bicycles but are unable to find the owners. So the bikes are auctioned periodically.

"That's four paper jobs already," Hagen said, sitting in the squad car to write a theft of bicycle report. "We're above average." "Average" for him is two or three.

LOOKING FOR A BICYCLE

"I'd like to find that bike," Hagen said. He drives thru nearby Merrimac park and past two schools on the outside chance the thief might be there. The three areas are deserted.

Hagen hears the district's vice car report on the radio it has arrests at Irving Park road and Linder avenue. "Probably teens drinking," he says, heading for the scene.

An unmarked police car is parked at the curb at Portage park, and two detectives have in custody five youngsters—all about 13 years old. One boy denies drinking. "Suppose I take you to your father and let him decide," the detective offers. There is no reply. A squadron comes and takes the five away to the station where they will be released to their parents.

"Now let's take care of the special attentions," Hagen says.

A "special attention" is a specific request by a citizen for service. Hagen has three orders: The first to check a house on Nora avenue because the family is on vacation, the second to watch a vacant house on Plainfield avenue because a neighbor has reported that teen-agers have broken in and have damaged property, and a third from a business owner on Belmont avenue who said teen-agers wander on his roof at night and park in the rear parking lot to drink.

Hagen checks the Belmont avenue store. No one is there. The two other "special attentions" went unchecked during Hagen's watch.

On the radio, he heard that his supervisor, a sergeant, was meeting another patrolman at a closed gas station at Irving Park and Central. Patrolmen in the district normally have their reports checked by their sergeant during the watch, so Hagen heads for the gas station.

The next call came at 10:57 p.m.: "Dogbite at Northwest hospital." A hospital must call the police on any dogbite case because of the threat of rabies. A 4-year-old girl was bitten on the upper lip by a neighbor's dog and needed three stitches.

The dog's owner, a mother with two young daughters, was petrified as Hagen filled out the report and told her she must take the dog to her veterinarian or the city pound for a 10-day rabies check. The woman chose her veterinarian, but didn't know his name. She said she had it at home.

Hagen went to her home, and asked to see tags for rabies shot and dog license. The woman had only 1968 tags and was informed she would receive a nontraffic summons and be required to appear in court.

ADVICE TO A DOG OWNER

Only the supervising sergeant has the nontraffic summons book, and Hagen phoned him and waited. "Will I be fined?" the woman asked. Hagen said probably not, provided she showed the judge proof of a current rabies shot and a dog license.

At 11:55 p.m., 58 minutes after receiving the dogbite call, Hagen left the owner's home.

Since Hagen started patrol at 4:30 p.m. [roll call was 4 p.m.], he was to be on the street until 12:30 a.m. There was yet one more call, "a suspicious man in an auto."

For the second time, Hagen switched on the blue light and drove at speeds up to 50 miles an hour to reach the scene 2½ miles away in three minutes. There was no suspicious man, but a woman came out of a tavern to say the man had just left.

She said the man was her ex-husband, who was tampering with her car as part of a continual pattern of harassment. Hagen told her to start the ignition, and the engine ran normally. The policeman explained that she could go to court to get a warrant for his arrest. The judge may order him to stay away from the woman and her property for six months, he said. If the order is violated, he could be sentenced to jail and fined for contempt of court.

Finally, Hagen drove back to the station, ending his watch. He had made no arrests, fired no shots, and seen no crimes committed. As usual, his primary role was in providing service to the people.

FILLMORE IS PRIME BATTLEGROUND FOR CHICAGO'S POLICE

(By Casey Banas)

Patrolmen Gerald Gregg, 24, and Tyrone Foster, 26, cover beat 113, a six-square-block area in the vicinity of Fifth and Central Park avenues. Their Fillmore district, which has the city's highest crime rate among 21 police districts, includes the west side areas leveled by fires and plagued by rioting in April, 1968.

Fillmore has two men in most, but not all, squad cars. It is a district where the beat policeman considers himself in danger at all times. Foster, a Negro, drives home that point in his first comment.

One rear door of the squad car is stuck, so the Tribune reporter and photographer team use the other rear door to climb in. Foster takes pity on the reporter sitting next to the jammed door.

JAMMED DOOR MAY BE TROUBLE

"You might have to get out of the car in a hurry," he explains. "The car may come under fire, or bricks may be thrown at it."

Fillmore's crime report for the preceding 24 hours includes 30 items. Among these are one murder, 12 burglaries, a variety of stolen autos and attempted thefts, and one attempted rape.

Within one minute after leaving the station, the first call is received over the police radio: "Disturbance with teens." In six minutes, Gregg and Foster are on the scene, a three-story dilapidated tenement on Fifth avenue. A group of blacks standing on the sidewalk eye the policemen with suspicion.

The caller is supposed to live in a third floor apartment, but the woman who opens the door insists she did not call. "Somebody probably changed his mind after calling," Gregg notes.

HEAT, HUMIDITY, CLUSTERS OF PEOPLE

The temperature is in the 80s, the humidity is high, and clusters of people are on the streets to escape the heat of the apartments. "On a day like this, we wish for rain or a hailstorm," Foster says.

"When it's hot like this, a lot of people are milling around," Gregg adds.

"They stay up later and drink more," Foster continues.

"What time is your lunch break?" the reporter asks. The question hits a tender nerve. The two policemen explain that department regulations forbid two patrolmen from taking the 30-minute lunch period together.

"Send him to lunch and I get killed," Foster said, pointing to Gregg. "Send me to lunch and he gets killed."

The thinking at headquarters, Greggs theorizes, is that top police officials want a squad car in a high crime area on the street thruout the entire eight-hour watch. He explains that instead of following the only-one-policeman-can-eat-at-a-time policy, they quickly grab a hamburger in the car together, than resume patrol.

Their next assignment is a burglary call. As the squad car pulls in front of a house, a dozen teenagers are chatting on the front porch. "There's 12 suspects right there," Foster says.

Inside, a husband and wife tell the policemen that a burglar has stolen a $300 stereo set, a diamond ring, four pairs of tailored pants, a collection of pennies, and 20 record albums out of a collection of 100.

"I'm getting tired of this," the wife says, explaining it's the second burglary in two weeks in their home.

BURGLARS COULD BE NEARBY

Foster takes the husband aside and says: "Man, they're right out there." He tries to convince the man that the burglar probably is right on his front porch, but he refuses to believe it.

As Gregg writes the burglary report, Foster explains how the Fillmore policeman—under constant pressure is dealing with the seamy side of life—must find comical aspects in his job to help ease the strain.

He told an anecdote about the time he and a new partner just out of the police academy answered a disturbance call. Foster was attacked by a man.

"We started in the apartment and wrestled all the way down the stairs," he recalled. "Man, we did the whole thing.

"My partner was just standing there. Finally he said, 'You're doing a terrific job.'"

CLEARS WIFE IN STABBING, DIES

There was the case, Foster continued, of the man who was stabbed and claimed he rolled over a knife while peeling apples. He said the victim was stabbed by his wife. "He cleared her, then died three days later," he said.

Foster's story telling was interrupted by a "man with a gun" call. Gregg turned on his blue light and raced to the scene in four minutes. Three young boys approached the squad. "We're ones that called," one said. They said a man pulled a gun on them while they were playing in a vacant lot. The boys pointed out the house where the man lived and described the gun.

The man said he had a gun, but denied threatening the boys. He said he owned the vacant lot and didn't want the boys on it. The gun he produced did not match the description the boys gave of the gun.

Continuing on patrol, Foster said one problem in Fillmore was the possibility that someone might shoot a policeman without any notice.

Gregg told how his regular partner answered a disturbance call, and a man pulled a

knife and threw bleach in his face. The policeman immediately shot and killed him. "When somebody comes at you with knife and throws bleach in your face, you have no recourse," Gregg contended.

"Write about the fire hydrant at this corner," Gregg suggested.

"Why should I write about the fire hydrant?" the reporter asked.

EXTORTION OF UNWARY DRIVERS

Gregg and Foster related how boys often opened the fire hydrant to flood a railroad viaduct a few feet away. An unsuspecting motorist starts thru the viaduct and gets stuck in several feet of water. A crowd of boys descends on him, each demanding 50 cents to push the car out. If the motorist refuses, the boys pelt the car with rocks.

Almost always, the motorist quickly pays. Why can't the police stop it?

"When we come, they scatter," Gregg explains. The answer, Foster suggests, is for the city to develop a new hydrant cover that could not be easily opened by teen-agers.

Open fire hydrants in ghettos on hot days is a recurring call for policemen. "Isn't the water department supposed to shut off hydrants?" the reporter asked.

"I'll show you the hydrant key in the trunk," Gregg offered.

"We're the water guys," Foster added.

"There should be no one-man cars here," Foster asserts, passing a squad car with one white policeman. This is a bitter point with patrolmen in the inner city.

The lull is broken by a "disturbance at door" call at 3451 Monroe st. Foster and Gregg find there is no disturbance at the door. In fact, there is no door because there is no such address.

"Police officer needs assist" is the next call 10 minutes later. Within two minutes, Foster and Gregg are on the scene—along with six other squad cars. A policeman has two people in custody. Fifty young people are in the street, with another 100 persons leaning out of apartment windows.

Two young men were quarreling over a girl. When a patrolman moved in, the girl and the young men threatened him. He called for help.

DISTURBANCE THAT CAN BE SPARK

It is this type of disturbance that police officials fear could develop into something serious on a hot summer day. But this time it did not.

The two patrolmen then stopped at a snack restaurant for their dinner: hamburgers and soft drinks. Altho they are allotted 30 minutes for the meal, they were back on patrol in 13 minutes.

Gregg was asked to resume his discussion on Fillmore policemen.

"We only have one set of car keys between two guys," he explained. "We need two keys."

Why? "We're supposed to lock the squad car when answering a call," Foster explains. "Suppose a policeman is scuffling with someone, has the keys in his pocket, and needs help. The car door is locked."

The squad car continued to crisscross on the west side. Foster and Gregg pointed out two places where policemen were shot in the last month.

"These are known spots for ambushing policemen," Foster said, as the car headed west on Taylor street parallel to elevated railroad tracks. "People can stand on the track and either shoot or throw rocks at the squad, and make a getaway by running down the south side of the elevated tracks," he added.

The car turns down Madison street west from Pulaski road. "See that red window in that store," Foster says. It's a window between two doors. Foster explains that until recently, the window was clear glass and was often broken. Looters could enter at will at night without the patrolmen in the squad car realizing the window was broken. Store officials installed red glass. Now, they have gone one step farther by placing a large steel post directly in front of the window.

CALL FOR "DOMESTIC DISTURBANCE"

Next came a call for a "domestic disturbance" in a basement apartment. The man at the door says he wants police help to stop his brother-in-law from making advances to his wife.

"Do you let him in your place?' Gregg asked.

"Yes," the man replies.

The two policemen suggest that he call while his brother-in-law is in the apartment. The man explains he tries, but since the phone is upstairs, the brother-in-law leaves as soon as he is suspicious. Foster and Gregg suggest that the man keep the brother-in-law out of the apartment.

Only one minute after leaving the apartment there is a "disturbance in house" call. On the way to the scene, Foster spots a man, obviously out of gas, pouring gas into his tank from a one-gallon can. "If we were up north in some district, we would stop and help," Foster admits. "But not here. We're too busy."

Foster and Gregg reach the address, and a man comes to the squad car. "He stole my two garbage cans and sold them," he says. "And he owes me $58." The complainant says the alleged thief lives only two doors away.

"Maybe he's trying to get money to pay you," Gregg wryly replies.

Foster volunteers to mediate the dispute between the pair. "Both say the cans are theirs," he reports back, "but the guy says he's got a suit against him."

The reporter suggested that perhaps another agency should be created to answer calls such as the garbage can dispute, thereby freeing police to devote more time to fighting crime. "They'd get their heads blown off," Gregg replies.

The evening shadows lengthen at 7:25 p.m. and activity for policemen is expected to increase as more people start standing on street corners and the taverns are filling with patrons.

Two minutes later comes the call, "suspicious person in basement."

That call kept the two patrolmen occupied for 3 hours and 4 minutes.

"I think there's a dead man in there," says a man who has been waiting for the police. He is right.

A man is lying face down on the blood-covered floor next to a bed. "Possibly murder," is the initial comment of another policeman called to the scene. Detectives later said no foul play was involved.

Gregg and Foster determine from interviewing residents that four alcoholics were living in the basement. One had died. Perhaps hemorrhaging was the cause. Or maybe in a drunken stupor, he fell out of bed, hit his head on the concrete floor, and died. These were among their theories.

Because they were the first policemen on the scene, Foster and Gregg had the responsibility of "securing the crime scene" so that nothing in the room would be disrupted. They also had to call their sergeant, homicide, the crime laboratory, and a deputy superintendent.

Gregg interviewed several residents in the building, but none offered much help. "I went upstairs to talk to the woman on the first floor," he said. "She said she didn't want to get involved."

Much later, Gregg returned to the Fillmore station to fill out a "hospitalization case report" on the dead man. Completing the report took 29 minutes in a drab interrogation room.

INTERRUPTED BY SCUFFLING

His efforts were interrupted several times by scuffling in an adjoining interrogation room where a man was being questioned. "Mr. ———, would you like to take a sobriety test?" a policeman was overheard asking.

The response was the sound of bodies banging against walls coupled with an abundance of profanity directed at the policeman. Gregg and a half dozen policemen immediately charged into the room to help rescue their colleague.

With the report completed, Gregg and Foster returned to patrol with only 29 minutes of their watch left. Calls over the police radio continued without abatement.

"It's just starting to roll," Foster says. He expresses sympathy for policemen on the midnight to 8 a.m. watch who "come right out of roll call into the middle of this stuff."

Then came the final call of the watch: "Policeman needs help." In three minutes, the patrolmen reached the Madison street address, but there was no activity. The squad car turned the corner, and a crowd milled in front of a tavern on Pulaski road. A man had pulled a gun on a policeman on Madison, then fled for the sanctuary of the tavern. Police had found him.

Foster and Gregg left the scene and returned to the station to turn over the squad car to the next watch.

Even tho the activity for Beat 1113 was less than usual, one impression was left. What sociologists term as the "we-they mentality" between the police and the community seemed to permeate Fillmore.

The "we-they mentality" simply means that police and some segments of the community view each other as the enemy.

FIVE HUNDRED SPECIAL POLICE WORK TO KEEP YOUNG FROM LIFE OF CRIME

(By Casey Banas)

The curly-haired 14-year-old boy sat sobbing in a corner, rivulets of tears streaming down his face.

He had just been arrested for the 19th time in four years.

Across the drab youth officers' room in the Englewood police station sat a second white 14-year-old. It was his first arrest.

JUVENILE ARRESTS RISING

Police picked up the pair after a citizen reported that a burglary was in progress in a southwest side tavern. They were found on the tavern roof beside a skylight where three windows had been broken. Apparently they were out to steal liquor.

Arrests of juveniles, such as these two young men, are on the upswing in Chicago. In 1965, police made 38,521 juvenile arrests. By last year, the figure had soared to 46,372, a 20 per cent increase in three years.

Responsibility for handling juvenile offenders—and for attempting to prevent juvenile delinquency—rests with the police department's youth division, 500 specially-trained policemen and policewomen. They work closely with a myriad of community agencies and churches in a seemingly ever-uphill battle.

"America's best hope for reducing crime is to reduce juvenile delinquency and youth crime," emphasized the Presidential Crime Commission.

COMMUNITY HAS FAILED

"Once a juvenile is apprehended by the police and referred to the juvenile court," the commission continued, "the community already has failed."

The community seemingly has failed 19 times with the diminutive, sobbing 14-year-old boy described by one youth officer as "cute as a button." Tho cute and tho small for his age, the boy has shocking credentials. His record showed a variety of shoplifting and burglary charges.

Because of his size, older boys have used him to go into small places to pave the way for burglaries of television sets, radios, and clothes. He has crawled thru air vents in

the Ford City shopping center to gain entrance into stores, then opened the doors for the older boys who carried out the merchandise.

ASKS FOR MERCY

"Give me a break, give me a break," the boy cried repeatedly after being told he was again headed for Family court. "I've given you two breaks in the last month," replied Edward Earl, the youth officer.

"What about his parents?" a reporter asked.

"They don't give a damn," answered James Mulligan, another youth officer. He could have given the same answer to countless cases of juvenile arrests.

On the far side of the room, the father of the other boy was discussing the attempted burglary with Richard Siles, another youth officer. "We will refer your son to a neighborhood agency for counseling," Siles explained. "This is not punishment."

THREE THINGS POSSIBLE

When a juvenile [boy under 17 years of age, girl under 18] is brought to a police station, one of three things will happen. The juvenile is always turned over to a youth officer who will fill out a juvenile information report, a community adjustment report, or a referral to Juvenile court.

If a juvenile information report is made, the youth officer records the incident and the child is released.

In a community adjustment report, the youth is referred to a neighborhood agency for a follow-up counseling session to determine what went wrong. This is designed to be a preventive measure against future delinquent behavior.

If the youth is referred to the court, he has a hearing before a judge.

The ideal community adjustment system, said Youth Officer Joseph Haughy, would be a "big brother" system providing a one-to-one relationship between counselor and offender. Because the need far outstrips the availability of services for the delinquent, a counselor may have a caseload of 40.

"Our objective is to try to provide a vehicle whereby the individual headed toward a life of crime is directed toward a path where appropriate counseling can be provided," explained Capt. Thomas M. Frost, youth division director. But Frost and his youth division needs much more help from the community, and especially from parents.

Why is youth crime on the increase?

"I can give you four reasons," Frost answered. "The general tenor and attitude of young people is contrary to the traditional concept of discipline and law and order. Young people are participating in more recreation outside the home. They have more opportunities for crime.

"Then there's the shifting role of the family with its attitude of more permissiveness. Finally, modernization of police techniques such as the communications center result in more youths getting caught."

Youth Officer Mulligan: "The need to belong is becoming more important. Coupled with this is that kids have so much unsupervised time and have money. This is the reason juvenile crime is up."

His analysis was backed by the Presidential Crime commission which said:

"The typical delinquent operates in the company of his peers, and delinquency thrives on group support. It has been estimated that between 60 and 90 per cent of all delinquent acts are committed with companions."

Police department officials believe this estimate would hold true for Chicago.

WATCH NEW GROUPS

Part of implementing the youth division's philosophy of preventing juvenile crime rests with surveillance of emerging groups. In recent days, Mulligan has kept close watch over a group of 15 youth on the southwest side who have started using chains and baseball bats in neighborhood fights.

Mulligan was planning to call a meeting of parents to enlist their cooperation to break up the group. "In many cases," he explained, "denial of use of the family automobile will knock them out of the box. A car is just used for joyrides, but the kids pick up bad habits."

Youth officers get mixed reactions from parents whose children are in trouble with the law. Sometimes an irate parent, called to the station when a son or daughter has been arrested, will offer this opening shot at the youth officer: "Why don't you go catch burglars instead of chasing kids?"

BURGLARS ARE YOUNGSTERS

Sometimes the burglars are little kids.

Asked the age of the youngest child he saw arrested, Mulligan told about the 6-year-old who crawled thru a transom in a burglary attempt. And he recalled the case of a 7-year-old arsonist who set a school and several apartment buildings on fire.

"This kid loved to set fires," Mulligan said. "He would wake up in the middle of the night from a dream about setting a fire."

The parents were shocked to learn their child was an arsonist, but they cooperated in permitting the boy to be sent to the Institute for Juvenile Research for extensive psychiatric study.

COURT OF LAST RESORT

The youth division often serves as a court of last resort for the parent unable to control the son or daughter. From time to time, parents walk into the police station to admit their offspring are stealing cars or are on narcotics. A father bringing in a daughter using harmful pills helped the youth division uncover a ring of teen-agers staging pill parties in a southwest area forest preserve.

And parents still come to police stations to ask that their children be given what Mulligan calls the "boogieman routine." They want the policeman to instill fear into the young child so he will obey the law. Affluent families as well as those from a lower economic status still make this request which policemen always refuse.

In seeking to find youthful suspects, police have discovered that their nicknames may provide the only clue.

SUSPECT IS LOCATED

Last August, a 14-year-old boy hurled a rock from a Chicago transit authority bus at 55th street and Kedzie avenue. It struck a passer-by, severely lacerating his head. The boy fled from the bus.

Other teen-agers on the bus were questioned. They didn't know either his first or last name, but knew his nickname was "Baby." Police checked the nickname file on "Baby," came up with one living in the area, and tracked him down. He was the same boy.

A sex offender known only as "Animal" and a murderer called "Dracula," were also apprehended because of their nicknames.

ONLY SECONDARY GOAL

But apprehension remains as a secondary goal for the youth division.

"Our job is to keep kids out of jail," Mulligan asserted.

The new youth officers must take a special one-month course. In this year's training, 31 university professors, psychologists, attorneys, and judges taught without receiving any compensation.

THE POLICE TASK FORCE: TOUGH, OFTEN A TARGET OF CRITICISM

(By Casey Banas)

The Chicago police department has a unit that literally is "on the land, on the sea, in the air, and in the hole."

This is a description of the 837-member task force offered by its commander, Capt. Richard Lionhood. Its members can be found in boats patroling Lake Michigan, up in the two police helicopters keeping a watchful eye over a demonstration, on the street faking drunkenness to trap a would-be robber, and under ground patroling the subway stations.

The primary mission of the task force, Lionhood explained, is "to combat specific crime a district is unable to cover because it doesn't have enough manpower." Its men are deployed over and above any policemen assigned to a specific district or police division.

UNORTHODOX METHODS USED

The task force often uses highly unorthodox methods to combat tough crime situations. Its men are deployed in an area for no more than five days, then are shifted elsewhere. The idea is to keep the criminal from being able to trace a task force pattern so he can strike where they aren't.

But among some elements of the black community, the task force is under severe criticism as a hostile force that should be barred from Negro neighborhoods. Sociologists who have studied police departments say one liability of the task force concept is that ever-shifting policemen never do get to know the people in any area.

CRIME PATTERNS WATCHED

Altho the task force has a myriad of special assignments, such as providing bodyguards to VIPs and patroling beaches, its main force is a tactical unit assigned to take on the biggest street crime challenges in the city.

Tactical unit members are assigned specific missions in a given area. The detective division's operations analysis office develops reports on crime patterns. These are used to chart most task force missions. Or a district commander, unable to assign enough of his own men to fight a crime pattern, may ask the task force for help.

When one neighborhood was plagued by a rash of robberies in cleaning stores, the task force sent in units to stake out several stores. Tactical unit members hid in back rooms waiting for a robber to strike.

When a pattern of robberies of truck drivers became evident, the task force swung into action. Cartage companies were asked to lend trucks to the task force. Members posed as truck drivers, and in playing the role, made four arrests of potential robbers.

OFTEN IN PLAIN CLOTHES

The task force member may or may not be in uniform.

Among the most unusual—and certainly the most dangerous—assignments for any Chicago policeman is being a member of the TUF squad [for tactical undercover force]. Periodically, the TUF squad takes to the streets with the assignment of trapping would-be strong armed robbers. Its latest assignment was on west Madison street.

One squad member deliberately sacrifices himself as the "pigeon." He may pretend he is drunk, setting himself up as a potential robbery victim. The "pigeon" is covered by five other squad members. Several may be lurking in darkened doorways and others may be in a disguised truck.

TASK FORCE OPPOSED

The "pigeon" is wired for sound. When he is attacked, he yells, "Hit! hit! hit!" His colleagues race to the scene to help him fight off his attacker. Injuries to the "pigeon" are not uncommon.

Opposition to the task force by some in the black community has developed because of its tactics. One example: handling traffic violators.

A regular patrolman confronting a traffic violator will issue a ticket and the motorist will be on his way. Not necessarily so with a task force member.

In high crime areas, Lionhood explained, most criminals use autos and may carry

weapons in their cars. A task force member may stop a car for a traffic violation, then search the car for weapons or narcotics.

The law-abiding black citizen understandably may consider the tactics as harassment. If this happens several times, he may readily develop a contemptuous view of the Chicago police department.

DEFENDS UNIT'S TACTICS

"We're just trying to do our job," Lionhood replied when asked to justify the tactics. Police officials maintain citizens should not be upset at the inconvenience because it is done for their own protection to reduce crime in their neighborhoods. "We stop people in white areas, too," Lionhood emphasized.

But the task force does deploy its men primarily in black areas. "Our operation is where crime is heavy," Lionhood explained. "According to the statistics, it's in the inner city. But we have worked in every district in the city."

Asked for an example of a task force mission in a white neighborhood, Lionhood referred to disturbances at Kennedy High school, 6325 56th st. For two weeks, 20 task force members were deployed at or near the school.

WATCH FOR TRUANTS

One of Lionhood's current concerns is daytime burglary. "Most daytime burglary is done by truants," he explained. So an ongoing mission is for some task force members to patrol the streets during school hours and stop every school-age child and ask him what he's doing. If the child is a truant, the task force men immediately take him to his school.

Adding to the constant controversy swirling about the task force is the presence of its 46 extra members—the canine unit. The use of dogs in the police patrol has led to criticism. When blacks in some neighborhoods assailed the deployment of canine units in the areas, they were removed.

But the task force and the department's planning division have made a study to determine what effect, if any, canine units have on crime. In 1967, five areas were selected for study: Canine units were assigned. In 1968, they were replaced by regular police patrols. This year, the dogs are back for another test.

Use of the canine units, Lionhood said, has resulted in a decline in crime in the five areas.

JOB OF CROWD CONTROL

Another task force assignment is crowd control, including, of course, demonstrations and riots. Task force members were among the Chicago policemen involved in handling demonstrations during the 1968 Democratic national convention.

When a peace march was held a few weeks after the convention, task force members were assigned to patrol. But they all were subjected to a special psychiatric examination, Lionhood said, to find if they had the "emotional stability to face a provoking situation without going overboard."

In the last year, the task force by default has inherited yet another assignment—patroling the city's subways. For years, subway duty was considered "a penalty post" within the department. If some commander wanted to punish a patrolman, he arranged to have him relegated to patroling a subway station.

PATROL IS INCREASED

When the Tribune and other newspapers began to bring to public attention increasing crime in the subways and elevated trains and stations, the number of policemen assigned to Chicago transit authority installations was increased.

The task force was given this responsibility and it formed a CTA unit. In recent months, Lionhood said, concerted effort has been made to shake off the "penalty post" image of subway patrol. Captains give "pep talks" to emphasize how vital to public safety the patrol is.

Emphasis on neat appearance is stressed so much, Lionhood said, that the unkempt policeman faces action by his superiors. One example of such action is making the policeman work on one of his days off.

The task force, which prides itself on a marine-type esprit de corps, explained exmarine sergeant Lionhood, is seeking to develop this same spirit within the CTA units. "And I think we are succeeding," he said.

"AGGRESSIVE PATROLS" USED IN CRIME WAR

(By Casey Banas)

"Aggressive preventive patrol" is what the Chicago police department uses to deter crime on the streets.

This concept means that policemen stop citizens on the street for questioning and even searching if their behavior supposedly is suspicious. Policemen justify these stops on grounds they are looking for weapons and narcotics.

The beat men in the squad cars usually have little opportunity for aggressive preventive patrol because most of their time is devoted to answering citizens' calls for service and help. Each police district does have men assigned to its own tactical unit which may spend time in aggressive preventive patrol.

But primarily, this type of patrol is left to the task force, which answers no calls for service but patrols areas of "high crime." These areas, according to the police, are the black ghettos.

Sometimes questioning of citizens and searching cars brings charges by Negroes that their civil rights are violated.

A reporter rode from 6 p.m. to 1:30 a.m. with a task force unit patroling an inner city area and observed more than a dozen instances of stops and searches And because the task force is the department's most versatile unit, the unexpected happened.

This is how the evening went:

Patrolmen Edward Czekala, 29, and Al Grefsheim, 31, are aggressive, but tactful. They were assigned to a task force car patroling the south side. Their assignment is changed every five days.

HEADS DOWN EXPRESSWAY

The squad car headed south on the Dan Ryan expressway toward the assigned area for the evening—bounded by 103d, State, 115th, and Halsted streets. This was supposed to be a "high crime" mission, but Czekala and Grefsheim both questioned whether the area, in the beginning stages of racial change, qualified under the "high crime" criterion.

After only 37 minutes patroling the area, their assignment would be abruptly changed by an incident developing in the shadow of the Robert Taylor homes public housing project.

On the Ryan expressway near 51st street, the patrolmen stopped a motorist driving on the shoulder to gain ground on the heavy rush hour traffic. The motorist was the only white man stopped during the shift. No ticket was issued.

"He said his wife's going to have a baby," Czekala explained. "He looks like a distraught father," Grefsheim added.

Minutes later, the squad car had threaded its way south and Czekala spotted a car with a cracked windshield at State street near 97th street. The driver was motioned to the curb. The black motorist explained the car was in an accident a few days before and he hadn't had an opportunity to get it fixed.

HUNTS FOR WEAPONS

As Grefsheim continued to question the driver, Czekala thoroly searched the automobile, even lying prone on the front seat to search underneath for narcotics or weapons. Grefsheim recorded the man's name, address, and license plate number on a task force mission report.

Before the shift would be over, the 11 spaces on the sheet would be filled as evidence the task force team was indeed stopping people on the streets. But no ticket would be issued to any offender and no arrests would be made.

"They look like youthful pot smokers," Czekala said, as he flagged down two teenagers in a car at 103d street and Green avenue. Grefsheim told the driver he did not have a city vehicle sticker.

Then he patted the teen-ager, frisking him for weapons. The surprised black youth said, "Man, what did I do?" But he offered no resistance. Czekala, meanwhile, searched the car.

The dispatcher on the police radio had issued two "10–1" [policeman needs help] at a supermarket at 5225 State st. Supposedly, shots were fired at a policeman. Czekala and Grefsheim suggested that the incident could trigger a volatile situation.

Moments later, Car 6217 and other task force units were ordered to 5225 State st. "We'll have to get our helmets out," Grefsheim said. "There might be some *rock* throwing."

Tension filled the air in front of the supermarket. A dozen policemen stood with rifles pointed skyward. The street was filled with other policemen and police vehicles.

A hundred or more black spectators milled about. The supermarket's front windows were smashed. The tall buildings of Robert Taylor homes stood in the background, and policemen were concerned that snipers would be shooting.

The task force deputy commander told Czekala and Grefsheim to assemble with other task force units in front of Du Sable High School on Wabash avenue near 50th street, three blocks away. It is standard procedure that the task force stays in the background at potential disturbance. District cars are on the scene, but the task force is ready on the periphery to move into action if needed.

For the next 54 minutes, 20 task force policemen just waited.

STORE'S WINDOWS SMASHED

One sergeant said the disturbance was triggered when the supermarket wanted to close for inventory, but the people wanted it opened. The front windows were smashed, and police moved in with force—just in case.

A reporter asked whether the police responded with an undue show of force and whether their presence in large number might only inflame the incident.

"But what if it broke out and we weren't here?" Grefsheim countered.

The two policemen told how an incident quickly can lead to a major problem. Policemen, they said, stopped a youth who kicked over a mailbox the previous week at 69th and Throop streets. The youth's girl friend leapt at a policeman and bit him, and she was arrested. The policeman had difficulty restraining her.

But a crowd went to the Englewood police station demanding that the policeman be arrested. They charged brutality. The girl, police said, was a sister of a leader of the Disciples gang. "The worst thing about it," Grefsheim said, "is that the policeman might get suspended for brutality."

Grefsheim told how a computer error resulted in a Negro minister filing charges against him.

The license plate of the minister's car was on the hot sheet, so he stopped him for questioning. Grefsheim said the minister told him he had no right to stop him and began to walk away. The task force officer grasped him by the arm.

The minister was taken to a police station where he produced the paper from the auto pound saying his car was stolen, recovered, and returned to him.

REPORT TAKES TIME

After the minister filed a complaint, Grefsheim was required by the internal investigations divisions to report his side and it took two hours to type out the report. It was later determined that the computer failed to remove the minister's car license number from the daily hot sheet after it was recovered.

The task force unit began patrolling the Wabash district which has lost its dubious longstanding distinction as the district with the most reported crime to the Fillmore district on the west side.

While driving in the 4600 block of Prairie avenue, the reporter asked: "If I walked down this street now alone, would I get robbed?"

Back came the answer: "You couldn't walk down this street without getting robbed."

A white man dressed in a suit, the policemen said, would be on this block only for one reason: Seeking a Negro prostitute. Someone on the block would spot the man, assume he had money, and rob him, the officers said. And if the man did get by unmolested, chances were excellent that the prostitute or an accomplice would roll him.

A pair of peddlers were selling fruits and vegetables at 47th street and Calumet avenue. Some of their boxes were out in the street. The two officers acknowledged the law was being broken, but they did nothing.

They said they overlook certain laws so incidents are not created. "You can't stop a car anywhere around here without attracting a crowd," Grefsheim said. Attracting a crowd, always hostile to police, could lead to a major disturbance.

Sociologists who study police operations contend the law is not enforced with equal vigor in white and black neighborhoods.

BRIBE OFFERED, SPURNED

A speeding auto on Evans avenue was pursued by the task force team and stopped at 44th street. It led to the first of two bribe attempts of the evening. "Come back here and let me talk to you," the black motorist said to Czekala, motioning him to the rear of the squad car. "I don't talk that kind of language," the policeman answered. The motorist was not ticketed, nor arrested.

That was the first of 10 stops of black citizens over a period of 3 hours, 26 minutes, broken only for a stop for a bowl of chili in a 47th street restaurant. In none of these instances was a citizen given a traffic citation or arrested.

The squad car continued to patrol back and forth along a one-mile stretch of Garfield boulevard.

"Shall we stop these intellectuals?" Grefsheim asked his partner, pointing to a car ahead with two studious-looking blacks.

The "intellectuals" were stopped and they identified themselves. They were Africans enrolled at the University of Illinois. It was one of only three stops of black citizens during the evening that Czekala and Grefsheim did not conduct a thoro search of an auto.

Driving on Prairie avenue near 61st street, Grefsheim said, "Let's see what that car is up to." The two occupants were wearing uniforms of a private police security firm and were driving an auto that the task force officer said looked like an unmarked police car.

He wondered if they were posing as policemen. He explained that sometimes a citizen will pose as a policeman to commit a crime.

AUTO NOT SEARCHED

The two occupants of the car identified themselves to the satisfaction of the policemen. Their car was not searched. During the questioning, the haunting sounds of "Oink! oink! oink! oink!" came thru the night air from the upper floor of a nearby apartment building.

"Look at how far he's leaning out the window," Czekala pointed upward. "I hope he doesn't fall out."

At Prairie avenue near Garfield boulevard a man was driving on the wrong side of the street and was quickly curbed by the task force team. "You don't carry a weapon, do you, sir?" Grefsheim asked, as the Negro dug a driver's license out of his wallet.

"No, sir," he replied. After producing the driver's license, he came up with some paper money and prominently displayed a five dollar bill. Grefsheim, ignoring the apparent bribe attempt, told the motorist his driver's license had expired. Czekala, in another thoro search of glove compartment, underside of visors, and underneath of front side, found on the seat a notice from the secretary of state's office that the driver's license was to expire. The driver insisted he had never seen it. He was let go.

The next Garfield boulevard stop was a motorist without a city sticker. A group of black teen-agers chatting in the street looked on with disfavor as the young black and his car were searched. A broken cuestick in the back seat was left there. "The cuestick is just there to protect him from the elements," Grefsheim said later. The "elements," he said, are other youths who would want to fight.

"What do you have up there in your sky?" Czekala said, pointing to the black's wide-brimmed hat. But Grefsheim already had searched inside the brim for narcotics. A package of paper used to roll marijuana cigarets was found in the front seat, but the youth denied using drugs. He was allowed to continue on his way.

Back in the squad car, Grefsheim called out at some youths lurking in the shadow of a building and said: "How are things tonight in the ghetto?"

A teen-ager shot back: "Things are never right in the ghetto."

At Garfield and Stony Island avenue, the task force team spotted a car without a city vehicle sticker. When the squad car's blue light went on, the driver quickly pulled into a gas station. The policemen followed and pulled up behind at the gas pumps. They waited until the gas tank was filled, the motorist drove back onto Garfield, and then curbed him.

A well-dressed black man explained he bought the car only last week. "You don't have a holster under that suit coat, do you?" Czekala asked. The Negro opened his suit coat wide. There was no gun. A search of the auto turned up nothing.

"If you stopped me for a violation and searched my car, I would object," the reporter told the task force men. "Why hasn't even one of these people objected?"

"They know they could be arrested for a traffic violation," Czekala replied.

STOPS AT HOSPITAL

The squad car stopped at Provident hospital, 426 E 51st st. Its emergency room is the scene of intense activity on week-ends because of the neighborhood violence. Grefsheim went inside for a minute, then came out and reported that three current emergency cases included a youth shot in the leg, another with stab wounds all over his chest, and a third with a turban-bandage covering his head.

On the radio a policeman was telling the dispatcher that a youth shot in a skirmish refused police help. It was no surprise to Grefsheim and Czekala. They said gang members with minor gunshot wounds often will "walk off" their injury and refuse to be taken to a hospital.

Back on patrol, the task force officers spotted a double parked car on Wabash just north of Garfield. A Negro was sitting at the wheel.

"There's a good chance he has no driver's license," Czekala said.

"There's a fair chance he has a gun," Grefsheim countered.

The youth explained he was waiting for two friends, who momentarily returned from a gas station. Czekala conducted his usual thoro search of the car.

Pointing to one of the black youths, he told his partner, "Does this guy have our number. He says we won't find a reefer in there." They didn't.

After several minutes of amiable conversation, the policemen and the black youths parted company.

And the aggressive, incessant patrol of Garfield boulevard continued.

"Why Garfield?" the reported asked.

"It's not so crowded and you can pull people over without blocking traffic," Czekala replied.

"What's your biggest frustration?" the reporter asked.

"When you know someone is guilty and he's not convicted," Czekala replied. Grefsheim cited the case of a 16-year-old rapist they caught in the act. "He's back on the street," he said.

As the patrol continued, Grefsheim was studying license plate numbers and faces in cars to see if they would match with numbers on the hot sheets or sketches in the Daily Bulletin. "I'm getting the first four numbers, but that's all," he said.

Then he noticed the driver of an auto was similar to a sketch of a man wanted for robbery. The color and make of the car fitted the Daily Bulletin description. "Let's see what he has to say for himself," Grefsheim said.

SHOWS PICTURE TO DRIVER

The motorist, nattily dressed in electric blue suit, identified himself as a bartender. His car was searched. Then, in a display of police-community relations, Grefsheim brought out the Daily Bulletin.

Pointing to the sketch, he asked the black motorist, "Now, doesn't that look like you. You even have the same type of processed hair. That's why we stopped you."

The two joked about the resemblance to the sketch, and how the description of the car coincided with the motorist's auto.

Back in the squad car, Grefsheim said, "Let's go to 47th street. Maybe we'll see an on-view cutting." That's his phrase for seeing someone getting stabbed.

At 47th and Calumet, the policemen spotted a driver wearing earphones, "I've got to find out why he's wearing earphones," said Czekala, who pursued the motorist. He was stopped a block away.

The black man showed the policemen how the tape recorder on the front seat worked with its stereo cartridges. He was listening to "soul music" while driving. The policement suggested that was not a good idea.

A car with only one headlight was spotted and Czekala gave chase. The motorist turned two corners quickly. "It appears he has eluded us," Czekala said. "A sidestreet sneaker," Grefsheim joked.

The policeman drove past "the filthiest corner in North America"—45th street and St. Lawrence avenue, and "the worst building in the city"—744 E Bowen st, "where people kicked out of the projects come to live."

Then at 42d and St. Lawrence, three black children ran frantically up to the squad car and cried out, "Somebody is shooting down the street." The officers questioned other people on the street, but failed to locate the alleged shooting.

The dispatcher on the police radio gave a call of "shot fired" in a building on 36th street. The call is assigned to a district's squad car, but the task force men were only three blocks away so they speed to the scene.

Their presence a block from the supposed shooting abruptly broke up a crap game, with one youth quickly scooping up the money. "He's probably the one who called," Grefsheim said.

At the address of the alleged shooting, there was no activity. Two youths questioned in a parking lot said they heard nothing. Phony calls are as much a plague to policemen as the false alarm is to firemen.

THRIVE IN DARK

"We're members of the mushroom club," Czekala said. "We thrive in the dark and are fed a lot of manure."

The officers answered "a man with a gun" call at 51st and State. But there was no man with a gun in view, so they drove to the parking lot of the supermarket where the disturbance occurred earlier in the evening.

A squadrol was stationed in the parking lot. A policeman came up to the squad car and grumbled that the worst thing the sergeant could have done was to order the squadrol in the parking lot where it would make a prime target for snipers in Robert Taylor homes.

He told how a policeman was shot in the shoulder only minutes earlier just outside his squad car in the parking lot of the Wabash avenue police station.

Then a shot rang out from Robert Taylor homes.

The policeman ran for cover. Czekala rapidly exited the parking lot. Apparently we were the targets of a sniper's bullet, but no one was injured.

Two more stops of citizens, and the shift was over.

Left in doubt was whether the task force methods did any good or violated citizens' rights.

Earlier, Czekala conceded, "We do abuse people, but we get guns off the street and prevent a lot of potential grief." And Gretsheim suggested that "some people have to suffer" in the fight against crime.

WHAT KERNER REPORT SAID

This is what the Kerner report said about "aggressive preventive patrol:"

"Although police administrators may take steps to attempt to eliminate misconduct by individual police officers, many departments have adopted patrol practices which in the words of one commentator, have '. . . replaced harassment by individual patrolmen with harassment by entire departments.'

"These practices, sometimes known as 'aggressive preventive patrol,' take a number of forms, but invariably they involve a large number of police-citizen contacts initiated by police rather than in response to a call for help or service. One such practice utilizes a roving task force which moves into high crime districts without prior notice, and conducts intensive, often indiscriminate, street stops and searches.

"A number of persons who might legitimately be described as suspicious are stopped. But so also are persons whom the beat patrolman would know are respected members of the community. Such task forces are often deliberately moved from place to place making it impossible for its members to know the people with whom they come in contact."

COMMUNITY PROGRAM STRESSED BY POLICE

(By Casey Banas)

Police Sgt. Arthur Ferando went fishing instead of reporting to the Austin district station and his superiors approved.

Ferando took 35 neighborhood children fishing at a suburban Bridgeview lagoon. The previous evening, he had worked behind the scenes to insure that the district's monthly police-community workshop ran smoothly.

These are among the duties of Ferando, who is community services sergeant for the Austin district. One such sergeant was appointed in each police district in March, 1967, as part of a new effort to improve police relations with the community.

SOME POLICE OBJECT

The program is viewed with mixed feelings within the department. If asked about the need for community relations, many policemen—including some in upper echelons—would angrily answer: "We're not social workers."

But the thinking of those who have closely studied police operations thruout the nation is the opposite.

The Presidential Crime commission emphasized: "The commission believes that a police-community relations program is one of the most important functions of any police department in a community with a substantial minority population."

The commission said that it is "not a public relations program to 'sell the police image' to the community," but is "a long-range, full-scale effort to acquaint the police and the community with each other's problems and to stimulate action aimed at solving those problems."

DENOUNCES CLICHE METHODS

The Kerner commission said it believes that "community relations is an integral part of all law enforcement," but warned "it cannot be made so by part-time effort, peripheral status, or cliche methods."

The commission added that "improving community relations is a full-time assignment for every commander and every officer—an assignment that must include the development of an attitude, a tone, throughout the force that conforms with the ultimate responsibility of every policeman: public service."

Five months after the community services sergeant concept was implemented, the police department formed a community services division to coordinate all programs.

Deputy Chief Samuel M. Nolan, the department's highest ranking black policeman, is the director. "We have now detoured from the traditional role of law enforcement," he said, "and some policemen don't like it."

Years ago, the policeman walking the beat was a one-man community relations program as he personally knew scores of business men, residents, and children. But the motorization of the police force coupled with increased calls for services has created a wall between the policeman and the community.

"All you can do is to ride around and answer calls," Ferando lamented. "We have lost that personal touch."

Often, the only contact an average citizen has now with a policeman is under unpleasant circumstances—like being curbed by a squad car and given a ticket for running a red light. But the chances are increasing for the citizen to meet a policeman without the heavy arm of law enforcement resting upon his shoulder.

A child's first contact with a policeman is likely to be when an "Officer Friendly" visits his classroom. The "Officer Friendly" program was started in March, 1966, to help teach youngsters respect for authority and to show them the policeman is their friend.

FORTY-TWO "OFFICERS FRIENDLY"

There are now 42 full-time "Officers Friendly" who will speak to 750,000 pupils in Chicago elementary schools—public, parochial, and private—during the current school year. Every child will be visited nine times by an "Officer Friendly" between kindergarten and 8th grade.

This fall, an experimental program is under way in which 10 policemen will be teaching a three-week course on law enforcement and social problems for juniors in six south side high schools.

Key elements of a district's community relations programs are a variety of police-sponsored youth activities—such as Sgt. Ferando's fishing trip—and the monthly police-community workshop.

District commanders are required to preside at these meetings. Citizens have a monthly opportunity for questions and debate.

Sgt. Ferando's August program, for example, included 21 outings for Austin youngsters ranging from a trip to a Negro history museum to a White Sox ball game. When he spread the word that children who register their bicycles and tack on reflector tape would receive a certificate for a free hamburger, 500 youths showed up. A McDonald's drive-in restaurant indeed did give out 500 hamburgers.

In mid-summer, the police department sponsored a physical fitness pentathlon where youths from 6 thru 18 years old competed against national standards. A rainy day did not scare away the 800 youths who came to Hanson park stadium for the event.

There is one fact of life about a community relations program that can be devastating. "One guy in a beat car can ruin the program," Ferando admitted. A new police department film on the community services program illustrates this.

MUST FULFILL ROLE

Sgt. William Howe, community services sergeant for the Shakespeare district, is shown at a roll call reading a letter from a child submitting his resignation as a Junior Patrolman. The youth wrote that he walked up to a squad car and offered a cheery, "Hi, I'm a Junior Patrolman." The policeman replied, "Get off the corner and go home."

Altho the police-community workshop may be an ideal forum for citizens to air their grievances, it may not be fulfilling the community relations role envisioned by the Presidential Crime commission.

Less than one hour before an Austin district police-community workshop, Ferando was wondering if even 20 people would show up. But 137 people occupied every available chair in the meeting room of the Central Masonic Temple, 5352 Chicago av.

Very few were under 40 years of age. Even tho Austin has rapidly increasing Negro population, only two black people were present, altho two others came 15 minutes before the two-hour session ended.

PEOPLE BACK COMMANDER

It was strictly a love-in between Capt. Mark Thanasouras, Austin district commander, and the citizens. The people were solidly behind Thanasouras, and did not ask any penetrating questions. Before the meeting, several registered complaints about abandoned autos and rowdy teen-agers with Ferando.

Had more teen-agers and blacks attended, this is what they would have seen and heard:

Thanasouras presented a Jaycee award to Patrolman Eugene Manion, father of 11 children, who pretended to accept a $3,000 bribe from two narcotics sellers so he could infiltrate their operation. The sellers threatened to kill him, his wife, and children if he did not cooperate by killing a fellow gang member and helping to rob a dairy.

Guided by Manion, police moved in and broke up a $500,000 heroin ring.

The guest speaker, Joseph DiNatale, an assistant state's attorney, pleaded for increased citizen cooperation in reporting crimes and showing up for court appearances. He said that in a two-week period in Violence court, only 30 per cent of the citizens signing complaints appeared compared with 100 per cent of the arresting officers.

DiNatale told about an old man confined to a wheelchair who was beaten by youths near Lincoln and Belmont avenues until he relinquished the keys to his car. A crowd of spectators, including four lifelong friends of the man, failed to intrude or seek any help from police.

The youths drove away with the man, eventually throwing him on a pile of rocks at Fullerton avenue at Lake Michigan. His auto was smashed beyond repair.

GIVES OTHER EXAMPLES

DiNatale told other stories to demonstrate how law enforcement is hampered by lack of citizen participation.

"Law enforcement isn't the police, the state's attorney, the judge, the penologist, or even the executioner," Thanasouras empha-

sized. "It's all of us. Any community will get the quality and quantity of law enforcement it demands and will take."

"Do you think the time will come again when we can walk the streets without fear?" asked a woman in her fifties.

"That's why we've got violence," Thanasouras replied. "No one cares about what happens to the next guy."

After the meeting, a reporter commented that the workshop would have been more effective had large numbers of young people been present.

"But how do you reach them?" Ferando asked.

"How about a rock 'n' roll band as a side attraction?"

"That would be asking for trouble," intruded an eavesdropping citizen.

POLICE FILM OFFERED TO HELP RELATIONS

A new 27-minute film depicting the work of three community services sergeants is available without charge for showing to any group. The film, "Let's Work Together," is designed to combat antagonism between police and young people.

It includes a scene of a black youth charging police harassment. "Who you going to go to?" he asked. "They've got power to do anything." A black teen-ager challenges a white community services sergeant, William Howe, to answer frankly whether he is prejudiced. "I am prejudiced, and I don't like it," Howe admits. "My parents told me black people live in slums and are bad." Howe explains he came in contact only with criminal elements in six years patroling in an inner city area. But he says he is attempting to rid himself of racial prejudice.

"A policeman can be nice," one teen-ager tells another. "He's not there just to rap you on the head with a stick."

I.I.D. Keeps Watch Over the Police Department

(By Casey Banas)

Suppose a policeman solicits a bribe after stopping you for a traffic violation and you report the incident to the police department.

What are the chances the policeman will be disciplined?

When such a case occurred a few weeks ago, police investigators were at the patrolman's district station within an hour after the complaint was made. The accusing citizen was asked to confront the policeman at the station. He did. He said the policeman sought a $20 bribe.

The policeman denied taking any money. Investigators searched him and his locker, but did not find the money. A subsequent investigation showed there was sufficient basis for disciplinary action. The policeman was suspended for 30 days without pay.

PROBLEM FOR I.I.D.

Policing the police department and investigating complaints such as this is the responsibility of the internal investigations division.

Often, the I.I.D. comes under attack from both inside and outside the department. Citizens may believe complaints against policemen are whitewashed. Policemen may charge the I.I.D. with using sneaky methods to gather evidence against them.

"Our effectiveness really depends on the cooperation of the people," emphasized Capt. Raymond Clark, who was director of the I.I.D. until several weeks ago.

THE $1,000 BRIBE CASE

The citizen may be reluctant to bring charges against a policeman because he, too, may be guilty of an offense. But that didn't deter a citizen in this case:

A motorist left the scene of an accident. He was later found by a policeman in the hit-and-run unit. According to an I.I.D. investigation, the policeman said that for a $1,000 bribe, he would arrange that the motorist not be charged. The citizen agreed to leave the $1,000 in the policeman's desk drawer.

I. I. D. investigators were on the scene, and after receiving a prearranged signal from the citizen, they recovered the $1,000 from the desk. The policeman was prosecuted and fined $500. The department recommended his dismissal from the force. The police board has taken the case under advisement.

If you called POlice 5–1313 to register a complaint against a policeman, here's what the department says would happen:

The policeman answering your call would refer you to the I. I. D. complaint desk manned by a sergeant. He would write down the pertinent information. Within the hour, some action must be taken on your complaint. You might be asked to come to the policeman's district station immediately to confront him. Or more often, the complaint would be referred to the policeman's immediate supervisor for investigation.

In another recent case, a woman charged that a policeman was abusive in knocking at her door at 3 a.m. with a warrant for the arrest of her 17-year-old son. The report included 13 interviews with parties involved during a two month investigation.

The I. I. D. report said the abusiveness charge was unfounded and that the policeman has the legal prerogative to serve the warrant even at 3 a.m. But when it was found the policeman was given the warrant at noon the preceeding day, the I. I. D. recommended a five-day suspension for failure to execute duties promptly.

HOW FAIR IS PROBE?

Is it realistic for a citizen to expect a fair and thorough investigation under a system where the police department polices itself?

"They should be able to expect fairness," Clark contended, "but sometimes this is a hard product to sell." Citizens often question the system when they find out that more often than not, the immediate superiors of the policeman conduct the investigation, he said.

The I. I. D. does not have the manpower to investigate all complaints, nor should it have, Clark said. It handles the most serious and most complicated cases, and those involving more than one police district or division. Or if the identity of a policeman charged with misconduct is unknown, the I. I. D. tries to determine who he is. Once this is done, the investigation is turned over to the policeman's unit.

When former Police Supt. O. W. Wilson formed the I.I.D. in 1960, it was assigned to investigate all complaints. Later Wilson became convinced that discipline is an essential function of police commanders and supervisors and said they should assume the major share of the cleansing process.

So a citizen bringing a charge against a policeman may be contacted by his immediate supervisor, a sergeant. "Any attempts to minimize guilt will be detected, at any one of a number of levels," Clark insisted.

TWO SERGEANTS SUSPENDED

After the sergeant completes his report, it is reviewed by the watch commander, the district commander, the deputy superintendent, then by the I.I.D. Both the recommendations and thoroness of the investigation come under close scrutiny, Clark said.

"We have disciplined supervisors whose investigations are not in keeping with the evidence," he explained. "Word gets around quickly that the investigation had better be in keeping with the evidence." In 1968, two sergeants were suspended for failure to make a proper investigation.

Disciplinary action against the policemen ranges from an oral reprimand to a written reprimand to suspensions ranging from 1 to 30 days to firing.

A policeman is given a choice of accepting or rejecting the disciplinary action recommended. If he is unhappy, he can ask for a hearing by a three-member review panel. In the case of a patrolman, the panel must include three lieutenants. With a sergeant or officer of higher rank, the panel must include three officers who are captains or higher ranks.

REVIEWS ALL CASES

Police Supt. James B. Conlisk reviews all recommendations of disciplinary actions, and his decision is final in cases up to 30-day suspensions. But only the five-member citizens police board can fire a policeman. This is done after a trial in which the policeman has the right to legal counsel. Witnesses for both sides are heard.

Currently, the police department has 18 cases pending where it is seeking to fire policemen.

Three policemen are accused of accepting bribes from traffic violators. One allegedly used excessive force against a citizen. An off-duty policeman in uniform is charged with being drunk in a tavern.

Another policeman was convicted in court of a battery charge committed while off duty. Another allegedly fired a gun in a traffic dispute with a citizen. A policeman is charged with insubordination and striking a superior officer.

DIDN'T REGISTER WEAPON

Another is charged with failure to register a private weapon with the police department and also having fired it. An I. I. D. investigation reported that the policeman spent a night with a prostitute, became angry at her the next morning, and fired the weapon. During a police board hearing, the city dropped a third charge that the policeman committed sexual acts with a prostitute.

One of the biggest problems in investigating charges of police misconduct is that in many cases, it is the word of the complainant against the policeman. Often, there are no witnesses or evidence sustaining the charge. So no disciplinary action is taken. Asked to explain this procedure, Clark emphasized that no court would convict a man solely on the basis of one man's word without witnesses or evidence.

Sometimes, lie detector tests are given in an attempt to find out who is telling the truth. First, the complainant is asked to take a polygraph test. Why not the policeman first? "It's the citizen who brings the charge," Clark answered.

TYPES OF QUESTIONS

The complainant will be asked questions such as: "Were you resisting arrest?" If the citizen passes the test, the policeman is asked to take the polygraph. If he refuses, he faces disciplinary action. One case is pending against a policeman who refused an order of a superior officer to take a lie detector test in a bribery charge.

Sometimes the I. I. D. is thwarted by refusal of complainants to cooperate with police investigators, Clark said, altho they readily tell their stories to newspaper and television reporters. He referred to the case of a business man seen on television news programs charging police brutality and displaying physical marks of a beating. But the same man, Clark contended, refused to discuss the case with the I. I. D.

In some instances, Clark said, the citizen's refusal to cooperate stems from his lack of confidence that the police will take any disciplinary action. In other cases, an attorney has advised the citizen not to talk. Often, this is done because the citizen will have a suit pending against the policeman.

SOME PROBES HAMPERED

One top police official suggested that the department sometimes is hampered in making an investigation because of the feeling that "monetary aspects outweigh justice."

A chief critic of the police department's job of policing itself is Jay A. Miller, executive director of the Illinois division of the American Civil Liberties union. He argues that the department unduly justifies the

conduct of its members when they are clearly in the wrong.

Miller cited the case of a white attorney who paused alongside his home to peer into his basement window and was arrested as a "peeping Tom." He added that the man's explanation and identification by his family and friends were to no avail.

ATTORNEY SUES CITY

The attorney sued and was awarded a $5,000 out-of-court settlement, Miller said. No disciplinary action was taken against the policemen involved in the arrest, he said.

Some months later, Miller said he cited this case while speaking at a University of Illinois seminar to Chicago's top police officers. "They said I didn't tell the whole story," he recalled. "They alleged the attorney was creating a commission." Instead of admitting that perhaps the policemen were wrong, the top police officials came to their defense, even tho the incident cost taxpayers $5,000, Miller said.

"When you take that attitude into the ghetto," he continued, "you're in serious trouble. Citizens can only depend on the self-restraint of the policeman."

FILES KEPT CLOSED

Conlisk refused a reporter's request to study several I. I. D. reports altho the superintendent was assured no names or identifications would be published. He justified his decision on the grounds that policemen have been assured that only the superintendent, deputy superintendent, and I. I. D. will see any file.

But Conlisk did authorize release of statistics on the department's disciplinary action. Out of 5,323 completed investigations of citizens' complaints last year, 1,128 were sustained by the police department. Thru Aug. 20 of this year 606 of 3,372 complaints were upheld.

TOO SOON FOR VERDICT

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. FISH. Mr. Speaker, Americans were shocked at the allegations of atrocities at Mylai. This does not mean, however, that we abandon our concept of justice and prejudged American military officers charged with responsibility for the alleged massacre of civilians in South Vietnam. The facts will be brought out and the Congress has the power to assure a complete airing of the facts. Only then should a verdict be rendered.

It has been said that the right of freedom of the press and the right to a free trial are on a collision course. It is my opinion that this collision is not necessary. I commend to my colleagues' attention a most thoughtful and responsible editorial on the subject from the December 1, 1969, edition of the Kingston (N.Y.) Daily Freeman:

TOO SOON FOR VERDICT

David Lawrence in an adjoining column states that throughout the world public opinion apparently has made up its mind that American officers were responsible for whatever did happen in a South Vietnamese hamlet in March, 1968.

Americans have recoiled in horror as details of the alleged massacre have unfolded in recent days. There is, to be sure, no incontrovertible proof that GIs deliberately gunned down civilians. Pictures of piled-up bones do not show how or by whose hand they were killed.

But the charges are too grave and too horrible and corroboration is coming from too many sources to be swept aside. The Army has brought charges of murder against 1st Lieut. William Calley Jr. alleging that he murdered 109 civilians of various ages and of both sexes. The officer must be given every chance to try to prove his innocence, but all the witnesses that can be rounded up also should be heard. If others beside this lieutenant are implicated, they too, should be court-martialed. Members of the South Vietnamese Senate and Assembly also are to conduct an investigation. A week ago Defense Minister General Nguyen Van Vy branded the reports as "totally untrue."

As it now stands, none of the charges has been proved, but Americans are disturbed just the same. However, as the columnist points out, it is just as illogical for a verdict to be rendered by the press or TV as it would be when a jury has heard only one side of a case in a trial where someone is accused of murder.

If it is established that our armed forces massacred innocent civilians, the guilty should be punished. But before jumping to conclusions, we should wait until a full investigation is completed. It is too soon to render a verdict.

AMERICAN INDIAN COURT JUDGES ASK FOR BASIC CHANGES IN U.S. GOVERNMENT AGENCY STRUCTURE

HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. BERRY. Mr. Speaker, Mr. Tom Colosimo, secretary of Arrow, Inc. who maintains the Arrow headquarters here in Washington, has recently written an editorial for their publication entitled "American Indian Court Judges Ask for Basic Changes in U.S. Government Agency Structure." The article is well done and I think deserves the studious consideration of each Member of Congress. The article follows:

AMERICAN INDIAN COURT JUDGES ASK FOR BASIC CHANGES IN U.S. GOVERNMENT AGENCY STRUCTURE

The American Indian Tribal Court system, as it is known today, has its origin in the Wheeler-Howard Act of 1934, more commonly known as the Indian Reorganization Act. The intent of this legislation was to give each recognized Tribal entity an opportunity to provide the total range of governmental services for members of the Indian community while operating under a Tribal constitution and charter. This legislation stipulated that each Tribal government would be organized so as to provide for the maximum social and economic welfare of its members. This concept of self-government involved all aspects of community services, including the police and judicial function.

The Tribal court system at first operated under the U.S. Code of Federal Regulations, Title 25. Each Tribal organization that reorganized under the Act was later encouraged to adopt its own law and order codes which would provide for the safety of its Tribal members under laws applicable to the reservation on which it was operating. The reservation resident was thereby to be provided with laws which were consistent with the surrounding environment.

However, as the surrounding environment has become increasingly complex and difficult to cope with, the Indian court system has been held back by a number of factors. In the fore among these factors are the present Federal government regulations and controls of many judicial functions, a lack of provision for training Indian judges, and a lack of funding to the Tribal courts.

Existing Regulations include two provisions limiting the function of the Tribal Court System. First, the present codes relate generally to misdemeanor offenses. The Federal government retains exclusive jurisdiction over all other offenses under the Eleven Major Crimes Act. Second, the Code provides that only members of the Tribe under the jurisdiction of a particular Tribal court shall be eligible to sit as judges on that court.

At first, Tribal judges were capable of coping with misdemeanors and simple civil cases which came to the attention of their courts. With the passing of time and the extension of jurisdiction to Tribal courts by decisions of state and Federal courts, criminal and civil actions became more complex, and many of the Indian judges found *themselves* lacking training in law and legal procedures.

The men and women who now serve as Indian court judges hold a vital position within the reservation community. As in any community, the judges are responsible, in large part, for upholding the individual rights of the citizens who appear before their courts. The importance of the court system to the fabric of the entire community it serves is obvious.

The sad fact is that the American Indian Tribal court system is understaffed, underequipped, and underfunded. The judges who serve the system, in most cases, have a minimum of formal legal training and no access to up-to-date information on legislation and legal process. While Indian policemen receive training, and police functions on the reservation are augmented by the Federal government (the Bureau of Indian Affairs Branch of Law and Order and the F.B.I.), the judiciary and its personnel are sadly neglected.

American Indian Tribal court judges, if their communities' needs are to be served, must be given the training and dignity commensurate with the important positions that they hold. Many Indian judges, including the Chief Justices of some reservations, must serve in a number of capacities not directly related to their positions as judges if important court services are to be provided for their people at all. They perform some of the duties that secretarial staff, counselors, and probation and parole officers should perform. Several Indian judges have commented recently that their jobs could easily take twenty hours of each working day. The exceptional responsibility that these men and women are assuming becomes clearer when one realizes that most Indian judges must rely on sources of income other than their judge's salary. This salary is in many cases as low as $20.00 per day, this being in a court which does not convene daily.

The Indian courts themselves are neglected. Many of the Tribal systems in the nation do not have so much as a real courtroom in which trials may be conducted. Not only do many of the Tribal judges have a minimum of formal background in law, but also they have little, if any, access to such basic resources as law codes, due to lack of funds to purchase these volumes. The lack of funding and training also prohibits the employment of other court officials—clerks, bailiffs, and probation and parole officers.

Despite the grave needs that Tribal courts now face, funds for those courts, which are handled through the Bureau of Indian Affairs Branch of Law and Order, have been given annual increases by the Congress

which account only for annual cost increase. In other words, the Indian courts are funded so that they can maintain the starvation level at which they now operate, and are provided no funding for expansion or improvement. This is the case despite the fact that Indian courts share the steadily increasing load of Anglo courts throughout the nation. The number of criminal cases processed by Indian courts rose 7% in fiscal year 1968 as compared with fiscal year 1967. With no possibilities for decent probation and parole programs on the horizon, it is worrisome to note that about 69% of the Indian court convictions during fiscal year 1968 were of repeat offenders, and in over 76% of the cases placed on probation or parole during that time, no supervision was intended.

American Indian Tribal court judges are fully aware of the deficiencies of their court system. They want to obtain the training that they now lack; they want to obtain the facilities their courts now lack so they may function at top efficiency and be concerned only with the *administration of justice* on the reservation.

In June, 1968, a series of conversations was initiated among a number of Indian court judges, Bureau of Indian Affairs officials and Arrow, Inc., a non-profit corporation based in Washington, D.C., and devoted exclusively to American Indian programs. After many preliminary meetings, these judges formed their own professional society, the National American Indian Court Judges Association (NAICJA), to combat the problems cited above. The overall purpose of NAICJA, as stated in its Articles of Incorporation, is to upgrade the Tribal court system through professional advancement and continuing education. Its emphases are on research, education, and communication. With some assistance from Arrow, Inc., NAICJA has already sponsored two management training institutes for Indian court judges and court clerks, and is now planning a third.

The institutes were held in Albuquerque, New Mexico and Custer, South Dakota, June 16–19 and September 12–14, respectively, and were attended by approximately 100 Indian court judges, court clerks, Tribal officials, and judicial officials of the states in which they were held. The institutes provided sessions on such topics as: jurisdictional problems, the effectiveness of volunteer probation and parole officers on reservations, implications on the reservation of the 1968 Civil Rights Act, and the importance of an independent judiciary in Tribal government. The judges attending the institutes all expressed an interest in and a desire to work with NAICJA in its future efforts. While the judges recognize that each Tribal court has its own particular strengths and needs, they recognize a commonality of problems—isolation of reservation areas, lack of training possibilities for reservation court officials, lack of funding to courts, and more emphasis on police functions on the reservation than on the judiciary.

NAICJA, then, is providing two much-needed services. It is a society within which Indian judges throughout the nation will undertake research and education programs and can openly discuss their individual needs and ideas, and it is a forum from which these judges can speak in a unified voice.

One extremely important note to come from NAICJA in recent weeks is a recommendation by Judge Virgil L. Kirk, Sr., Tribal Court Judge for the Navajo Tribe and President of the Board of Directors of NAICJA. Judge Kirk is advocating the replacement of the Branch of Law and Order in the Bureau of Indian Affairs with a *Department of the Judiciary and Law Enforcement*, also within the Bureau. This request will be one of the main topics for discussion at the next NAICJA management training institute, which will be held in January.

The thinking behind Judge Kirk's recommendation involves much more than a simple name change. He and other members of NAICJA are looking toward a reorganization in the Bureau of Indian Affairs that will provide ample recognition for the Tribal court system. The Indian judges are presently researching their ideas to find the most practicable ways of bringing about that recognition. They are in touch with government agencies in Washington and throughout the country, and they have enlisted the aid of a number of experts in the field of Indian law. The formation of NAICJA in itself is a significant step in the right direction for Indian judges. NAICJA's action to shift emphasis on the reservation so that the court system will have the funds and the expertise it needs is highly noteworthy. Although the name change is significant, the thinking behind it is of much greater importance. A BIA Department of Justice that will eventually help these judges establish a court system that will truly administer justice to American Indians is one of the most important contributions to be made in the field of Indian affairs today. For without a meaningful and successful law and order *and* justice program for individual American Indians living on Reservation lands how can there be a meaningful and successful education program, economic development program and improvement in all categories of Indian community life?

BERNARD BOUTIN, PRESIDENT, ST. MICHAEL'S COLLEGE

HON. ROBERT T. STAFFORD

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. STAFFORD. Mr. Speaker, I recently had the pleasure of attending the inauguration ceremonies at which Mr. Bernard Boutin was installed as president of St. Michael's College, in Vermont.

This was a historic occasion at St. Michael's, which has become one of our Nation's finest liberal arts colleges. Mr. Boutin became the first layman to become president, following his 10 predecessors who were assigned to the office of president of the Society of St. Edmunds.

Because of Mr. Boutin's long and outstanding service here in Washington, I know that he has many friends here who are interested in his new endeavor. I, therefore, would like to bring to their attention the address given by President Boutin following his inauguration, as well as an account of the ceremony which appeared in the Vermont Catholic Tribune:

INAUGURATION ADDRESS OF BERNARD BOUTIN, PRESIDENT OF ST. MICHAEL'S COLLEGE

Your Excellency Bishop Joyce, Lt. Governor Hayes, Congressman Stafford, distinguished presidents and representatives of colleges and universities, very reverend and reverend fathers, reverend sisters and brothers, Rabbi Wall, Reverend Dr. Garrett, civic leaders, trustees, associate trustees, alumni, my colleagues on the faculty and in administration, students and friends:

Today formally marks a time of new adventure at St. Michael's College. It had its beginning last March when the trustees elected for the first time in the 65-year history of the college, its first lay president. Typically, on an occasion such as this, I suppose a new president should express his feelings in terms of trepidation. Rather, I have accepted these responsibilities with gladness of heart, tranquility of spirit and eagerness for the future. I undertake these challenges with a single obligation: the obligation to devote every effort of mind, body and spirit to lead this college to still greater achievement as we seek to develop great men.

To my predecessors, outstanding priests and educators of the Society of St. Edmund, I express our collective gratitude for their vision and their leadership. The problems of today pale by comparison with those of the small band of priests, newly arrived from France, who in 1904 founded this college armed only with faith in Almighty God and the "princely sum" of $1300. We are both proud and pleased to have still with us at the college one of those early pioneers, Father Eugene Alliot, fifth president of the college, who has been a part of the building of a greater St. Michael's from the very beginning to the present day. His youthfulness of mind and spirit, his confidence in the future, is an example to all of us. This November sixteenth, feast day of St. Edmund of Canterbury, is a fitting occasion to assure Father Alliot and his Edmundite confreres that we shall continue to nurture with care the seeds planted sixty-five years ago.

So while we speak of new beginnings we also speak of building on the proud traditions and accomplishments of the past. But this past which serves as a prologue to the present must not become shackles for the future. The times are too grave, the problems too apparent, the challenges too urgent, the stakes too high for any college or university to be bound by the status quo. It is clear that some of the old concepts, many of the old ways, will no longer do. Confident in the belief that our institutions of higher learning offer the greatest hope and promise of a better, safer, more just world, we at St. Michael's welcome the emerging changes and the new opportunities they carry with them.

Just as Vatican II opened the doors of the Catholic Church, not to a surrender of principle, but to a search for better ways to accomplish its apostolic mission, so too have the doors of this college been opened wide to new ideas. Since early summer, literally our entire college community—trustees, faculty, students, alumni and administration—has been joined in a common effort to plan our future. We work together not as adversaries but with the common good as our goal. Nor do we concern ourselves with who is right but rather seek together to determine what is right—uniquely right for St. Michael's.

I foresee, as a result of the research and work being done by a committee chaired by Dr. Earl McGrath, former U.S. Commissioner of Education, a St. Michael's college whose educational objectives and purposes are more clearly stated than ever before. Objectives and purposes which, to be accomplished, will demand a high degree of excellence by each who wishes to participate.

Simultaneously, a committee on curriculum, under the able leadership of Dean Pfeifer, is seeking new and better ways to enhance the educational experience, to expand academic opportunities, and to assure at St. Michael's a faculty-student relationship of close rapport and mutual respect contributing to effective teaching and deep learning. Recognizing that each student possesses his own knowledge, forms his own opinions, makes his own inferences, is endowed with his own gifts, possesses his own character and has his own individual aspirations, we endeavor to design a unique system for the transmission and acquisition of knowledge which will motivate each student to be all that he can be, and to search for a greatness of his own.

A college of liberal arts and science we have been and such will we continue to be, not in terms of antiquated definition and obsolete restriction, but rather in a climate

where experimentation and innovation are a way of life.

I think even the doubters who were ready to embalm the body of each small college only a few years ago have now detected new signs of life, vigor and virtue in the very smallness they once thought was dead. And it is because we seek at St. Michael's to achieve the most perfect development of each student as an individual rather than as a statistic, that we will measure our growth in qualitative rather than quantitative terms. Translated to specific objectives, this will mean a further gradual raising of our admissions standards, an increasing demand for academic achievement by our students and a faculty noted without exception for its excellence of preparation and ability to teach.

If small, private colleges have an achilles' heel, it surely relates to equating academic excellence and solvency. It seems very clear to me that even with near perfect management of the business affairs of a college, there still must be a reasonable amount of financial support from government if we are to avoid fiscal disaster. Of top priority are financial assistance programs for students and aid in the form of grants and low interest loans to enable colleges to provide needed buildings and modern equipment. Each time that the high promise of legislation goes unmatched by appropriations, the potential of higher education to serve the public interest is diminished.

But we are not dependent upon government alone for assistance. During the past five months, we have been busily engaged in the business of identifying our future needs. They consist of endowments for scholarships and faculty salaries, a new fine arts center, an academic building and a sports center. Translated into financial terms, to meet these needs will require ten million dollars with only about one and one-half million to come from the college's own resources. For the balance of eight and one-half millions, we will need the assistance of our trustees, associate trustees, alumni, friends of the college, business, industry, foundations, government, student and alumni parents, and each and every one of us at the college to meet this ambitious goal over the next five years.

St. Michael's, having from its very beginning an edmundite affiliation, is first and foremost a catholic college. In the ecumenical spirit, we regard this term with both a small and a capital "C". Defining catholic with a small "C" as being all embracive, we wish to make it crystal clear that students of all religious faiths are most welcome at this college. The values we seek to inculcate are those identified with the judeo-christian traditions of western civilization and surely these are of critical importance in contemporary society regardless of religious beliefs. For the catholic student, we endeavor to provide, through both the physical presence on campus of learned priests and laymen and through strong, comprehensive programs in philosophy and theology, the means to better understand, to build upon and to live his faith.

A problem, not unique to this college, troubling educators all over the land who have responsibility for schools now either exclusively male or female, concerns the advisability of coeducation. I believe that there is much to be said in its favor and because we are fortunate enough to have nearby an outstanding women's college of liberal arts, an unusual opportunity for cooperation appears feasible. We have, therefore, entered into serious discussions with our counterparts at Trinity College in Burlington, which we hope, at an early date, will lead not to a merger but rather to a working together for the purpose of enriching the educational experience of the students on both campuses.

There may be those who expect on a college campus to hear harsh rhetoric about student apathy. Too many tend to identify today's student with a scene from the *Graduate*, a film in which the main character is concerned about his future. When he is asked in anger by his father, "what did I send you to college for?" The graduate responds, "You got me, dad." I'll quickly concede that probably every college in the country, St. Michael's included, has more of this type student than it wishes. In the final analyses, however, we have only ourselves to blame for it points up a weakness in admissions policy and a lack of stimulation in the classroom. For many restless and indifferent students today, college deals too exclusively with abstractions, theories, and precise facts to be memorized almost by Rote, and too little with morality, and action and the direct confrontation of man with his society and his environment. As an integral part of education at St. Michael's, we must be sensitive to the burning issues of our time and prepare our students to tackle them when they go out in society. We must increasingly seek and attract students whose alert and probing minds mark them as natural participants in the life of the mind. We must and will remain dedicated to the pursuit of truth and the diffusion of both knowledge and culture.

Our days, therefore, are filled with intense activity and high hopes for the future of this college. Each day is a new adventure as one step at a time we progress toward the realization of the high standards we have set as our goal. To those at the college, I ask your help. To all, I ask your prayers.

[From the Vermont Catholic Tribune]

MANY FIRSTS FOR ST. MICHAEL'S COLLEGE LAY PREXY

(By John D. Donoghue)

WINOOSKI PARK.—In a ceremony rich with symbolism and color, Bernard L. Boutin was inaugurated Sunday as the 11th president of St. Michael's College. About 100 colleges and universities sent delegates.

There were many "firsts." Mr. Boutin is the first layman to become president of the liberal arts college. It was the first time a president was formally inaugurated in the 65-year history of St. Michael's.

One of St. Michael's most distinguished alumni—he had served Presidents Kennedy and Johnson in Washington—Mr. Boutin became the first president to receive the medallion of office. Bearing the seal of St. Michael's College as its main ornament, the newly created presidential medallion also carries on its small, bronze oval disks the names and dates of all 11 presidents.

The oldest living former president, the Very Rev. Eugene Alliot, S.S.E. (1931–1934) a founder of the college in 1904, was there to see a former student accept the medallion and mace from the Very Rev. Eymard P. Galgan, superior general of the Society of St. Edmund and chairman of the board of trustees.

Mr. Boutin's 10 predecessors, some of whom were in attendance, took office without the formal turning over on Sunday of presidential leadership from religious to lay hands. His predecessors had taken office as an assignment from their Edmundite colleague who constituted the board of trustees. The ceremony took place on the feast of St. Edmund.

Mr. Boutin was chosen president on March 14, 1969 by a board that now includes seven other laymen, following a search in which trustees, faculty, administrators and students participated.

Dr. Henry G. Fairbanks, chairman of the inauguration committee, was marshal for the colorful procession into the chapel. From Harvard University, founded in 1636, to Franklin Pierce College, founded in 1962, the delegates and representatives of civic, learned and professional societies brightened the chapel with their hoods of every color. TV and still cameramen kept their bright lights focused on the area in front of the altar.

After the national anthem, the invocation was delivered by the most Rev. Robert F. Joyce, bishop of Burlington.

Then followed a series of greetings: for the students. Francis M. Corbishley, president of the Student Association; for the faculty, Dr. Edward J. Pfeifer, academic dean; for the administration, Rev. Francis E. Moriarty, S.S.E., assistant to the president and himself a former president; for the alumni, Alfred A. Scaia, president of the Alumni Association; for the trustees, Father Galligan; for the state, Thomas L. Hayes, lieutenant governor; and for the diocese, Bishop Joyce.

After a choral interlude, "Exultate Justi" by the choir under the direction of Paul Dorsam, the formal investiture was followed by President Boutin's inauguration address.

For the occasion, the trustees had also voted to confer three honorary degrees: To Ernest W. Gibson; Bernard J. Leddy; and the Rev. William A. Donaghy, S.J.

Because Judge Gibson, chief judge for the U.S. District Court, District of Vermont, died since the vote of the trustees, the honorary doctor of laws degree was received by his son, Ernest W. Gibson, III, from the Rev. Daniel P. Lyons, S.S.E., trustee and former president.

Judge Leddy also received an honorary doctorate of laws. It was presented by Trustee Thomas J. Kenney.

Father Donaghy, poet and former president of Holy Cross College where he is again teaching, received his honorary doctorate of humane letters from Rt. Rev. Msgr. Charles J. Marcoux, trustee.

The Benediction was offered antiphonally in Hebrew and English by two members of the faculty, Rabbi Max B. Wall of Ohavi Zedek Synagogue in Burlington, and Dr. William R. Garrett, a Baptist minister.

Among those attending was Congressman Robert T. Stafford.

The Vermont State Department of Education was represented by Deputy Commissioner Daniel G. O'Connor and the Diocesan Board of Education by its chairman, the Rev. Raymond A. Adams.

The New Hampshire Board of Education which Boutin served as chairman before his call to St. Michael's was represented by Deputy Commissioner Robert L. Brunelle and members Gerard F. Cullerot and John J. McNabb.

FOSTER GRANDPARENTS

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. QUIE. Mr. Speaker, Miss Genevieve M. Thompson, supervisor of special services for the Ramsey County Welfare Department, gave an excellent speech on the workings of the Foster Grandparent program in Minnesota in May 1968. This speech has just been published in the November issue of Child Welfare.

I commend it to my colleagues as it portrays how the Foster Grandparent program can bring tremendous benefits to both the young and the old.

The speech follows:

FOSTER GRANDPARENTS

(By Genevieve M. Thompson)

(NOTE.—Genevieve M. Thompson is Supervisor, Special Services, Ramsey County Welfare Department, St. Paul, Minnesota. She set up the foster grandparent project described in this paper, which was presented at the CWLA Midwest Region Conference, 1968.)

Discussing the potential of older citizens, Esther E. Twente, then at the University of

Kansas School of Social Work, wrote in 1965: "In a youth-oriented culture, with much emphasis placed on production and money income, the period of life between retirement and death may become quite meaningless for older people. Frustrations, undefined roles, and the lowered economic status often accompanying retirement may make for irascibility, loneliness, and a feeling of worthlessness. Yet this can also be a time of usefulness and productivity. It may also be a period during which courage, strength, and a capacity for creativity may be demonstrated."

In the same year, the Administration of Aging, U. S. Department of Health, Education, and Welfare, was negotiating a contract with the newly established Office of Economic Opportunity to initiate a most fascinating, productive, and rewarding way of life for senior citizens—the Foster Grandparent Program. Basic to the project were two facts: America has hundreds of children existing in institutions without the opportunity of experiencing a close personal relationship; America also has thousands of persons 60 years old or older whose lives have become essentially meaningless because they no longer have a close personal relationship.

About 100 directors of children's institutions throughout the country, convening in Washington, expressed their concern about the institutionalized children's unmet need for individual relationships, and were told of the Administration on Aging's concern about elderly persons lacking personal relationships. It was obvious that the children needed the older persons, and the older persons needed the children—and the Foster Grandparent Program was born.

Applications for projects were received from about 70 children's institutions represented at the conference. These included proposals to use foster grandparents in hospitals, schools, day care centers, and sheltered workshops, and in the family homes of children who were crippled, blind, retarded emotionaly ill, physically ill, or culturally deprived. I was involved in setting up a project, sponsored by the Minnesota Association for Retarded Children, that authorized use of 120 foster grandparents divided among the three state hospitals for retarded children, at Brainerd, Cambridge, and Faribault, Minnesota.

The contract between the OEO and the Administration on Aging made the administration responsible for technical development and supervision of projects initiated under the program, and for determining the best procedure for conducting future programs. The OEO made nationwide expansion of the program possible by providing financial support. Children accepted for the program were to be less than 16 years old, and elderly persons accepted were to be 60 or older, and have an income below that established by OEO as the poverty level. Initially this level was $1500 for a single person and below $2000 for a married person; in December 1968 these amounts were increased to $1600 and $2100. The basic unit of service was 2 hours a day of individual contact with a child, and the basic objective, of course, was to employ older persons to give personal attention to individual children. The program was conceived as an added dimension of agency services, and the foster grandparents were not to be used to relieve staff of routine duties. There were to be no maintenance or custodial responsibilities unless such activities were a natural part of giving attention to an assigned child. A maximum of 20 hours a week was established for each foster grandparent. Although pay for most projects has been increased to $1.60 an hour, with a transportation allowance, for the Minnesota Association project the initial pay was $1.50 an hour, plus a transportation allowance not to exceed $1 a day.

Foster grandparents were expected to work from 10 a.m. to noon with one assigned child, and from 1 p.m. to 3 p.m. with a second. A 40-hour training program was required for identifying and developing foster grandparent abilities in the senior citizens employed. Supervision and continuing in-service training were required in each project. Advisory committees composed of one-third lay community members, one-third professional community members, and one-third foster grandparents were organized to meet the "maximum feasible participation" goal of antipoverty programs. Quarterly narrative reports were required, covering three areas: general operating description of the project, community relations, and observable benefits.

COMMUNICATION LEVELS

Although I am a professionally trained social worker with 30 years' experience, my communication experience had been primarily in a one-to-one relationship, and secondarily in group relationships—in short, it had been meager compared with the intensive and extensive experiences in communication involved in the foster grandparent project. From the beginning and at all levels of involvement, each facet of the programs was observed, reported on, and scrutinized openly. Foster grandparents kept diaries that were shared with staff, in newsletters, and in the quarterly reports. The diaries recording activities of the foster grandparents and children (activities observable by institution staff, the children's own family, the community, etc.) contained a wealth of "inner" comments and feelings, as well as foster grandparents' own instructions to themselves. Many recorded the foster grandparents' need to "listen carefully," to "speak clearly," to "report such and such," to "experiment with this," together with their evaluations of their own activities, such as "that was sure a flop," or "I finally got through to him." To give an example: A foster grandmother had tried repeatedly, and in various ways, to keep a child from biting whoever came near him. One day her diary recorded: "I'm going to try a pepper bag." She made a bag, filled it with pepper, and tucket it into her apron pocket for use the next day. When the child bit, she applied the pepper bag to the tip of his tongue. That stopped him. On a few other occasions, when the child indicated readiness to bite, she said, "Pepper bag," and he found some other way to express himself.

This kind of procedure will not be found in a book on disciplining children, but it made one little boy a more welcome member of society.

The foster grandparent programs have gained much by this kind of open reporting on experiences. We have much to learn from older citizens, who disclose more of themselves and their living than younger people ordinarily do. In state-level advisory committees we struggled with the concept of "maximum feasible participation" in relation to an expressed view that problems of helping foster grandparents should not be discussed at meetings where they are present.

The quarterly narrative reports kept Washington apprised of developments and problems, and this sustained a sense of creativity and growth in all the projects. Each quarterly narrative report reflects the individuality of each project. Preparing them takes time, but as a way of evaluating experience, they are invaluable.

THE PERSONAL EQUATION

I have sketched the background of the foster grandparent-foster grandchild experience, and now will describe how I saw the human beings involved. I viewed the people over 60 as having long human, living experience, and as using themselves freely in the foster grandparent relationship. This relation included the foster grandparent's feelings of love, his desire to be wanted and needed, his sense of self-importance, all expressed in the 2 hours a day, 5 days a week he spent with the child. There can be no other commitment such as teaching, accomplishing, and socializing. I saw no role for the older person as teacher, nurse, or social worker; no secondary aim, no task-oriented focus. The only objective was establishing a deep feeling connecting him and the child.

The 240 children involved in our project—in all three hospitals for the retarded—were experiencing "herd-type care" and were acknowledged to be "substandard." The children selected for the assignment of foster grandparents were the most limited, the most deprived in the institution population, and had the least family or other personal contact. Most were not involved in any of the hospital programs; generally they spent days as well as nights in cribs or on the floor, often withdrawn, often engaging in behavior destructive to themselves and to other children. Many were totally dependent, needing to be bathed, fed, dressed, and toileted.

These children, as infants, lacked the loving relationship of the baby and the mother whose unconditional response is an affirmation of the child and his needs. Besides being fed, bathed, changed, and held, he needs an affectionate relationship to enable him to grow emotionally, intellectually, and socially. Lacking these elements, the child develops patterns of behavior that limit, block, and distort his growth processes. This calls for remedial relationship.

In the training program for foster grandparents we oriented them to the hospital settings, but emphasized the primary value of the relationship of foster grandparent and grandchild. We urged the foster grandparents to be natural in their relationship with the children, to be creative, spontaneous, responsive to the children's feelings and wishes, in whatever way both enjoyed. After the training period one grandmother wrote: "It's gratifying to me that an elderly person can get in contact with a young person. It is quite rewarding when a child recognizes you, wants to come and talk with you, smiles when he sees you. It does something for the foster grandparents as well as for the child." Another wrote: "She took my hand the other day, led me to the rocker, then waited for me to sit down so she could climb onto my lap and be rocked."

CHANGES IN THE CHILDREN

At the end of the first 3 months almost every grandparent had experienced the thrill of watching the child perform "for the first time" some simple operation such as turning over, sitting up, holding a glass, putting a spoon in his mouth, walking up stairs, or uttering words. It was rewarding for the foster grandparents when their children gave up such behavior as biting, hitting, screaming, throwing toys, and wetting and soiling themselves.

The nursing staff reported that at least 75 percent of the children had shown improvement. They said the children were less destructive, less hyperactive, seemed to have more respect for each other's belongings, were more secure, more responsive, more aware, more like little individuals. With such evidences of growth, it was disappointing that an initial study early in the program indicated no significant difference between children who had foster grandparents and a control group that did not have them. One explanation for this finding seemed to be the lack of refined ways to measure emotional and relationship growth. For example, in the study ambulation categories were defined as "bedfast," "sits if propped," "sits unaided," "crawls," "walks with support,"

"walks unsteadily," "walks normally," and "has problem in climbing stairs." These categories could not describe the change in one child who, at the beginning of the Foster Grandparent Program, was bedfast but could stand with sprawling legs and feet, had limited movements of his arms, and was a quiet child. At the end of a month he was hugging his grandparent, laughing out loud, kicking, and using a scooter upright. Before the end of the second month he was playing on and off a walker; at the end of 6 weeks he took six steps free of the walker.

A second study evaluating some of the children after 6 months showed some significant gains.[1] In this survey 56 children from 5 to 15 years old, ambulatory and nonambulatory, with little or no parental contact, who had been tested before their introduction to the Foster Grandparent Program were tested again after the 6 months of the program. In social quotient scores, there were 46 positive changes, seven negative changes, and three cases of no change. Statistically, there were significant changes in six catgories: self-help general, self-help in eating, communication, socialization, locomotion, and occupation. In only two categories were there no significant changes, those of self-help in dressing, and self-direction.

A NEW ATMOSPHERE

At about this time a new atmosphere began to develop for the children. The hospital campuses were filled with purposeful activity; playground equipment was in constant use. There were many tanned faces. One could observe a foster grandfather wrestling with his foster grandson on the grass; a second foster grandson was learning to roll down a grassy bank; another foster grandfather was playing hide and seek around a hedge with his child. Other grandparents briskly walking their nonambulatory children in wheelchairs. There was an increased sense of interdependence, trust, and loving between the foster grandparents and the foster grandchildren. It was as though by working and searching together they were coming to a realization of themselves in relation to each other.

The relationship brought many benefits to the foster grandparents. The importance of the financial benefits depended, of course, on the initial level of income. One foster grandmother converted her wood furnace to an oil burner. Another installed indoor plumbing. Many used the income to meet current expenses, to purchase hospital or life insurance, to buy clothing, cosmetics, books, or to help a son or a daughter.

Social benefits were reflected in comments such as: "I enjoy people and I feel more content after being out among them," "I find that I can now get along with anyone and everyone," "I have met lots of nice people, made good friends, look forward to being with the group." Health improvements were obvious to hospital staff, family members, and the foster grandparents themselves: "My friends say I look younger and better"; "I go to bed early and really sleep." Many grandparents expressed their pleasure at being involved in something meaningful, instead of "just waiting around to die" or living out their lives "feeling useless." They enjoyed helping the children.

After several years of operation, the question of who benefits more from the program—the foster grandparents or the foster grandchildren—remains unanswered. An older citizen wrote: "The foster grandparent project gives me the ability to earn my living rather than receive aid to the disabled it gives me a feeling of usefulness, since I think I can do the children some good; it has opened up a whole new life for me and my grandchildren; and, finally, I feel needed again." On the other hand, a staff member in a hospital for retarded children told me of a blind, self-abusive, emotionally disturbed 13-year-old girl who kept both arms twisted in her blouse, would not let herself be touched, and almost never spoke. After a few weeks with her foster grandmother, her arms came out of her blouse, she became affectionate and less withdrawn, and began to communicate verbally.

Benefits to the institution were slower in evolving and were more generalized. Staff members had more time for the children left in the wards during the foster grandparents' working hours. Many of the gains in behavior made by the foster grandchildren were maintained by the staff. Wards were quieter, there was more related activity, and less destructive action. Staff members established a close, friendly relationship with the foster grandparents. Parents of the children also expressed pleasure because their children showed improvement.

UNDERSTANDING THE RETARDED

Finally, the program has given some of us a better understanding of retardation. It is a painful experience to see children and adults in a state hospital for the retarded, living out their lives in a setting that accepts the absence of learning and growth. Most of us block out this picture once we leave the hospital grounds; the foster grandparents set about relating to their assigned children in such a way that we could no longer avoid a realization of the tragic waste—human and economic—that the traditional care for the retarded involves. Out of the foster grandparent experience thousands of persons are becoming aware that even profoundly retarded intellectual development does not eliminate the possibility of a child's relating in a close, loving way, of his learning to feed himself, to dress himself, to play with peers, to share and respect individual belongings, to take care of toilet and bathing needs—in short, of learning appropriate social behavior.

Foster grandparents offer a vital remedial relationship for needy children, providing a special relationship conducive to emotional, physical, social, and educational growth in the child. Their contribution is essentially the use of their own personality and life experience within a defined area, and not activity as subprofessionals, paraprofessionals, aides, or assistants to the professional worker. They need a minimum of training to understand the general principles of their roles, and to prepare themselves to make a deep commitment in this new kind of work.

Foster grandparents should be made available to children who need a one-to-one relationship—those who are retarded, emotionally disturbed, delinquent, physically handicapped, culturally and economically deprived, or living with troubled families.[2] Such services should be provided in residential care facilities, day care centers, nursery schools, special education classes and training centers, religious education programs, recreation facilities, foster homes, and the child's own home.

[1] Elizabeth Moore, Margaret Raedeke, and L. Kenneth Stinson, "An Evaluation of the Foster Grandparent Project at Cambridge State Hospital: The Effect of Social Stimulation on the Profoundly Retarded Child," unpublished thesis as part of requirement for M.S.W., University of Minnesota, June 1968.

[2] The 1967 Social Security Amendments require each state public assistance plan to "use subprofessional staff and volunteers in providing services to individuals applying for and receiving assistance." These plans should utilize foster grandparents in providing remedial relationship experience for children and parents.

CONFERENCE ON THE CONCEPT OF ATLANTIC PARTNERSHIP

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. STEIGER of Wisconsin. Mr. Speaker, it is my privilege to introduce into the RECORD today the report of the British panel of the very fruitful and productive conference on the concept of Atlantic partnership, sponsored by the Institute on Problems of European Unity.

The strategic arms limitation talks in Helsinki raise some very basic questions about the future of Europe and the forms which American-European relations will take. It is therefore particularly timely that this comprehensive report be brought to the attention of the Congress, as follows:

CONFERENCE ON THE CONCEPT OF ATLANTIC PARTNERSHIP—BRITISH PANEL CHAIRMAN'S REPORT

Panel Members: David Calleo (chairman), SAIS, Johns Hopkins University; Professor Carl H. Cerny, Georgetown University; Mr. Peter Jay, London *Times* Washington editor; Mr. Andrew Knight, *The Economist* Washington editor; Professor Robert Skidelsky, Nuffield College; Professor Henry Steck, State University of New York (Cortland).

Discussion focused on the tension in British policy between an Atlanticist orientation built around an American special relation, and a European orientation—aimed towards a cohesive European political grouping. The discussion was organized into three sessions, the first dealing with broad political aspects, the second with economic and the third with military.

Amid a wide variety of arguments and points of view, certain general conclusions appeared to be shared among most members. It was clear that the issue of Britain's future orientation was extremely complex. For many people in Britain, there seemed strong tension between the European and Atlanticist poles, between the ideal of a new European grouping and the ideal of a developing unity within the Atlantic world, a perception which, in turn, generated considerable ambivalence and diffidence in Britain's commitment to European integration. Although Britain's bid for membership in the Common Market might suggest a shift towards the European ideal, the Atlantic vision continued to exercise a strong hold on the British imagination. Unlike many continentals concerned with European unity, many British were not seriously dissatisfied with the prospect of a Russian-American world condominium, an arrangement which many people in Britain instinctively found safer than the rise of a new European colossus.

The ideal of a wide and relatively loose Atlantic world, embracing Japan and much of the Commonwealth as well, appealed to the still strong free-trade perspectives of the British, while, for many, the Common Market still seemed the creation of incurably mercantilist, "inward-looking" continentals.

The notion of a special partnership with America in peace-keeping throughout the world still appealed to the perspectives of a nation conditioned to imperial responsibilities in maintaining a world-wide system of order. By comparison, a European bloc, less enthusiastic about international peacekeeping, and preoccupied with internal consolidation, seemed relatively limited in its hori-

zons, as well as essentially revisionist and hence disruptive towards a postwar world system which most British supported. For many in Britain, General de Gaulle's challenge to the status quo simply made articulate the tendencies which were inherent from the beginning in the whole notion of a European bloc.

On the other hand, in spite of their fundamental sympathies with the Atlantic ideal, the British have found their present position increasingly unsatisfying, both economically and politically. Britain's continuing economic decline has made junior partnership with America seem less and less meaningful and isolation from the relatively dynamic continent more and more costly. For some, however, there still remains the hope that Britain's draconian measures to strengthen the pound will finally turn round the economy and again allow Britain to assume a satisfactory role in Atlantic partnership with America. Hence, some speculated, the seeming decline in interest in the Common Market after the recent signs of strong improvement in the balance of payments.

In any event, there remains a strong and deep division in the British mind between Atlantic and European ideals and a strong sense of the tension between them. Much of this feeling has never been clearly articulated in the public debate over the issue of Market membership. The British tactic, instead, has been to seek entry into the European bloc on terms which would compromise Atlantic ties as little as possible. Most panelists agreed that General de Gaulle's veto was, therefore, not surprising. There had not yet been a public debate in England which showed much awareness of the real issues. The profound shift in British perspectives required to make Britain enthusiastically "European" had not taken place, in spite of an undoubted evolution of public opinion in that direction.

One development might hasten a British evolution towards Europe. The Americans themselves might begin convincingly to disengage from their world duopoly and, in particular, from their heavy role in European affairs. American policy, on such a course, might actively promote, or at least cease to resist, the gathering of a European bloc dedicated to building a "Third Force."

Such a development would leave Britain supporting an American policy no longer supported by the Americans and might provoke an active commitment to building a European bloc. Many in Britain, however, clearly prefer the present Atlanticist military and financial arrangements and, in general, America's continuing a leading role in European affairs.

FIRST SESSION: POLITICAL ASPECTS

The meeting heard remarks by Mr. Jay and later Mr. Skidelsky, with the other members joining in discussion. The British, some panelists argued, saw the tension between the ideals of European unity and Atlantic partnership far more clearly than the Americans. Many Americans seemed to assume that a revived and cohesive Europe would automatically become a partner in preserving the status quo and world order generally. Other Americans, unenthusiastic or unconcerned about the status quo, or disenchanted with peacekeeping, were essentially indifferent about whether a new Europe would be a "partner." Almost any self-sustaining grouping was acceptable which could allow America to return home the stream of resources presently expended in European defense. To many British these American views seemed naive. Throughout their history, the British had lived in fear of a cohesive power bloc on the continent. Previous attempts to create such a bloc had invariably released illiberal and aggressive forces which had been a threat to British independence and world peace. Furthermore, many British, with their lingering imperial and elitist perspectives, believed more than most Americans in great power intervention to preserve an international system of order. Thus, while many might disapprove of the conduct of the war in Viet Nam, they nevertheless firmly supported an interventionist role for the U.S. generally and were highly sensitive to signs of any American swing towards disengagement, which they regarded as a return to unrealistic isolationist perspectives.

These combined British attitudes—fear of a European union and acceptance of great power peacekeeping—made them sympathetic to world duopoly and an Atlantic status quo. The United States was, in fact, fulfilling the British role of the last century—preventing the amalgamation of a European bloc, run from either the West or the East, and keeping peace throughout the Third World.

One of the great goals of a European bloc would be the breaking of Russo-American duopoly and the creation of a new Third Force. While the present condominium had obvious costs, especially to the captive states of Eastern Europe, nevertheless, condominium seemed safer and more stable than the European alternative. There was, of course, the danger that European nationalist restiveness would grow to an explosive point, or that European morale would degenerate in its gilded cage and lead to violent social revolution, or that American isolation would reassert itself or the Russian system explode, but there was, nevertheless, no decisive evidence that the present arrangements would break down.

Indeed, with intelligent leadership, the present Western bloc could evolve into a new political structure, a kind of new medieval system in which nationalist sovereignty became meaningless. Government would become increasingly internationalized into cooperative multinational structures with limited powers over limited areas. Institutions like the Group of Ten, the OECD, the IMF and NATO could be the precursors of a new world political system. Such an "Atlantic" system was far more in keeping with the nature of the modern economy, to which the nation-state was increasingly irrelevent. The OECD represented the relevant context for modern technology and industrial development. The transposing of power to such international bodies would rid the world of the terrible curse of the nationalist state.

By contrast, the creation of a new united Europe would only be the nationalist state writ large and would result in a vigorous revival of nationalist perspectives. It was not, incidentally, the general public of Europe that resented the present state of affairs, but the traditional diplomatic, military and political elites, who missed their traditional grand role in the world. But their interests, though understandable, were not in harmony with the economic and social welfare of their own people and there was no reason, therefore, while they should prevail.

Members of the panel argued among themselves as to how realistic or desirable this vision of the future might be. The psychological costs of Europe's subordination were heavy. Dissatisfied elites would inevitably generate popular support for their positions. Indeed, the greater the prosperity of a society, the more likely it was to become assertive and resent continuing political subordination. Indeed, the increasing restiveness of Western European society resulted, in large part, from the decline in prestige of traditional political structures, robbed of their political manhood by comfortable American hegemony.

It was inaccurate, however, to look for the origins of revisionism among the present elites. Quite the contrary. The present order was increasingly a world run by cosmopolitan mandarins, insulated from popular democratic politics. It was primarily the desire of these elites to insulate themselves further from popular control which explained their attack on "nationalism." The nation-state was the only political formula around in which it had been possible to organize democratic participation in government. While it might be necessary to modify traditional national structures by participation in some higher European formula, nevertheless, the fundamental nationalist principle of modern politics would still remain valid. Democratic participation was only possible within the consensus formed by a relatively cohesive national culture. While there might be created some new European "nation," replacing the European ideal by Atlanticism was merely a cover for insulating politics from popular participation. It was a device for continuing and extending the present primacy of commercial values over all other human and political considerations. If the national states could be denatured, then elitist technocracy could reign supreme. To advocate such a course was to overlook the gathering revolt, throughout both West and East, against the primacy of technocracy and for the reassertion of humane and democratic values.

In short, some argued, the status quo was neither desirable nor was it stable. Those who worked against the rennaissance of a new European political spirit were not only opposing the vital forces of modern society, but also undermining the only ideals and structures which could contain and channel these new forces and prevent their exploding in far more radical ways.

In any event, most participants agreed that the Atlanticist ideal had a strong pull on the British and did seriously stand in the way of their wholehearted commitment to a European program.

The discussion turned to the actual role which Britain had played towards European unity. Some members contested the common view that Britain had ignored Europe in the fifties and then shifted belatedly to join it in the sixties. On the contrary, Britain had followed a consistent European policy since the war. The policy consisted of unyielding opposition to European integration into a Third force. The decision to apply for E.E.C. membership was only another tactic in the same fundamental strategy.

British fears about the likelihood of such a development, to be sure, had been greatly exaggerated. Divisions among the Europeans and American pressures had been more than enough to prevent agreement on common policies, although the divisive effect of Britain's various bids for membership also played a considerable part in frustrating Europeanist ambitions. As a consequence, some felt, Britain would bear a heavy responsibility should the frustration of the relatively benign Europe of the Six lead to the rise of a truly assertive European nationalism.

In summary, the discussion amply illustrated the strong underlying reservations about European integration among many Englishmen, their consequent diffidence towards European political integration and their continuing susceptibility to the Atlanticist alternative.

THE SECOND SESSION: THE ECONOMIC ASPECTS

The meeting consisted of opening remarks by Mr. Knight and Mr. Calleo, with other members joining in general discussion. The discussion centered around two topics, a North Atlantic Free Trade Area, the likely future relations between American and European economies and the possibilities for closer British incorporation into the latter.

Some found the U.S. an unsuitable trading partner for Britain in any sort of association which left out the E.E.C. The disproportion in size and resources was too great.

Partners did not have to be equal, but the smaller must be at least large enough to contain penetration by the larger, which England could not do. Others strongly contested this whole view. The actual ownership and management of industry was, for the most part, irrelevant to real concerns of national growth and prosperity. National governments, moreover, had ample means to prevent abuses and regulate development.

Wide disagreement arose in the discussion of the likely future relations between the American and European economies. Some expected the Americans to become more predominant and in an increasingly unified Atlantic economy. Others saw the U.S. beginning a serious decline as a trading nation. In recent years, the U.S. trade balance had declined steadily from a surplus of $4 billion to rough equality. Close examination of the content of trade revealed that American exports were increasingly those of an underdeveloped nation—raw materials and food rather than machinery. In any number of basic manufacturing industries, automobiles and steel, for example, American products were increasingly noncompetitive. Foreign industries were gradually erasing the American advantages in productivity per man hour, and thus lower foreign labor costs, with their consequences for all other prices, were becoming increasingly decisive. The United States, of course, still had a great lead in some advanced industries. Nevertheless, overall, the American position was declining.

The decline was perhaps owing to three broad developments. With its vast and relatively inaccessible mid-Western industrial heartland, American had always been a fortress economy, relatively impenetrable to foreign competition. Air transport and cheap water routes were opening the fortress and ending American industry's privileged sanctuary. Hence the United States would, in the normal course of things, import more and more. Secondly, America was ceasing to be a relatively cheap producer of raw materials. American coal and iron were depleted and oil was no longer competitive with imported oil from the Middle East. Thirdly, the speed with which information was now transmitted and the increasingly supply of trained technological manpower in all advanced countries was bound to erode America's technological leads. In short, America's relative trading position was likely to decline if the present rapid advance of European and Japanese industry continued.

The United States would obviously remain the world's leading producer, but if Europe continued the advances made possible by consolidation within a broad market, the menace of American domination would recede. So, incidentally, would the pace of American direct investment. The disappearance of the trade surplus over the past eighteen months had been covered, in the balance of payments, by a masssive return of capital. It appeared that nearly $20 billion, probably half of the overseas short-term dollars, had been repatriated. The investment activities of American corporations were bound to be cut as the Eurodollar market dried up.

Members discussed the possibility that relative American decline, if it occurred, might reduce the pressure for European integration. For European greed might not be as powerful a prod as fear. Others noted that the U.S. and Japan would remain sufficiently formidable to spur Europe forward. The apparent decline in European political will towards integration, on the other hand, could mean that the great difficulties inherent in integrating a general European economy could finally overcome the will to do so.

The panel then turned to Britain's prospects for joining more closely in a European economic bloc. Assuming that the continent's economic consolidation continued, Britain would be increasingly drawn towards it. Britain, of course, had rather special difficulties fitting in the E.E.C., especially with its Common Agricultural Policy. Joining in the present agricultural arrangements would cost the British balance of payments some 200 million annually. What about association which would leave out agriculture? While such an arrangement might be useful for the short run, the fact was that Britain, as she began integration into the continental economy, might come to favor increasing centralization and direction. Like France at the beginning, Britain, with special disabilities, had an interest in a central authority working to harmonize the conditions of competition throughout the whole Market. Free trade was for the strong and centralized planning was the recourse of the weak and disadvantaged who needed a compensatory direction of resources. Association, moreover, might not give industry the necessary leverage to break the inefficient tax structures and labor practices which could not, in any case, be overcome within the domestic political context alone.

Were there any alternatives to association? Could a way be found for Britain to participate fully without abandoning the Common Agricultural Policy. The problem was not Britain's agriculture, which was relatively efficient, but for her balance-of-payments which, as noted would be adversely affected by at least some 200 million annually. What were the prospects for some form of intimate European monetary agreement that could strengthen sterling and give the British economy time to adjust? An intimate monetary arrangement would be difficult to reach among the Six. Britain, with her huge overhang of old and new debts, would greatly complicate the problem.

Various proposals for such cooperation had been floated, mostly notably the Barre Memorandum. All envisaged some form of limited short-term lending and recycling as well as medium-term loans and consultation. In effect, the Six, to sustain the fixed exchange rates which many people believed essential for a common economy would move towards pooling their reserves and coordinating their planning. But were the economies sufficiently in phase with each other to work within a common system without unbearable strain on exchange rates and reserves? Britain, with her heavy debts, trading currency and unimpressive productivity, would certainly increase the strains on the system. There might be compensations for the Europeans. Conceivably, the City of London might offer facilities badly needed in developing a European capital market. On the other hand, much of the City's financial expertise and machinery was presumably already available to continental clients and Britain was unlikely, for the short run, to have much capital to contribute to European development. The advantages of having their own capital channeled back to them through London might seem a doubtful advantage to continentals, especially those who themselves aspired to be the financial centers of a new European market.

In any event, there was, moreover, still no great interest among English bankers and economists in a European monetary bloc. In this aspect, as in others. British institutions and perspectives were oriented towards close partnership with America in a wider Atlantic context. The discussion seemed to suggest that Britain's membership would both greatly increase the need and difficulties for any European monetary union. In this respect, of course, as in others, it was possible that the difficulties posed by British entry might work towards a greater degree of coordinated planning among the members.

THIRD SESSION: THE MILITARY ASPECT

Mr. Calleo began with a general statement and discussion followed. The panel focussed on Britain's military "special relation" with the U.S., a relation most concretely institutionalized in their nuclear collaboration, but also running through their military activities in many parts of the world.

To some panelists, the advantage of this military tie seemed dubious for Britain. While close support of the United States in the Far East had involved the British in alien and damaging quarrels, the United States had not shown a corresponding concern for Britain's external interests, as Suez had so dramatically demonstrated. Why did the British cling so tenaciously to their special relation? Some panelists agreed that the British nowadays seemed more enthusiastic about the American imperial role than the Americans themselves. It seemed far easier to find a serious defense of the Vietnamese intervention in England than in the U.S.

British support for America's world role stemmed, it was argued, from Britain's lingering imperialist perspective. It seemed axiomatic to many people in England that a great power had a vocation for order, a special responsibility for preserving a world system of peace by interventions in the affairs of weak and unstable states. Without such attention, any system of world order would soon break down in war and revolution.

This view, it was argued, tended to alienate Britain from the continent where both Gaullists and Leftists saw the age of interventionist imperialism finished, advanced the view that most countries should be left to sort out their own political affairs and that national self-determination was the only proper basis for a world order. Some members thus saw the American military ties as one of the principal obstacles to Britain's entering a European bloc.

Most notably, Macmillan's desire to maintain the nuclear special relation at Nassau had, some believed, ensured the defeat of his European policy. Britain's choice for dependence on the United States in place of sharing with France confirmed De Gaulle's views about England's essential political orientation.

What were the possibilities for a British shift to Europe? Heath, after all, had several times suggested nuclear collaboration with France. The problems and prospects of a European defense coalition, including nuclear weapons, were discussed at some length. That controversial argument was advanced that even without the Americans, Western Europe now had adequate conventional forces to counterbalance Russian military power. NATO's failings stemmed from lack of resources but the Europeans' unwillingness to take their own defense seriously. But such lethargy was inevitable given the prolonged and comfortable American hegemony which pre-empted all European initiative and responsibility. If European military elites were thrown the primary responsibility for their own defense, they would be forced to cooperate and to organize their own resources more competently. America could and should abdicate this primary responsibility for organizing Europe's defense. The alliance could remain, along with some American troops, but primary leadership and responsibility should return to Europe.

Some doubted that the European democracies would rise to the occasion, any more than they had in the 1930's, although others contested the analogy, by arguing that the present situation called for no increase in budgetary or manpower resources. What was needed was a return of responsibility to Europe. The professional military, once endowed with their proper responsibilities, were unlikely to discount the dangers of a military vacuum on the Western side of the Iron Curtain. Western European industries were as likely to safeguard their budgetary patronage as their American counterparts.

If Europeans were to take proper responsibility for their own defense, however, some believed they would need nuclear weapons of their own. The notion of a division of responsibility between nuclear and conven-

tional defense was unrealistic. Defense against a nuclear adversary had to contemplate the full range of options. The Americans, moreover, would never be able to yield direction of European defense as long as they manned Europe's first and only line of nuclear defense.

Some kind of effective European nuclear force might be built around the present British and French deterrents. There was no reason, it was argued, why such a deterrent was technologically impossible. The chief problems were political. The arrangements would doubtless be confederal although there might eventually be some kind of multilateral force alongside the national forces. Coordination would be the task of some European planning group.

What of the Germans? As Germany's strong conventional army was essential to any collective defense, and her financial contributions doubtless much desired, the FRG would be in a strong position to insist upon an adequate role for herself. If the Germans were not expected to have nuclear weapons of their own, they would have to be given satisfactory status in nuclear planning. They would, no doubt, also insist on close coordination with the American deterrent.

Panelists speculated on whether a European nuclear force was opposed to America's own national interest. The inexorable pressure for disengagement presented a dilemma for America's advocacy of non proliferation. If Americans were to retain the responsibilities for the immediate and exclusive nuclear defense of other countries, they were unlikely to entrust control over conventional defense to alien hands. Hence disengagement and proliferation could be seen as two sides of the same coin. It was unrealistic and unsound to expect one without the other. America's interest in nonproliferation was obvious. But American policymakers might come to have second thoughts about extending clear guarantees as China moved towards a full-scale intercontinental deterrent. American cities could not credibly become hostages for an Asian status quo as they had for the European. American policy, therefore, should be moving towards the creation of regional nuclear balances which would permit at least a partial American disengagement. Europe, it was argued, offered a relatively safe opportunity to create the prototype. National nuclear forces existed anyway and the vulnerable Europeans were unlikely to be reckless. Thus Americans were unlikely to resist a serious effort to create a shared European nuclear deterrent. All this provided Britain, with her thermonuclear weapons the opportunity to take a leading role, along with France, in building a European military bloc. So far, however, British governments had shown little initiative in these matters, but instead had become even more steadfast champions of a "moribund" NATO than the Americans themselves. In this, as in other fields, Britain's perspectives, rightly or wrongly, remained essentially Atlanticists, tied to a real or imagined special relation with America. Many panelists concluded that nothing short of a clear indication of imminent American withdrawal would jolt the British—and indeed Europeans generally—into more activist responsibility for their own defense. As many believed America would and should withdraw in the end, they believed it would be prudent for American policy to see the occasion for precipitating the desired reaction among the Europeans. Otherwise, British commitment to Europe would remain too ambivalent to permit a leading role. Some panelists protested against their whole line of reasoning. European conventional defense could not be organized without American leadership. Proliferation was dangerous and ineffective. Atlantic military institutions were preferable to European ones.

Nearly all panelists agreed that most people in Britain would prefer the present NATO military arrangements, as long as they believed the Americans were willing to sustain them.

VICE PRESIDENT AGNEW DISCUSSES AMERICAN EDUCATION

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PUCINSKI. Mr. Speaker, last night at an impressive dinner sponsored by Worthington Chapter No. 30 of the Order of AHEPA, the Vice President of the United States was honored and delivered an impressive speech on the status of American education. It was my pleasure to attend the dinner with a group of my Chicago constituents.

As a member of the Education Committee, I believe the Vice President has placed into proper perspective some of the problems being discussed by parents, teachers, and students throughout our Nation as to the role of American education in the development of our society.

I was particularly pleased to see that the Vice President found inspiration for his remarks in the teachings of Greek philosophers who had given meaning to the entire concept of education in a free society.

My subcommittee is currently studying America's educational needs for the 1970's and I believe the address presented by Vice President AGNEW at the AHEPA banquet ought to be included in the dialog of these needs.

It is for this reason that I include Vice President AGNEW's entire speech in the RECORD at this point.

His remarks provide an excellent basis for a discussion of new concepts in education which will meet the educational needs of young people in the decade of the 1970's and thereafter.

The Vice President's speech follows:

I am grateful for your presence tonight. More than an honor to me, it is a profound tribute to the memory of my father. Many of you knew him, knew the kind of man he was and knew that such men are rare in any community—at any time.

I am proud to say that I grew up in the light of my father. My beliefs are his and my father believed deeply in America. My father was deeply involved in the life of the Greek community, for this, to him, was part of being an American.

"My Brother Ahephans" he said eight years ago, "Who better understands the true value of freedom and dignity than *we* . . . . who are the the direct descendants of the authors of those principles—the Ancient Hellenes? Who better understands the true value of freedom and dignity than *we* who have matured and prospered in the workshop of democracy, the United States of America?"

This Ahepa-conceived Scholarship Fund is particularly appropriate to honor my father's memory, for he cherished education as the key to a better life. That belief is Greek as much as it is American.

Pericles, the father of the first democratic state, said in the fifth century before Christ, "Athens is the school of Hellas." The Athenian ideal was that of the free citizen in the free state. But a state of freedom was never a state of ignorance. Education was, and always will be, integral to civilization.

As Pericles said, "The great impediment to action is . . . . not discussion, but the want of that knowledge which is gained by discussion preparatory to action." Courage from conviction distinguishes the free and civilized citizen.

To Socrates, to Plato, to Aristotle, all education served the soul. The Golden Age of Greece gave birth to the concept that public education was prerequisite to intelligent citizenship. Twenty centuries before Thomas Jefferson, Aristotle connected the public and private interest with cultivation of the mind as a free society's ultimate aim.

Never was there a separation of individual and collective good nor was there a distinction between a life of pleasure and a life of civic fulfillment. The Athenian spirit was not only to live but to live well. Civic duty was an honor, and a life balancing work and comfort was the goal. Neither property nor prosperity were vices, only their misuse or a misunderstanding of their value was deplored.

This is our Greek heritage—deeply philosophical and political—and while the world has grown in technical prowess, it has never surpassed the Anthenian ideal of free citizenship. Ancient Athens remains the school of civilized nations. And from ancient Athens we can draw lessons of good and evil applicable today.

The rise and fall of all free nations mirrors the rise and fall of Athens. The overall lesson is that freedom and the good life are demanding possessions. To use them well and possess them permanently, discipline and education are required.

If I am known to raise my voice in criticism, it is because I see danger in our nation's course. Because America, like ancient Athens, can become foolish and corrupt; because a life of ease is not synonymous with a life of fulfillment; and because no generation can confer wisdom upon its children. Each generation must work to earn its own.

Heraclitus, one of Greece's earliest philosophers, perceived that all is flux. Change is the only constant. Arcesilaus, the skeptic, said, "Nothing is certain, not even that." Is this not true of today? Power is ephemeral and no excuse for conceit. Freedom, prosperity, moral and military strength are evanescent, not eternal. They cannot be secured once and then forgotten but must be carefully and continuously cultivated.

Education is the source to replenish a free society. America understands renewal and reform. We labor to renew our cities and reform our government. Yet we have left education—the source—relatively untouched. Of course, we have expanded and multiplied educational opportunities. We have had added pre-school programs, community colleges, and enlarged universities to multiversities. But we have not sufficiently probed to the essence of the pure institution, and this explains much of our present problem.

By inclination, Americans think quantitatively. We are appreciators of the bigger. The danger in this lies in possible error in the original assumption. If what we are doing is not right to begin with, quantitative adjustments compound the wrong.

We have sometimes failed to perceive that as times change, we must not only change our programs but our premises governing education. Albert Einstein once defined education as "that which remains after you have forgotten everything you learned in school." Yet the American public continues to think of education as a terminal process limited to the youthful years of life. In a society where skilled laborers must learn new techniques six times before retirement, where 50 per cent of technical engineering knowledge becomes obsolete within a decade, where 70 per cent of all knowledge that will serve our present student generation during their lives is as yet unknown and undiscovered . . . it is time to stop regarding educa-

tion as circumscribed by a particular period of a lifetime.

We must stop developing educational programs for twelve years, or sixteen, or twenty years and start creating programs that gear themselves to useful, satisfying lives.

In the first place, the penchant for clustering higher education in the post adolescent decade adversely affects the human spirit. We are consigning a huge group of our young citizens to an academic limbo totally alien to their human instincts. Whether we realize it or not, whether we intend it or not, we have created a disenfrancised social class called youth.

How? Although our young population—between the ages of eleven and twenty-five—has not grown disproportionately, the proportion of young people in school has increased dramatically. High school attendance has doubled in two decades; 94 per cent of our young people attend high school; 75 per cent graduate from high school; and in higher education, the growth is even greater. College enrollment has tripled in twenty years; 40 per cent of all young people attend college for at least a year. Including advanced technical training, the figure approaches 50 per cent.

By pricing teen-age labor out of the market and expanding secondary and higher education, we have stretched post-adolescent dependency a full ten years. While the age of physical maturity has declined, we have confined a generation on campuses at a point in life when their fathers and grandfathers were supporting households. We have subsidized youths' education at the expense of many of their human rights. And society, in many cases, has forced its youth into an academic mold alien to their aptitudes or inclinations. The distinguished psychologist, Dr. Bruno Bettelheim, writes of higher education's debilitating effect:

"What makes for adolescent revolt is the fact that a society keeps the next generation too long dependent in terms of mature responsibility and a striving for independence . . . all too many who now go to college have little interest, ability, and use for what constitutes a college education. They would be better off with a high level vocational education which is closely linked to a work program which gives scope to their needs for physical activity and visible, tangible achievement. The complaint of many of these students is that nobody needs them. They feel parasites of society, and hence, come to hate a society which they think makes them feel this way."

In our reverence for education and our desire to do right by our children, we have inadvertently denied this generation's right to participate as mature citizens. The damage it does to the individual is no greater than the damage it does to the university. Denied political participation in the real community, the youth seeks to politicize the only community he has, the academic one. This defeats the purpose of the university which journalist William Shannon notes:

"Is to transmit knowledge and wisdom and to enhance them by research and study. The university is not a forum for political action. It is not a training ground for revolutionaries. It is not a residential facility for the psychiatrically maladjusted. It is not a theater for the acting out of racial fears and phantasies."

As we demean, we pervert. Consider the single problem of these black students, trapped by the the best intentions into a situation where he cannot compete. The demands for black studies, black dormitories, special black grading systems, are often smoke-screen evading the basic failure in black primary and secondary education. Brandeis professor and former Presidential Aide, John P. Roche, sees black separatism on the campus as a last ditch attempt for survival by culturally deprived students who have been admitted to college just because they came from inner city ghettos. They are bright, but unprepared to compete with their highly articulate classmates. Without swimming lessons, they have been dumped in the mainstream and they are not going to drown without a struggle.

Bayard Rustin, pioneer in civil rights and Executive Director of the Philip Randolph Institute, takes a harder line:

"Everyone knows that education for the Negro is inferior. Bring them to the University with the understanding that they must have (the) remedial work they require. The easy way out is to let them have black courses and their own dormitories and give them degrees . . . What in hell are soul courses worth in the real world? No one gives a damn if you've taken soul courses. They want to know if you can do mathematics and write a correct sentence . . . an element in that society."

The point remains that we have neglected the real problem of compensatory education for the shallow solution of sympathy. And there are other equally compelling areas of neglect.

We have neglected vocational and technical education for the elegant ornament of liberal arts. Certainly, the social sciences are important but they are not sacrosanct. And in our society, which needs skilled labor, we must restore the manual arts to their rightful place of esteem. We have done a grave disservice to the working man by neglecting his central importance to our society. We have failed his appetite for the arts, his preparation for leisure, and, in many cases, his need to renew his skills.

If we are not going to have revolution within our educational community, we will be wise to take a revolutionary look at our institutions of education. We should not be reluctant to ask daring questions or consider bold solutions. Is the four year college necessary in all cases? Are there better ways to combine secondary and undergraduate programs? To accelerate graduate work? Or to space it out over the years? Should we invest more in adult education and enrichment? Are present primary and secondary school programs creating enough outstanding citizens—citizens with an appetite for learning and an aptitude for service to others?

The answers require courage and cooperation from every sector of our society. There is little point in questioning the value of graduate degrees in the soft sciences if businessmen continue to treat these degrees as keys to open the inner doors to better jobs. There is no point in discussing black studies without an objective ordering of educational priorities by the black community. There is no hope for major academic reform without the support of America's academicians.

There is no chance for change if parents revere the college degree as a symbol of their parental success. Until every interest group reappraises its attachments to existing institutional forms, we cannot achieve a new structure.

Today's students have an obligation, too, to question radicalism and demands for relevance as satisfactory answers. Revolution is ridiculous and revelance often an excuse for more amusing and less arduous involvement. Where is this drive for reality in the demand for non-graded courses? The real world distinguishes between excellent and mediocre effort. Is doing one's own thing ennobling or selfish; profound or simply vacant?

Finally, I think government has an obligation to review its many programs affecting youth and ask itself whether it is doing a good job or even what it intends to do? Right now, this Administration is taking a hard look at youth policies. We are looking at the ways we have prolonged the period of dependency . . . disenfranchised our young adults . . . discriminated against non-college youth and directed others, in disregard of their desires, into higher education.

We are saying that many young people have cause to complain. They are alienated—not by our hypocrisy, or racism, or the war in Vietnam—but by our best intentions and inappropriate institutions. Their claims of hypocrisy, racism or immoral wars are not borne out by the facts. Their frustration at being held apart from responsibility and reality is understandable.

The educational community should ask whether encouraging ever increasing numbers of young people to attend college—when 40 per cent already do—benefits the lower half of the intelligence scale. We should question whether society's demand for college attendance compounds social antagonisms between those who go and those who do not. For if everyone is expected to attend college, life will only be harder on those who simply cannot achieve in an academic setting.

The Federal government should reevaluate those policies which protract dependence . . . civil service age requirements, restrictive apprenticeship programs, present age limits on voting and public candidacy.

We should question whether some programs do, in effect, discriminate against the working young . . . such as the Peace Corps and Vista which could benefit greatly from their marketable skills.

All of these questions should be asked not in the fear that we are out to destroy popular education, but as a positive search to broaden educational opportunities and to make our educational institutions fit the public rather than make the public fit the institutions. The threat to education does not lie in asking these questions, but in not asking them.

The challenge of American education from the cradle to the doctoral degree is our most important work. Our nation's future depends upon it, for as the Greek maxim goes, in the face of youth we find the future. America need not falter like ancient Athens if we learn from ancient Athens. We can retain our vigor and replenish our power by renewing our institutions.

Hope brought my father to America, and in honor of his limitless hope, the Theodore Spiro Agnew Scholarships will be bestowed. Because he was a child of Greece, they will go to youths of Greek descent. And because he was a citizen of America, their recipients will study here.

For as my father revered his Greek heritage and, like Pericles, saw Athens as the school of Hellas, so he would want . . . as we want . . America to be the school of free men everywhere.

Above all, this scholarship is established in the spirit of my father's legacy to me—his painfully accumulated knowledge that—the principles of freedom need and deserve our constant protection—that we must work to make democracy live.

TIME TO EXAMINE THE RHODESIAN BOYCOTT

HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. BERRY. Mr. Speaker, on the theory that too many Members do not have an opportunity to read Metals Week, I insert in the RECORD an article entitled "Time To Examine the Rhodesian Boycott," which is interesting and thought provoking.

The article is as follow:

TIME TO EXAMINE THE RHODESIAN BOYCOTT

The price of Russian chrome ore is up another $10 for 1970. Turkish ore is going up a like amount. The reason for the increase, and the increases of 1968 and 1969, is, quite simply, the Rhodesian boycott.

Since the boycott went into effect in Jan. 1967, and US ferroalloy producers were cut off from their prime source of chrome ore, Russian prices have increased by over $25 a ton, or 81%. Russia is now our major supplier of metallurgical grade chrome ore and is in a position to dictate the market. Of the total of 486,000 tons of metallurgical grade chromite imported in 1968, Russia supplied 335,000.

These are simple, straightforward facts. This has been but one result of the Rhodesian boycott. Perhaps it is time to examine what some other results of this boycott have been.

In the first place, Union Carbide and Foote Mineral have lost their valuable Rhodesian mines. And second, they must buy Russian ore at much higher prices to keep up their ferrochrome production. This translates into higher costs for the US steel industry.

And while US ferrochrome producers have to buy Russian ore, South African ferrochrome producers take in cheaper Rhodesian ore, and then turn around and undersell US producers in the US market. In 1968, some 45% of all ferrochrome imported into the US came from South Africa. It might be added that over 50% of US chemical grade chrome ore (below 46% Cr_2O_5) also comes from South Africa.

So, who has benefited? Russia and South Africa—not exactly two of our closest allies. And who has lost? US ferrochrome producers, the US steel industry, and, ultimately through inflation, the US consumer. And Rhodesia? By all accounts her economy is humming and any inconvenience caused by the boycott is minimal.

It is not an economic issue, but rather a moral issue, supporters of the boycott maintain. If so, is what Rhodesia is doing to her blacks any worse than what Russia did to the Czechs? And is South Africa's apartheid policy any less severe than Rhodesia's limited representation? If we do not intend to boycott Russian or South African products because we disapprove of the way these nations behave, what right do we have to impose sanctions on Rhodesia?

And moral considerations aside, the boycott just plain isn't working.

THE TAXMAN COMETH

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PUCINSKI. Mr. Speaker, on December 8, I warned in a speech in this House that the U.S. Treasury may lose as much as $20 billion in anticipated revenue because of the continuing decline in values of the stock market.

So far this year the total decline of stock market values has reached a staggering $100 billion. This loss of market value can create about a $20 billion loss to the Treasury, assuming a 20-percent tax rate for those stockholders who will deduct their losses for income tax purposes.

I do not believe that those in responsible positions are aware of the gravity of this possibility.

At the time that the administration had anticipated that a $197½ billion income for 1969 and a budget of $192½ billion would produce a $5½ billion surplus, no one had expected the decline of the stock market to continue nor did anyone really expect the stock market to suffer $100 billion loss in value.

I said the other day, and I submit that the possibility continues, that this administration could wind up its first year with a $15 billion deficit and if this happens I do not think anyone can deny the inflationary pressures which we had hoped would be abated instead will continue.

We know only too well what happens to interest rates when the Federal Government has to go into the money market to borrow money.

I know that no President wants to have a deficit in his budget. I am sure this was true of President Eisenhower when he had a $12 billion deficit in 1959; it was true of President Johnson when he had a deficit of $25 billion in 1968, and I am sure it is true of President Nixon.

I submit, Mr. Speaker, this administration ought to take note of the possibility which I have outlined here today and perhaps it can suggest some voluntary program to avoid a huge "tax selling" drive in the remaining weeks of this year.

I am placing in the RECORD today a full page ad which appeared in the New York Times on Tuesday, October 28, 1969, titled "The Taxman Cometh" and which states that Merrill Lynch suggests three legitimate ways to cut your 1969 taxes.

This full-page ad openly urges investors in the stock market to review their portfolios before December 31, for possible tax savings.

As legitimate as this ad is, and I do not question in any manner or form the right of Merrill Lynch to advise its clients how they can save money, the fact remains that this ad is an open invitation to compound the Government's already uncontrollable problems.

I include this ad in the RECORD today not as a criticism of Merrill Lynch but rather to illustrate my point that we are faced with a crisis in fiscal financing to which I do not believe the administration has addressed itself.

We have 3 weeks in which to try to discourage a massive "tax-selling" stampede which could have disastrous effects on our entire economy.

The Merrill Lynch ad follows:

THE TAXMAN COMETH

MERRILL LYNCH SUGGESTS 3 LEGITIMATE WAYS TO CUT YOUR 1969 TAXES

Thousands of stockholders put off "tax-selling" till the very last minute. Merrill Lynch believes this can be *shortsighted.*

Five minutes scanning this page will show you why you may benefit by taking action *before* others get around to doing so. You'll also see why you may need to *buy* stock before December first—to establish a *loss* by December thirty-first.

Consider these three ways sophisticated investors save money on taxes. Then clip coupon for Merrill Lynch Research's list of "Tax Exchanges"—352 matched buy and sell suggestions that may improve your tax position now, and might also improve your overall investment situation next year.

Note: In its present form, the new tax bill will not affect the savings you might make by following these suggestions—for 1969 taxes. But the bill does propose important changes for the years after 1969. Check with your Merrill Lynch Account Executive if new tax legislation is passed.

Review your portfolio now

If you read the financial columns, you know how talk of "tax-selling" becomes more and more frequent as the end of the year approaches.

Naturally. Many stockholders put off establishing their losses till the very last days of December.

Results: 1. Concentrated selling of some stocks tends to depress prices. 2. Some investors may establish losses at *unnecessarily* low levels. 3. Others may be able to pick up attractive *buys.*

Merrill Lynch does not suggest that *all* the following considerations apply to *all* stockholders. Or that stockholders generally should either buy or sell.

But we do suggest that all stockholders should now *review* their portfolios for possible tax savings.

If you'd like a second opinion, ours is yours for the asking. No charge or obligation, of course.

Tax-exchanging: Some plain talk on a subject that sometimes sounds complicated

Few sophisticated stockholders need reminding that capital losses can be money in the bank. If you have capital gains, you can use capital losses to *offset them.* If you still have capital losses "left over," you can deduct up to $1,000 of them from your ordinary taxable income.

If you are married, with a joint taxable income of $16,000, and *no* capital gains, a deduction of $1,000 means a Federal tax saving this year of $275.

What's more—though many investors are unaware of it—the current tax law allows you to carry forward your losses *indefinitely.*

How does tax-exchanging help?

It allows you to realize losses, reduce your taxes, and still maintain your investment in a particular industry group.

Suppose you favor the oil industry. You hold oil stock "A." It has gone down since you bought it, but you still think the outlook is bright for the *industry.* So you sell oil stock "B" to maintain your interest in oils.

Simple, so far. The problem is, which oil stock to sell, and which to buy.

How Merrill Lynch can help:

Our analysts have listed matched buy and sell ideas involving a total 352 stocks. This list constitutes a comprehensive summary of Merrill Lynch's opinion on what to sell to establish a loss, and what to exchange it for in the hope of a gain.

Our list also covers 104 stocks you may want to consider selling *anyway,* to cut potentially larger losses as well as to establish them for tax purposes. If you'd like a copy, just clip the coupon.

How the tax law can let you have your cake—And eat it, too

That stock you had high hopes for has faded away.

You could establish a handy loss by selling it now, but you think it might come back next year—so you'd like to hold on.

By "doubling up" on your holding, you can do *both.*

If you hold 100 shares of a stock, you buy an additional 100 shares. You sell the *first* 100 shares to establish your loss, and—in the expectation that the stock will "come back"—you keep the *second* 100.

Important: To establish a loss by "doubling up," the tax law requires that you wait 30 days after your purchase of your second 100 shares, before you sell your first 100 shares. This means that, if you want to reduce your taxes by purchasing and selling the

same stock, you must *act* on or before November 28.

Selling stock you own—Even though you hold it

While most investors understand "short selling," a surprisingly large number find "selling short against the box" almost incomprehensible.

When you go short against the box, you simply sell stock you *borrow* from your broker, while *retaining* your own shares.

Here is how you can use this sophisticated investor's tool to defer—and perhaps reduce—your tax bite.

Suppose you bought 100 shares of XYZ stock at 50, and it is now 60. You believe XYZ may go down again, but you'd prefer not to sell immediately, because you do not want to pay the resulting capital gains tax with your 1969 returns. You go short against the box by borrowing 100 shares of XYZ from your broker, and selling *them* short now. You cover your debt (the 100 shares you "owe") by repaying him with your original 100 shares—*at the beginning of next year.*

What's the *point* of this complicated maneuver? Why not just sell the shares you owned all along?

If you sell *your own* 100 shares now, you will have to report your gain on April 15th, 1970.

If you sell the shares you *borrowed,* your gain will not be "recognized" for tax purposes until you *cover*—by paying back the stock you borrowed to your broker.

Suppose, on December 10, you sell at 60 the XYZ shares you borrowed. Suppose you pay back your broker, with your original shares, on January 12.

Your gain is "frozen" at 60—the price you got on December 10. But for tax purposes, your gain is not "recognized" until January 12, 1970—so you have the use of your gain right up till April 15th, 1971.*

Three points to bear in mind: 1. Make sure your broker *does have* the stock to lend you. Merrill Lynch, with $3,549,690,260 in margined securities available for loans on August 15, 1969, is in a particularly good position to help here. 2. It's especially important to defer taking gains this year because surtax rates are scheduled to go down—whether or not the new bill is passed. 3. Selling short against the box is not always possible. Check with your Merrill Lynch Account Executive.

Free Research opinions and tax information

If you'd like our ideas on your holdings, our suggestions about tax-selling or about stocks we consider attractive for purchase, just phone or write us. Or stop by your nearest Merrill Lynch office.

If you'd like our Research Department's list of "Tax Exchanges," and our 12-page "Investor's Tax Kit" (packed with basic information about taxes and your stockholdings), just clip the coupon.

*If you pay taxes on the basis of *forward estimates,* you would have the use of your gain till April, 1971 only if you estimate 1970 taxes on the basis of your 1969 taxable income.

CENTENNIAL OF ST. JOHN'S UNIVERSITY, NEW YORK

HON. HUGH L. CAREY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. CAREY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement concerning the centennial of St. John's University:

ST. JOHN'S UNIVERSITY, NEW YORK, MARKS THE BEGINNING OF ITS SECOND HUNDRED YEARS OF DISTINGUISHED SERVICE IN EDUCATION

A new chapter in the story of higher education in urban United States is about to be recorded.

The year 1970 will mark the beginning of a second century for an institution founded in 1870 to help provide higher education for the young people of Brooklyn and New York City—and eventually for those in nearby areas of Nassau and Suffolk Counties, New Jersey and Connecticut. That institution is the St. John's University of today.

Significant events are scheduled for 1970 when a year-long program of observances will herald the Centennial of this truly notable educational center.

Simultaneously, the University will launch a $30 million development program and a Centennial appeal for funds to attain the academic and physical objectives whereby St. John's can strengthen its learning environment for its second one hundred years of dedicated service.

At its founding as St. John's College, the Most Reverend John D. Loughlin, the first Bishop of Brooklyn, emphasized that St. John's was to be "a day college where the youth of the City might find the advantages of a solid education."

At the laying of the cornerstone for the first building, at Lewis and Willoughby Avenues in Brooklyn, St. John's mission was set forth by Governor Enoch Louis Lowe of Maryland as "a college for the education of the youth of Brooklyn, without distinction of religious belief, political opinion or social condition."

The mission of St. John's University is the same today—except that it has broadened its area of service to embrace the entire Greater New York City area. The fundamental purpose of the University is to offer men and women, in a Christian atmosphere, the opportunity to achieve for themselves a higher education in the liberal arts and sciences and to prepare for certain professions.

Chartered by the State of New York in 1871, St. John's has been operated continuously by the Congregation of the Mission, known as the Vincentian Fathers because of their founder, St. Vincent de Paul.

During its first 35 years the achievements of the small college were so impressive that in 1906 an amended charter granted the privileges and title of a *university,* with the power to establish professional departments. Included among such departments have been the School of Education, the Graduate School of Arts and Sciences, the School of Law, the College of Liberal Arts and Sciences, the College of Business Administration, and the College of Pharmacy.

Continued growth saw expansion in 1929 by the building of the present Brooklyn Center in the Downtown Borough Hall section, and, in 1955, by the creation of a campus at Jamaica in the Borough of Queens.

OPPORTUNITIES FOR A SOUND EDUCATION

St. John's University in the last 100 years has given more than 75,000 youths of the Metropolitan New York City area an opportunity to attain the advantages of a sound education.

St. John's has broadened its original educational horizons to provide programs relevant to the growing needs of New York and its young people.

As a "commuter college," St. John's has done for New York youth what the land-grant universities of the mid-west have done for the farm youth—given them a college they could afford to attend, provided basically sound education they could assimilate and use, and offered them an opportunity for full participation in American life.

The vast majority of men and women who graduate from St. John's elect to live and work in the New York City area where they become a vital part of its active citizenry. Their decision has increasing significance because New York City today is confronted with urban problems that are critical in scope and depth.

One of the necessary solutions to these problems is *education,* including education for the disadvantaged—the young people who *must* be given their chance in the life of the metropolis if progress and growth are to continue, not only in New York but in the nation. This, St. John's can provide and will provide, as it has been doing for 100 years.

The problem is not new. When St. John's opened its doors in 1870, a large part of its student body could be considered among the less advantaged. Many students were children of immigrants, the first and second generations of those who came to the New World to seek a new life. Their parents either found what they were searching for in New York, or became locked in by circumstances and were forced to stay. Many had to live in substandard housing and worked at only the most difficult and low-paying jobs. They vowed that their children would have things better. Education then, as now, was the way up and out—and many have found that way at St. John's.

If that way is to continue to be a productive one, St. John's knows that it must constantly seek to provide a higher quality of education. This means maintaining high faculty standards, adequate physical facilities, new academic programs (particularly those relevant to the problems of metropolitan New York), attracting better qualified students, and offering even greater educational opportunities to all who wish to attend. All this St. John's seeks to accomplish in the years immediately ahead, working within the framework of an educational concept that has proved to be basically sound.

DUAL CAMPUS IN TWO BOROUGHS

As it enters its Centennial Year, St. John's is a dual-campus educational complex with buildings in two boroughs of New York City—at Jamaica in Queens and in Downtown Brooklyn. Co-educational, and offering courses in both day and evening sessions, the University's Schools and Colleges are:

Jamaica campus

College of Liberal Arts and Sciences (St. John's College), School of Education, College of Business Administration, College of Pharmacy, Graduate School of Arts and Sciences, School of General Studies.

Brooklyn center

School of Law, College of Liberal Arts and Sciences (University College), College of Business Administration (Division), School of Education (Division), School of General Studies (Division).

These Schools and Colleges are St. John's physical reflection. The essence of the University, however, lies in its "family"—its students, faculty, trustees, council, administrators, alumni, parents, and friends.

STUDENT INVOLVEMENT

Currently, approximately 13,000 young men and women are enrolled in the University's day and evening sessions. Since the University has no facilities for student residence, its students reach the campuses by car, subway and bus.

"Involvement" is a word in wide use today, and the St. John's student is involved in all the processes of University activities. With the faculty and administration, students have participated in and do serve on such important committees as:

The University's Senate Committee on Student Activities, the Campus Center Planning Committee, the University Long-range Plan-

ning Committee, the Committee on Honorary Degrees, the Centennial Committee, the Committee on Programs for the Disadvantaged, the Committee on Curriculum Revision of the Liberal Arts College.

In addition, eight students serve on the University Senate, the highest legislative body in the University, second only to the Board of Trustees to which it reports directly.

Student involvement is also evident in the 130 student organizations that serve the varied cultural, scientific, political, economic, social, religious, and pre-professional interests of their members.

STUDENT ACHIEVEMENT

Student involvement and activity at St. John's lead to achievement. During the past two years approximately fifty percent of all seniors went on to leading graduate schools, many with fellowships or assistantships.

Achievement is also reflected in intercollegiate competition by the University's athletic teams—the "Redmen"—and by its debating teams. Year in and year out, they have brought national recognition and prestige to St. John's University. With a student body of this calibre the University can, and does, hold its head very high.

DISTINGUISHED FACULTY

An educational institution can only be as good as its faculty. This is the team that sets the tone and pace for the University and today's team is regarded as the strongest in St. John's history on the basis of educational qualifications and experience.

Compelling evidence of faculty strength is the fact that 53 percent of the men and women who teach at St. John's have earned the Ph. D. or other terminal degrees in their particular disciplines. The national average is 40 percent.

Faculty strength is also evident in the many research projects being conducted at the University—in science, education, theology, business, and the humanities. In addition to strong financial support given these projects by the University, grants of funds are also received from government and private agencies. Faculty members are active in professional societies and several serve in leadership positions in their local, state, or national organizations.

CAPABLE LAY LEADERSHIP

The Board of Trustees, the ultimate governing body of St. John's University, was reconstituted in 1965, and in November, 1968, laymen assumed numerical control. Presently, there are fourteen laymen and seven clergy. These laymen, who are involved responsibly in the policies and plans of the University and are instrumental in helping to chart the course for its second century of service, include:

Joseph F. Adams, president of United States Trucking Corporation; Robert J. Dixson, vice chairman of Johnson & Johnson International; Hon. Dorothea E. Donaldson of the Court of Claims of New York; Col. Saul Fromkes, president of City Title Insurance Company of New York; E. Burke Giblin, president of Warner-Lambert Pharmaceutical Company; John J. Lynch, honorary chairman of Kings County Lafayette Trust Company; Hugh P. McFadden, Esq. of McFadden & Riskin, Bethlehem, Pa.; James F. Murphy, Sr., vice chairman of George A. Fuller Company of New York.

Also Hon. Joseph H. Murphy, former Commissioner of Taxation and Finance of the State of New York; Charles P. Ryan, owner of Real Estate Investment Company of New York; James R. Schule, executive vice president of Batten, Barton, Durstine & Osborn, Inc.; William P. Tavoulareas, president of Mobil Oil Corporation; Hon. Robert F. Wagner, former U.S. Ambassador to Spain; Thomas J. Welsh, president, Welsh Associates, Inc., New Canaan, Conn.

Supplementing the capable guidance provided by the trustees is the valuable assistance of the University Council. This organization numbers more than forty business and industrial leaders, professional men, and executives who give freely of their time and abilities in assisting and counseling the University's administration.

EXPERIENCED ADMINISTRATORS

The restructuring of St. John's administration in the past few years has been described by authorities in the field of education as "an outstanding effort." The man who has guided the University through these years of progress is its President, the Very Reverend Joseph T. Cahill, C.M., who assumed office in July, 1965.

Key administrative changes at St. John's are also reflected at the vice-presidential level, where the University secured the services of three outstanding and experienced laymen: Dr. Henry C. Mills, Vice President and Provost, and for 19 years a teacher and administrator at the University of Rochester, is primarily responsible for all of St. John's academic programs; Charles E. McCarthy, Vice President for Business Affairs and Treasurer, formerly President and Vice Chairman of the Board of Allied Stores Corporation, is a nationally-known authority on retailing and marketing; and Dr. Blaise J. Opulente, whose appointment followed a long and distinguished career as a faculty member on both undergraduate and graduate levels at St. John's, serves as Administrative Vice President and Secretary of the University.

These administrators and other men of prominence who are Deans of the various Schools and Colleges of the University bring dynamic leadership and inpiration to the administrative team. They also have both the desire and the capacity to pursue the University's long-range goals of tomorrow.

ALUMNI ACHIEVEMENT

St. John's alumni, and alumnae, can point with pride to a century of accomplishment. Many are the chief executive officers of their own corporations. Others hold key executive and managerial posts in the companies with which they are associated.

The University's School of Law provides an example of alumni achievement. Today there are more than 200 judges, legislators and commissioners who graduated from St. John's and who serve government on all levels—Federal, state, city and county.

The School of Education has provided some 4,000 teachers in the New York City, Nassau County and Suffolk County school systems.

The College of Pharmacy, the College of Business Administration, and, indeed, all of the other Schools and Colleges of St. John's University, can claim impressive records of achievement on the part of their alumni.

Approximately 38,000 graduates remain and work today in New York City, Nassau and Suffolk Counties, and the adjacent areas of New Jersey and Connecticut. They, together with their families and relatives, constitute a sizeable consumer force in the economy of the Greater Metropolitan New York area.

Last, but by no means least in the University's "family" are the parents of its present students. In the spring of 1968, a Parents Association was formed at St. John's by a group of interested fathers and mothers. More than 8,500 parents are presently members of the organization and are encouraged to serve on its various committees and to attend functions sponsored by the University and by the Association.

COMMUNITY SERVICE

Community service has been a basic precept at St. John's University during its entire one-hundred-year history. A current example of this service has been student participation in CAUSE (Community and University Services in Education), an action project in which volunteer students give two hours of their time each week to teach English and Mathematics classes for children and adults in the deprived areas near each campus. For the past three years, CAUSE has also sponsored a highly successful summer program on the Jamaica campus which helps to meet the educational and recreational needs of hundreds of disadvantaged youngsters.

Also, at an Experimental College established at the University's Brooklyn Center, more than 200 students and faculty members participate in special study and research projects involving pertinent social, economic, and political issues in their community and beyond. Because of its location close to deprived areas, the Experimental College has the potential to become a meaningful factor in the study of today's urban problems and their resolution.

RELEVANT CURRICULUM

The University's continuing policy of adapting its curriculum to meet current needs is reflected in such recent developments as:

A new 4-year program of primary and advanced training in Computer Science, leading to a B.S. degree.

A 4-year Bachelor of Science degree program in Communication Arts, leading to careers in modern mass communication media.

Establishment at the College of Pharmacy of a Master's degree program in Toxicology. St. John's was the first to offer this program and only six other educational institutions in the nation offer such a program.

A Master's degree program in Taxation for accountants and attorneys at the College of Business Administration, in a field of increasing importance today.

A Ph.D. program in pharmaceutical sciences.

A series of courses in Black Area Studies has been instituted and these will eventually be incorporated as parts of curricula leading to the Associate and Baccalaureate degrees.

A truly comprehensive and impressive record of service has marked the first 100 years of St. John's University. In commemoration, a University Centennial Committee, headed by the Reverend Joseph I. Dirvin, C.M., Assistant to the President, is planning appropriate observances which will include a number of symposia, convocations, significant academic functions and special events, including a Concert Series at Philharmonic Hall in Lincoln Center, the first such series ever to be sponsored by a university.

THE CENTENNIAL DEVELOPMENT PROGRAM—THE "POSSIBLE DREAM"

Looking to the future, the University has charted a purposeful course. A long and intensive study by trustees, faculty, administration, and representatives of the student body, together with qualified educational consultants has determined the University's needs, both academic and physical, immediate and long-range.

From this study has come *The Centennial Development Program*—a project designed to expand and strengthen St. John's role as a vitally involved member of the Greater Metropolitan New York community.

The cost to attain the academic and physical objectives of the Centennial Development Program is estimated at $30,500,000. Success in reaching these goals will give the University the resources it needs to take advantage of new opportunities and to meet new and demanding challenges in the future.

ACADEMIC NEEDS

The primary purpose of the Centennial Development Program is the further strengthening of the University's *academic* structure. Specific academic needs are in three categories:

1. Endowed Faculty Chairs to attract to the University distinguished scholars whose re-

search, publications and ability as teachers will complement the efforts of the present faculty and provide a new stimulus for students. The estimated cost of creating these Chairs is $10,500,000.

2. Increased endowment for financial aid to students to supplement the income derived from its present modest $11,000,000 endowment. If St. John's is to meet fully the needs of the city, it must have funds to make educational opportunity a reality for students who have the potential but not the means for a college education. Estimated minimum requirement is $2,500,000.

3. Endowment for special projects and innovative programs in response to community requests to assist in elevating the general level of literacy and education, particularly among disadvantaged adults and under-privileged children of pre-school age in the ghetto areas. These projects are designed to train men and women who will assume responsibility for planning and conducting these programs. Estimated minimum requirement is $2,500,000.

The total amount required to meet the academic needs as outlined above is $15,500,000.

PHYSICAL NEEDS

St. John's *physical* needs represent new construction, renovation and remodeling, and additional equipment that will be required to achieve the University's academic objectives and to make possible the University's goal of providing greater service to its students, faculty, alumni, staff and the community at large.

St. John's physical needs are:

1. A University Campus Center at the Jamaica campus. This structure would be a unifying force in campus life, provide adequate food services, together with social, cultural and recreational facilities to meet the needs of a growing enrollment. The estimated cost of construction, fixed equipment, fixtures and furnishings is $7,800,000.

2. A new Law School Building on the Jamaica campus to replace the present inadequate quarters on four floors at the Brooklyn Center. Because of current physical limitations, the School has had to turn away many qualified students. The new building will enable the School of Law not only to provide adequate instructional facilities but to offer additional and urgently needed courses. The estimated cost of construction, fixed equipment, fixtures and furnishings is $4,500,000.

3. Library Development. The University's holdings now total more than 500,000 volumes. The number of books is increasing each year, and the further development of the University library at both campuses is essential. This development, together with extensive remodeling to provide additional stacks space is estimated to cost $1,500,000.

4. The Science-Pharmacy Building also requires extensive renovation and additional laboratories so that its facilities and equipment can be better adapted not only to meet contemporary educational requirements, but to meet the community's business, industrial and professional manpower needs of the future. Estimated cost is $700,000.

5. Extensive remodeling and renovation of the Brooklyn Center. With the relocation of the School of Law at the Jamaica campus, the space vacated at Brooklyn will be remodeled to meet pressing enrollment needs of the University's Schools and Colleges there. Estimated cost is $500,000.

TO MEET THE NEEDS OF A NEW CENTURY

The total amount needed to meet the physical needs as outlined is $15,000,000—bringing to a minimum of $30,500,000 the overall financial objectives of the Centennial Development Program. The campaign for funds toward this goal will seek the support of all who believe in St. John's and who wish to join in enabling it to strengthen and expand its position in the vitally important field of higher education in America.

St. John's University, at the beginning of its second century of service is on the move—educationally upward for its students, and outward for the community. As a Catholic University committed to a Christian vision of reality, St. John's hopes to further in its students a deep appreciation of Christian ideals of living and a true sense of Christian responsbility to self and to others.

The Centennial Development Program is both a challenge and an inspiration. The achievements of this great urban university over the past one hundred years have demonstrated its capacity for action and its ability to cope with demanding and complex problems. It is with confidence and faith that St. John's University approaches the opportunities, the problems, and the challenges of the future.

SLEPA AIDS FOR LOCAL LAW ENFORCEMENT AND THE ADMINISTRATION OF JUSTICE

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. HELSTOSKI. Mr. Speaker, we have, in New Jersey, a most excellent executive director of the State law enforcement planning agency. He is Mr. James A. Spady.

Just recently Mr. Spady delivered an important address in Atlantic City, N.J., on our criminal justice system and its many facets before the special session on law enforcement assistance of the New Jersey State League of Municipalities. In it Mr. Spady explains the use of Federal grants for local enforcement agencies and I believe all of us should be interested in his report for it was Congress which created the program. Thus, I will place in the RECORD the text of Mr. Spady's address.

Before doing so, I would like to dwell briefly on Mr. Spady's background and qualifications. Mr. Spady is a native of New Jersey. He is married and has two sons.

Mr. Spady was graduated in 1955 from Stevens Institute of Technology with a degree in engineering. He was employed for 2 years in research and development work with national corporations, and is familiar with data processing and communications equipment employed in law enforcement. He is a full member of the Institute of Electrical and Electronic Engineers and a life member of the American Association for the Advancement of Science.

In 1960 Mr. Spady received the juris doctor degree from the Columbia University School of Law. He is a member of the New York bar. From 1960 to 1968, he practiced law in New York City, interrupted by a 2-year period during which he was a department head for a national corporation based in New Jersey.

Prior to entering government service on a full-time basis, Mr. Spady served in several part-time capacities while he practiced law. Chief among these were his positions as a legislative assistant to a New York City councilman, as counsel for the New Jersey State Senate assistant majority leader, and as a member of the Bergen County Planning Board.

On February 1, 1968, he joined the staff of Gov. Richard J. Hughes of New Jersey as administrative assistant to the Governor. Then on August 14, 1968, Governor Hughes appointed him executive director of the State law-enforcement planning agency, which the Governor created by executive order the day before. It became Mr. Spady's responsibility to organize the agency and to develop and administer New Jersey's first comprehensive crime control plan.

In June of 1969, the U.S. Department of Justice called the crime control plan prepared under Mr. Spady's staff direction, "unusually good," and added that it showed "high quality in-house competence."

Mr. Spady also is president of the American Society of Criminal Justice Planners, the professional association comprising 47 of the State executive directors of the omnibus crime control program, and just recently he was named a Littauer Fellow in Public Administration at Harvard University's John F. Kennedy School of Government.

This is the text of Mr. Spady's address:

SLEPA AIDS FOR LOCAL LAW ENFORCEMENT AND THE ADMINISTRATION OF JUSTICE

INTRODUCTION

One hundred and forty years ago Daniel Webster said these now amazing words:

"Justice is the great interest of man on earth. It is the ligament which holds civilized beings and civilized nations together. Wherever her temple stands, and so long as it is duly honored, there is a foundation for social security, general happiness, and the improvement and progress of a people. And whoever labors on this edifice with usefulness and distinction, whoever clears its foundations, strengthens its pillars, adorns its entablatures, or contributes to raise its august dome still higher in the skies, connects himself, in name, and fame and character, with that which is and must be as durable as the frame of human society itself."

What went wrong in the ensuing 140 years? Why has the criminal justice system been so neglected that Professor Jameson Doig of Princeton could call it, without fear of contradiction, the "dark continent of American political science?"

And a related question: how can we *change* the system, so as to regain its former grandeur?

How it got that way—a large topic; too large for here and now.

But there *are* some threads that can be quickly unraveled.

Somehow the public has come to think of the criminal justice system—and especially law enforcement—as somehow "different" from other governmental activities. Not *really* government, in the sense of budgets and desks and typewriters and personnel problems—and a need for research, development, and change. It's a Dick Tracy world to most people.

Also, there is no tradition of press *analysis* in the field of criminal justice. In education, for example, we see "Education Editors," who are expected not to turn up a news story on the latest disciplinary problem or on the teacher who put a hand in the till—but on the *issues* of education, the contending *methods* and *programs*, the *institutional* factors. In criminal justice, it's a comic strip world of cops and robbers. The press attitude and the public attitude rein-

force one another—and make support for the hard work of change, very difficult.

I promise to return to this theme—change—at the end of my remarks. But in the meanwhile I will follow the theme of this conference—State aid programs to local law enforcement. I will set out the ways in which SLEPA has decided to *work* for change—notice that I did not say *achieve* change. *That*, I am afraid, is a very large problem indeed, and the forces at work—of the order of magnitude of the two examples set forth above—are certainly far beyond what any small agency can hope to cope with.

But there *are* things we *can* do, and I will now discuss them.

AID OFFERED BY SLEPA

The aid to local criminal justice offered by SLEPA that is either in the field or in the works *right now*, numbers ten categories. We will, of course, pick up new responsibilities as time goes on.

FIRST CATEGORY—ACTION GRANTS

The first category, not in terms of *sequence* over these past months, but in terms of *importance*, is financial aid to the local criminal justice agencies—the so-called "action grants."

Obviously, this is the most important category because it is what the program is about. But, as I will explain later, it cannot succeed without the support of the nine other categories of aid that we offer.

In fiscal 1969, SLEPA received a block grant of $866,000 from the federal government to administer "action grants" to local governments.

This money could *not* be receivel by SLEPA from Washington until *after* the first statewide plan had been approved in Washington.

For fiscal 1969, the plans of the 50 States were not approved until the very last month—June—of the fiscal year. New Jersey's plan was approved and the grant award made on June 23, and the first installment of action funds was received on August 26, 1969.

As soon as the block of action money was received, SLEPA mailed out, to 3000 criminal justice and general government officials across the State, a document—our so-called Dissemination Document No. 2—setting forth what program categories of action aid had been approved in Washington, and what local officials had to do to apply for sub-grants within those categories. A deadline of October 15 was set, and 47 applications were received from local units. In a minute, I will say a word about what happens next with those applications, but first I want to state very clearly an important fact about "block" grants.

A "block grant" is a single sum of money granted by the federal government for use within a State, such as New Jersey. *The amount of money is fixed*, and depends only on how much the Congress appropriates for the whole country, and the percentage population of the whole country that a State has.

New Jersey's plan in fact was singled out by the Justice Department, and called "unusually good." It was the only one of the 50 State plans approved without a single condition attached to it; that is, without a single fault found in it. California, on the other hand, received 30 pages of single spaced conditions on the use of their action money.

But no matter how good or bad your plan is (as long as it gets a "passing" grade) you get your population percentage share. Thus, New Jersey's population is 3½% of the National population, and New Jersey's block grant for fiscal 1969 was therefore 3½% of the National *action* appropriation of $29,000,000, or $866,000.

I spell this out in some detail, because it is important to understand that action funds under a "block grant" approach are *predictable*. And if we are going to improve criminal justice step by step, the money *has* to be predictable.

It is therefore perfectly predictable that New Jersey will again, late next spring, after the second State plan is approved in Washington, receive 3½% of the fiscal 1970 National appropriation. It looks like the National appropriation for the 50 States will be $185,000,000, so it is perfectly predictable that on about May 15, 1970, New Jersey will receive its 3½%, or $6.5 million.

I say it is *good* that it is this predictable, because then we can *count on* the money, we can *plan on* it, and all of you know how important that is.

But I promised that I would return to the subject of the current action monies.

$151,000 was granted to 25 cities throughout the State in 1968 under a special "early bird" clause in the Act, restricted only to civil disorder purposes. The money was used for portable communications equipment; we call it Project Alert, and I will touch on it again later.

$95,000 was very recently granted to the State Police to conduct a training session in organized crime, and to purchase special anti-organized crime equipment. This training session was praised by the Justice Department as "an exciting training program."

This, by the way, was the *only* State level grant made or to be made with fiscal 1969 "action" funds. In fact, in providing 89% earmarked for local use only, New Jersey is one of the top five States in regard to emphasis upon local needs.

Those 47 applications from local units of government—and I imagine there are 47 of you out there interested in this—have been reviewed by the SLEPA staff, and are awaiting decision by special committees of the SLEPA Governing Board. This decision should be forthcoming quite soon, and we will then announce the awards of action assistance.

These action grant applications and awards will of course become a regular thing once the "big" money starts to become available next spring. In fact, SLEPA will be administering at least $1 million a month from there on.

Money in *that* kind of magnitude can begin to be an important factor in assisting local criminal justice agencies in their fight to control crime—the prevention agencies, the apprehension agencies, the adjudication agencies, and the rehabilitation agencies.

But only, of course, if the money is spent wisely—and that brings me to the next subject.

I will now describe, much more briefly, the second through the tenth categories of aid that SLEPA offers to local law enforcement.

All of *these* nine categories have *one* thing in common: *They are intended to set the framework for the action grants*. Each of *these* aids in some way helps ensure that we—SLEPA and you—know exactly *what* to spend action money on, *where* to spend it, *when* to spend it, and *how much* to spend—all in terms of wringing the most benefit out of the limited action dollars we will have each year.

I will now describe these nine additional categories of aid.

SECOND CATEGORY—STATEWIDE PLANNING

The second category of aid which we provide, is the initial creation, and the annual revision and resubmittal, of the comprehensive Statewide Crime Control Plan.

At first glance you might not see this as aid to *you*, but let me assure you that it is. If *you*, as municipal officials have a *good* statewide plan, you have one leg up on the problem of knowing *what* should be done locally, and *what* you can expect from SLEPA. If you had seen some of the confused, contradictory, and unimaginative plans of some other States that *I* have seen, you would know what I mean. You would know how difficult it must be for local officials in *those* States to decide just what *is* available under the plan, just what *has* to be done to get it, and just *where* is the whole thing headed.

A good Statewide Plan—one that clearly and accurately defines the problems, the proposed program solutions, and the procedures—is the single most helpful thing a local official can have as a guide to what he can and should do himself.

As you know from reviewing our Plan—which was sent to all of you as Dissemination Document No. 1—it is very complete, yet very clear. It represents many, many thousands of hours of work. But we at SLEPA are perfectly satisfied that the extra effort was worth it because you now have to work with as you begin to pick up *your* end of the responsibilities under this Crime Control Act program, the use of the clearest and most complete effort of which we were capable.

THIRD CATEGORY—PLANNING GRANTS

The third category of aid that SLEPA offers to local governments, is that of *"planning"* grants.

The purpose of a planning grant to a local unit is of course, to assist that unit to *define* its problems clearly, completely, and accurately; to *develop* solutions to the problems; and to create a local plan for attacking those problems—a plan setting forth programs, priorities, costs, time sequence of the programs, and so on.

All businesses plan, and modern "blue-chip" businesses plan with great sophistication and with all the assistance that systems analysis, compueter simulation, and decision analysis can offer. They have found that planning pays off.

Obviously we do not imagine that local law enforcement can do *that* kind of planning. But as John F. Kennedy said in his inaugural address, "the longest journey starts with a single step—let us begin".

And it is worthwhile even just to "begin" because the institution (in even a modest degree) of planning, or the planning viewpoint, will have immediate beneficial effects upon a local unit. It will help clarify current assets, problems, and goals; and it will save money through better coordination of existing assets, and better choice among possible future changes and improvements.

Many of the programs developed in local planning will require local funds for implementation. In many cases, however, SLEPA action funds will become available to implement portions of these local plans—the good portions, I might add, and therein lies the incentive to do the local planning well.

Now I'm very well aware that "planning" has a bad name among many people. And it ought to, if it leads nowhere. That's not the kind of planning the Crime Control Act contemplates. It wants *action* planning from local governments.

Our planning grant monies are quite limited. The Congress, and properly so, appropriates many times more "action" money than "planning" money. Still, we have already begun to make a local impact with our planning grants.

In fiscal 1969, we had $253,000 for local planning grants. (Incidentally, 10% of that was donated by the State). We reviewed the crime statistics for local units in New Jersey, and offered planning grants to 17 cities spaced around the State; cities that had very high crime rates. In each of the 13 counties where there were no such cities, we made a planning award to the county so *it* could begin to assess the problems of the region.

With fiscal 1970 monies, we will expand this program of planning grants. It is our hope to be able to extend some kind of tangible planning aid to a large number of New Jersey cities, and all counties, by the second year of the program.

FOURTH CATEGORY—TRAINING LOCAL PLANNERS

The fourth category of aid, is the *training* of local planners.

We are very well aware that there is very little planning tradition in the criminal justice system. We therefore know that providing planning mones is not enough. We must train local planners. It is not money as such that effects change and improvement, it is people and skills.

We have scheduled a monthly series of training classes at the SLEPA offices in Trenton. The first class is scheduled for December 17, 18, and 19. The format will be that of a workshop: lectures about the Statewide Plan and about methods of local planning; discussion of local problems; and small group work on actual planning problem.

There will be between 15 and 25 attendees in each training class. We have invited to the first class a majority of the local project directors of the 1969 planning grant cities and counties. They were invited to the first class because they have an immediate need to learn the principles of planning, so that they can use their current grant to the fullest advantage.

However, we will in succeeding monthly classes, include representatives from the remaining eight counties, and from as many cities as want to attend.

In the second and third monthly classes, we will give preference to representatives from the balance of the 50 crime cities, but we will be pleased even then to include others if they so desire. From the fourth month on, we will have no preferences whatever, and will train representatives from as many cities as will come.

* * * * *

There are three elements to successful planning, and therefore to successful action: planning *money, trained* planners, and *information* upon which to base plans. I have described, in the preceding two categories of aid, how we are moving to handle the money, and the training, for planning locally. I now turn to the third prerequisite: the *information* needed by the local planner.

Lest you downgrade the importance of information, let me illustrate. Some time ago a potential applicant from a city south of Trenton submitted an action grant application to us, dealing with education against narcotics abuse. In discussing their approach with them, it developed that they had never heard of pioneering work in that area done in a county north of Trenton. Yet that approach was really the kind of thing they were trying to devise themselves. As small as New Jersey is, it's very difficult to not "reinvent the wheel" over and over again. Information *is* vital, and SLEPA means to do something about it.

Therefore, the remaining six categories of aid that SLEPA offers to local units, all have one thing in common: they provide *information* upon which local planners can make recommendations, and upon which local officials can make decisions.

FIFTH CATEGORY—DISSEMINATION DOCUMENTS

The fifth category of aid to local units is therefore an *umbrella* category, overlapping each of the succeeding five. It is the aid represented by dissemination documents, i.e. documents sent to local officials to give them information they need or can use.

There are four kinds of Dissemination Documents that SLEPA has programmed for the period commencing last June. Each has its own information transmission purpose.

The first, and most obvious, are Dissemination Documents that relate to the fundamental processes of the Crime Control Act program—each annual plan, each action fund procedures guide, and planning guides and explanations. You have already begun to receive these; by their very nature they come first.

The second class of Dissemination Documents are those that summarize a great many program ideas. Less than a page is devoted to each idea, and each is an abstract of a full program, the details of which will be made available to interested parties. The source of these abstracts are (1) the programs submitted by applicants to SLEPA, (2) programs submitted in other States (as President of the American Society of Criminal Justice Planners, the association to which 47 of the State Directors of this program belong, I have instituted the sharing of abstracts among States), (3) *existing* criminal justice programs in New Jersey that have innovative content, and (4) such *existing* programs in other States.

Obviously, this kind of document is put out only infrequently—we plan it once a year.

The third class of Dissemination Documents are those that trace the outline of where we at SLEPA think criminal justice ought to go in New Jersey, as regards a specific subject. It is helpful to you, to have materials that go beyond the plan—materials that are *binding* on no one, but that help *clarify* where we might be going. Some topics that are high on this agenda are: (1) narcotics control, (2) State-wide police communication and information retrieval, (3) juvenile delinquency prevention and control, (4) criminal justice education, and (5) the corrections and rehabilitation system. These are obviously large undertakings, but we have each of them under study right now.

The fourth and final class of Dissemination Documents are those that report the results of action grants. Obviously the biggest advantage derived from a successful action grant project, is that others can learn from it—again, they don't have to reinvent the wheel over again. It is our responsibility—SLEPA's—to see that whatever is learned with action monies, is made available to all. If, to go back to the earlier illustration, a good narcotics program is mounted in a North Jersey County, we don't want a South Jersey City—or any city or county for that matter—not to know about it.

I mentioned before "Project Alert", our first action project, which was funded a year ago to 25 riot prone cities. After a year's experience, we are now ready to report the results so that others might join the Alert system. This first report of its kind will be set out in Dissemination Document No. 4, to be mailed in late December.

The remaining five categories of aid are less major, and operate by feeding information into Dissemination Document process, or directly to the local official.

SIXTH CATEGORY—TECHNICAL ASSISTANCE

The sixth category of aid is technical assistance to local units. The SLEPA Staff includes a former Model Cities senior researcher; a former senior FBI Agent; a veteran State Police planner; a veteran corrections planner; police training people, financial people, and so on. I mentioned before that the Justice Department called our Plan "unusually good" in approving it. They also said the quality of the plan indicated that we had "high quality in-house competence." That competence is there for *you*. Use it. We want to help.

SEVENTH CATEGORY—LEEP PROGRAM

The seventh category of aid is the Law Enforcement Education Program.

While the funds are awarded directly to colleges and universities in New Jersey for the provision of loans and scholarships to criminal justice people pursuing college credits, we have assumed the task of coordinating the awards. The direct nature of the awards has made coordination difficult; however it is our hope that a master plan for criminal justice education will bring some order, and therefore more coordination, into the process.

In the past academic year $142,200 was awarded to New Jersey colleges, resulting in the full or partial support of 658 law enforcement related students.

EIGHTH CATEGORY—ANNUAL CONFERENCES

Our eighth category of aid, is the calling of annual criminal justice conferences, to bring together once a year, people from all branches of the system and all parts of the State, to get to know each others viewpoints and problems and suggestions.

At the first such conferences, which were held in six locations in the State, there were nearly 1500 attendees. Many people far wiser than I, hold to the opinion that the isolation of the various branches of the criminal, justice system is one of its greatest problems—we hope the conferences in some small way will begin to alleviate that situation.

NINTH CATEGORY—COLLOQUIA

The ninth category of aid is closely related to the eighth. We intend to sponsor discussions among leaders of the various branches of the criminal justice system in New Jersey, of the problems cutting across two or more of the branches. The problems between the police and prosecution for example. Or the delay in the branches of the adjudication system.

We will experiment with methods for bringing out the best, most-informed operating viewpoints. At present, we believe that colloquia among four or five leaders holds the greatest promise. We will of course disseminate the results.

TENTH CATEGORY—RESEARCH

The tenth and final category of aid is research.

It is not practical to attempt to do really basic research, or even *much* research of any kind, on the State level. For that reason, Congress set up a national research effort in the Justice Department.

However, we do perform research. We have conducted systems analysis studies on the operations of a number of New Jersey criminal justice agencies, including two courts, one prosecutor's office, and four police departments. Our research director is currently doing literature and field studies on the narcotics control problem, and on the design of urban streets and buildings to render them safer from crime. These research efforts will, of course, be disseminated in due course.

CONCLUSION

I come now to the end of my report to you.

I have made only three points:

(1) Change in the criminal justice system is very difficult to achieve. Large-scale change in basic institutions is always difficult, but there are special problems with criminal justice. Criminal justice is not treated like education. It is, as a system, not taken seriously. We have a Dick Tracy view of criminal justice. We see it as cops and robbers; not as a vast, sprawling system of agencies that are in deep *institutional* trouble. We don't treat it like an administrative branch of government; it is "different". These attitudes, wherever they come from originally, are not helped by the treatment that criminal justice gets in the media: all transitory sensationalism, and no analysis. *A change in attitude must precede a change in the criminal justice system.*

(2) Rational planning will work in criminal justice, just as it does in every other endeavor; and it is *necessary* if there is to be change under conditions of scarce resources for change. We can't afford to waste this opportunity.

(3) *Information* is needed, about *how* to change, and *what* to change to. When Professor Jameson Doig of Princeton called law enforcement "the dark continent of American political science", he at once put his finger on two truths: there is very little known in the criminal justice branch of government; and that fact cannot be an accident.

In conclusion, I must confess that I do

not myself know what went wrong in the hundred and forty years since Webster was moved to praise, in the quotation with which I opened these remarks, not only *justice*, but also those who *"labor* on this edifice".

But whatever happened, only people—that's us too—can reverse it. And so I conclude on that note by citing the final words of the Report of the President's Crime Commission, "if America is to meet the challenge of crime it must do more, far more, than it is doing now. It must welcome new ideas and risk new actions. It must spend time and money. It must resist those who point to scapegoats, who use facile slogans about crime by habit or for selfish ends. It must recognize that the government of a free society is obliged to act not only effectively but fairly. It must seek knowledge and admit mistakes.

"Controlling crime in America is an endeavor that will be *slow* and *hard* and *costly*. But America can control crime *if it will."*

THE SELLING OF THE PRESIDENT IN 1863

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 11, 1969

Mr. PUCINSKI. Mr. Speaker, I should like today to call to the attention of my colleagues a fascinating article written by Mr. Hank Lindsey, for the Chicago Tribune, which in a most eloquent manner speculates on how the network pundits—the glamor boys of the big tube—would have covered the campaign of President Abraham Lincoln.

It is only by interposing today's network commentators on a known vignette of American history that we can fully appreciate what is happening to Americans today.

Mr. Lindsey has performed a notable public service by putting today's electronic journalism into proper perspective.

His excellent article, which appeared in the Chicago Tribune on December 1, follows:

THE SELLING OF THE PRESIDENT: 1863

(By Hank Lindsey)

Today, we in the United States are very fortunate. For every major public utterance by a political figure, we have at least a hundred journalists who interpret what was said.

I understand that, actually, there was a time when a President would make a speech and the average citizen had to figure out what the man in the White House said without any help from learned commentators.

Of course, everyone realizes why we need professional interpreters of the news. Politicians otherwise defy understanding.

Of all the news media, television seems to be making the greatest strides toward a comprehensive program of interpreting the news. The real beauty of the television method of instant analysis is that we don't have to wait to learn what we should think about a policy statement by the President or one of his ranking administrators.

Just imagine how different things might have been a hundred or so years ago had we had network television covering Lincoln's Gettysburg Address.

". . . that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, and for the people shall not perish from the earth."

"This is Walter Conkle reporting directly from Gettysburg. Mr. Lincoln has just finished his remarks and is retiring from the platform. He is the stovepipe moving just to the left of the screen. The derby just in front of the President is the Pinkerton man clearing a path thru the crowd so Mr. Lincoln can get to his horse.

"We have a crew located by the station in Gettsyburg standing by the Presidential train waiting to wisk Mr. Lincoln off to Washington for another round of top level conferences on war strategy.

"While we wait for the President to travel from here to the station, we'll switch back to our studios where Chet Hinkley has a panel of our distinguished newsmen waiting to share a few of their reactions to the just completed address by Mr. Lincoln. Take it way Chet."

"Thank you, Walter, and good day. Here at the studio we have followed the President's remarks closely to glean, if possible, any hints of changes in current administration policies.

"Around the table here in the studio, we have Frank Sagee, who has been covering the congressional scene for ABS; Sandy Vancouver, who traveled with the President during the last campaign and has been close to the current administration since Mr. Lincoln's election; and Herb Kalow, who has just returned from a tour of the front for ABS.

"Let me kick this discussion off by saying that I thought that the President tried to keep his remarks on a high plane as evidenced by his opening reference about four score and seven years. I'm sure the old Lincoln would probably said '87.'

"Sandy, you've witnessed both the old and the new Lincoln. Do you think that we saw the new version today and if so, does the President's new polish give any indication as to a shifting of administration policy?"

"Well, Chet, I have to agree that the old Lincoln wouldn't have said four score and seven, but I don't see any basic changes in the man or his policies. As you rightly noted, the President is seemingly more polished these days, but from my vantage point I can see where he is tending to let Andy Johnson take the low road while he remains above the conflict."

"I see. Then you'd say that the old Lincoln is still with us?"

"Yes, very much with us, but I'd like to hear what Frank has to say about how he feels Congress will react to today's statement."

"Well, Sandy, in my conversations with several of the leaders in the Senate, they indicated that they'd be watching today's speech by the President very closely for any signs of softening in the administration policy of complete victory or nothing. Several expressed a hope that Mr. Lincoln would outline some definite program for bringing the conflict to a quick end.

"Frankly, I don't think that the senators will be able to read any indication of a softening attitude from today's statement. For example, Mr. Lincoln's calling for people to be 'dedicated to the great task before us,' seemed to me to be an affirmation that the administration plans to continue its total victory strategy.

"Thank you, gentlemen. I have word that Mr. Lincoln is about to board the train in Gettysburg, so we have to switch back to Walter Conkle at the scene. Take it away, Walter."

"Thank you, Chet, and thank you gentlemen for your candid comments on President Lincoln's remarks.

"I might add for the benefit of our viewers that if today's audience is any indication of the national mood, the President is in deep trouble, politically. There was almost no reaction to the President's address. The crowd now in the process of dispersing is silent and solemn indicating, I fear, a deep distrust for Mr. Lincoln and the current administration policies.

"And now, to the station for Mr. Lincoln's departure. Take it away, David."

BALTIMOREANS JAMES, COOK ARE KILLED IN VIETNAM ACTION

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. LONG of Maryland. Mr. Speaker, 2d Lt. Franklin T. James and Pvt. David R. Cook, two fine young men from Maryland were killed recently in Vietnam. I wish to honor their memories by including the following article in the RECORD:

BALTIMOREANS JAMES, COOK ARE KILLED IN VIETNAM ACTION

The Korean-born wife of an Army second lieutenant stood in the rain yesterday as the coffin bearing her husband's body was gently lowered into a grave at Baltimore National Cemetery.

Not far away in West Baltimore, the mother of a 19-year-old Army private who dropped out of high school to enlist at the age of 17, wept silently because her son will not be returning from Vietnam next week.

Second Lt. Franklin T. James, whose wife lives at 1518 North Collington avenue, was killed in Vietnam November 3 when he stepped on a land mine while out on patrol. He was 26.

Private David R. Cook, the son of Mr. and Mrs. Samuel F. Cook, of 1702 Moreland avenue, was killed November 7 in hostile action. His mother said he was scheduled to return to the United States next week.

Lieutenant James, who enlisted in the Army two months after graduating from Poly in 1961, was graduated from Officers Candidate School at Fort Benning, Ga., in February, and sent to Vietnam August 31.

Born in Wilmington, N.C., Lieutenant James was brought to Baltimore by an aunt when he was 3, and, after the aunt died, he was adopted by Mr. and Mrs. Samuel Jones, who also live at the Collington avenue address.

After joining the Army, Lieutenant James served in Turkey and later Korea, where he met and married his wife. His wife is the former Yong Cha Lee.

Besides his wife and stepparents, he is survived by a stepsister, Mrs. Nancy Crosby; and four stepbrothers, Samuel, Bert, Evell, and Thomas Jones, all of Baltimore.

Private Cook attended Carver Vocational-Technical Senior High School through his junior year, and quit to join the Army with his parents' approval.

Private Cook completed high school in the Army, and had planned to go to college to learn skills necessary to open his own business, a dry-cleaning establishment, his mother said.

HIGH SCHOOL QUARTERBACK

While at Carver, Private Cook was a quarterback for the school's football team, and was a member of the track team.

After completing his tour of duty in Vietnam, Private Cook was to be stationed at Fort Bragg, N.C., after a leave in Baltimore.

Besides his parents, he is survived by four brothers, Otis, Samuel, James, and John Cook, all of Baltimore; five sisters, Mary, Helena, Christine, Shirley, and Alice Cook, all of Baltimore; and his maternal grandmother, Mrs. Lena Lockley, of Gloucester, Va.

JOSEPH P. KENNEDY

HON. FRANK CHURCH

OF IDAHO

IN THE SENATE OF THE UNITED STATES

Friday, December 12, 1969

Mr. CHURCH. Mr. President, the late Joseph P. Kennedy was a singular individual in the annals of our national life. His own career in both public service and private life was distinguished by the contributions he made to his fellow man.

But historians will remember him primarily as a father—as a man who bequeathed to his children that love of life which encompassed courage of leadership and compassion toward others.

In a family seared by the pain of recurring tragedy, Joseph Kennedy was allowed the blessing of a peaceful death. Bill Hall, the editorial page editor of the Lewiston Tribune, in Idaho, said it well in his eulogy:

Against all the others, it is almost the happy parting from cares of life that the theologians tell us death should be.

Mr. President, I commend Mr. Hall's editorial to the Senate and ask unanimous consent that it be printed in the Extensions of Remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Lewiston (Idaho) Morning Tribune, Nov. 19, 1969]

AN ODD EVENT FOR THE KENNEDYS

A most extraordinary thing happened yesterday: There was a natural death in the Kennedy family.

After 30 years of plane crashes and assassinations, Joseph P. Kennedy, father and catalyst to one of the most remarkable political dynasties in American history, died as old men do, peacefully in a coma.

It will be the first family funeral the Kennedys will have attended in years that will not include the overriding tragedy of premature, unexpected and cruel termination. Against all the others, it is almost the happy parting from cares of life that the theologians tell us death should be.

There are few Americans who cannot recite from memory the toll that preceded it: a son killed in a World War II airplane crash, a daughter killed in an airplane crash in 1948, a son killed in the presidency and another cut down while striving for that office.

Few men have suffered so much pain—or shared in so much triumph—during the lives of their children.

Political men at the beginning of their careers and in the back of their minds have thoughts of reaching for the top, all the way to the top in their wildest dreams. But when the realization dawns, as it does quite early with most, that they will never make it, a substitute dream—equally sweet in its way—emerges: There is always the son who can have the advantage of picking up where the father left off and perhaps reach the goal. The stage mothers of politics are all frustrated actors themselves.

Joseph Kennedy was the most successful stage mother of all time. He molded the ideals, talents and ambition of his sons, focusing their lives toward a single goal and succeeding more than any other man because he had the acumen to leave them with their individuality when the process was finished.

The first son, Joe, was to be the first to try for president—a wish many fathers share, but which in retrospect was no delusion of grandeur in this particular family.

Joe never came back from the war.

Jack did, though barely, and his well launched career took him to the White House in 14 short years where he became the youngest man ever elected president of the United States. He died there. Brother Robert was next to try and next to die.

The last remaining son, Teddy, has already collided twice with the curse—a broken back in an airplane crash and a traffic accident in which a companion died under bizarre circumstances. The office may now be beyond his reach.

The price was high, and sons are not a commodity to be squandered heedlessly on a father's ambition, but the record is astonishing: of four sons, three became U.S. senators, one became president, and two became serious presidential contenders. All four were victims of their time. And the father, proud and sad, died in his sleep, where dreams are made.

TRIBUTE TO POISON PREVENTION PIONEER

HON. BILL D. BURLISON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BURLISON of Missouri. Mr. Speaker, some men's lives are monuments enough and their accomplishments need not be engraved in stone that they be remembered. So it was with my friend, a fellow Missourian, Homer George. The man is gone but his life was rich and his friends were many. Many more who never were fortunate enough to know him owe him a great debt. A pharmacist by profession, he knew firsthand how children were often poisoned because their parents were not aware of the danger. He was not the kind of man to wring his hands and shake his head; he set out to do something. Through his untiring efforts and the active assistance of former Congressman Paul C. Jones, he finally succeeded. On February 9, 1962, at 2:26 in the afternoon, President John F. Kennedy issued a proclamation designating the third week in March as National Poison Prevention Week. None worked harder for this project than Homer George, and none deserved greater credit for it.

No one can even estimate how many children's lives have been saved because Homer George cared about them and tried to help. We do know that before the inauguration of Poison Prevention Week hundreds of thousands of children were accidentally poisoned every year. The text of the President's proclamation reads in part as follows:

Whereas accidental poisoning consistently takes a substantial toll of lives each year, especially among very young children; and

Whereas prevention of accidental poisoning can best be promoted through a vigorous program designed to alert parents and others against this hazard. Now, therefore, I, John F. Kennedy, President of the United States of America, do hereby proclaim this week beginning March 18, 1962, as National Poison Prevention Week.

This then is Homer George's monument; the thousands of children whose lives have been saved and the thousands more whose lives will be saved in the years to come.

Mr. Speaker, may I add that the departure of this fine man has been a personal loss to me. For 5 years my law office was located in his building and adjacent to the prescription shop. Our business and personal relationships were always close and friendly.

SOLDIER SCORNS "PUNKS WALLOWING IN SELF-PITY"

HON. W. E. (BILL) BROCK

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BROCK. Mr. Speaker, I want to share with my colleagues a recent letter to the editor of the Nashville Banner, Capt. Jerry L. Edwards, a native of McKenzie, Tenn., has written from Vietnam expressing his disdain for those Americans who would destroy rather than build our great Nation. Although Captain Edwards is speaking only for himself, I believe he expresses the views of a great many Americans. His letter follows:

"PUNKS WALLOWING IN SELF-PITY" DRAW A SOLDIER'S SCORN

To the EDITOR OF THE BANNER:

I have had it with people trying to tear my country apart, and it's much too late to throw the over-used adage about being a "Flag Waver" at me. You're right, I'm a Flag waver! I have a right to be one, I've earned my privilege.

I have had it with punks wallowing in self pity, who make a display of deploring their birth into a rugged world, to use their sissy expression, "they didn't make!"

Well I didn't make the world into which I was born either, and neither did the men I know who are worthy of American respect. They are out trying to do something about it, not out wearing a beard and causing confusion and destruction in our wonderful country. There is a reason our Hippies wear beards and don't shave. When you shave you have to take a good look at yourself and most Hippies don't have enough self respect and courage to take that look.

Don't give me your whining, whimpering, self-pitying claptrap about how this country is letting you down. I've had it with Hippies, brainless intellectuals, writers who can't write, painters who can't paint, teachers who can't teach, administrators who can't administrate, entertainers who fancy themselves sociologists, and Negroes who castigate as "Uncle-Toms," the men who have demonstrated to all the most important quality in America, "Individual Enterprise and Responsibility," Dr. George Washington Carver, Booker T. Washington, Roy Wilkins, Justice Thurgood Marshall, Duke Ellington, Count Basie, the Mills Brothers and many more.

I've had it with those cerebral giants who think it's appropriate to invite advocates of drug use to lecture in their classrooms or to invite a Black Power spokesman to deliver a lecture on Flag-burning as was the case in the Mercer Island school district.

There are 500,000 American men in Vietnam who endure tremendous hardships and of whom many give their lives each week to keep our country free and our Flag flying.

Yet there are people in American who defile and burn our Flag. Are these people really Americans?

I've had it with people who set out deliberately to crush mankind's most noble experiment in decency.

Let me tell you one thing, if you are going to attempt to strip my country of its pride and destroy those institutions my friends and my family have fought and died for, you have to climb over me first! In order to do that you will have to get up awfully early in the morning.

Capt. JERRY L. EDWARDS,
101st Airborne Division, Vietnam.

PROCLAMATION OF THE STATE OF CONNECTICUT

HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. DADDARIO. Mr. Speaker, the late Martin Luther King was one of the most charismatic and influential leaders of our generation. As the focus of a nonviolent quest for equal rights for all Americans, he had a significant impact on our history.

His assassination was a terrible blow to America. I traveled with many others to mourn at his funeral in Atlanta when he was laid to rest, and I believe the increasing recognition of a desirable action sought by our people is well stated in a proclamation issued by Gov. John Dempsey, of Connecticut, with the cooperation of the general assembly. The text of which I submit for the RECORD now so that it may be available to all our Members:

PROCLAMATION OF THE STATE OF CONNECTICUT

(By His Excellency John Dempsey, Governor)

"Abused and scorned though we may be," Martin Luther King once said in speaking of his people, "our destiny is tied up with America's destiny. Before the Pilgrims landed at Plymouth, we were here. Before the pen of Jefferson etched the majestic words of the Declaration of Independence across the pages of history, we were here.

"For more than two centuries our forebears labored in this country without wages; they made cotton king; they built the homes of their masters while suffering gross injustice and shameful humiliation—and yet out of a bottomless vitality they continued to thrive and develop.

"If the inexpressible cruelties of slavery could not stop us, the opposition we now face will surely fail. We will win our freedom because the sacred heritage of our nation and the eternal will of God are embodied in our echoing demands."

Dr. King's words reflect his unswerving dedication to the cause he embraced—true freedom and equality of opportunity for our black citizens.

An eloquent spokesman and a determined advocate, Dr. King won the respect and admiration of his fellow citizens. His accomplishments, and his record of service in behalf of brotherhood, will long be remembered.

The General Assembly has directed that a day be set aside each year to honor Martin Luther King "for his selfless devotion to the advancement of equality and the preservation of human rights." Accordingly, I proclaim January 15, the anniversary of the birth of this eminent leader, to be Martin Luther King Day in the State of Connecticut.

I urge that flags be flown on public buildings and private homes and that there be suitable observance of this occasion in the schools of this state and in our communities.

Given under my hand and seal of the State at the Capitol, in Hartford, this fifth day of January, in the year of our Lord one thousand nine hundred and seventy and of the independence of the United States the one hundred and ninety-fourth.

JOHN DEMPSEY.

By His Excellency's Command:

ELLA T. GRASSO,
Secretary of the State.

EMERGENCY DETENTION ACT SHOULD BE REPEALED

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. RODINO. Mr. Speaker, I was very pleased to note the recent recommendation of the Department of Justice that the Emergency Detention Act—title II of the Internal Security Act—should be repealed. It is dismaying to realize that this ill-advised statute—passed over the veto of President Truman—is still in effect. Its implications are readily apparent when we recall the disgraceful record of the detention of American citizens of Japanese ancestry during World War II. Although it can easily be said "It can't happen here," it remains an insidious threat to justice and the constitutional rights of all Americans, and I welcome the Justice Department's action. As a cosponsor of H.R. 13455, to repeal this act, I urge speedy consideration of this legislation to eliminate an unneeded and dangerous law which does violence to the basic principles of our democracy. In this connection, the December 13 issue of the New Jersey Afro-American contains an excellent editorial on the question and I am including it in the RECORD. As it cogently points out, the act is an "unnecessary shadow over the democratic process" and should be removed. The editorial follows:

CONGRESS SHOULD AGREE

The Justice Department took a commendable step Wednesday in asking Congress to withdraw the department's authority to set up detention camps.

Deputy Atty. Gen. Richard G. Kleindienst was giving the Congress a concise picture of the situation when he advised that the mere threat that the authority might someday be used is "extremely offensive to many Americans."

A statement Mr. Kleindienst has denied making, which suggested anyone who demonstrated in a way as to interfere with others might be subjected to such detention, has increased concern about the six camps still in existence.

One of the most un-American aspects of the detention camp authority is that it permits people to be rounded up and detained without proper legal safeguards and recourse.

In these tense days when many viewpoints are being pressed and attacked by people in and out of government, no citizen, or groups of citizens, should have to fear oppression by whim.

The government has said on more than one occasion that it never intends to use the Emergency Detention Act authority.

The AFRO consistently has said, as did Mr. Kleindienst last week, that the benefit of repealing the act "outweighs any potential advantage which the act may provide in a time of internal security emergency."

The Congress should remove this unnecessary shadow over the democratic process.

VIEWPOINT OF A SOLDIER IN VIETNAM

HON. MARTIN B. McKNEALLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. McKNEALLY. Mr. Speaker, the national dialog on the pros and cons of President Nixon's Vietnam policy continues unabated. I have long been greatly interested—but not in the least mystified by them—in the sources of the theme of dissent against the Vietnam war. I am interested as well in the relatively small number of individuals who tenaciously and—I must sadly admit—successfully promote this theme throughout the length and breadth of our Nation.

I would like to bring to the attention of my colleagues in the House, a letter written by a soldier in Vietnam to the editor of the Journal-News in Nyack, N.Y. This young soldier is a resident of Monsey, N.Y., in the 27th Congressional District, which I have the honor to serve.

I harbor no doubt that the great majority of Americans support the President. I believe a letter from a soldier in Vietnam is particularly significant and it is unfortunate they do not write more often; but then, they are rather preoccupied with the business of defending the free world against Communist aggression. When the letters do come, however, they are like a breath of fresh air in a room full of stale smoke. The letter follows:

To the EDITOR, JOURNAL-NEWS:

I'm one of many soldiers in Vietnam doing my thing for the people over here. Perhaps you think I'm having a groovy time. Well, I'm not, and the good people of the world know that I'm not. This is a stinking, rotten war and I hate it. I wish I were back in my own world in Monsey.

That's maybe what you want to hear. Well, it is rotten and I would like to be home but I am glad I am here to help these people who respect us more than the people at home. You people talk about a war you know nothing about yet you think you know all the answers. It's not that simple.

Wouldn't you like some help if some big bully came in and took your home and land away? Would you like to wear clothes salvaged from a dump that weren't fit for a hippie? You run around with signs saying war is hell. You're darn right war is hell but these people need our help and most of us are willing to give it. These people are sick of war, too, but they are willing to go on fighting until they are free of the Vietcong and I am willing to help them.

If you want to help, you can come on over and give a hand or you can shut up and let us do our job. We do a pretty darn good job, too, because we are in a hurry to come back home.

If you say killing is wrong, why are you killing something that it took more than a hundred years to build—our American democracy? Stop it now so we may have a

place of peace to come back to when this is over.

It is really more quiet over here where the people are together. If you would like to know who are the big mouths over here, look in the papers at the pictures of the servicemen shouting war is hell but peace without honor is a tragedy.

Pfc. JAMES L. SIMPSON,
101st Airborne Division, Vietnam.

AFTERMATH—22 YEARS AFTER BATTLE OF SAIPAN

HON. FRANK A. STUBBLEFIELD

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. STUBBLEFIELD. Mr. Speaker, in these critically trying times for both Members of Congress and the Nation at large, I wish to insert in the RECORD, for the benefit of all our colleagues, a portion of a narrative poem which was serialized in the Madisonville Messenger, Madisonville, Ky., a daily newspaper in my district. This poem was written by a man who 22 years before was involved in the Battle of Saipan. The author, Mr. Ben Rash of Mortons Gap, Ky., in prefacing his own poem stated:

It is not the purpose of this narrative poem to glorify any person, group or unit, but rather to set down for any interested reader the actual events as they were known to me and to try to convey the feelings of a combat survivor after enough years have passed that those same events should have long passed into oblivion.

Parts VI and VII of Mr. Rash's poem follow:

PART VI—THE RETURN

Left that grim, forbidding Island,
Two years later war was won,
Came back to my cherished country,
Left behind the pack and gun.

Journey on to Ole Kentucky,
Arrived again at my home town,
There I met my Love and wooed her,
"Married up!" and settled down.

Lived in peace all through these bright years,
But the dream I dreamed last night
Brought back horror of the conflict
Of the terrible Island fight.

Saw a spectral group come marching,
Each one proud and stiff and straight,
None no longer prone and lifeless,
All had met and known his fate.

Ranks of four they stepped out smartly,
Around each head a halo light,
Saw with growing consternation
Garments that they wore were white.

Couldn't believe this thing approaching,
Suddenly filled with awful dread,
Realized now this ghostly column
Was the Legion of the Dead.

Now the marching column halted,
Leader turned and raised his arm,
Beckoned for my presence nearer,
Plain for now they meant no harm.

Summoned last reserve of courage,
Tried to overcome my fear,
Stopped in horrified amazement
When I saw their faces clear.

Leader was the Sergeant Nichols
Dead and gone these twenty-two years,
Heading up the first squad column
Was the Corporal Charlie Spears.

Searched each shining face so peaceful,
Tried to stifle back a sob,
There stood Gates and Hart and Kovak
Lynch, Sims, Price and Cobb.

Many, many other comrades
Helped make up this silent Crew,
Stood there like a cold stone statue
Fearful apprehension grew.

Nichols eyes so kind and gentle
Fixed mine with a level gaze,
Voice came so unexpected,
Stirred me from my frozen daze.

"Now you answer up these questions,"
Said he in unyielding tone.
"Why are you among these mortals?"
"Why has not your spirit flown?"

"Wondered where you've been this long time,
Wondered why you didn't fall."
I answered quick, "The Lord so willed it,
Supreme Commander of us all."

"Don't know why the Blessed Savior
Didn't have me join your band,
Left my life so precious to me,
Brought me safe back to this land."

But I'm sure He had a purpose,
Knew I wasn't fit to die,
Left me here to get me ready,
Gave me one more chance to try."

A COUNTY MAN REMEMBERS: "AFTERMATH"—22 YEARS AFTER BATTLE OF SAIPAN

PART VII—THE MESSAGE

Nichols thought the Answer over,
Said,"I'll tell you something more
Stand fast now and listen closely,
You have drawn a sacred chore."

"Another reason that HE spared you
On the path of life to tread,
Was that you might take a message
To the living from the dead."

"Long have we celestial dwellers
Watched events on earth with gloom,
Listened while men plotted ever
Mankind's fast approaching doom."

Seems as though the hell first started
When the atom bomb was born,
Since that day the moral fiber
Of the Nations weak was shorn.

I speak here of draft card burners
And the ones who cry aloud
Of their false religious feeling
Masking cowardice with this shroud.

Also, there are those scared authors,
Writers of the "Protest Song"
Those who shout the foreign policy
Of the Government is wrong.

Remember, too, the "slogan mongers"
Who attempt their rot to spread,
Shameful whispers to each other
Such as, "better red than dead."

I include the politician
He who utters reckless words,
He who shouts his partisan speeches.
While the foe of freedom girds.

And the pampered, misled students,
Those who enter school to learn,
Then profess to such great knowledge,
Military duty they must spurn.

There are other spineless creatures
Who enjoy this land so great,
Yet, they aid the foreign menace
Preaching communistic hate.

Nichols voice now rose in anger,
Bitter tongue and words of scorn,
Directed to the "semi traitors"
Who were all in freedom born.

Before the fighting in Korea,
"Eighteen" proud free nations fell
Existing now in subjugation
Behind the "Iron Curtain" hell.

South Korea, only Cuba
Has fallen to the communist horde,
Because America is committed
As a shield against the sword.

Don't those fools now demonstrating
For our military retreat
Know the path of world desertion
Leads to freedom's sure defeat?

Can't they see their silly antics
Aid the evil communist flow?
Bring a wealth of aid and comfort
To the free world's wily foe.

Nichols gazed up in the darkness,
Arms outstretched and head thrown back
Shrieked up to the unseen dwellers
Of the heavens' traceless, track.

Come down here my honored brethren!
You who died in freedom's name,
You who perished for your country,
You of everlasting fame.

Descend and give your sure approval
Of this message I now give
To the mortal man before you,
He whose life was spared to live.

Then before my startled vision
Appeared a host of wraithlike ones,
Each had written American history,
Each had faced the enemy guns.

First, there came an apparition
Of the "General" Washington,
Then an endless line of spirits,
Each a lost American son.

Recognized a score of others
As they came fast flitting by,
All looked straight into my being,
All looked deep into my eye.

One thing now I know for certain
Each one backed the Sergeant's word,
And I know they cried in anguish
That his message must be heard.

Came the ghost of Andrew Jackson,
Tall and stately, passing by,
Heard the voice of Colonel Travis
Venting forth his battle cry.

John Paul Jones appeared before me
As did General Nathaniel Greene,
Attired as those gone on before them
Lighted by their halo sheen.

Next, I saw the face of Custer,
Knew him by his yellow hair,
Passed the great incomparable Patton
Possessing still his showman flair.

John J. Pershing paused a moment
Linked the arm of Les McNair,
General McArthur followed closely
Just behind that dauntless pair.

Saw the form of Bolivar Buckner
Adding to the marchers flow,
Colonel Bowie and Davy Crockett
Defenders of the Alamo.

Admirals Dewey, Nimitz and Halsey
Entered in my vision clear.
Sergeant York with Colin Kelley
Flanked the horseman, Paul Revere.

Countless names and countless faces
Now had answered Nichols call,
Every one enshrined in history,
Brave, strong fighters, heroes all.

Then I fell back, shamed and shaken
Turned to Nick and cried his name,
Promised to absorb his message,
Promised to deliver same.

Receive it then my mortal cohort
Spoke Nick now, his voice clear,
Tell the loyal of the nation
That they need not live in fear.

Two great problems of the future
Men must face upon this Earth,
First containment of the Marxists,
And the Chinese missile birth.

Declare to all that world enslavement
Is the communistic prize,
With the leaders of this movement
There can be no compromise.

Say unto all civilized people
Unite! They must in year's to come
Before the Oriental war lords
Perfect delivery of their bomb.

Think, my friend, of what must happen
From a nuclear holocaust,
Untold millions sure to perish,
Civilization will be lost.

Speak to those brave men in Asia
Bearing freedom's torch on high,
We commend their noble effort
From our home up in the sky.

Say unto the nations chieftain
He who shoulders such a weight,
We the Patriots of the ages
Believe He carries mankinds fate.

Assure Him that He is supported
By America's honored dead,
History shall record the rightness
Of the fight which He has led.

To the malcontented marchers,
Those who cry and lie and moan,
They shall surely reap the whirlwind
Of the evil they have sown.

Inform the shameless draft card burners
Hell will write their pedigree,
They now share the full contempt
Of those who died for liberty.

Tell the crummy, craven cowards,
Their subversion will emerge,
And the anger of all free men
Will compose their funeral dirge.

Americans everywhere must safeguard
Freedom's precious holy right,
United firmly as one people,
Carry on the free world fight.

Now my thoughts were whirling madly,
Smashing, crashing through my head,
Felt the weight of that great mission
Entrusted to me by the dead.

Thought how each had died in battle,
Some in horror, some in pain,
Knew from all my years of freedom,
Not a one had died in vain.

Mutely nodded my agreement,
Stood there chastized, shook, forlorn,
Saddened by the specters anguish,
Humbled by their whiplash scorn.

Satisfied, Nick turned to go now,
Commanded that the troops "Fall in,"
Forward, March! On in to glory,
Leave this wretched place of men.

Glanced at my bowed head and nodded,
Gesture seemed to clearly say,
Deliver that which you are charged with,
And we'll meet another day.

PUBLIC POLICY AND HIGHER EDUCATION IN MISSOURI

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. HUNGATE. Mr. Speaker, I call your attention to a statement by Dr. John Anthony Brown, president, Lindenwood College in St. Charles, Mo., at the fall meeting of the independent colleges and universities of Missouri. Dr. Brown points out the contributions private education has made to Missouri and the apparent lack of recognition for these contributions.

PUBLIC POLICY AND HIGHER EDUCATION IN MISSOURI

The 34 private colleges and universities that comprise the Independent Colleges and Universities of Missouri offer a great diversity of educational opportunity to the people of our state.

This private sector of higher education in Missouri represents an educational, economic and social asset that the state can neither afford to lose nor afford to replace. These institutions attract students from every state in the union, and from several dozen foreign countries. They enroll 28.3% of the students in higher education in Missouri; they award over 34% of the bachelor's degrees, more than 38% of all graduate degrees, and almost 47% of the Ph.D's. These independent colleges and universities educate more than 43% of the dentists, almost 46% of the lawyers, more than 65% of the pharmacists, and almost 69% of the physicians.

Our private colleges and universities employ some 16,000 people and have an annual payroll of close to $100,000,000. In 1968–69 these colleges and universities had operating budgets which totaled in excess of $160,000,000, and spent another $25,000,000 to $30,000,000 on capital expenditures. They represent assets of close to one-half a billion dollars (replacement cost) in buildings, grounds, and equipment, and well over $200,000,000 in market value endowment.

This is an impressive recitation. The trouble with it as a recitation is that no one seems to have heard it before. Neither our students nor our faculties are aware of our present role; neither our employees nor our alumni are fully conscious of the impact we have and have had on this state and nation; neither the foundations nor the corporations are alert to the great resources we have put together; neither the people of the state nor their political leaders have looked carefully at the independent sector of higher education in Missouri.

DR. LUTHER HOLCOMB

HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. MAHON. Mr. Speaker, one of the able public servants of our time is Dr. Luther Holcomb, of Dallas, Tex., Vice Chairman of the Equal Employment Opportunity Commission. The attached editorial taking note of the outstanding services of Dr. Holcomb appeared in the Wichita Eagle and the Beacon, Wichita, Kans., and I submit it for inclusion in the RECORD:

IT'S REASSURING

Change is a way of life in Washington. But a graduate of the University of Oklahoma has compiled a record that has received little publicity while serving as vice chairman of the Equal Employment Opportunity Commission under four different EEOC chair men. He is Dr. Luther Holcomb, a Dallas Democrat, who was reappointed by President Nixon.

Common sense and reasonableness are the two traits that this unobtrusive former minister brought to the work of the commission. His philosophy is that "where prejudice and discrimination exist, we must tear it out from its very roots." By tact and diplomacy he has successfully encouraged the maintenance of lines of communication with minority groups.

Dr. Holcomb's continued service on the commission demonstrates that capable service can be rewarded in political-conscious Washington. This is especially reassuring when it involves an agency with sensitive problems of human relations.

STUDENT INVOLVEMENT IN ENVIRONMENTAL PROBLEMS

HON. WILLIAM B. SPONG, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, December 12, 1969

Mr. SPONG. Mr. President, students from five States in the mid-Atlantic region and the District of Columbia will meet in Richmond on Tuesday, December 30 to focus public attention and awareness upon environmental problems.

The conference will be held under the auspices of the Student Council on Pollution in the Environment—SCOPE—and the Federal Water Pollution Control Administration. The cochairmen of mid-Atlantic SCOPE are Miss Patti Collins of Westhampton College, Richmond, and Randall Simons of the University of Virginia at Charlottesville.

Generating constructive interest in the need to move forward with pollution prevention and control is a highly commendable objective, and I hope SCOPE has a successful and well-attended meeting in Richmond.

Mr. President, the background of SCOPE and its objectives is set forth in an article published on December 9, 1969, in the Richmond News Leader. I ask unanimous consent that it be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Richmond Newsleader, Dec. 9, 1969]

YOUTHS VERSUS POLLUTION—SCOPE UNIT FORMED

(By Hugh Robertson)

If college students can rally around such causes as "Vote 18" and "End the War," why not water pollution control?

Thus was created today, Mid-Altantic SCOPE—Student Council on Pollution in the Environment—with a pledge to "try and educate the public" on problems of pollution.

Its co-chairman, Patti Collins, a 20-year-old coed from Westhampton College, and Randall Simmons, 21, a University of Virginia graduate student, also held a press conference at the Sheraton Motor Inn.

Both voiced their concern about the polluted environment, which their elders are passing on to them, and announced a get-together to see how many college students are interested in the subject.

The get-together, billed as "The Great Grey Ice Gathering," is scheduled Dec. 30 at the Arena, from 1 p.m. until, according to a press release, "the music and words no longer stir the gathering."

Leaders hope the session will draw college students from throughout the Mid-Atlantic region—Virginia, North and South Carolina, District of Columbia, Maryland and Pennsylvania.

If all goes well, Mid-Atlantic SCOPE will become a youth advisory council to the Middle-Atlantic Region of the Federal Water Pollution Control Administration.

Mid-Atlantic SCOPE and other regional units throughout the United States also will be expected to advise U.S. Secretary of the Interior Walter J. Hickel.

Presumably, it was Hickel's idea to involve college students in water pollution—as well as air and land pollution—control.

College councils began forming this month, with the assistance, technical and financial, of the federal water control agency, a component of the Interior Department.

To match Richmond's "Great Grey Ice," a reference to the grayish color of frozen polluted water, there will be Dec. 29 "happenings" in Kansas City and Portland, Ore., and Dec. 30 "happenings" in Boston, Cincinnati, Chicago, Atlanta, Dallas and San Francisco, the press release said.

In Richmond, the program calls for "hard rock music, movies, speeches, young people and Federal Water Pollution Control Administration Officials."

For this initial organization, the federal agency's Middle-Atlantic Region headquarters in Charlottesville will be paying the bills—the Sheraton press conference, student travel expenses, renting the area—Eugene Jensen, regional director, explained.

But the students are expected to chart an independent, advisory course, Jensen said.

Miss Collins said in the press release the Dec. 30 gathering would "provide students with the kind of information they need to react intelligently to the apathy of government officials and business and industrial leaders to the awesome environmental crises now blooming in the United States."

Earlier, Miss Collins was instrumental in gathering 672 student signatures on a petition protesting Richmond's original plan to discharge raw sewage into the James River this winter.

Other than Miss Collins and Simmons, the council, which will be expanded later, includes:

Dorland Humphries of Richmond Bland College; Linwood Creekmore, Lee Bates and Leo Fields of Virginia State College; Marshall Davenson and Jay Managan of Virginia Commonwealth University, and Carl Jerome, William C. Brown and Haywood Blakemore of Randolph-Macon College.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorial for today is from the Charleston Mail, in the State of West Virginia. The editorial follows:

[From the Charleston (W. Va.) Mail, July 19, 1969]

SCANT ECONOMY IN DESTRUCTION

For the average American motorist, the giant vans and trailers that roar along the highways are quite big enough. Even when they are carefully driven, which is most of the time, they are overawing and forbidding.

For the trucking industry, these behemoths of transport are too small to be economical, and the industry wants permission to build them wider, heavier and longer. A bill to that effect is pending in Congress, and it sets up a nice conflict of interest.

On one side is the American Trucking Association, speaking for the industry, of course. And on the other is the American Automobile Association, broadly representative of the motorist.

It should be an easy one to settle, and the Iowa director of highways sets forth the criterion. Iowa has about 110,000 miles of highway in its system. Outside of its Interstate mileage, little of its was built to carry the heavier loads. Much of West Virginia's highway system is in the same shape.

Considerations of safety aside, this should do it. What might be economical for the trucking industry would not be economical in the maintenance of a highway system never built for the burden.

CABINET COMMITTEE ON OPPORTUNITIES FOR SPANISH-SPEAKING PEOPLE

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. SCHEUER. Mr. Speaker, as a Congressman representing a large number of Spanish-speaking Americans of Puerto Rican descent, I rise on behalf of House Report 91–699 of the Government Operations Committee which urges the adoption of a bill, known as S. 740 to establish a Cabinet Committee on Opportunities for Spanish-Speaking People.

Mexican Americans, Puerto Ricans, and others need a stronger voice in the administrative branch of Government. They need ombudsman services and a broader representation in decisions. S. 740 would seek to increase representation of Spanish-speaking citizens in the governmental process. With greater representation in administration, dividends should increase for the Spanish speaking.

I must agree with Horicio Ulibarri and others when they write in "Administration of Bilingual Education":

At present there is a dearth of materials for bilingual, bicultural education programs. The materials that are in existence today tend to be translations from English originals . . . and while some of the translated materials are indeed very good . . . some do not fit into the sociocultural context of the Spanish language.

I was an author of the Bilingual Education Act and I hope that the Cabinet Committee on Opportunities for Spanish-Speaking People will serve to strengthen that legislation and bring greater emphasis to its unique function. I hope the proposed Cabinet Committee can push to provide materials which "fit into the sociocultural context of the Spanish language." Similarly, the new Committee can potentially help bring housing programs to barrios, employment counseling to Cuban refugees, and job stabilization to Chicanos. The Committee can emphasize throughout government that the Spanish-speaking citizen should share in Federal programs.

Let the voice of the Spanish-speaking peoples be heard.

Lt. GEN. SAMUEL C. PHILLIPS—A MAN TO MAKE AMERICA PROUD

HON. JOHN WOLD

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. WOLD. Mr. Speaker, the names, Neil Armstrong, Edwin Aldrin, and Michael Collins, will surely be emblazoned in bold for history students of a thousand generations. Only slightly less space will be given to Alan Bean, Eugene Cernan, and Charles Conrad.

It is justly so—especially in this day when heroes are mostly unsung. There are men behind the scenes who are deserving of the billing that is reserved for the stars.

Such a man is the 1969 Kappa Sigma Man of the Year.

He is a man who in his modest fashion deserves much of the credit for man's greatest adventure—the moon flight of Apollo 11.

We live in a time where undertakings and tasks are so vast that they are national in scope. Such was the Apollo program. Its scale was matched by its complexity.

America is blessed with men and women of stature, and such a man directed the Apollo lunar landing program.

His heritage fitted him for the task. Reared on the vast plains of Wyoming, he acquired the straightforward manner and methodical and painstaking approach to problem solving which was so important to the Apollo program.

An assessment of his capability was revealed during the investigation which followed the 1967 Apollo tragedy.

General Phillips appointment as Apollo director came only after he had proved himself elsewhere. In 1959 he was appointed director of the faltering Minuteman ICBM program. By 1963 it stood as one of our brightest defense efforts.

It gives me great pleasure to extend to a personal friend, Lt. Gen. Samuel C. Phillips, U.S. Air Force, my warmest congratulations on his being named 1969 Kappa Sigma Man of the Year. I am sure the other Members of this body join with me.

Fittingly, the award was presented in the city he calls his hometown—the capital of Wyoming, Cheyenne.

Mr. Speaker, a biographical sketch of General Phillips and a comprehensive account of the Kappa Sigma Man of the Year dinner in Cheyenne, December 7, follows:

MAN-OF-THE-YEAR PREDICTS: "SPACE EXPLORATION WILL SOLVE WORLD PROBLEMS"

(By Kirk Knox)

Space developments and exploration over the next few years will contribute "more than most of us are smart enough to anticipate today," Lt. Gen. Samuel C. Phillips told a Kappa Sigma fraternity dinner in his honor last night at Little America here.

Phillips, who was reared in Cheyenne and was graduated from the University of Wyoming in 1942, was honored at the banquet as Kappa Sigma fraternity's "Man of the year."

He currently is commander of Air Force's

Space and Missile System with headquarters in Los Angeles, but it was as director of the Apollo Moon landing program that he gained international renown.

Phillips predicted the U.S. space program would contribute to solution of earth's problems with environment, need for communication and transportation, make possible "a better job in human affairs and solve many of the problems that face people in general."

He said it will be necessary for people "to tackle more seriously" the matter of an expanding earth population which it is estimated will reach four billion by the year 2000.

"I am tremendously impressed with what we can do when we make up our mind to do something," said the general, "and back up the people . . . assigned to a job . . ."

Phillips alluded to himself several times as "a very fortunate guy," because of his family, being a citizen "of this great country," and having the opportunity "to lead the U.S. Apollo team to its national objective of landing a man on the moon and returning (him) to earth."

In his acknowledgment of the honor conferred by his fraternity, Phillips recalled he "probably wouldn't have gotten through the university had it not been for the (Kappa Sigma) student loan program."

His heritage, he acknowledged, "began with my father and mother and my years in Wyoming and my upbringing in the great West."

He felt especially fortunate, he said, "to have this tremendous group of friends and fraternity brothers. This fraternity, Kappa Sigma, has meant a lot to me."

Phillips said, "I stand in awe at what has happened in three decades. Not many years ago you couldn't gather a group like this because of the travel they would have to endure.

"I am in awe, also, at what has happened with our standard of living and in our science and technology."

He noted it was just 12 years ago last October that mankind put the first projectile into space orbit.

Phillips said, "As I think back, I also am looking ahead to the challenge and opportunities I think I see ahead.

"More than that, I see these challenges and opportunities as pretty damned exciting and interesting."

The general saw each generation on "a new threshold from which things proceed."

He added, "You hear a lot today about the youth of America which is not all flattering. From my contacts, I think they are great."

Phillips asserted, "I think with the threshold from which they are starting I am going to be much more awestruck in 30 years."

Thus far, he pointed out, the U.S. space program's work has brought about "some new industries and tremendous increases in technology and science."

In the face of space exploration, the general said, "the world is smaller."

He added spacemen see the earth as a "bright oasis in space," that "this earth is a pretty good place and we could do a lot better in learning now to take care of it and conduct affairs in a way that will contribute to its longevity."

"We are starting to see some ways through space exploration to help tackle some of our problems such as an expanding population," Phillips asserted.

He said we are beginning to understand more about the way in which air, atmosphere, sun and other things affect earth and "to see some of the ways in which we can tackle the problems."

The general forecast the space program will lead "to a large space station orbiting the earth; more economical ways of getting into and out of space; and space vehicles which will begin to look much more like airplanes and which will be used hundreds of times."

He added, "We are going to understand much more than we do today about how to use our resources and to manage earth."

Noting that he is called upon often to prove benefits from the space program, Phillips said "It is always a hard thing to prove."

He said he was "certainly humble" that his name was placed in honor by his fraternity among those of Lowell Thomas, Edward R. Murrow and Hoagy Carmichael.

"I pledge to you I will do my best to live up to your evaluation of how I have handled the opportunities I have had."

The general's mother, Mrs. Mabel Phillips of Cheyenne, watched as her noted son accepted his honor.

W. F. Rockwell, Jr., himself man of the year in 1958 and a former worthy grand master noted that Kappa Sigma has "many successful graduates," and our alumni have done well in a diversity of fields as the list of notables indicates."

Fraternities, he said, recently have become targets for "some snipping by non-fraternity people who profess that we're stereotypes—straight off of 'central casting'—who think alike and act alike and really have very little individuality."

This line of thinking, he said, "might make good conversation at a campus sit-in but it has no roots in fact."

Kappa Sigma he asserted, always has fostered "the pursuit by individuals of their own particular interests. In fact, we're thrived on the interchange of varying ideas, opinions and interests."

He found evidence of that in a list of successful members he had cited to the dinner audience.

"If there's a sameness that we try to encourage in Kappa Sigma," Rockell asserted, "It's leadership—leadership in whatever field a man chooses."

T. V. (Tom) Jones, of Cheyenne, Kappa Sigma alumni president for Wyoming, served as toastmaster.

Fraternity members and officials from other states, including Colorado and Nebraska, attended.

BIOGRAPHICAL SKETCH

Lieutenant General Samuel C. Phillips.

Currently commander of the Space and Missile Systems Organization, and until September, 1969, director of the U.S. Apollo Lunar Landing Program under which Americans went to the moon earlier this year, Lt. Gen. Samuel C. Phillips, U.S.A.F., is the 1969 Kappa Sigma Man of the Year. This man of distinction has spent more than half of his military career in the research and development field.

A native of Arizona, Phillips considers Cheyenne, Wyoming, his permanent home. He is a 1942 electrical engineering graduate of the University of Wyoming. His alma mater honored him in 1963 with an honorary doctor of laws degree.

After receiving his bachelor of science from UW, Phillips received a presidential appointment to second lieutenant of infantry in the U.S. Army. Upon graduation, he was transferred to the Air Corps and earned his pilot's wings in 1943. His World War II duties included two combat tours in England with the 364th Fighter Group of the 8th Air Force. During the war, Phillips earned the Distinguished Flying Cross and Oak Leak Cluster, Air Medal with seven Oak Leaf Clusters and the Croix de Guerre.

After the war, General Phillips—then a major—was assigned to theater headquarters in Frankfurt, Germany, until 1947. He received the Army Commendation Ribbon for his meritorious service during this assignment.

General Phillips was next assigned to be director of operations, 1st AACS wing, Langley Air Force Base, Virginia. This assignment was shortened by Phillips' selection for graduate study at the University of Michigan where he studied from 1948 to 1950 and received his master of science degree in electrical engineering, specializing in electronics.

General Phillips then joined the engineering division of the Air Materiel Command at Wright-Patterson AFB, Ohio. He remained in this research and development post for six years, with the exception of six months in 1951—three months in Eniwetok as an electronics officer on Operation Greenhouse and three months at the Air Command and Staff School, Maxwell AFB, Alabama.

While at Wright-Patterson AFB, General Phillips served as director of operations in the armament laboratory, as B–52 project officer and as chief of the air defense missiles division, working on such missiles as Falcon and Bomarc.

In June, 1956, General Phillips returned to England as chief of logistics for Strategic Air Command's 7th air division. On this assignment he participated in writing the international agreement with Great Britain on the use of the Thor IR BM. Later, as 7th air division director of materiel, his duties included assisting in the completion of Thor IR BM installations for turn-over to the Royal Air Force. He was awarded the Legion of Merit for this service.

General Phillips returned to the U.S. in 1959 as director of the Minuteman Program in the ballistic missiles division of the air research and development command in Los Angeles. During the two-year period Phillips was director, U.S. Air Force reorganizations resulted in the Minuteman Program Office being combined with the ballistic systems division of the Air Force Systems Command. While at his Los Angeles post, Phillips was nominated in April, 1961, for promotion to brigadier general.

In January, 1964, Gen. Phillips moved to Washington to become deputy director of the Apollo Program. In February of the same year he was nominated for promotion to major general. In October, 1964, he was appointed director of the Apollo Program and in May, 1968, he was nominated for promotion to lieutenant general.

During 1969, General Phillips has received several awards and honors including the National Aeronautics & Space Administration's Distinguished Service Medal, the Astronautics Engineer Award, Air Force Association's Citation of Honor, Arnold Air Society's Eugene M. Zuckert Award and the Hap Arnold Award from AFA's H.H. Arnold Chapter.

General Phillips and his wife, Betty, have three daughters—Kathleen Phillips, 14; Mrs. Janie Phillips Culpepper whose husband is a captain in the U.S. Air Force; and Dana, who lives in Marina del Rey, Calif. The Phillips have one grandchild—one-year-old John Patrick.

PUBLIC HOUSING TO RECEIVE INCREASED FEDERAL ASSISTANCE

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BOLAND. Mr. Speaker, conferees on the 1969 Housing Act have agreed to maintain intact a Senate amendment that offers welcome relief to people living in public housing projects. Designed to help clear away the burdensome financial difficulties the poor encounter when living in public housing, the amendment would limit to 25 percent of a person's income the amount he pays for rent. Any slack in a public project's income would be taken up by increased Federal assistance. Such legislation is long overdue.

Indeed, it meets a need so pressing and so apparent that virtually no one acquainted with public housing could object to it.

Minimum rents for public housing apartments are inching upward at an alarming pace—up to as much as $70 or $80 in many cities. Granted, such rents appear almost preposterously low to the average middle-class citizen. Yet, to the poor for whom such public projects were built, such rents are startlingly high. Living on meager welfare payments or social security checks, the poor and elderly simply cannot afford the kind of rents now demanded in public housing. A significant percentage of public housing tenants, as a result, must approach the top of the public housing income scale. And many poor people—the people who desperately need adequate housing at modest rents—are simply left out.

The Senate amendment I have outlined here will help put a stop to this trend.

Senator EDWARD W. BROOKE is to be commended for his work in drafting this amendment and shepherding it through the Senate.

I am sure it will be one of the most heartening provisions of this year's Housing Act.

YAF FIGHTS FOR JUST PEACE, OPPOSES SURRENDER

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. FISHER. Mr. Speaker, the Young Americans for Freedom is presently engaged in a lofty objective. On December 12 and 13 it is conducting a massive counteroffensive to continue moratoriums on 600 major college campuses.

These young people, 50,000 strong, deserve the plaudits of all Americans who seek a just peace in Vietnam. They very properly oppose unilateral, unconditional withdrawal of our troops—which means surrender. They have the maturity and commonsense to know such a course would be a great tragedy. Their "Tell it to Hanoi" should reverberate throughout the Nation.

The YAF is fast becoming recognized as a vital voice in behalf of sound principles of good government. Believers in law and order, they have led the fight against the lunatic fringe and the hooligans who have degraded and disgraced the dignity of education on college campuses. They have sounded the alarm against unnecessary and unwarranted trade with the Communist enemy. Their record is one of patriotic devotion to the highest ideals of American democracy.

Mr. Speaker, I am delighted to express my appreciation for these activities. The YAF deserves the support and admiration of every American who shares these views and these sound principles. I salute the YAF for its great demonstration of Americanism and the preservation of our cherished heritage.

AN UNUSUAL LETTER

HON. PAUL J. FANNIN

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Friday, December 12, 1969

Mr. FANNIN. Mr. President, many Senators have frequently noted that they hear often from those who are dissatisfied with progress in America, but seldom from people who like what they observe.

It has been my happy privilege to share in a letter of commendation from two Arizonans addressed to their elected Senators and Representatives. These folks, Mr. and Mrs. Lester Arie, of Phoenix, have taken the time to express appreciation for being Americans, and I appreciate their thoughtfulness and good wishes in sharing their thoughts with us.

Mr. President, I ask unanimous consent that a letter from Mr. and Mrs. Lester Arie, dated November 27, 1969, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. PAUL J. FANNIN,
Senator, Arizona.
Hon. BARRY GOLDWATER,
Senator, Arizona.
Hon. JOHN J. RHODES,
Representative, Arizona.
Hon. SAM STEIGER,
Representative, Arizona.

DEAR SENATORS AND CONGRESSMEN: We are doing today what too few of us do: taking time to express an opinion; also making sure that it reaches our elected representatives in Washington. We of the "Silent Majority" have too long been silent, taking things for granted, neglecting our civic duties, failing to get involved in the democratic process. We now realize that the time is here to break that silence, speak out, stand up and be counted. This being Thanksgiving we believe it is appropriate to first count our blessings. So we shall enumerate some of the things for which we are thankful.

1. We give thanks to God that by His Grace and the circumstance of birth we are Americans.

2. We give thanks that we are privileged to live under a government that is the best yet devised by the inspired, composite mind of man. On this point we are adamant—after visiting and breaking bread with the peoples of 67 nations during the past half dozen years. Many of these people would realize their fondest dream if they and their children could live in the United States.

3. We give thanks that though Americans first and Arizonans second, we call Arizona "Home". We are thankful that we live among people imbued with traditional concepts and values of Americanism.

4. We give thanks for abundant good health and good friends; sufficient worldly goods to live graciously (but not extravagantly) and the knowledge that the latter was earned by the sweat of our brow under a "system" that grants the same privilege and opportunity to others.

5. We give thanks for the high moral character, the ethical and spiritual stature, the clear, unmuddled, unbefuddled thinking of the men we have elected to represent us on a national and state level; men of integrity who dare speak their minds. For these and many other blessings we give both humble and proud thanks.

Now, to the true purpose of this letter. We fervently believe that President Nixon's conduct of the Vietnam war which he inherited is the right course to pursue. It is not only the *right* but the *only* course to achieve a just and honorable peace. We know that you support the President. We want you to know that we support *you* and the *President*. And also, the *Vice President*.

We believe that Vice President Agnew rendered an inestimable and historic service to his fellow Americans in voicing what most of us of the "Silent Majority" have been thinking and saying privately. We are tired, nauseated, even sick, seeing and hearing self-appointed or corporation-boss-appointed omnipotents play God. An internationally known commentator who reports that the November 15 marchers constituted less than one half of one per cent of our population and in the next breath comments (quote) "Of course there is no way of knowing if this constitutes a majority" (unquote) is the kind of slanted reporting and comment we reference. Certainly this commentator needs to examine his arithmetic. And while he is examining his arithmetic, his background and that of his bosses should be investigated.

When we elect a President by the will of the majority, then a very few, but a very powerful and dangerous few, by virtue of controlling the news media, with particular emphasis on television, subvert or try to subvert the will of the majority, something should be done. If this is not done from the inside, most assuredly it will be done from the outside. John Q. American will take just about so much and he has just about had it. The "silent majority" is beginning to reach the boiling-over point. Uncle Sam (that composite of John Q. citizen), the benign, sleeping giant, is wakening. While he slept the lilliputians (intentionally spelled with a small "L") were getting in their subtle licks and dirty work. Aided and abetted by mini-mini-lilliput politicos, at least some of whom thought they saw political advantage in aligning with the lilliputs, they staged their marches which gave the enemy encouragement. Does anyone doubt that the war would be settled if the lilliputs had first been settled? Now the mini-mini-lilliput politicos are scampering for cover; trying to disassociate themselves from a bad dream. They have realized that they made a bad guess. They have seen the handwriting on the wall. And it is inevitable that the rest of the motley crew will wither away in front of a united America. When Sam starts swinging the lilliputs disappear. Only when he sleeps do they try to bind and enslave him.

It is the eleventh or twenty-third hour and the fifty-ninth minute. It is high time for those who are not *against* America to be *for* her—and evidence it by cutting their hair, chopping their whiskers, taking a bath, sweeping the cobwebs out of their attic, rolling up their sleeves and going to work. I see more work that needs to be done than at any time in history. And there are too few ready, willing and competent to pitch in and do it.

We are very, very tired of seeing 15 year olds interviewed on television and asked about their views on the Vietnam war. Americans as a nation have the least sense of history, the least perspective on the past of any nation on earth—any modern nation. This comparative lack of perspective on history came as a shock in my exchange of ideas with people in West Germany, Poland, Czechoslovakia, Hungary, Rumania, Yugoslavia, Finland, Turkey, Greece, Japan and the Soviet Union. Many of these people told me things about my own country that I did not know. So, what deep, sophisticated, mature knowledge is such a youngster supposed to dispense? All of us deplore war. All of us would like to live in a world that is all sweetness and light; milk and honey; all play and no work; all good and no bad. But

I have sad news: there just ain't no such animal. There never was and there never will be such a world. And the lilliputs are not bettering the world they and we live in by vulgarity of every sort, degrading themselves and the human race and attempting to destroy the best of everything we have.

It is so easy for lilliputs to berate and tear down, with nothing in mind to replace what is destroyed. It is difficult to build for the present and future generations and requires sacrifice now. If you want to see a really confused lilliput just ask him (or her) "What is your alternative? What do you suggest? What do you have to offer to replace what you would destroy? What is the other side of the coin?" While the lilliput imitates a guppie and gasps for words which don't seem to be available, is a good time to supply the answer yourself. "The worst, the most horrible, the most complete and total, the most controlled, the most brutal and abject slavery the world has ever seen—enslavement not only of body, but of mind and spirit".

Why, under the guise of Freedom of the Press, Freedom of Speech, Freedom of Assembly and "Academic" Freedom are a small handful of misguided (or guided) sick-of-the-world, prophets-of-doom permitted to destroy all freedom? By virtue of what do they possess esoteric and God-like knowledge? And how did they acquire a license to play God? To project their cob-web thinking just one notch further means freedom (license) to riot, freedom to burn, destroy, steal, rape, plunder and kill. The ultimate freedom the lilliputs are bellowing and clamoring for is "Freedom of the Law of the Jungle"—anarchy and chaos. When a university hires an avowed communist to teach and invites a rapist to lecture, something should be done about it. And, it better be soon. The "hirers" should be given a lesson in ditch-digging freedom, under competent supervision.

Why has not more coverage been given to the established-beyond-a-doubt, thousands of heads severed by the VC from peaceable South Vietnamese, impaled on stakes and exhibited in isolated South Vietnamese villages? I asked an Air Force Colonel that question in Saigon on Easter Sunday, 1966. This was the morning after a good South Vietnamese, by day, was shot during the night while attempting to blow up military aircraft—with enough explosives on his person to do a bang-up job. He had been employed at the airport for some time. The Colonel's mouth tightened to a straight line and he shook his head negatively. "How the devil do you know who is and who isn't a VC?" I asked. He shook his head again and replied "Buddy, from here in, whoever sticks his head up out there is a VC. It is that kind of war".

Herein may lie the cause of the alleged massacre by American soldiers of South Vietnamese civilians—by a company that had lost half its men to snipers. Remember, those boys' lives were at stake. But why does the news media latch on to hearsay by someone that was not there, take the word of communists and pictures provided from communist sources as the Gospel truth, try, condemn and hang the Americans without a trial and before the world? Again, why not publicize the fact that the VC and Hanoi's invaders killed thousands and thousands of South Vietnamese in cold blood and inflicted worse than death on thousands more. It is a sad commentary that but for the fact that this horrible, messy war is undeclared, many of our omniscients, including university professors, columnists, commentators and corporate bosses, misguided politicians and others would be behind bars charged with such crimes as sedition, subversion, giving aid and comfort to the enemy, yes, even treason. The marchers would be marching to the sound of other drums and Moscow, Hanoi and Peking would be looking elsewhere for their belly-laughs.

We, the silent majority, do not want censored news. We merely want ALL the news; unbiased, fair reporting. All the news—not just one side. The worst possible censorship is to just ignore; to be given the silent treatment of ostracism. Give us the news and spare the comment and interpretation—comment and interpretation that insults the intelligence of a ten year old child! Comment that exposes the commentator's inexperience, lack of maturity, knowledge of the world and more particularly knowledge of America as well as lack of judgment and good taste; comment that by the manner and inflections and nuances of speech in which it is delivered, belittles America and degrades her institutions and traditions. We deplore and resent this sneaky, sneering pomposity being carried over and projected into network shows—propagandizing entertainment.

Give us the news and we'll take ours straight. No chasers, please. And no embellished Hors d'oeuvres. If we are so stupid we can't add 2 and 2, we'll ask somebody. No network boss nor all combined has a license to try to brainwash John Q.

In conclusion, no person or entity, corporate or otherwise, is bigger that the United States government and should not be permitted to operate on the assumption that he or it is. In the end, *if* news *is* controlled, you can bet that it will not be by somebody or a handful of somebodies, elected to nothing by nobody, but rather by Uncle Sam, the embodiment of the majority American Will; that composite of John Q. Citizen, U.S.A. That is the American Spirit and the American Way.

Just two voices from the great silent majority of your constituency.

Respectfully yours,

LESTER R. ARIE,
SALLY E. ARIE.

Copies to: Hon. Richard M. Nixon, President of the United States; Hon. Spiro T. Agnew, Vice President of the United States; and Hon. Richard G. Kleindienst, Assistant Attorney General of the United States.

REMEMBER PEARL HARBOR

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. DERWINSKI. Mr. Speaker, December 7, Pearl Harbor Day passed without much attention apparently lost in the passage of time and the present-day controversies. However, I was impressed with the succinct editorial commentary in the Calumet Index on Sunday, December 7, which I insert into the RECORD at this point:

YES, WE REMEMBER

With our many agonies in Vietnam, problems of local and national import, it is only a different agony to remember Pearl Harbor—Dec. 7, 1941—a day that was to "live in infamy." But 28 years have passed and the surge of troubled tides has all but washed away the heavy footprints on the sands of another time—of a war that Americans fought with pride in many parts of the world. May we pause today to recognize the pride and the courage in a cause that took the lives of thousands of our youth, and left thousands more all but lifeless due to the wounds they suffered. We have not and could not forget Pearl Harbor.

THE VICTUAL REVOLUTION

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. WRIGHT. Mr. Speaker, this great Nation of ours is experiencing a new revolution. Not demonstrations, mobilizations or student unrest on campus, but a quietly forceful, positive, and constructive type of revolution. It is gradually assuming national proportions. It is innovative and interesting. It is changing our habits and our landscape.

In the December 1969 issue of Nation's Business, there appears an article entitled "Here Come the Girls." It deals with the growth of womanpower in industry and the increasing number of women entering the labor force. It declares that a major factor enabling more women to seek business employment is the development of homemaking devices, particularly those associated with the preparation of family meals, which give women greater freedom and more time out of the kitchen.

The author of the article, Mr. Walter Wingo, an associate editor of Nation's Business and a manpower specialist, rightfully describes this development as a "victual revolution." He cites as an example the new restaurant complex of Bonanza International which recently opened in Fort Worth under the name "1849 Village."

At this point in my remarks, I wish to insert a few brief paragraphs from Mr. Wingo's article where reference is made to the victual revolution and 1849 Village. These paragraphs read as follows:

THE VICTUAL REVOLUTION

Improvements and innovations in homemaking devices are freeing the housewife from most of her time-consuming chores. For example, a revolution is under way in American family meals, pulling women out of the kitchen.

Mercedes Bates, who directs General Mills' Betty Crocker Kitchens and is president-elect of the American Home Economics Association, says families are relying increasingly on having food catered to their homes and on eating out at fast-service franchised restaurants.

Taking advantage of this trend is Bonanza International, Inc., which recently started an "1849 Village" in Fort Worth, Texas. Here seven different franchised restaurants are bunched around a modern theater and a bandstand. The entire family can drive to the area and each member can walk to his own favorite type of eatery. Bonanza plans more such projects in other parts of the country, because "housewives eat it up."

The restaurant complex described in these few lines is much more than meets the eye. It is a new concept in restaurant planning, a pilot project which eventually may revolutionize our dining-out habits. It consists of seven different restaurants, a movie theater, a beautiful public area with a bandstand, a landscaped lake, and other features. In short, it is a place for the whole family, with an appeal to the eye, the taste and the pocketbook. This is what makes it dif-

ferent. And this is where the victual revolution is beginning.

Fort Worth, Tex., is paving the way for this quiet revolution. It constitutes a great innovation in American life, a spirit of creative enterprise, and continued economic growth and well-being. As such, it is a source of great pride to all of us. I want to congratulate those associated with 1849 Village and extend my very best wishes for its success.

PASSENGER TRAIN SERVICE NEEDS CONGRESSIONAL SUPPORT

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. McCLORY. Mr. Speaker, the passage of the Department of Transportation appropriation bill, H.R. 14794, gives assurance that many of the transportation needs of the future will be met by appropriate Federal, State, and local action—including a contribution of substantial Federal funds. However, there has not been developed an adequate program of legislation for improved passenger rail transportation. This omission appears to result from the belief that persons seeking ground transportation will turn to private automobiles or buses. There is the further belief that those individuals who desire greater speed will travel by air.

However, our increasingly crowded highways, as well as the overcrowded airways around many urban centers, suggest the need to carry more people by means of high-speed rail transportation.

In a recent article by Louis Dombrowski in the Chicago Tribune issue of Wednesday, November 5, 1969, a most convincing argument is made for Federal support of expanding high-speed railroad passenger service. I am pleased to include this article at the conclusion of my remarks and to direct my colleagues in the House and the Senate to the need for giving serious attention to this subject at the earliest possible time. Mr. Dombrowski's article follows:

CONGRESS RATED KEY TO SURVIVAL OF COUNTRY'S PASSENGER TRAINS

(By Louis Dombrowski)

WASHINGTON, November 4.—The ultimate future of railroad passenger service will depend almost entirely on how determined Congress is to save it from extinction. Within the next few months, the lawmakers will have probably their last opportunity to do something about the rapidly disappearing passenger train.

The Senate already has held hearings on the future of rail passenger service. The House commerce committee meets Thursday on the same question.

URGES SENSIBLE ADVICE

Donald E. Deuster, a former aid to Rep. Robert McClory (R., Ill.) and now with the office of congressional relations of the transportation department, feels this way:

"I am thoroughly convinced that the Congress would like to help the rail industry provided that sensible suggestions are set forth. It is up to all of us to provide such suggestions for congressional consideration."

The department of transportation, with the full support of the Interstate Commerce Commission, is in the final stages of a study that will recommend the adoption by Congress of some form of limited financial assistance to subsidize unprofitable passenger trains whose continued operation is deemed in the public interest.

QUESTION TO BE ANSWERED

Only the question of how much money will be needed each year and the amount that will be available due to the extreme demands of the federal budget and the Nixon administration's anti-inflation policies remains to be answered.

Appearing before the Senate commerce subcommittee on surface transportation, Stuart T. Saunders, chairman of Penn Central company, said that the economic justification for most railroad passenger service no longer exists in nonurban areas and over long distances.

"Under the dictates of the marketplace, such unprofitable passenger service should be discontinued," he testified. "If, however, the regulatory agencies will not permit this, it is only fair that the railroads be reimbursed for losses."

WARNS OF DISAPPEARANCE

Louis W. Menk, president of the Northern Pacific railway, went still further. Unless Congress authorizes reimbursement of passenger train deficits, he said, "The nation's passenger trains will disappear or the railroad industry will be pushed to the verge of financial disaster and [be] unable to provide essential freight service."

Neither Menk nor Saunders can be called prophets of doom and gloom. Menk, particularly, is a hard headed business executive who operates a profitable railroad.

He said that despite its profitability the N.P. cannot endure losses that, for last year alone, ranged from 16.8 million dollars on the ICC full deficit accounting basis to 10.2 million on a "solely related" basis from its passenger operations.

"It is essential that our limited resources be concentrated in upgrading and improving our freight service so that we can serve the growing west rather than employed in sustaining these huge passenger losses," Menk testified.

MEDIUM DISTANCE ONLY

There is no question that people will ride trains provided the equipment is clean and comfortable and the service is fast and frequent, but only for the medium distance intercity trains where downtown-to-downtown service is roughly comparable to air travel.

Rep. Jake Pickle [D., Tex.] put it this way, "The Penn Central Metroliner [operating between Washington and New York City] is a good example of what can be accomplished when the government joins hands with railroads in an effort to find another solution to our mass transportation problems."

Seconding the congressman's statement, Deuster said, "There is not the slightest doubt in my mind that notwithstanding the extreme demands on the federal budget at this time in history, the means is going to be found by the congress to support rail passenger service."

OPERATION NOEL

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. ADDABBO. Mr. Speaker, this week the secretaries of Capitol Hill distinguished themselves by sponsoring Operation Noel together with USO. This part of the Christmas in Vietnam activities included music, food and companionship for over 300 servicemen wounded in Vietnam.

Specail credit should be given to Mrs. Kathy Pierpan, secretary to the Honorable OTIS G. PIKE, our colleague from New York, and to Mrs. Fran Westner, secretary to the Honorable THOMAS S. KLEPPE, our colleague from North Dakota. Their tireless efforts and the help of hundreds of other secretaries who devoted time and donated money to this worthy cause made the evening a success.

The servicemen came from the six military hospitals in the Washington area and they were entertained by three bands and by Jim Evans, of radio station WMAL, who served as emcee. Guests of honor included the Secretary of Defense, the Honorable Melvin Laird, Mrs. Mamie Eisenhower, Army Chief of Staff Gen. William C. Westmoreland, and many Members of Congress. Those of us who were in attendance were struck by the enthusiasm of the volunteers who helped make the party a success and by the appreciation and genuine enjoyment which appeared on the faces of the servicemen.

The purpose of Operation Noel was expressed in its name—No One Ever Lonely—and it was a success. Our thanks to our secretaries who worked so hard to assure that success.

WHY NOT FAIR PRESS AND FREE TRIAL?

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. HUNGATE. Mr. Speaker, in the December 1969 edition of the Illinois Bar Journal Henry L. Pitts, president of the Illinois State Bar Association, has commented on problems of the news media and fair trials. I think his statement which follows will be of interest:

WHY NOT FAIR PRESS AND FREE TRIAL?

The advent of the Reardon Report has brought some light and much heat to the difficult and sensitive problem of balancing the rights protected by the First and Sixth Amendments of the Constitution. In the news media the problem is described as "Free Press—Fair Trial"; bar publications are wont to refer to it as "Fair Trial—Free Press." The Board of Governors has taken the position that there is no irreconcilable conflict between the two amendments.

While the Association has not endorsed the recommendations of the Reardon Report, the proposed new Code of Professional Responsibility which will soon be presented to the Board contains many of the recommendations of the Report relating to the conduct of lawyers in criminal cases. Our first responsibility is to improve and clarify the standards of our own profession, so as to preserve a fair and common sense interpretation of both Amendments.

Events in recent months suggest that the news media might well do the same within their own ranks. Any such suggestion is offered with considerable trepidation, because of the awesome retaliatory power of those who control the news media. But that power

should be matched by a responsibility to tell the truth and the whole truth in a reasonably objective and fair manner.

The overwhelming majority of news agencies and individual newsmen are as dedicated to fully and fairly reporting events as it is possible for any of us to be. There are notable, if not increasing, exceptions to the rule, however. The conduct of some radio and television interviewers during the Special Commission hearings last July is a case in point. The constant prodding and wheedling of a few publicity-seekers into making often totally unfounded accusations against judges without any apparent effort to check the truth or falsity of charges before they went out over the air waves was a disheartening spectacle.

The reporting of the Bobby Seale case is another instance which should cause some critical self-examination by organizations of the news media. It may sell a television program, but does it assist in the administration of justice to have a defendant on trial repeatedly use the TV and radio facilities as a soap box during court recesses and as an afternoon wrap-up at the conclusion of the day's proceedings? What about the fairness of this from the standpoint of the witnesses whose integrity, morality or intelligence is being impugned before millions of viewers? And the implications it has regarding their willingness to testify in the future?

The current and quite legitimate concern about the financial interests of judges and judicial candidates also offer an example of the widespread reporting of totally false charges. The bench and bar are at work on clarifying reasonable rules of conduct in this area. But we would do well to remember that "appearance of impropriety" and "conflict of interest" can be used as code terms for nihilism, leading to irreparable damage to the institutions—imperfect though they may be—by which we hope to maintain a free society. Witness the outrages perpetrated in the name of peace, with revolutionists who say they are part of the Peace Movement urging their followers, and others duped into joining them, to "Kill the Pigs."

If no restraints whatever are recognized or observed by some segments of the media, a fair trial will be virtually impossible in many cases. The breathless search for a "story", for the bizarre, and for violence or controversy, in the fiercely competitive world of reporters and commentators, may even make it impossible to hold a trial at all in some cases.

HENRY L. CITTI,
President.

STATE CHAMPIONS

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. DUNCAN. Mr. Speaker, it is quite a thrill for a football team to come from behind in the last 4 minutes of a game to win a State championship. That is just what Morristown, Tenn., East High School did as they won over Memphis South Side and took the Tennessee State Class AAA championship with a 15–12 score.

I am proud to represent these fine young athletes in the Congress. Head Coach Rex Dockery, Assistant Coach Buddy Fisher, other staff members, and above all, the winning team are deserving of all the congratulations they have been receiving.

SOCIAL SECURITY INCREASES

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. PHILBIN. Mr. Speaker, over a period of time, I have given a great deal of effort to the question of raising social security benefits.

Time and again I have urged the appropriate leaders of the House to give this matter attention, because it is of greatest urgency to many worthy, loyal Americans in advanced years, who, notwithstanding lifetimes of hard work, because of current inadequate social security benefits are, in all too many instances, living under substandard conditions.

In our great country, where at the present time, we are enjoying the greatest period of prosperity that any nation in the world has ever enjoyed, it is a sad and sorry contradiction, as well as a great injustice, that this older group should not be given adequate consideration.

I will not outline my own efforts in detail, but I have made many persistent attempts to try to get early hearings on the pending bills, of which I have one that would raise the current benefits by 15 percent, and would permit, according to my actuarial information, social security payments to be raised to levels, relatively and hopefully, commensurate with current, high prices and living costs, although that is difficult to envision.

The 15-percent increase provided in my bill was based, in part, on certain reports that I have received from informed government officials. At the same time, I recognize that 15 percent would not be fully adequate to make the adjustment that is required by the low income of many people, and current very high, inflated, unjust, price levels and living costs.

I also have in mind that the President is said to favor a 10-percent increase. It is my impression, however, that if the Congress were to enact a bill providing for a 15-percent increase, that the President would accept it, and sign the bill, in fact, I believe the President would definitely sign such a bill.

In any event, it is up to the House, and our great Ways and Means Committee in the first instance, to discharge its obligation to the millions of Americans who depend upon social security payments to meet their living costs, and pay their bills, and I again urge, as I have done so many times before, that the current proceedings be expedited, so that this crucial legislation may be passed by the Congress now. Moreover, I urge that this bill, or one like it, be given highest priority on the legislative program.

Mr. Speaker, this is one of our greatest human problems, and it affects the needs of worthy veterans of industry, agriculture, and the professions and practically every employment activity in this country. The great needs of these people in these trying days cannot be underestimated, nor can they be swept aside, nor can their consideration by the Congress be further delayed.

Now that the House Ways and Means Committee with its great expertise, based on long experience, is bringing a bill similar to the one I introduced, to the floor for final passage, I am confident that its able, distinguished chairman and members can now turn their attention to developing some legislation that will coordinate and consolidate our various social security and social purpose statutes so that programs that belong together can be kept together, and be appropriately coordinated with the needs across the board for social security, hospitalization, medicare, and other social needs of great import that must be given immediate consideration and prompt action.

I believe that this situation and the opportunity presented by the social security increase bill is urgent. The time is now. This matter should be considered and acted upon on an emergency basis, and I am sure the social security bill will pass the House by hardly a dissenting vote.

INCOME TAX REFORM

HON. E. ROSS ADAIR

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. ADAIR. Mr. Speaker, Mr. T. E. Haberkorn, Jr., editor and publisher of the St. Joe News, St. Joe, Ind., recently had an editorial on income tax reform. It is well worth reading, and I include it herewith:

INCOME TAX REFORM

Reading the headlines in the last few months, as discussion and debate go on in our Congress about tax reform, can give John Q. Public a bad case of the ups and downs. One day it sounds as if our elected representatives are really getting down to common sense ideas as they approach the problem of tax reform; the next day it sounds as if they have forgotten what the word "reform" means.

Most of us are not "expert" at this matter of taxes, except to know that there are too many and they are too high! We don't understand the concessions made to one group of taxpayers and the lack of concessions to others. This debate on the oil depletion allowance is Greek to me. I am certain that it is difficult to understand why an extra-heavy allowance or deduction or whatever it is can be given to the oil industry, with all the millions it is making. I have read explanations about the number of unproductive drillings made on the average before a strike is made. But I also see the ridiculous program of building more service stations than are needed, all over the country. These "four-corner" gas station intersections within blocks of one another are ridiculous.

I also see the periodic price wars or "seasonal" drops in gasoline prices. I also know the major oil companies are spending a terrific amount of money in promoting their rash of "contests."

The oil companies are not the only ones who have gotten what seems to be unfair consideration in the tax program. Another group is that containing the low income individuals. Except for the most extreme cases of poverty, every person who has an

income owes something to this country to keep it going, even if it is only a "drop in the bucket" as far as their tax contribution. There is talk at the present time of increasing the personal exemption from $600 per dependent to somewhere around $1,000. This sounds great at first glance; I would benefit from it. But it would also take a certain percentage of taxpayers off the tax rolls. This is NOT good.

Those who support increased exemptions, knowing that some families will no longer have to pay federal income taxes, are missing the target. We ought to be aiming for FAIR distribution of the tax burden, not the reduction in numbers of those who bear the burden of the cost of government.

What tax reform ought to do is set up a tax program which involves as many people as possible as simply as possible. Special exemptions and allowances ought to be removed and the tax rate adjusted downward accordingly. There ought to be real relief in tax reform for the middle income group. There ought to be a tax program which considers income from any source of investment, salary, wages, interest, etc., as taxable income, so that the rich cannot escape federal taxes by manipulation of money. Income is income and it ought to be treated as such.

The idea that corporations, businesses big and little, have some kind of special reserves into which they can dip to pay higher taxes than anyone else ought to be eliminated. Too many citizens think that high corporation taxes are being paid by the corporations; they are not. High corporation taxes are paid by John Q. Public who buys the products and pays for the services of the corporation and the corporation sets its prices according to what it needs to pay for materials, wages of employees, expansion—and taxes, people pay ALL taxes; there is no such thing as "corporation" taxes in the literal sense.

There ought to be an adjustment in the rate structure, too, to prevent the penalty which everyone faces in higher taxes when selling property. The graduated income tax as it now stands has no logic. Any fair tax program is one which does not penalize increased income, one which can be easily understood and complied with, one which does not favor the person who has the means to find and use loopholes, legal as they may be, to save tax dollars.

I hope the tax reform which everyone knows is needed can be accomplished. But the manner in which reform is being approached suggests that our Congressmen in both houses are hedging, and the average taxpayer is going to come out short again.

13,000 QUEENS CITIZENS SIGN AJC PEACE PETITION

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. ROSENTHAL. Mr. Speaker, each Member of this House is proud of his constituents but I have a special pride that my district, and particularly the women of Queens,, have worked so hard and so long for peace in Vietnam.

When the final history is written of our involvement in the tragic war in Vietnam, an important chapter will be devoted to these citizens who put aside their already great responsibilities as housewives, mothers, and workers to lead our community in the inspiring October and November peace moratoriums.

Among the most dedicated workers for peace are the members of the Queens women's division of the American Jewish Congress who recently presented me with petitions bearing the names of over 13,000 Queens citizens. The petitions read:

STOP THE WAR

We, the undersigned, support the Vietnam Moratorium on October 15. There must be an immediate end to this senseless killing and destruction. We call upon the President to end the war in Vietnam *now!*

At street corner tables and on the sidewalks of Queens these women worked tirelessly in the past 2 months for peace. The Queens women's division of the AJC constitute, in my opinion, one of the most devoted and diligent groups working for peace in the entire New York City area.

The petitions were presented to me by Mrs. Bertha Adler, president, Queens women's division, AJC; Mrs. Judith Tuller, executive vice president, and Mrs. Dorothy Gerhskoff, president of the business and professional chapter of the Queen's women's division, AJC.

INDEPENDENCE DAY OF KENYA

HON. ADAM C. POWELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. POWELL. Mr. Speaker, on this national day, the sixth anniversary of their independence, Kenyans may look back at this last year with some sadness. In the last 12 months one of their brightest young leaders, Tom Mboya, was assassinated and the country has been wrought with divisive tribal strife. Yet, the friends of Kenya maintain their confidence in that nation and their belief that Kenya will be able to overcome the unrest which seems to be part of the growing pains of nationhood.

Kenya not only is a land of great beauty and abundant wildlife, but is the site of some of the earliest European contact with Africa. As early as 1498, Portuguese mariners landed in Kenya. Following the rise of German activity in East Africa in the mid-19th century, Great Britain began exploring Kenya. Today, Kenya is one of the more developed nations of Africa. Its capital Nairobi is a great commercial center. In contrast to the modernity of Nairobi some of Africa's most primitive tribesmen, the Elmolo, live on the shores of Lake Rudolf which lies in northern Kenya. Thus, Kenya is a land of great interest for the naturalist, anthropologist, and businessman alike.

Though the years preceding Kenya's independence and the years of nation-building have not been without strife, Kenya has made great economic progress and has strived to resolve its political conflicts. Thus, I call upon my colleagues to join with me in extending to Kenya on the sixth anniversary of its independence our congratulations and our best wishes for its success in the future.

GENERATION GAP

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. ALEXANDER. Mr. Speaker, I recently received from a young Arkansan one of the most thoughtful letters since becoming a Member of Congress. Miss Kitty Sloan, of Jonesboro, Ark., who is now a college freshman, has asked some questions and made some statements that deserve the attention of each of my colleagues. Under leave to extend my remarks, I would like to include the letter I received from Miss Sloan as well as my reply to her:

DECEMBER 12, 1969.

DEAR MR. ALEXANDER: I am grossly ignorant of what has been going on in Washington, if anything, this fall. I know that several committees are looking into the problems of air pollution, gun re-sales, poverty, hunger, civil rights, antitrusts, etc., and I hope some constructive action comes from their investigations. But congressional committees seem to be forever researching problems and never implementing the findings of their research. This prompts me to ask: What specific action is being taken to relieve the vast problems that confront the United States?

As Congressman for the first district, I know you are concerned with the lives of your constituents, but what are you and your congressional colleagues doing to assure that these lives will exist in ten years? Approving ABM? Cyclamate drinks have been removed from the market—good, the sugar industry liked that. But what about cigarettes which cause lung cancer, some dangerous birth control pills which produce various side effects, unsafe automobiles which cause high traffic accident rates, all gasoline-operated automobiles which drastically add to air pollution, factories which continuously pollute streams, rivers, lakes, and oceans? "America" flaunts its advanced technology, but has "America" done anything—enough to solve the problems this technology has created, such as pollution, noise, unemployment, etc.

Of all these self-created problems, the worst seems to be the technological dehumanization of mankind and the denaturalization of nature. Technology and capitalism have turned men into statistics, judged by their finances and position in our class society rather than by their individualism. Men are *usually* judged on their contribution to economy rather than on their service to humanity (but *usually* does show that there is hope . . .). Man's technology is upsetting the balance of nature by destroying plants and animals and perpetuating man beyond his natural limit. Men are living longer but actually living less; they are merely going through the function of breathing, performing the routine that society has set for them, and eventually retiring to sulk over the past. Overpopulation has been caused by man's eradication of disease, famines, and other natural checks, and so man must also work to eradicate this self-made problem of overpopulation. But who has the answers to these ever-increasing problems? You, the Congress, are supposed to. Can you live up to the faith, the hope that the American people have placed in you? Can you save our "sick" society?

Yes, I believe that categorically our society is sick.

When placing two men on the moon is given higher priority than feeding millions of starving people, something is definitely sick in our society.

When the majority of U.S. citizens are silent on or actively support the killing of 1,500,000 human lives in a senseless war in Southeast Asia, something is definitely sick within our society.

When the national army is sent across the Pacific to "liberate" the Vietnamese while the red-Americans, black-Americans, yellow-Americans, brown-Americans, and some white-Americans are still enslaved in an oppressive system, then that society is definitely sick.

When Congress emphasizes the possibility of nuclear war over the reality of poverty, hunger, and racism, then the society which condones such action is definitely sick.

When the federal government first attacks the flow of marijuana into the country rather than concentrating on stopping the flow of deadly heroin, something is definitely sick in our society.

When civil rights advocates are still struggling for a decent education for *all* American kids fifteen years after the U.S. Supreme Court struck down the separate-but-equal clause, something is definitely sick in our society.

When a person must obtain a prescription to buy a bottle of medicine, a license for a pet dog, and a registration certificate for an automobile, yet can buy a gun without any stipulation, something is deadly sick in our society.

Yes . . . . sick! And many politicians, voters, and apathetic citizens refuse to note its sickness and, therefore, perpetuate it. However, I do not, cannot believe that there is a hopeless chance of recovery . . . . YET!

Together, we must work to implement the basics of our Declaration of Independence, our Constitution, our democracy. This may entail changing the present system or reworking what we have . . . . but it MUST be done. If you, our elected officials cannot do it, then we, the people must and will find a way. The way is not to tear down the United States but to tear down the myth that an American Dream actually exists . . . . not to destroy tradition but to implement the radical ideas which were written down 250 years ago:

"We hold these truths to be self-evident: that all men are created equal; that they are endowed by their Creator with certain unalienable *rights;* that among these are life, liberty, and the pursuit of happiness; that to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these needs, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness . . . ."

Perhaps the fact that I just turned 18 and still cannot vote, yet am very concerned with the politics of the country, forces me to resort to letters, demonstrations, and anger—anger at those who do not use their vote or who manipulate the power given to them through the vote. Many people are angry. I pray that Congress can change the system which causes this intense anger—for frustrated anger is certain to develop if something is not done. And the frustration and anger of millions of Americans will certainly change the system if you fail to do so.

Good Luck.

I welcome your response.

Sincerely,

KITTY SLOAN.

JONESBORO, ARK.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 12, 1969.

Miss KITTY SLOAN,
Atlanta, Ga.,

DEAR KITTY: Your most thoughtful and thought-provoking letter concerning America and the "American Dream" was sincerely appreciated. I apologize for the delay in answering your letter, but I have wanted to have the time to devote at least as much thought to my response as you obviously did to your letter.

I cannot, and would not, try to dispute your contention that there are serious problems existent in our society. These problems, which you thoroughly and capably discussed, are pressing problems which need to be attacked, solved, and eliminated.

Along this line, I would like to dispute one statement that you made in your letter. You stated, "But who has the answers to these ever-increasing problems? You, the Congress, are supposed to. Can you live up to the faith, the hope that the American people have placed in you? Can you save our 'sick' society?"

These problems face and involve all of us and, as such, it is the responsibility of all of us to seek solutions to these problems. I am aware that average citizens, and young people in particular, often feel helpless to contribute to the solutions to these problems. I have the power to cast one vote in the House of Representatives, but under our system of government the Congress basically reflects and mirrors the wishes and desires of the American people. Major efforts to solve many of these problems will, realistically, not be made until a majority of the citizens of this country share your concern and urge such actions. If a majority of the people do not share our views, then it is our responsibility to work to become the majority.

It is my feeling that one of the reasons for any "communication gap" or "generation gap" which might exist evolves from a difference of viewpoint. Members of the generations ahead of you view America from the standpoint of comparison with other nations and other ideologies that they have personally witnessed and fought. For Americans who sacrificed in wars against German Nazism or Russian Communism, America is truly "the land of the free and the home of the brave." Young people, on the other hand, measure our country against its claims of freedom, equality and democracy. According to these standards, we still have a long way to go, I am afraid.

In short, I fully understand and am in sympathy with the frustration you feel over our seeming inability to deal with the problems facing our society. I can only assure you of my interest and concern and of the concern of many of my colleagues over these problems. Efforts are being made to solve many of these problems and some progress can be shown, although it is not fast enough for either you or me.

I would suggest, however, that the ultimate answers to these problems lie not with me or with the Congress, but with you and the members of your generation. All problems cannot be solved by Federal legislation without sacrificing personal freedom and identity that you and I both cherish. Increasing Federal programs inevitably mean a vastly increased Federal Government with more control and less personal interest in the citizens. This is a situation which neither I nor the members of your generation can find tolerable. So, in the long run, many of these problems are going to have to be solved not by the threat of a club from the Federal Government, but by the powers of persuasion in which you have proven yourself to be proficient.

Thank you for your letter, and particularly, for your closing wish of "Good Luck." Let me now turn that around and wish you and the members of your generation "Good Luck" as you accept the responsibility that will increasingly be yours for finding the long-range solutions to these problems in the hearts and minds of your fellow citizens.

With kindest personal regards, I am

Sincerely,

BILL ALEXANDER

NAVY LEAGUE RESOLUTIONS

HON. PETER N. KYROS

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. KYROS. Mr. Speaker, I was pleased to learn that the 67th annual convention of the Navy League has taken careful notice of the continuing and increased importance of maritime affairs in our national considerations. The resolutions approved by this convention bear eloquent testimony to the importance of this subject, and to the work which congressional committees are doing in this area. I believe it would be helpful to bring these resolutions to the attention of my colleagues:

NATIONAL OCEANIC POLICY

Whereas a progressive and competitive posture for a modern U.S. Merchant Fleet would provide an essential element of total oceanic preeminence for the Nation and enhance the potential of the United States Navy, Marine Corps and Coast Guard serving as key instruments of national policy; and

Whereas the United States must have an oceanic policy if it is to remain as a world maritime leader; and

Whereas the President of the United States has proclaimed that "A strong and viable Merchant Marine is essential in this quest for economic vitality;" and

Whereas history records that the nations which have built the ships, carried the cargo and collected the revenues have generally been powerful and well off in an economic sense; and

Whereas if U.S. flag shipping carried a preponderant portion of our exports and imports, the nation's deficit in international balance of payments would be reversed and a chief stimulator of the economy would be provided; and

Whereas heretofore U.S. flag shipping has not received national emphasis commensurate in scope with other national programs necessary to enable the U.S. merchant fleet to develop a strong, competitive posture;

Now, therefore, be it resolved That the Government of the United States, as a matter of highest priority, formulate and execute a progressive and dynamic oceanic policy encompassing the totality of endeavor on the oceans in furtherance of the national interest.

NATIONAL OCEANIC STRATEGY

Whereas the Commander-in-Chief in personal pronouncements has highlighted the sound economics of a national oceanic strategy; and

Whereas American oceanic leadership is being increasingly challenged by the burgeoning Soviet maritime and missile threat; and

Whereas the common concern of all citizens and government agencies is the preservation of the United States nuclear attack; and

Whereas the United States must optimize the allocation of resources on the basis of what contributes most to the preservation of the Republic; and

Whereas the United States Navy can make a greater contribution toward securing the Republic from nuclear and surprise attack by more utilization of the seas of the world; and

Whereas the survivability of sea-based systems greatly deters the will to strike; and

Whereas the Secretary of Defense has made his decision known to form "a blue ribbon" panel to conduct a thorough, independent and objective overall review and analysis of

the Department of Defense from its mission to its performance;

Now, therefore, be it resolved that the United States accelerate the implementation of an oceanic strategy, allocating national resources as required for the fullest utilization of oceanic power in all its aspects, to gain greater security from attack and to support foreign policy, thereby enhancing its posture as the leading world power.

LONG RANGE SHIP CONSTRUCTION PROGRAM

Whereas the implementation of a national oceanic strategy, deriving its incentive through national oceanic policy, is dependent on an availability of modern high speed ships; and

Whereas the American ship construction program requires appreciable expansion through an implementation of a long-range comprehensive program, including provision for men-of-war, merchantmen, oceanic research ships and a modern fishing fleet, powered by the most modern means, in numbers and capabilities to maintain world leadership; and

Whereas, to date, the lack of a long-range adequate shipbuilding program has resulted in the block obsolescence of the U.S. Fleet and has left major segments of the Merchant Marine in a deplorable condition; and

Whereas the same considerations have markedly circumscribed opportunities for expansion and full utilization of U.S. shipbuilding facilities and the expansion of new technologies and techniques; and

Whereas national programs which rectify these critical maritime deficiencies are a prerequisite for gaining a competitive posture leading to a dominant American position on the seas; and

Whereas, similarly, the lack of a resolute Marine Research Program has resulted in a failure to attain the modernity of the fleets essential to the maintenance of a decisive American superiority at sea, capable, if need be, of controlling the sea in war;

Now, therefore, be it resolved that our nation undertake, as a matter of urgency, a long-term, major, modern ship construction program which appreciably increases the balanced naval and merchant fleet strength to, in fact, fulfill our rapidly expanding national requirements.

OCEANIC EDUCATION

Whereas a primary mission of the Navy League is to encourage and support oceanic education; and

Whereas ever-broadening oceanic interest and exceptional maritime activity should serve to create a climate favorable for the advancement of maritime thinking; and

Whereas unfolding oceanic opportunities and the potential for contributing to the economic and intellectual wealth and prosperity of the nation loom in almost limitless perspective; and

Whereas the Marine Engineering and Resources Development Act and the Sea Grant College program, launched in 1966, have provided impetus for ever-expanding attention and educational measures related to the oceans in their total perspective, including the strategic aspects; and

Whereas the leadership of the League has initiated an expanding scale of educational activity nationally; and

Whereas the Navy League through the encouragement of an establishment of centers of maritime study and oceanic educational foundations will accelerate the recognition of the frontiers of oceanic opportunity;

Now, therefore, be it resolved that the Navy League of the United States, as a matter of primary policy, continue to foster the broad spectrum of oceanic education and research in universities, colleges and institutions of learning throughout the country to attain a national intellectual foundation for gaining the fullest oceanic advancement in furtherance of the long-term security and prosperity of the Republic.

PEOPLE—"THE SEA BREED"

Whereas the leadership of the military is a critical factor in the provision of the strength and security of the Republic; and

Whereas the recognition and prestige which accrue from devoted service to their nation are of significant importance to the military; and

Whereas the most critical problem facing the Department of Defense today is the problem of personnel, their motivation and their attraction to satisfying careers in the Armed Services; and

Whereas the compensations provided to the military that are in keeping with their service and sacrifices, and in a manner serving to foster the respect of the citizenry of the Nation are of major importance to their morale; and

Whereas more progressive policies and definitive actions are required to meet the needs of the people of the Armed Services;

Now, therefore, be it resolved that the concerned committees of the Congress, together with the Administration, be encouraged to maintain a constant review and upgrading of the incentives, opportunities and compensations affecting the status, prestige, morale, welfare and performance of our military personnel as a primary element of national strength.

NATIONAL OCEANIC RESEARCH

Whereas the capability to exploit the resources of the oceans may be the decisive factor in determining world leadership in future decades; and

Whereas the Navy is responsible for safeguarding the United States and its possessions from attack through the oceans; and

Whereas oceanic research, including oceanographic and hydrographic marine research is essential to acquiring knowledge vital to exercising all phases of control of the seas, particularly to insure optimum performance by the POLARIS-POSEIDON offensive seabased system as well as strategic defensive systems, and to improve our submarine and anti-submarine warfare capabilities, the latter a vital element of the Navy's mission to protect shipping; and

Whereas the seabeds in the future will become as important militarily to U.S. security as is the surface of the ocean; and

Whereas the Navy is responsible for the protection of U.S. flag shipping on the high seas, and conversely the U.S. Merchant Fleet provides sea transport to the armed forces in time of war or emergency; and

Whereas the U.S. Coast Guard becomes part of the operating force for the Navy in the event of war or other emergency and the Coast Guard activities in oceanic research activity are complementary and fully support Navy goals; and

Whereas research, development, test and evaluation efforts historically have been greatly out of balance to the extreme detriment of programs leading to advanced ship hull and propulsion systems, and that ocean oriented programs generally have been inadequately funded; and

Whereas there are currently tremendous opportunities to improve technical capabilities in the fields of shipbuilding, cargo handling, ship hull and propulsion, and exploitation of ocean resources; and

Whereas the Navy is and will be the principal user of knowledge acquired from the oceans, and is the best equipped among government agencies to plan and execute ocean oriented research and operations; and

Whereas the report of the Commission on Marine Science Engineering and Resources has provided a plan for national action relating to resources of the oceans in which the establishing of a National Oceanic and Atmospheric Agency (NOAA) is proposed;

Be it, therefore, resolved that the Navy provide the leadership in oceanographic and hydrographic research and development programs; and

Be it further resolved that adequate funds be provided all ocean-oriented research, development, test and evaluation programs; and

Be it further resolved that all national, Defense and Navy, RDT&E programs be brought into balance to provide drastically increased emphasis on shipbuilding modernization, improved ship loading and unloading (including helicopters) and improved ship hull and propulsion (including catamarans, water jet propulsion, surface effect ships, regenerative gas turbines and im proved nuclear power plants); and

Be it further resolved that in the interest of a strong national defense, the Navy League urges that the United States retain control of all necessary military seabed installations and resist all actions of internationalization of the oceans that relate directly to the strategic interest and to the provision of security for the Republic.

HOUSE ARMED SERVICES COMMITTEE

Whereas the Sea Power Subcommittee convened by the Chairman of the House Armed Services Committee, with the full support of its investigation and interim report, has factually and dramatically provided the American public with an awareness of the "shocking" material condition of the U.S. Fleet; and

Whereas this material decline in the fleet has resulted from the government's neglect of modern ship construction and failure to provide a long-range phased program to meet the mounting problem of block obsolescence; and

Whereas the recently published interim report of the Sea Power Subcommittee has highlighted a serious decline in the oceanic posture of the nation; and

Whereas the report accentuates the importance of our government giving immediate and urgent attention to the measures to restore American maritime posture; and

Whereas this Subcommittee has performed an outstanding public service in relating the deteriorating American oceanic posture to the burgeoning threat confronting it on the oceans of the world; and

Whereas positive constructive measures can be anticipated to rectify the critical condition of the fleet as a result of the Sea Power Subcommittee findings; and

Whereas the Chairman of the House Armed Services Committee has already introduced legislation for a long-range ship building program to provide for the modern ships essential to our nation;

Therefore be it resolved that the Navy League commend Chairman L. Mendel Rivers, ranking minority member William H. Bates and Representative Charles S. Bennett, Chairman of the Sea Power Subcommittee of the House Armed Services Committee, together with the other members and the staff of the committee for their outstanding action on behalf of the Nation.

Be it further resolved that the Navy League fully support the rectifying action initiated by the Chairman, particularly his leadership in requesting a major modern ship construction program to regain requisite maritime posture.

Be it further resolved that Chairman L. Mendel Rivers be commended for his alert and discerning leadership in initiating a full-scale investigation of the national sea power that has revealed to the American people the critical condition of the nation's posture at sea; and for his dedication to oceanic strength in proposing the legislative program to meet the threat and restore the United

States to a position of leadership on the oceans; and

Be it further resolved that the chairman be encouraged to initiate appropriate action to maintain the Sea Power Subcommittee on a continuing basis as a means of insuring adequate and continuous congressional and public attention on the totality of the Nation's sea power.

HOUSE MERCHANT MARINE AND FISHERIES COMMITTEE SENATE COMMITTEE ON COMMERCE

Whereas the Merchant Marine and Fisheries Committee of the House of Representatives and the Committee on Commerce of the United States Senate have contributed greatly to rekindling public awareness of the nation's need for a stronger American Merchant Marine; and

Whereas the leadership and members of the committees have given generously of their time to stress our country's dependence upon sea power to foster our essential foreign trade and commerce as well as to ensure our security; and

Whereas these committees have spent untold hours in study and debate in an effort to have an American Merchant Marine, American-built and American manned which would ensure our competitive posture in the market places of the world; and

Whereas these committees have encouraged and supported essential research projects to add to the capability of our maritime establishments; and

Whereas they have implemented a new and promising system of authorizing maritime appropriations in order to put the needed emphasis on appropriate support of our Merchant Marine; and

Whereas the committees have encouraged the training of a Merchant Marine Officer Corps learned in the sciences of Marine management and navigation and trained in the essentials of naval warfare; and

Whereas these committees have accordingly laid the foundation for a national maritime policy which will soon be formulated by the President and his Administration;

Therefore, be it resolved that the leadership, membership and staff of these Committees of Congress be commended for the vigor and guidance they have provided in the endeavor to define and achieve our national maritime goals.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the Wisconsin State Journal; the Capital Times, Madison, Wis.; the Fond Du Lac, Wis., Commonwealth Reporter; the Oshkosh, Wis., Paper; and the Milwaukee Journal. The editorials follow:

[From the Wisconsin State Journal, Madison, Wis., Aug. 27, 1969]

LONGER TRUCK HAZARDS: STATISTICS ON DOUBLE BOTTOMS

Truckers, pushing for permission to roll longer trucks on Wisconsin roads, argue vehemently that 65-foot vehicles will not increase road hazards.

And while they seek 65-foot trucks in Wisconsin, 70-foot lengths are being sought through federal legislation. Such trucks are often called "truck trains," tandem trailers, or double bottoms.

Information recently provided for congressional consideration by Rep. Richard McCarthy (D–N.Y.), an opponent of longer trucks, supports the safety position of groups like the American Automobile Assn.

Citing a survey of the Buffalo Courier-Express, McCarthy said, "Tandem tractor-trailer accidents on the New York Thruway have increased faster than the mileage logged by commercial vehicles on the vast superhighway.

"The thruway authority revealed that the number of accidents involving tandem trucks almost tripled between 1964 and 1968. During the same period of time the total number of miles traveled by commercial vehicles on the 559-mile thruway system doubled over the 5-year stretch."

Such statistics deserve sober consideration the next time—and it will surely come up again when lawmakers return—truck lobbyists urge legislation for longer trucks.

[From the Madison (Wis.) Capital Times, Sept. 4, 1969]

SAFETY ISSUE DISREGARDED—NIXON BACKS MONSTER TRUCKS

WASHINGTON.—It didn't plan it this way, but the Nixon administration found itself today accused of siding "with the giant trailer truck barreling down the thruway and against the terrorized motorist nearly blown off the road by the resulting blast of air."

A Republican congressman, a Democratic congressman and consumer champion Ralph Nader mounted the opposition to the administration stand.

The administration unveiled its long-awaited position Wednesday on legislation that would permit heavier, wider and longer trucks and buses on the nation's interstate highway system.

The administration stand was outlined in a day of testimony before a House public works subcommittee by Federal Highway Administrator Francis C. Turner. He said the bill would benefit the economy and that the government didn't have "sufficiently reliable data" to say whether the bigger trucks would pose additional safety hazards.

The three disagreed.

"Mr. Nixon's Transportation Department does and the Federal Highway Administration should immediately disclose all the secret studies it has conducted regarding the hazards of giant trucks," Nader said in alleging Turner was suppressing the studies.

"We're not safety experts," was the response of Rep. Richard D. McCarthy (D-N.Y.) to Turner's proposal that Congress decide the safety question. "You have them. But you take a Pontius Pilate attitude of washing your hands of the whole affair."

"I am convinced as I can be," said Rep. Fred Schwengel (R-Iowa), "that people are going to end up in hospitals and the graveyard unless we have more controls (over truck traffic)."

Schwengel, who led the battle last year to kill a similar bill, said he had a feeling Nixon had not gotten the full story and that he intended to see that he did.

The subcommittee, which heard trucking testimony earlier in the year is about ready to wind up hearings and act on a bill.

"The way I look at it," McCarthy told a newsman, "the administration, from the position it took Wednesday, is siding with the giant trailer truck barreling down the thruway and against the terrorized motorist nearly blown off the road by the resulting blast of air."

During the hearing, Schwengel said the blast problem should be studied before larger trucks are permitted on expressways. He told of his own experiences passing trucks while driving on the Indiana turnpike during the August congressional vacation.

Turner said the bill would be "acceptable" only if Congress adopted all of his agency's proposed amendments, including one that would apply size restrictions to all federally financed highways, not only the interstate system.

The bill, supported by the trucking industry and opposed by the American Automobile Association, would increase from 8 to 8½ feet the maximum allowable width of trucks and buses using the interstate highway system.

The limit on weight would be raised from 73,280 pounds to 108,500 pounds. The length, which is not limited now, would be set at 70 feet. Turner recommended a maximum length of 65 feet.

The trucking industry says bigger vehicles would permit more economical movement of freight and more comfortable bus travel. The bill's opponents say the larger vehicles would increase the risk of traffic accidents and cost the government millions of dollars each year in repairs caused by added wear and tear on the highways.

Turner acknowledged large trucks affect "the mental and emotional attitude of the general motoring public." But he said government studies presented no evidence such trucks are involved in more accidents than smaller ones. He did say that when a car is struck by a truck 15 or 20 times its size, "the truck tends to demolish the smaller vehicle."

[From the Fond du Lac (Wis.) Commonwealth Reporter, Aug. 2, 1969]

BIGGER TRUCKS ON THE ROAD?

The trucking industry, engaged in a determined campaign for the last year or so to persuade the government to give even larger trucks the run of the nation's roads, has lately come up with a new agreement to bolster its case.

Industry spokesmen asserted in congressional hearings that the size and weight hikes desired would actually contribute to highway safety. Their reasoning is that by abandoning the present weight limit—73,280 pounds—for trucks on the interstate system and adopting instead an axle-spacing formula, weight distribution would be improved. Trucks might be heavier—up to 92,500 pounds—and wider, but also better-balanced, and therefore less of a hazard to truckers, passenger car drivers, bridges and the roadways themselves.

There is no question that trucking is a vital element in the transport system of a consumption-happy society or that there are valid arguments for bringing existing regulations into line with changing needs of the industry and public, improved technology and highway facilities.

But this is one that is likely to be difficult to sell to drivers who have had white-knuckled experience maneuvering around and among present width and weight trucks, or struggled to keep a car on the road in the gale-force winds frequently created in passing or being passed by trucks.

[From the Oshkosh (Wis.) Paper, Aug. 9, 1969]

TRUCKS ARE BIG ENOUGH NOW

The American trucking industry has mounted a well-financed campaign to increase the size of trucks using interstate highways.

It is a campaign that goes against the best interests and safety of everyone who drives an automobile.

But there is a possibility the truck lobby will succeed because it contributes many thousands of dollars each year to the campaign funds of key Congressmen.

The bill now before Congress would allow states to approve trucks that are wider by six inches—to 8½ feet. Side mirrors and other fixtures of course extend that width.

Also, the maximum loaded weight of a truck could jump from 73,280 to 109,500 pounds (over 54 tons).

Expert testimony before a Congressional committee has emphasized the safety hazards and higher costs of allowing larger trucks.

For instance: when passenger cars and pickup trucks collide, there are 0.3 fatalities per 100 persons involved. But 7.1 fatalities per 100 occur in crashes of cars and tractor-trailers. When collisions involve cars and two-trailer rigs the fatality rate jumps to 13.3 per 100.

The Federal Highway Administration reports that heavier commercial vehicles (over 30 tons) are implicated in 19 per cent of all highway fatalities. Yet these trucks constitute only 7 per cent of registered motor vehicles.

Rep. John Moss, chairman of a House subcommittee which has studied auto safety, noted, "passenger and light truck drivers often experience acute anxiety and even fear when passing, being passed by, or accompanying larger vehicles on the road."

"This anxiety is certainly justified," he said. "The motorist's visibility is lessened, passing is more difficult and the force of the combined weight and speed of the larger trucks often causes rocking or jolting of his vehicle."

With present truck limits, two trucks passing on an average two-lane road with 12-foot lanes have four feet of clearance. Under the proposed limits, with allowances for side mirrors and other outcroppings, this gap would be less than two feet.

In addition, there is the cost factor. The Bureau of Public Roads estimates that the wear and tear of an estimated 300,000 bigger trucks would add $5.8 billion in repair and construction costs to the Interstate highway system in the first 10 years.

Trucks are big enough now; good sense dictates that they be no larger.

[From the Milwaukee Journal, June 21, 1969]

KEEP TRUCK LIMITS

If Wisconsin again rejects proposals to lengthen truck limits to 65 feet—as it should—it will be in good company.

Of nine states with such bills before them, five have rejected them—Iowa, Maine, Minnesota, South Carolina and Tennessee. Only North Dakota among the group approved. The rest haven't acted yet.

The trucking industry claims that 34 states now allow 65 foot twin trailers or "double bottoms," although in many they are limited to special permits or routings. Wisconsin's maximum is 55 feet in length, with some exceptions.

Wisconsin is one of the important "bridge" states in the double bottom controversy. Relaxation here, along with Minnesota and Iowa, would provide clear sailing for the truckers to western states, which have the greater lengths.

The western situation, incidentally, has an interesting explanation. Several of those states were caught with lower axle weight laws when interim truck limits were set for interstate highways in 1956. To achieve the maximum weight of 73,280 pounds, trucks were allowed to lengthen.

While it minds its own legislative ramparts, Wisconsin also should keep an eye on new federal proposals. A recently introduced bill, applying to interstate roads, would allow states to go to 70 foot lengths. It also would set up a new weight formula, granting an extra ton on the 18,000 pounds now permitted for single axles and ranging up to 108,500 pounds for nine axle rigs. Widths could go to 102 inches. A separate bill would increase bus widths to 102 inches.

The 1956 federal standards applied where states did not have higher limits. The new rules would allow states to increase those limits.

Federal maximums tend to become state minimums. As each state relaxed its requirements, the truckers' push on the remaining states would increase—a sort of double bottom domino effect.

LEGAL EDUCATION

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BINGHAM. Mr. Speaker, a most impressive series of editorials was recently aired by radio station WINS in New York. They are entitled "Ignorance and the Law," and they make a very persuasive case for an educational program at elementary and secondary levels designed to teach young people the basics of law. They argue, quite convincingly I think, that in a complex society like ours, "if you want people to obey the rules, you first have to tell them what the rules are." But while 50 million youngsters now in our Nation's public schools will have used 6 billion textbooks in their 12-year schooling, they will never see a single textbook on the fundamentals of law because "none has ever been published."

I think the conclusions contained in these editorials make good sense, and I intend to explore possible Federal legislation to help stimulate legal education for youngsters at all grade levels.

It is about time we stop treating the law as material only for study by lawyers and law students. The law relates intimately to the life of every citizen, and both the citizen and society as a whole will benefit from a more widespread and detailed appreciation of it. That can best be achieved, as these excellent editorials suggest, by a good law education program in the schools.

I want to commend WINS for this series, and urge my colleagues and other readers of the RECORD to reflect on them.

The editorials follow:

IGNORANCE AND THE LAW—1

(By Peter E. Schruth)

We Americans like to think we're a nation of laws, not mere men. We also accept the idea that ignorance of the law is no excuse. Yet that's just about all the law most people ever learn unless they study to become lawyers.

Our schools are supposed to prepare young people for life. The academic process sharpens their minds. A number of specific subjects and topics are in the curriculum by law. Physical education is required to build bodies and physical education teaches students the rules of the sports they play. But, nowhere, be it California, Massachusetts, New York, New Jersey or Connecticut is there a requirement that they learn the rules they must live by for the rest of their lives. We're talking statute law which covers citizen rights and citizen responsibilities beyond those spelled out in the Constitution—such things as contracts, tax and labor law, civil and criminal law.

We spend millions of tax dollars to put our children through 12 years of public school, during which they go through scores of courses and more than 100 textbooks. But none of these courses and books really deals with basic law. Few of our teachers have any training in the subject themselves, and there has been little text material for them to use, even if they are interested.

We teach our students the laws of grammar, but the laws of the land are learned only by trial and error—or trial and conviction. WINS believes that we can and must develop a more positive approach to the teaching of basic law to our youngsters. We'll talk more about ignorance and the law tomorrow.

IGNORANCE AND THE LAW—2

We say that ignorance of the laws is no excuse for lawlessness. But could ignorance be a reason? Do we actually promote that ignorance when we fail to teach the fundamentals of law in our Tri-state area schools? This is no attack on education or on educators. The specific study of the fundamentals of law is not and has never been a major subject in the education system in our country . . . or in any other; not in the way we teach language or history.

The only peoples that ever carefully schooled their children in the rules by which they had to live were the ones we now refer to as "savages". The ancients who lived in tribes carefully schooled their children in tribal laws. Their reason: survival. The alternative: death.

In 1765, Sir William Blackstone sorted and codified the laws of England for the first time. He wrote an essay on the natural rights of man. From Blackstone came the basis of our American law. From Blackstone we copied almost word-for-word The Bill of Rights. But Sir William was in fact, *not* a great justice. He was a school teacher. As early as 1690, in our land, the American people decided that the teaching of the law of the land was better left to the home. And so it remained . . . by tradition.

The "law" a child learns in New York, New Jersey and Connecticut schools today, is the Constitution; the mechanics of courts and legislature . . . the size and shape of government. But these are problems of American democracy, civics and social science; not law. In his real world, he faces the law of installment credit, contracts, mortgages, public property, citizen rights and legal responsibilities, equity, tax laws, labor law, civil and criminal law: *statute law.*

The 50 million youngsters now in our nation's public schools will have used six *billion* textbooks in their 12 year schooling. Yet, they will never see a single textbook on the fundamentals of law. None has ever been published. More about this tomorrow.

IGNORANCE AND THE LAW—3

Americans will spend tens of billions of dollars this year to catch, punish and correct people who violate the laws of the land. Most violators will know little or nothing about the law they broke. But ignorance is no excuse. Sharpshooting sales bunco artists will steal another six billion dollars from consumers. Victims will scream in anger. But in the end, they will examine the law . . . and pay the bill because ignorance is no defense.

We will hear lawlessness blamed on white people, black people, law enforcement, the courts, unemployment and overwork. We'll blame it on inhibitions, free love, Dr. Spock and the weather . . . communists, militants, peaceniks, parents and pot. Nobody seems to blame it on plain old ignorance. That is: a simple lack of knowledge.

And we will continue to propagate and promote ignorance by teaching children *nothing* of fundamental or statute law in our homes, or in our Tri-state area schools. At home, we don't have time.

So Tri-state area parents spend millions of tax dollars to put children through twelve years of schooling. During that time our children go through scores of classes and

more than 100 textbooks. But not one will be on the laws of the land, under which they must live from the cradle to the grave. Nowhere is a single textbook published on law for grade school students.

Law is the backbone of our society. And without it, we could not survive as a nation. Yet, we have no books, no classes and no teachers to teach it. What it tells us is this: Junior may graduate with honors, a bright young man in the eyes of society. But in the eyes of a judge, he is inarticulate, uniformed and possibly incoherent because he knows nothing of the most important rules in our land. And *that*, is ignorance of the law. More about that, tomorrow.

IGNORANCE AND THE LAW—4

There are five things that make us, or any people, a nation. We need *territory* to call our own; and a *defense* force to protect it. We need *work* on which to base our economy; *taxes* to support the organizations, and *laws* to regulate our behavior and maintain order. If one dies, they all die.

What's bothering many New York, New Jersey and Connecticut residents right now is that we have sufficient law, but our order seems to be breaking down or is at least being threatened, especially among our young people in the 15-to-25-year age group. For the past few years, more and more young people have been refusing to recognize and respect the rules of the game—the laws of the land. We hold that ignorance of the law is no excuse for breaking it. We also know there is a generation gap. But where does it start?

We know that children form their basic attitudes in their kindergarten years. That includes their ideas of fair play, responsibility, law and order . . . Tribal Law. It used to be that they learned it in their homes, mostly from their mothers. Not any more. Or at least not as much, any more. In World War II, Mom was forced to get a job, and the word "babysitter" became part of our language. Now, 25 years later, women hold 40 percent of the jobs. More than half of the employable women, some 28 million, are wage earners, and a vital part of our economy. And now we have our new term: "generation gap".

It is generally recognized that children now learn far less about the law at home than in years past. Add to this the fact that it has never been part of our public education system, here in the Tri-state area, or anywhere for that matter, to teach children the law of the land the way we teach them the laws of mathematics, or grammar, or football. We don't teach law at home. We don't teach law in the schools. So is it really so strange that some of our youngsters are trying to make their own law or tear down what there is?

WINS asks: How good is a law system when nobody knows very much about it except the judges who administer it; the lawyers who practice it, and the policemen who enforce it? We'll talk more about this, tomorrow.

IGNORANCE AND THE LAW—5

If there is anything more typically American than our respect for wealth and material possessions, it's our national love affair with equality and justice. In other words, Americans beef a lot about *other* people who don't play fair. We tell our children that crime doesn't pay . . . that cheaters never prosper . . . that it isn't whether you win or lose, but how you play the game. The small child's universal phrase for a violation is: "No fair". Grownups boo the referee and yell, "Kill the umpire", for the same reason.

Indeed, good sportsmanship and playing the game according to a "Queensbury Rules" concept is so important to us that we wrote it into our state education laws. Connecticut, New Jersey and New York laws require that every child have 12 years of physical education as part of his public schooling. But what of the "Queensbury Rules" of society . . . the rules by which we must play the game of citizen from the cradle to the grave? Those rules are the law of the land: the Federal Code; the New York, New Jersey and Connecticut statutes; city ordinances. The "Queensbury Rules" for being an American are the principles of contract law, of taxes, of equity, of civil law, private law—common law and criminal law. Citizen rights are one phase; citizen responsibilities, another.

America was founded by people seeking justice under the law. And we have been working toward that end for nearly 200 years. It is paradoxical that after 200 years, we carefully teach our children all of the rules of language, athletics, mathematics, personal health and safety, and law for the operation of a motor vehicle. Yet nowhere, except by hearsay, guesswork, intellectual osmosis, or trial and error do we even try to teach children the most important rules of all—the ones by which society demands that they live.

Among youth who are *not* taught law, crime rates are increasing by 15 to 30 percent a year. In the one area where they are taught the law, crime rates are dropping by three to ten percent a year. More about that, tomorrow.

IGNORANCE AND THE LAW—6

Our American system has always held that ignorance of the law is no excuse—no defense, for breaking the law. At no time in American history, have we been more threatened by the problem of people who do break the law. At no time have we tried harder and achieved less to find a solution to our dilemma than right now.

Law enforcement analysts noted a sharp increase in juvenile delinquency 20 years ago. When little action we took was obviously ineffective. Since 1950, crime rates have been climbing between 15 and 30 percent a year—*seven times faster than population*. Most of it is among young people who know little or nothing about the laws under which they, and we, are required to live. They don't know because we have neither the books nor the teachers to teach them.

The only area in which young people are required to learn the specific rules and penalties is in the military service, and the military says their crime rates are *not increasing*, but *decreasing*. Every military recruit is given a full course on the Uniform Code of Military Justice. He learns the rules of behavior the way he learned the rules of football. The Navy says its crime rate has dropped 30 percent in ten years. The Air Force says its crime rate is dropping by ten percent a year. The Army supplies no figures, but says its crime rate is in a steady decline.

Military people are hard-headed. They believe that if you want people to obey the rules, you first have to tell them what the rules are. We civilians don't subscribe to that. At least, we haven't, yet. So the graduating student from New York, New Jersey and Connecticut schools this year will know all the major rules in his academic subjects, and will then set out to play the game of being an American citizen, an American adult. But the rules of that game are called statute law. And on that subject, he is mute, blind, illiterate. What could we teach our youngsters? We'll talk about that tomorrow.

IGNORANCE AND THE LAW—7

It is one of the great paradoxes of America that when it comes to teaching the law to our children, we stand right now where we did 70 years ago, when we first decided to teach them about health and personal hygiene. Health and hygiene education are now required in our schools. And thanks to America's school teachers, as well as its physicians, we have a fantastically healthy society. Our children are bright and vigorous and strong. They are so bright and so strong, in fact, that there is virtually nothing our kids can't wreck, if they really put their minds to it. And their demonstration of that fact is part of our national agony.

Until now, it has not been "The American Way" to teach our children the laws of the land, the rules of being an American. And even if we should decide to teach them, it would be a gigantic task. Our educators would have to prepare material, lesson plans, curriculum guides, teaching guides and workbooks, because there are none now. They would have to prepare special materials to teach how to teach law, because we lack trained teachers and materials now.

And what could our children learn in that study? They could learn about public law, which covers taxes and crimes against the people; private law which includes disputes between persons. They could learn about contracts. They could learn common law—the prerogatives of proprietorship—private property—damages. They could learn equity, which says: No wrong shall be without adequate remedy. They could learn statute law, the specific rules under which we must live for our entire lives.

Our children could learn that the first law on personal liberties was passed, not by an American, but by a Greek named Solon, 2,000 years before Columbus even discovered America. We don't teach it, but men had laws long before we even had written language or doctors. And all we had before that was teachers. More about that tomorrow.

IGNORANCE AND THE LAW—8

Our people and our nation are deeply troubled by gross violations of our social guidelines: the law of our land. We say ignorance of the law is no excuse for breaking the law, but crime rates are climbing seven times faster than population. Our order is breaking down.

We demand that people live by the law. But we do not teach them what law is. WINS believes that if we, as a people, are obligated to abide by the rules, we must also be obligated to teach our people what the rules are. In law, those rules are called, "statutes". We have have neither books nor teacher expertise on this. But we *do* have the means to acquire the books and expertise.

WINS does not propose a specific curriculum. This station is an observer, a reporter, and in this case, an advocate. Designing the course to be taught is the job of the educators, and only they can do it.

We believe that in the study of *fundamental* law, our children will find reflected every major social advancement in recorded history of mankind. In *statute* law they will find the day-to-day rules that govern the money we earn, the land we own, the disputes we have, the agreement we make—even the purity of the food we eat.

We believe that having a legally informed citizenry is at least as important to the future of our social order as having a politically-informed electorate. We believe that teaching our children the specific laws under which they are required to live, is at least as important as their knowledge of our language. New York, New Jersey and Connecticut laws require that they be taught 12 years of language arts in our public schools, but no law.

WINS believes that ignorance of the law is a major element of social disorder. And the only antidote for ignorance of any kind is education. In sum: we expect our young people to abide by the rules. To aid and abet this we should first teach them specifically what the rules are, and the early schooling years are an excellent place to begin. It's as simple as that.

BROTHER JOE'S PLAN LACKS FUNDS

HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BROYHILL of Virginia. Mr. Speaker, I should like to call the attention of our colleagues to a program in Washington, D.C., known as "the K Street Project" under the direction of Brother Joseph Zambon.

The K Street project implements precisely the wishes of Congress as expressed in the Economic Opportunity Act of 1964, "to mobilize the material and human resources to combat poverty." However, it differs from other poverty programs, and particularly the community action programs formulated through the United Planning Organization in Washington, in two respects. First, it has received no Government funds. Second, in spite of limited resources it is achieving promising results.

I include at this point in the RECORD a copy of a letter from former OEO Director Sargent Shriver denying him funds; a news article concerning the program; a letter dated February 3, 1969, from Mrs. Agnes T. Marks, Coordinator, Legion of Mothers, expressing support for it; a letter to Mrs. Marks from Presidential Assistant Daniel P. Moynihan expressing approval of it; and finally, another letter from Mrs. Marks, dated September 22, 1969, urging termination of the community action programs under OEO:

OFFICE OF ECONOMIC OPPORTUNITY,
Washington, D.C., June 20, 1966.

Brother JOSEPH ZAMBON,
K Street Project Material Assistance,
Washington, D.C.

DEAR BROTHER JOE: I want to thank you for the information you sent me on the K Street Project and the wonderful things you are doing for poor children and their families in Washington, D.C. I'm glad that you have had the chance to talk with some of our people here. They have certainly been impressed by what you are doing.

I'm so sorry that we are unable to find a way in the guidelines under which our program must operate to help you directly. I know that Chris Weeks and Joe English have explained some of the difficulties we have had in doing this.

I would certainly hope that you would be able to continue to obtain private support for such a worthwhile effort. The possibility of Catholic charities being able to give you some assistance is something I certainly hope you will explore.

I am very sorry that I was unable to see you this week but the pressures here, as we prepare for our Congressional Presentations, have made my schedule very tight. Please accept my best wishes for the continued success of your program.

Sincerely,

SARGENT SHRIVER,
Director.

IT'S POVERTY AT ROCK BOTTOM: BROTHER JOE'S PLAN LACKS FUNDS

(By Michael J. Woods)

Brother Joseph Zambon, a native of Chadwicks, now lives in the hearts of 6,400 impoverished Negroes in a ghetto under the shadows of the nation's capitol. He is the son of Mrs. Irene Zambon, 31 Elm St., Chadwicks.

During a recent visit to his home town, Brother Joe spoke with concern of his project's inability to gain federal aid through the Office of Economic Opportunity (OEO).

This is a letter he received last month from Sargeant Shriver, OEO director.

"Dear Brother Joe: . . .

"I want to thank you for the information you sent me on the K Street Project and the wonderful things you are doing for poor children and their families . . . I'm glad that you have had the chance to talk with some of our people here. They have certainly been impressed by what you are doing.

"I'm sorry that we are unable to find a way in the guidelines under which our program must operate to help you directly . . .

"I would certainly hope that you would be able to continue to obtain private support for such a worthwhile effort . . ."

Just what is Project K, and why can't it receive federal support? Brother Joe answers the first part of the question with ease and enthusiasm.

The project gets its name from K Street, the heart of a five-block Negro ghetto within walking distance of the nation's capitol. Two years ago, Sister Mary Leo of the Sisters of Notre Dame began gathering children from poor tenements into her convent at night so they could have a clean, lighted place to do their homework.

But she discovered they couldn't study on empty stomachs. And the ones without shoes were ashamed to even come.

Then Brother Joe stepped in with what he called material assistance. He set up a shop in an abandoned hardware store on K Street and began collecting from labor, church and other groups and dispensing food, clothes, beds and shoes.

He organized a corps of women volunteers from the suburbs who came in to visit the homes of the children who came to the center hungry or shoeless.

Now numbering more than 200, the recruits come from Lions Clubs, church sodalities, Jewish Clubs, Kiwi Clubs (a group of ex-airline hostesses from the area), and many other organizations.

They advised hard-pressed mothers on the expenditure of their relief checks and intervened with negligent landlords.

Through a program termed by Brother Joe "suburban surplus for the poor" beds, tables, clothing, chairs, silverware, dishes, surplus foods, shoes were soon pouring into the project center.

The surplus came in rented trucks, by car, in the shopping bags of surburban mothers who came downtown by bus, any way they could carry what they had to offer.

"Yet," said Brother Joe, "their charity wasn't of the strict and cold variety. It was based on continuing interest. Contact was maintained with poor families and with their needs to give them that necessary base of minimum physical standards from which they could go on to self-sufficiency and human dignity."

This summer a program was begun to bus poor children from the slums to suburban parks where women volunteers waited with picnic lunches—"a short reprieve from daily squalor."

Just how bad is the situation on K Street? "It's poverty at rock bottom," said Brother Joe. He explained many of the families lack beds enough to sleep in. Children can't go to school because they actually don't have shoes. Families sometimes live on potato chips for two or three days at a time.

Walls of crumbling plaster in many tenements are wet with the dripping of faulty plumbing. The average family-man, according to his employers, is fortunate to earn a dollar an hour, Brother Joe said.

When Brother Joe thinks about the government's refusal to finance Project K, he becomes philosophic. It is not the average poor man who starts to riot says Brother Joe. He at least has something. It is the man at rock bottom who cannot hope, because he cannot think for hunger, which cries out madly for justice in the end.

Before a man can better himself, he must first be a man, he said sadly. "Through our work, many of these poor shelters have been made into homes. The breakdown of family life has been arrested simply by giving the essentials of family living which these people never had—food, clothing, beds, the first stirrings of dignity."

"But," said Brother Joe, "what began as charity on a shoestring now is at the breaking point. The project has barely sustained itself with donations and contributions. A fine thread of stability, of hope has been strung through the ghetto where three years ago a white man dared not walk. Children smile."

Now, Brother Joe said, the project can barely meet its operational expenses. Surplus waits in the suburbs with no way of being carried downtown. Volunteers can no longer meet the demands of a growing awareness of poverty and of the slender thread of stability that exists.

With all its apparent need, why is Project K ineligible for federal money? Brother Joe quoted the words of many letters and personal contacts with OEO personnel:

"Your project cannot be funded in its present form, primarily because of its emphasis on emergency services rather than more far-reaching community development services."

Brother Joe said he can understand that "the war on poverty is necessarily a long-range affair, that its scope is as broad as its good will. But there seems to be a vital gap in the battle lines," he added.

"Through this gap human dignity slips away and dissention, chaos and riot enter. What price to fill this one small gap? To bring a pair of shoes from the suburbs to K Street so a boy can know he is a human being?" Brother Joe asked.

In trying to find the answer to this question, Brother Joe recalled the words uttered by Congress in passing the OEO Act of 1964: ". . . to mobilize the human and material resources of the nation, to combat poverty in the United States. . . ."

"Our job is not very sophisticated," said Brother Joe, "but we get the job done. We feed, we clothe, we love. We strengthen the family unit which is the heart of our great country."

FEBRUARY 3, 1969.

SIR: We would like to express our appreciation to those who responded to our correspondence.

The Legion of Mothers has been actively supporting a pilot project dealing with the poor living here in the District of Columbia over the past four years. It is known as the "K" Street Project and is under the direction of Brother Joseph Zambon. This project was executed eight blocks from the Capitol in North West Urban Renewal No. 1. Approximately 6,500 people in this ten block area were living in abject poverty.

The primary purpose of the pilot project was to reestablish the family unit, to strengthen and to stabilize it. This was achieved by first administering to the material needs of the families and at the same time instilling discipline, personal and social. As a result mothers were able to maintain their homes—properly administer to their children—who in turn, when properly fed and clothed, were able to attend school regularly and to function in society.

As a result of the "K" Street Pilot Project the following conclusions were drawn:

1. The family unit—the basic stucture of society—must be reestablished, reinforced and protected. A discipline must be instilled and fostered—based on pride—which is achieved through the administration of the material and other needs of the family. In the pilot project this was achieved by working with the mother in the home and with the children in the home and in the neighborhood.

The pilot project confirms the basic concepts purported by Daniel Moynihan, assistant to the President on Urban Affairs who recognized the family unit as the unique structure of society. Through the pilot project we have been able to realistically carry into practice a program placing the emphasis on the family unit. The lack of continuity in the home has substantially contributed to the problem of crime.

2. Grass root political representation of the poor is not a prerequisite to solving poverty. This representation will develop as the families and the community are stabilized. At that point the community will assert itself in bringing about desired change.

3. The O.E.O. Act of 1964 expresses implicitly the wishes of Congress and properly implemented would solve many of the problems of poverty. Proper implementation however, cannot be achieved under the existing Community Action Program, because the program does not realistically carry into practice the desires of Congress. We would hope that Congress in its devotion to the poor of our nation, would see that its wishes are carried out as stated in the Act.

We feel that using the "K" Street Project as a guideline, the principles purported by Mr. Moynihan could be realistically placed into action under the existing Act. With your support a successful poverty program could be executed.

Very truly yours,

Mrs. AGNES T. MARKS,
Coordinator, Legion of Mothers.

THE WHITE HOUSE,
Washington, March 17, 1969.

DEAR MRS. MARKS: Thank you for your letter regarding the "K" Street Project which you have initiated in North West Urban Renewal No. 1. Having driven through this area recently by car, I know firsthand the problem conditions you describe in your letter.

I will be most interested in the results of this very important experiment, dealing with the all-important tasks of strengthening the family.

Sincerely,

DANIEL P. MOYNIHAN,
Assistant to the President.

WASHINGTON, D.C., *September 22, 1969.*

SIR: The Legion of Mothers are in agreement with the termination of the Community Action Programs under OEO. It has been our experience in working with the poor in the "K" Street Project, that these programs have been ineffective in reaching the poor.

We have been impressed with the philosophy of Mr. Daniel P. Moynihan (Presidential Assistant on Urban Affairs), in regard to the reestablishment and strengthening of the Family Unit. We feel that the existing Community Action Programs do not fulfill these needs. These programs are unable to reach down into the neighborhood and into the homes, which is most necessary as demonstrated in the "K" Street Project.

The proposal by the new Administration to give monetary grants in the way of subsidies will be as equally ineffective because this method, is not in accord with Mr. Moynihan's original philosophy. It is necessary, to go directly into the homes to assist and advise these families. They are unable to function without proper guidance and overall interest concerning their welfare.

We would hope that in the wisdom of this August Body, that you would explore the need for a technique that will not fail to produce the results desired. The "K" Street Project is completely in accord with Mr. Moynihan's previous philosophy and realize if properly implemented would bring about these desired results.

Very truly yours,

Mrs. AGNES T. MARKS,
Coordinator, Legion of Mothers.

PROGRESS ON U.N. CONSIDERATION OF SOVIET JEWRY

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BINGHAM. Mr. Speaker, 58 Members of the House, on November 21, joined me in urging the State Department to take several steps to lend support to a request by Israel that the United Nations take up the consideration of the case of 18 Jewish families in the Soviet State of Georgia. These families, with great bravery, wrote to Israeli Premier Golda Meir to let her and the outside world know their petitions to Soviet officials for permission to leave the Soviet Union for Israel have been ignored for years. In effect, they are being held captive by the Soviet Union's refusal to allow them to emigrate to Israel.

The specific steps the signers of the appeal urged on the State Department, and a copy of the letter the 18 Soviet Jewish families, appeared in the November 21 issue of the RECORD.

According to status reports on the matter I have received from the Department of State and from Ambassador Yost, the documents concerning the case of the 18 Jewish families have been officially circulated by the Secretary General to all member delegations, and the United States has announced its concern over this case, and treatment of Soviet Jews in general, in the course of recent General Assembly debate. Both of these steps were among those suggested in our appeal.

The remarks before the General Assembly made by the U.S. delegate, Ambassador Rita E. Hauser, seem to me to be among the most outspoken and detailed that have been made by the U.S. delegation, and I feel that our representatives are to be commended for their forthrightness on this most important humanitarian issue.

Finally, on the matter of the Human Rights Commission taking up this matter, which was the purpose of one of our requests. I am informed that an item has been placed on the agenda of the next meeting of the Commission concerning violations of human rights and fundamental freedoms, and that it will be possible under this item to take up the treatment of Soviet Jews and the case of the 18 families in particular. In the past, the United States has supported requests by Israel to take up such matters, and I am hopeful the United States will again do so vigorously when the Commission meets in February.

The replies I have received from Ambassador Yost and the State Department, and the recent remarks on Soviet Jewry by Ambassador Hauser, appear below:

DECEMBER 10, 1969.

Hon. JONATHAN B. BINGHAM,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN BINGHAM: The Secretary has asked me to reply to your letter of November 21, 1969 referring to the request submitted to the Secretary-General of the United Nations by the Israeli Ambassador concerning the treatment of Soviet Jewry.

You expressed the feeling of those Members of Congress for whom you have written that the United States should join and support the effort of the Government of Israel to focus international attention and opinion within the framework of the United Nations on the problem of Soviet Anti-Semitism.

You listed three specific actions which the United States Delegation should take in achieving United Nations action on this matter. Two of the actions which you have proposed have in fact taken place.

The request submitted by Israel concerning the treatment of Soviet Jewry has been officially recognized in the United Nations. The letter of November 10, 1969 from the Permanent Representative of Israel which was addressed to the Secretary-General and which transmitted a copy of a letter from a group of eighteen Jewish families in the USSR has been circulated as an official document of the United Nations General Assembly to all the Member States. A copy of this letter as it appeared in document A/7762 of November 13, 1969 is enclosed.

The subject of the treatment of Soviet Jewry was discussed in Committee III of the General Assembly on November 25, 1969. The matter was first raised in the Committee by the Representative of Israel. Following upon his intervention, the United States Representative in Committee III, Mrs. Rita E. Hauser, delivered a statement on behalf of the United States Delegation expressing our concern over the situation of Soviet Jewry. A copy of this statement is enclosed.

Concerning referral of the matter to the Human Rights Commission, it would not be necessary as you suggest that the Chairman of the Commission act to request referral by the Secretary-General. The matter can be proposed for the Commission's provisional agenda in advance of a session of the Commission on Human Rights by any member of the United Nations. Or the matter can be raised during a session of the Commission by any member of the Commission speaking under an appropriate item already on the agenda. For example, the Commission on Human Rights at its 23rd session held in 1967 decided to give annual consideration to an item dealing with violations of human rights and fundamental freedoms in all countries. Pursuant to this decision there will appear on the agenda of the next session of the Human Rights Commission a general item with this title. It would consequently be possible for the question of Soviet Jewry to be raised under this item. At the last session of the Commission on Human Rights the subject of the treatment of Soviet Jews was raised by the Delegation of Israel and supported by the United States Representative under the item dealing with the report of the Subcommission on the Prevention of Discrimination and the Protection of Minorities. At the next session of the Commission on Human Rights the annual report of the Subcommission will again be an item on its agenda; the question of the treatment of Soviet Jewry might therefore be raised under this item as well.

The next session of the Commission on Human Rights is scheduled for February 23 to March 27, 1970. The U.S. Delegation to the Commission, will, as in the past, consult with the Delegation of Israel, which is also a member of the Commission, in order to determine the best course of action to follow on this matter at that meeting.

We appreciate having your views and those of your colleagues on this important matter.

Sincerely yours,

H. G. TORBERT, Jr.,
Acting Assistant Secretary for Congressional Relations.

U.S. REPRESENTATIVE TO THE
UNITED NATIONS,
December 4, 1969.

HON. JONATHAN B. BINGHAM,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN BINGHAM: Thank you for the copy of your letter, dated November 21, to Secretary Rogers containing suggestions for United Nations consideration of treatment of Jews in the Soviet Union.

I am pleased to inform you that action has been taken on your first and third suggestions. The Secretary-General circulated the request of the Government of Israel as document A/7762 (copy attached).

Regarding the third suggestion, Mrs. Rita E. Hauser, United States Representative to the United Nations Commission on Human Rights, made a statement on November 25 on the treatment of Soviet Jews during consideration of human rights questions in the Third Committee of the General Assembly. This statement, which was interrupted several times by delegates from the USSR and the Ukraine, supported a prior intervention by Israel. Copies of the Israeli and United States statements are enclosed.

We are pleased with the outcome of the Committee consideration of this subject. The Soviets demonstrated exceptional sensitivity during the debate, and we feel that our efforts resulted in worthwhile publicity and a good measure of sympathy among other delegations, several of which also spoke out.

We will be giving careful consideration to our position on the question in the Commission on Human Rights, as we prepare for the next session in February.

Sincerely,

CHARLES W. YOST.

STATEMENT BY MRS. RITA E. HAUSER, UNITED STATES REPRESENTATIVE, IN COMMITTEE III, ON SOVIET JEWRY, NOVEMBER 25, 1969

For many years my Delegation has manifested a continued interest in the protection of minority groups. We have shown this interest through statements in the General Assembly and in other relevant bodies of the United Nations, such as the Human Rights Commission, and through our participation in the work of the Sub-Commission for the Prevention of Discrimination and the Protection of Minorities.

Our interest in this important matter is not limited to any one country or region. It stretches the world over, and is based on general humanitarian principles. Needless to say, it would be somewhat anomalous if the United States were indifferent to the problem of protection of minorities, considering the sizeable ethnic and racial minorities which comprise the population of the United States.

For some time, it was a common theory in my country that the special qualities of the diverse ethnic and racial groups would disappear with time as generations succeeded the original immigrants to our shores. This was widely known as the "melting pot" theory. We now appreciate that while a certain melting into the American prototype does take place, many ethnic and racial groups have kept their separate identities and flavor—all the while Americans—and that this distinctness contributes so much to the dynamism and innovativeness of my country. It is best illustrated by the multitude of non-English words which enter our vocabulary, and in the changing culinary and artistic tastes of America. Distinctiveness is most cherished by us when it produces the diversity of outlook which we believe to be the essential ingredient of sustained progress in all domains of life.

It is in this spirit that many Americans remain deeply concerned over the fate of minorities close to them whose life and existence may be impaired elsewhere. Who could fault the interest Irish-Americans recently held in events taking place in Londonderry, or the continued and deep involvement of Black Americans, in particular, in the problems of *apartheid* and in the civil strife now raging in one part of Africa. These are natural and abiding bonds felt with others of the same ethnic or racial group. While millions of Americans are interested in the welfare of others elsewhere in the world, and have manifested this interest with great generosity in times of distress such as war, famine or earthquake, we appreciate that those closest to the minorities in question feel even the more involved in the welfare of these minorities.

It is in this light that my Delegation has repeatedly spoken out on the matter of protection of the substantial Jewish minority in the Soviet Union—more than three million people.

We wish to note that we read with consuming interest the literature distributed here by the Soviet delegation on this subject. It appears to us, on considered reflection and upon review of material available from many other sources, that the situation, in actual fact, of the Jewish minority in the Soviet Union does not correspond to their legal situation or to the situation described in the distributed literature.

We do not doubt that the Constitution and laws of the Soviet Union place Jews on an equal level with all other Soviet citizens. In fact, however, they appear to suffer from discrimination in employment and opportunities; disabilities in public life; and, most important of all, the Jews are being deprived of the cultural ingredients needed to preserve their separate identity: schooling, training centers for religious leaders and other cultural tools. We have serious doubts as to their ability freely to exercise their religion. May I say in this regard that it is not uncommon for equal protection of the law to exist on paper without a corresponding situation in fact. This discrepancy plagued my country for some time as to its Black minority, and we are still struggling to accomplish an identify of fact and law.

My Delegation was distressed by the contents of the recent petitions to the United Nations Human Rights Commission from Georgian Jewish families. These petitioners are brave people who, we feel, are compelled to cry out for help by the negative circumstances surrounding their life as Soviet Jews. In these last few days, my Delegation was presented with a copy of another petition, which we have every reason to believe is authentic, and which will shortly be delivered by private interested persons to the U.N. Secretariat. I should like to read parts of this petition, which I believe best illustrates the nature of life today for a Soviet Jew.

"It is already two years since my son—a writer—has been expelled from his society and deprived of all means of earning a livelihood. My son and I are forced to exist on my pension, which is 49 rubles. In this letter I shall try to explain for what sins we have been punished so severely.

"My son had never been particularly nationalistic. On the contrary, he had received a true internationalist education. But he found it impossible to overlook the insulting attitude toward his people. He could not ignore the injustices and cruelties, and could not reconcile himself to the degradation of man. He always considered national enmity as the greatest of ills.

"In 1966 my son decided to write a book dealing with the history of the Jewish people, so as to attain mutual understanding between peoples and nations. He was, however, denied the possibility of carrying out this work. Still, my son could not reconcile himself to a situation where one nation is exalted in every way and all its actions are proclaimed to be holy, while another, a small people, is debased in every way.

"Therefore, in 1967 he applied to the Government of Israel with a request that he be admitted as a repatriate. In answer to this request he received an invitation to come to Israel. The Soviet authorities agreed to consider my son's application for an exit permit only on condition that he give up his Soviet citizenship. He was thus forced to apply to the Presidium of the Supreme Soviet of the USSR, stating that he was giving up his Soviet citizenship. He sent this statement on May 31, 1967, but until this day he has received no official written reply—although he has been told orally that his request to give up Soviet citizenship has been denied. At the same time, because he made this statement, he was expelled from the Writers' Committee of the Literary Fund of the USSR and from his trade union—which has deprived him of the possibility of working and of earning a living.

"In answer to his request for employment, the demand was put to him to 'repent'. But what should he repent of? Is devotion to one's own people a crime? Are feelings of human and national dignity forbidden feelings? Has a man no right to defend himself and his people from insults? My son has drunk to the full his cup of suffering and degradation. Around him for many years there existed an atmosphere of anti-Semitism, as a result of which his family disintegrated. Even in his early youth he was expelled from school because he refused to consider his father 'an enemy of the people'. Later, he was prosecuted by the organs of State Security, was prevented from working, and it was demanded of him that he should 'frankly confess' that he had allegedly written an 'anti-Communist Manifesto'.

"In April 1969, my son again received from the Israel Foreign Ministry an invitation for permanent residence. The Soviet authorities, however, on various pretexts, refuse to let him go. I cannot understand why they need him. For two years already, he has been shunted aside from participating in the life of society; he knows no state secrets, he has no intention and no possibility of harming the Soviet State in any way".

We note with interest the Jewish Congress held in Bogota, Colombia, in early September, 1969, attended by delegates from many Latin countries. That Congress decided, after examining all the documentation available, that discrimination against the Jewish minority existed in the Soviet Union. The Congress prepared a petition to the Soviet Government which urged the following:

(a) That the Jewish minority be permitted to develop a free cultural life;

(b) That acts which directly or indirectly express hate or Anti-semitic prejudice should be impeded and punished;

(c) Guarantee Jews the free exercise of their religion in the same manner that is permitted to other religious groups; and

(d) Recognize that, as provided in the Universal Declaration of Human Rights, every person has the right to leave any country and the right to leave or return to his own country.

Other Jewish Congresses recently held in France and Sweden, among others, reached the same result.

We subscribe fully to this call made upon the Soviet Government. We hope that immediate steps will be taken to ameliorate the life of Soviet Jews and that their situation, in fact, will soon correspond to their situation in law. We believe this matter to be of consummate interest to the United Nations.

RAILROAD PASSENGER SERVICE

HON. SAMUEL N. FRIEDEL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. FRIEDEL. Mr. Speaker, recently the House Interstate and Foreign Commerce Committee's Transportation and

Aeronautics Subcommittee, of which I am chairman, was privileged to hear the testimony of Mr. Edward D. Unger, president of Federated Consultants, Inc., and Maj. Gen. John J. Lane, retired, of Consultants International, Inc. Their testimony summarized a report they prepared which deals with intercity rail passenger service in the United States. Following 3 consecutive years of hearings on this topic, their testimony was the first which provided substantial, concrete evidence on costs and minimum rail networks, which the subcommittee could use in considering the many bills before Congress. Their analysis and recommendations came at a time when rail passenger service is on the verge of extinction.

This careful study provides a solid framework within which the committee can consider the serious problems facing passenger service. Their estimates put in factual terms what needs to be done to provide a basic network of necessary passenger service serving the Nation's major metropolitan areas. I think the conclusions of General Lane's and Mr. Unger's study will be helpful to my colleagues in considering pending passenger train legislation, and I include them in the RECORD at this point:

RAILROAD PASSENGER SERVICE

(Statement of John J. Lane, Major General U.S. Army (ret.), November 13, 1969)

I am John J. Lane, Maj. Gen. U.S. Army (retired). I have been in the transportation business for twenty years. Before I retired in March of this year, I was the commander, military traffic management and terminal service for four years, an organization which influenced transportation expenditures of over two billion dollars a year. One of my responsibilities was that of supervising the movement of all Department of Defense military personnel in the United States. In 1968 this accounted for about six and one half million passengers of which about 1½ million were moved in groups of ten or more directly by my office. All were moved commercially. Currently, I am working as a transportation management consultant with Consultants International, Inc.

With me is Mr. Edward Unger, economic consultant of Federated Consultants, Inc. We want to thank the chairman of the committee for giving us the opportunity of presenting to you a summary of the results of a study we have made on intercity rail passenger problems. The study was made for the rail foundation, a group of private citizens dedicated to improving rail passenger service and the creation of a modern rail passenger network as part of a balanced passenger system. The comments made by Mr. Unger and by me today are personal and based on our research and experience in the transportation business. They do not reflect the thinking or position of the rail foundation or any other organization.

We recognize that a complete study to resolve all problems relating to rail passenger traffic including operating deficits, condition of service, condition of cars, condition of roadbeds, taxes, labor and regulations, and to form a balanced transportation system could not be accomplished in the time frame available to us if this Congress is to reverse the current trend of rail passenger discontinuances. Accordingly, we have looked at the overall passenger requirements problem, and we have concentrated on those areas which we feel could help reverse the current trend of discontinuances and poor service by providing Congress with a basis for action this year. An action which will still be within any scope of action which may be required at a future date.

Our research indicates that the Government can be faced with a major passenger movement crisis within the next five years. Commenting on a bill which would upgrade the Nation's airports and airways, Mr. Volpe of the Department of Transportation, said in September: "We are on the verge of a real emergency situation calling for prompt remedial action."

An Air Transport Association (ATA) study forecasts that passenger volumes by air alone will increase four fold by 1985. The 1968 figure of 146 million passengers will reach 266 million in 1975 and 669 million by 1985. To the forecast add airport flight requirements for air freight that will increase from 14 million tons enplaned last year to 25.2 in 1985. How such requirements for flights can be handled is not quite clear to anyone at this time.

The cost of providing transportation facilities is not small. It should be kept in mind that a new jet port for New York will cost in the order of $400 million. Expressways cost around $10 million per mile in urban areas. Railroad bed rehabilitation costs start at about $20,000 per mile. In addition, there is strong public reaction developing in this and other cities to converting desirable real estate in and around urban areas to layers of concrete.

What is needed, obviously, is a national transportation policy which requires consideration of all transportation resources in solving the problems of the future. It is a basic mistake to attempt to solve the transportation passenger problems of this country by any single mode. Dr. Nelson, formerly of DOT, has said, "There cannot be effective coordination of transportation at the Federal level so long as the Bureau of Public Roads counts up benefits and costs of highway systems only, and allocates funds for highway construction on that basis; so long as the Federal Aviation Administration reckons benefits and costs of air systems only, and grants funds for airport construction on that basis; so long as the Federal Railroad Administration considers rail systems only and acts on that basis, and so long as the Corps of Engineers totes up benefits and costs of waterway systems only, and expends waterway construction funds on that basis. . . ."

Obviously, development of a national policy is a long range requirement for passenger problems that face us today. Conditions encouraging air and highway travel over the past 20 years have changed considerably in the recent past. Expanding requirements for individual travel have caused a saturation of many of our larger airports and clogged highway access to larger cities during critical periods. Highway accidents and aircraft near misses have caused concern across the country. Real estate in and around our expanding larger cities is either astronomically expensive or not available to meet requirements for future air and highway travel. In the meantime, rail passenger capacity has been drastically curtailed in the past 2 years.

An objective look at all modes of passenger transportation is required as soon as possible so that this nation can meet its requirements for transporting people by establishing a total system which includes all modes and in which each mode complements each other mode without duplication effort. Such a system would provide for meeting all passenger requirements at least cost to the government. It would require an objective reallocation of governmental transportation funds to support the capacity required of each mode. Without the long range objectives of a national policy, problems are handled only on a piecemeal basis and on the basis of solving the problems of each mode separately. This is not to say that all action should be suspended by the government pending an ideal solution to the problem. Some constructive emergency treatment is needed now.

Passenger movement problems are not static. At a point in time where highways and air terminals are facing saturation with projections of increased passenger traffic in the years ahead, we stand at a threshold where rail passenger service is about to be phased out as a future capability if not supported by the government. We should not wait for the ultimate solution of the long range studies which must be made if we are to have any rail passenger service left. Virginia Mae Brown, chairman of the ICC, stated in a letter to Senator Magnuson on 16 July 1969, "The past year has only substantiated our opinion that significant segments of the remaining intercity passenger service, except for service in high density population corridors such as the northeast corridor will not survive the next few years without a major change in Federal or carrier policies."

The causes of deterioration of rail passenger service have been many:

1. Government support of airports and highways with very little to the railroads encouraged movement by air and highway.

2. Declining revenues caused many railroads to lose interest in carrying passengers and resulted in a deterioration of service.

3. The high cost of acquisition of new equipment and the cost of improvement of roadbeds resulted in declining expenditures for capital improvements.

4. Lack of planning by many railroads and lack of a national transportation policy for the movement of people caused deterioration in rail service and diversions to other modes.

5. Approval of discontinuances in isolation without an assessment of the impact of each discontinuance on other rail schedules on a national basis resulted in poor service.

As a result of our three month study, we believe it is the consensus of knowledgeable people in and out of the railroad business that if rail passenger traffic in this country is to continue at all with a level of service acceptable to the public, some kind of public support is required now. An excellent study made by the ICC "investigation of costs of intercity rail passenger service" published on 16 July 1969 indicates the seriousness of current passenger losses to the railroad industry. Of eight railroads studied, carrying 40 percent of the passenger load, the average loss was fourteen and three-quarter million dollars in 1968. The highest loss for a single railroad was almost 22 million dollars. As a result, railroads cannot be expected to make large capital investments in passenger operations at this time.

Unless our Government embarks on a realistic and immediate solution to the current intercity passenger movement problem, the movement of people will soon become the bottleneck of our expanding economy. Air and road traffic will be super-saturated; rail traffic will be non-existent.

Realistically, the rail mode appears to provide the most promising immediate solution to intercity passenger movement. The railroads do not need more real estate. Their rights of way already provide access to the centers of most cities. Improvement to roadbeds provide freight as well as passenger advantages. They can move masses of people. Resulting air pollution is minimal. The Metroliners already have shown that the public will patronize trains with decent cars and service rather than be subject to the increasingly frequent delays of air traffic on short runs.

If intercity rail passenger traffic is to survive at all, action by this Congress is highly desirable. The rail passenger system needs an immediate transfusion of support if complete collapse is to be circumvented. It is essential that Congress reverse the current trend of discontinuances by providing guidance to the Interstate Commerce Commission, Department of Transportation and the railroads this year and by setting up within

the DOT initial funds and an implementing organization which can carry out the desires of the Congress now and in the future.

To that end and to provide a yardstick for your decisions, our study proposes for the first time we believe a basic intercity network which can be used for development of equipment costs now and for an expanded system as needs arise. Historically, each railroad is an island and operates accordingly. We recommend considering all rail passenger traffic as part of a balanced national system. To that end, we hope that our suggestions will provide the Congress with a basis for concrete action this year which will be well within the parameters which long range studies may develop for future action. Any action by you would be a first step in rescuing this important national asset from further deterioration. A national asset for which I am certain there will be increasing demands in the future.

TESTIMONY OF EDWARD D. UNGER, PRESIDENT, FEDERATED CONSULTANTS, INC., WASHINGTON, D.C.

We would like to summarize the results of the study we recently performed for the RAIL Foundation of Washington, D.C.—*A Preliminary Plan for Up-grading the U.S. Inter-City Rail Passenger Fleet.* The study generally concerned with the current and future status of inter-city rail passenger service in the United States. Specifically, we directed our attention to determining the amount of money that would be required to *begin* rehabilitating and/or replacing the existing fleet, as the basis of a longer-range program of up-grading the entire fleet.

In view of the many bills before this Congress dealing with inter-city rail passenger service, we would like to direct pertinent parts of our findings to the possibility that there may be public investment in the industry. Such public investment should be approached with the fullest knowledge available and in consideration of all alternatives. To this objective we directed our efforts at examining the major historical mistakes which helped create the present situation, how, if those mistakes are rectified it would set the stage for rejuvenating competitive inter-city service, and the number and cost of equipment for an alternative five-year program to begin up-grading the passenger car fleet.

The decline of inter-city service has taken some twenty years to reach its present low level. Virtually all of the data reflecting this period indicates declines in inter-city service. There are, though, a number of identifiable reasons for the decline; some were induced internally within the industry and some were created externally; it all took place, however, in lieu of a national transportation policy.

The basic cause for the current situation is that inter-city passenger service was not responsive to a shift in demand for it. For some seventy-five years trains were the dominant force of public transportation in this country. Its function varied from trans-continental runs to shorter-haul inter-city runs. Regardless of distance most trains developed as extended, continuous path transport modes, beginning at one point and continuing through a number of other points until it arrived at the end of its journey. Each train was a journey by itself, a process that worked well in the absence of competition.

Over-all, the growth of air and highway travel caused a change in the demand for rail travel. Geographical factors in the West and population in the East combined with competing technologies to precipitate the change. At a time when piston planes then jets were providing trans-continental transportation in hours, trains were still operating every day over six routes to the West Coast. Rigid adherence to daily service in face of declining demand resulted in polarized ridership patterns. Transcontinental routes to the West Coast, for instance, now are most heavily travelled in the summer months, showing 75% capacity utilization for three or four months and 30–40% capacity for the remaining months.

Inter-city service in the more densely populated eastern part of the country declined for more complex reasons. Population became concentrated into metropolitan groupings in all regional subsections of the eastern half of the country. Not only did air and highway travel between these metropolitan areas provide competitively substitutable modes in speed and technology but most importantly did they compete in concept and function. Daily trains still left one city, stopped at numerous others and terminated at another city hundreds of miles away. In the meantime demographic activity was generating a demand for transportation between large metropolitan areas. An increasing volume of travel developed back and forth between the population centers.

At the same time the nation was criss-crossed with standard-gauge tracks. The total number of railroads operating over these tracks, however, was substantial. Railroad passengers, while physically being able to travel virtually anywhere by rail, were faced with a number of different management philosophies.

Even today, there are some twenty-eight individual railroads which provide some type of inter-city service. While this is a dramatically fewer number of railroads than existed previously, it still represents the regional characteristic of our railroads. Each railroad, as you can see from these examples, has its own parameters of track. The whole network is a total of its components—in this case not something efficient by itself. A through-train run by more than one railroad is subject to the individual vagaries of each management. So basic a process as check-through baggage, for instance, may be challenged by a carrier more interested in commuter service. Furthermore, equipment procurement loses economics of scale when each road purchases a small lot with widely varying specifications. Even two or three discontinuance proceedings involved in individual sections of one train reflect the highly regionalized nature of the inter-city system.

Historically the highmark in rail passenger service came just after World War II, with the decline beginning in the 1950's. It was during that period that the competitive effects from other modes began to be reflected in fewer number of passengers and lower revenues. As losses attributable to inter-city trains increased, the common reaction was to reduce those losses by reducing costs. This was accomplished by the singularly narrow method of eliminating one train at a time. Each whole train discontinued under Section 13–A was a reduction in total costs equal to the cost of that train.

Of course, the ancillary result was a rapid decline in the number of trains and level of service. It also precipitated a more than proportionate decline in the volume of equipment ordered and delivered, and provided the impetus for a trend to the repair of equipment aimed at preserving safety often to the abandonment of comfort. A continually deteriorating financial situation simply inhibited continued investment in passenger equipment.

The twenty year decline in inter-city service developed in lieu of a national transportation policy. Each competing mode developed in response to many demands, especially in relation to public activity in its behalf. The highway trust fund bolstered the Interstate Highway System and the Federal Government has the responsibility for building and operating commercial airports. Rail passenger service, throughout, remain independent of the changing factors which affected its position.

The decline in intercity equipment has more than proportionately reflected the decline in the service itself. The fleet is old and generally tends to be deteriorating at least from the viewpoint of comfort. The last significant orders were delivered in 1956—fourteen years ago. This creates the situation where, even if there is a surplus of equipment for current operations, its age and condition is questionable. Obviously, a public investment program would require a census of equipment using a standard classification schedule.

Our basic objective was to create a desirable level of service, while correcting existing mistakes. We then determined the minimal number of cars which would be needed for this basic system. For the purpose of determining the costs of a program for rehabilitating and replacing the inter-city fleet, we super-imposed existing equipment on the equipment which would be necessary for a basic, desirable level of service. Because it would take up to ten years to completely replace the existing fleet, we assumed a phased five-year program in which to begin rejuvenating inter-city service.

The difficulty in measuring inter-city passengers is carried through in attempting to determine which equipment is used for inter-city travel. Our research, for example, showed a 5% to 15% difference in the number of inter-city cars derived from two reliable sources—AAR Statistics and the Official Rail Equipment Register. Regardless of the overlapping in counting, it was determined that a sufficient volume of equipment exists to begin a rehabilitation/replacement program.

We assumed that the present level of service, including existing equipment, would be the beginning of a comprehensive upgrading program over an extended period of time. On this basis we established two distinct types of service, depending on the unique demand for each.

Conceptually, short-haul service is based on a deviation from existing inter-city service. The key factor was to avoid extended transportation services connecting a series of cities over long distances. It is based on the concept that rail transportation is more competitive in providing frequent service between two discrete points. Such intensive short-haul services involves creation of city-pair links or routes. It creates a shuttle-type effect, with at least one daily-pair of trains between each city pair.

In order to determine economic demand for the high level of investment required, we assumed a short-haul network based on population concentrations, or Standard Metropolitan Statistical Areas with populations in excess of 500,000. Axiomatically, a large proportion of the demand for inter-city travel will come from these areas.

Of approximately fifty-five population centers, excluding intra-Northeast Corridors, there are some 75 pairs of cities generally 300 miles or less from each other which form the basic passenger network which can be expected to generate competitive demand for train service.

This short-haul intensive service will require at least one daily pair of trains between each city grouping. Since this is the beginning of a rejuvenated network, it may be anticipated that other city-pairs will generate demand for additional daily trains.

The long-haul network is primarily designed for those routes for which there is a unique demand. The New York to Florida route, for instance, can operate daily at a profit. Some of the Western routes, which are operated at higher capacity during the summer months, may require only three-times-a-week service during the winter.

The smallest number of cars required for the basic intensive service networks is 700

coaches, 100 lounges, 300 foodservice and 100 sleepers; totaling 1,200.

(Throughout, we were concerned with main line coaches, diners, lounges, and sleepers. It was assumed there were enough locomotives available and declining mail and baggage uses obviates the need for more headend cars. We also excluded the Northeast corridor because of the existing level of investment.)

Regardless of the source of information, it is obvious there are sufficient numbers of cars in existence—between 4,500 and 5,000 coaches, diners, lounges, and sleepers. Their usable condition, however, is one of the most speculative questions to be asked.

We arbitrarily determined that to be serviceable, some would require light rehabilitation and the majority medium to heavy rehabilitation.

Absolute cost data for inter-city equipment is extremely ambiguous. Existing equipment is anywhere from 15 to 60 years old. Even the newest equipment would likely require $10,000 to $70,000 each to rehabilitate. While these costs are low relative to new car costs, after rebuilding it would still be aging equipment. An accelerated applied research program may provide significant improvements in design and facilities for new equipment. Further, it is widely assumed that most equipment physically lasts less than the 25–30 years depreciation allowed for accounting purposes.

With the 1,200 cars needed, and cost of light rehabilitation and medium to heavy rehabilitation, it would require $50.2 million to rehabilitate only 1,200 cars in the existing fleet.

However, if there is an alternative investment possibility, and there was only total replacement required, assuming 1,200 cars to begin rehabilitating the network, it would take $345 million to build the new equipment, and we have estimated somewhere approximately $4 million for a one-year research program.

New equipment costs can only be estimated on the basis of the few coaches built in the last ten years and by comparison with commuter cars now being built. While new cars would be expensive, they would be new and incorporate new configurations developed during the applied research program. In addition, it may be assumed that new equipment would reduce maintenance costs.

We should like to emphasize the perspective both of these cost charts are to be put in. In the first case, they are to form the nucleus of a rejuvenated system and do not represent the total of all passenger equipment which will be necessary over a long-range program.

They are designed for a five year period and are constructed to be alternative, as either individually or in an evolving program where some cars are rehabilitated while new cars are ordered and delivered. This will give the government the option of phasing programs as events develop. Because short-haul intensive service is a departure from existing concepts, we assume the need for departure from complementary components of inter-city service. Short trains incorporating new technologies will probably reduce manpower demands per individual train.

New technologies will also be required if the system is to be rejuvenated. The most current events point to a change in railroad research and development methods. The preponderance of thought in this country has been towards such exotic developments as the tracked air cushion vehicle. A consortium of three North American companies, conversely, recently acquired the rights to a British process which would permit speeds up to 150 m.p.h. on existing track. The important aspect is that it allows high speeds with existing basic configurations.

For these same reasons we suggest an intense one year, $4 million applied research program.

TEN CONGRESSMEN JOIN IN STATEMENT ON GREECE

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. EDWARDS of California. Mr. Speaker, the military dictatorship of Greece stands convicted today before the world by its own action in withdrawing from the Council of Europe. The leaders of that dictatorship, minutes before it faced a verdict by 17 European nations on its acts of torture and oppression, pleaded guilty to those charges by fleeing the scene and the council. Let there be no mistake, the dictatorship recognized it could not afford a verdict from honest men and honest nations.

It is becoming increasingly obvious that the days of this dictatorship are numbered. The earlier worldwide condemnation of its oppressive rule by the European Commission on Human Rights, as well as by the resolution of the NATO Assembly, had isolated the Greek dictatorship. Within Greece, political leaders of all tendencies have defied the dictatorship's threats of prison and exile to demand the restoration of free elections, democratic rights, and the rule of law. Even that small part of the population which once supported the junta has been alienated by its cruelties and its pervasive corruption, which surfaced so blatantly in the maneuvers surrounding the Onassis-Niarchos competition for an oil refinery. At the same time the incompetence of the dictatorship has undermined the foundations of the Greek economy. Commerce and industry have stagnated, while the country has gone deeper and deeper into debt. The balance-of-payments deficit for the first 7 months of 1969 exceeds that for any previous full year.

The claims of the dictatorship that anarchy and a Communist takeover led it to overthrow the legal government of Greece has been disproven before the nations of the world. But now, through the actions, corruption, oppression, and torture of that dictatorship, anarchy does threaten.

The question today is not whether the dictatorship will fall, but when and how, and what will happen after its departure. For if the fall of the present dictatorship is significantly delayed, and if the dictatorship, by bribes and promises, should still retain enough support in the armed forces to conduct a last ditch resistance, the results could be tragic. Despite the best efforts of Greek democratic leaders to assure the reestablishment of full legal guarantees for all, the pent-up anger of the Greek people at the dictatorship's atrocities might overflow the channels of legality. At the same time, military resistance by the dictatorship would produce large-scale bloodshed as well as horrible destruction to Greece.

To assure a swift and bloodless restoration of democracy and legality, constructive U.S. action at this point is necessary. Above all, it is essential that the United States take steps that will leave no doubt in the minds either of the Greek people or the dictatorship of where this country stands.

In order to convince even those military elements who still back the dictatorship because of the favors they have received and expect from it, the United States should stop immediately the shipment of all military aid, and join with other countries to bar the dictatorship's acquisition of weapons through commercial channels. The United States should recognize the stand of the Council of Europe and should support efforts to suspend Greek membership in NATO until Greece restores the democratic rites which NATO was founded to defend. The suspension of arms deliveries and rapid action by the United States also are necessary because of Papadopoulos' threat to apply for admission to the Warsaw Pact.

The friendship of the Greek people for the United States has been traditional. Today the United States should act because of its friendship and kinship to the Greek people, act by denying the oppressors of Greece arms and and support.

In addition to making it clear in these ways that we are the allies of the Greek people and not of their oppressors, the United States could help to effect a peaceful transition from dictatorship to democracy by offering to arrange for the removal to exile of members of the present dictatorship. Such an offer would make it possible for the dictatorship to leave without widespread bloodshed and without facing the penalties it deserves for its crimes. Such an offer should remain open only for a short period of time, for if the transition is to be peaceful it must also be swift. A continuation of the dictatorship can only lead to further bloodshed. The safe removal of the leaders of the dictatorship should be arranged only if it is to avoid bloodshed.

The nightmare in Greece may be coming to an end. The decision on whether it is going to end lies both in Greece and in the United States. Firm action by the United States can help now.

Joining me in this statement are GEORGE BROWN, JR., PHILLIP BURTON, JOHN CONYERS, JR., BOB ECKHARDT, DONALD M. FRASER, ROBERT W. KASTENMEIER, ABNER J. MIKVA, BENJAMIN S. ROSENTHAL, and WILLIAM F. RYAN.

EFFECTS OF WATERSHED PROJECTS ON WILDLIFE

HON. BENJAMIN B. BLACKBURN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BLACKBURN. Mr. Speaker, a few days ago all Members of the House received a letter from me concerning the channelization of the Alcovy River in the State of Georgia. At that time, I presented the Members of this House with an article which I wrote for Field & Stream magazine showing the adverse effects that channelization has upon wildlife.

Since that time a number of Members

have requested additional information concerning the adverse effects of watershed projects upon wildlife. For the information of my colleagues, I am hereby inserting several articles which have come to my attention which I believe will answer any questions on this subject:

STATEMENT ON SMALL WATERSHED PROJECTS BEFORE THE GEORGIA GAME AND FISH COMMISSION, ATLANTA, GA., MARCH 20, 1969

(By C. Edward Carlsen, regional director, Bureau of Sport Fisheries and Wildlife, Atlanta, Ga.)

Gentlemen, I am honored to sit with you today to discuss a matter of mutual concern, the continuing despoilation of fish and wildlife habitat. This is but one example of environmental degradation which is going on at an ever-accelerating pace all around us. Air pollution, water pollution, estuarine destruction, urban sprawl are the prices we pay for the cultural developments accompanying our burgeoning human population.

Some are inclined to condone all our abuses of the planet as the cost of *Progress*. I disagree with that philosophy and so does everyone who has taken time to analyze the situation. An awakening public is beginning to appreciate that a check-rein on racehorse exploitation and growth is both a good and a necessary thing, for we have come to realize that conservative management of our environment is essential to the survival of the human race.

Conservation of the fish and wildlife resource is a significant element of the whole. Fish and wildlife are part of the web of life. They are indicators of a healthy environment which grows a healthy people. That, gentlemen, pinpoints our role and responsibility in the scheme of things.

I remember with fondness the waterfowl and squirrel hunting the Alcovy supplied 10 and more years ago, but in the year and a half I have been back in Georgia I have not had the opportunity to become reacquainted with the area. Therefore, I am not going to talk about the Alcovy project per se. I am not adequately familiar with it. I do, however, wish to support Director Bagby's statement concerning the time schedule as it relates to the project. My record shows that we received the watershed data sheets on July 12, 1968. And I do desire to apprise the honorable Representative Sorrels that streambottom hardwoods are indeed choice waterfowl habitat. There are two broad groups of ducks, diving ducks and puddle ducks. The diving ducks are the ones he was referring to which require a "runway" for take-off. The puddle ducks take off like quail and I am sure you are familiar with them.

I wish to spend the few available minutes in talking about stream manipulation projects, and in particular channelization and drainage features which destroy or set the stage for the destruction of fish and wildlife habitat.

Stream modification projects have destroyed between three and four million acres of bottomland hardwoods of significance to waterfowl in the last 20 years in the Southeast alone. In contrast, gentlemen, we have acquired only 158,751 acres of wintering ground habitat for waterfowl from 1948 to 1968 in Region 4 and it has cost $12,043,325 from our Duck Stamp Funds in the process.

Let me say immediately that not all of these losses have been caused by P.L. 566 projects. Public Works activities authorized by the Congress have also been involved. In some cases these and P.L. 566 projects have been intermeshed on the same stream, one complementing the other. However, the net result has been the same, alteration of fish and wildlife habitat.

[From Economic Geography, Vol. 29, No. 3, July 1953]

SETTLEMENT CONTROL BEATS FLOOD CONTROL

(Presented before the Association of American Geographers at Cleveland, March 31, 1953, by Walter M. Kollmorgen, chairman of the Department of Geography, University of Kansas)

In the Kansas River Basin, as well as in many other river basins, there is an urgent need for alternative plans dealing with flood problems. Such plans should be submitted to the public for acceptance or rejection, and they should be submitted with revealing price tags. Under present procedure, the public is confronted with a one-or-nothing program and the proposed program is likely to be extravagant in financial cost as well as in land cost, *i.e.*, land destroyed by permanent flooding. Geographers and other technicians could be very helpful to engineers with a dam-building complex by exploring alternative arrangements to reduce flood losses and translating these various arrangements into plans for public consideration.

FLOODPLAIN CANNIBALISM

Present programs for bringing some measure of flood protection to the Kansas River Basin—and also certain other basins—by the construction of a multiplicity of dams represent an interesting form of floodplain cannibalism. This cannibalism results in part from the common misconception that flood control means control of floods. Since no scheme yet devised will control floods in the Midwest, the tantalizing mirage of "flood control" must lead to a multiplication of dam structures until major portions of our prized alluvial valleys lie buried under a stair-step series of lakes.

Equally interesting is the fact that irreplaceable farm land is being cannibalized by replaceable sites for urban developments. During the 1951 flood, according to the Corps of Engineers, about 90 per cent ($479,000,000) of the damages experienced along the main stem of the Kansas River occurred in urban areas. It is this large urban loss which is now cited to justify the greatly expanded dam-building program in the Kansas River Basin. To bring a greater measure of protection to these urban areas it is proposed to flood permanently from 150,000 to 200,000 acres of the best agricultural lands in eastern Kansas or in lowlands adjacent to the Kansas River. Flooding these large tracts of lowlands will also blight the economy of many miles of adjacent uplands which are or should be in grass. These lowlands supply large amounts of concentrated feeds to supplement the forage of the uplands. It follows that the present plan of controlling floods is nothing less than a Rube Goldberg dream and one with a frightful price tag.

Let us try to gauge the nature of the appetite of the carnivore many propose to liberate in our floodplains. In 1944 the Pick Plan recommended an expenditure of somewhat less than one billion dollars to bring a reasonable measure of flood protection to to the entire Missouri Basin (House Document No. 475). Since then and particularly since 1951 the flood control plans for the Kansas River Basin alone have been so extended and elaborated that in extent, with the result that much of the hill land and slope land has a thin veneer of soil. The Flint Hills of Kansas extending north-south of Topeka and Manhattan are an extreme example of this kind of land. Here lie thousands of acres of land with only a few inches of soil and soil material on a very shallow bedrock. Much of the ramaining land has a hardpan within a foot of the surface and bedrock at a depth of two to three feet. This land already presents a serious problem in management because of the tendency to overplow and overgraze. Flooding a third of the floodplain lying in this area will create an almost insoluble problem in soil conservation. Many hundreds of upland grazing units within the area will lose a dependable supply of concentrated feeds. In combination, these changes mean more overgrazing, more overplowing, more small, uneconomic farming units, and, most of all, more devastating erosion. These geographic changes seem to be completely ignored by the Army Engineers and also big city pressure groups, who seem to be totally ignorant of where their food comes from and what gives them employment. It is urgent and even imperative that in the problem we face, structural engineering become the handmaiden of geographic engineering if we are to go forward rather than backward in a resource conservation effort. The tragedy of the Pick-Sloan Plan is that it destroys more wealth than it creates, and it achieves this by squandering several billions of dollars of public money.

COST-BENEFIT CLARIFICATION AND RECTIFICATION

It is submitted that geographers and other technicans can make a basic contribution to all water-control and water-management programs by scrutinizing and rectifying a weird structure of fairyland economics generally referred to as cost-benefits ratios. This structure has become particularly complicated with the advent of the multiple benefits concept. By magnifying one or several real or imagined benefits, almost any kind of engineering monuments can now be justified. This is particularly true of non-reimbursable benefits because beneficiaries make no special payments for projects developed and so no account can go into the red. If beneficiaries would be required to reimburse the federal Treasury for many of or most of the benefits listed on water-control programs, the entire program would shrink to size and sense overnight.

From the standpoint of landforms and soils, floods have a constructive as well as a destructive side. This should be, but is not, reflected in flood-loss estimates. Consider, for example, the major and unusual flood in the Kansas River Basin in 1951. Some alluvium deposits improved terrain and drainage; other deposits made for an improved soil structure after shallow or deep plowing. Still other deposits of proper texture will prove of value in that they increase the inventory of certain plant foods. Let us briefly consider some of these constructive processes.

Prior to the flood, some floodplain farmland was uneven in elevation, possibly with pockets of water, wet spots or seepage spots. Drainage problems may have made for some waste land or land marginal for farming. The fill or deposits left by the flood obliterated some of the uneven terrain and greatly improved the drainage. Examples of this are not difficult to find. A friend of mine remarked that before the flood he valued his land at $300 per acre, but after the flood he valued it at $400 per acre because fill of proper textured material had solved all drainage problems and removed all waste land. Here is an example of where an inventory of flood losses should also include an inventory of flood gain.

Another flood gain that was not uncommon was the deposit of sandy material of limited depth over fine-textured gumbo land. Gumbo land presents problems in management, drainage, and crop production. Several inches of sand deposits can readily be plowed into a gumbo soil, and in combination this mixture greatly improves the working qualities and productivity of the soil. Even deposits of sandy material from 12 to about 24 inches deep were mixed with formerly exposed soil material by deep plowing, that is, plowing three to four feet deep. Plowing at a depth of about three feet cost about $30 per acre. This expense was associated with the flood loss and was therefore largely paid for by the government. Now it develops that these

deep-plowed fields yielded about 20 bushels more corn per acre than the shallow-plowed fields which had little or no fill or deposits. The result is that plans are now underway to deep-plow other fields with little or no deposits to rejuvenate them or to increase their productivity. In other words, increased yields from many deep-plowed fields in one year paid for this special operation and there are those who believe that deep plowing may become a standard practice in the floodplain to increase soil productivity. Here is another benefit that was not listed to partly offset the flood losses.

It is not necessary here to dwell on the value of new alluvium of proper texture. For several thousands of years these new deposits made a garden spot of the Nile Valley. Now that dams are regulating more and more the flow of that stream and the silt remains behind the dams, Egypt is rapidly approaching productivity and fertilizer problems. Cotton also yields a shorter staple and a more brittle fiber. Closer to home we have the example of the Missouri River floodplain between St. Joseph, Mo., and Sioux City, Iowa. In 1952 farmers in that floodplain boasted some of the best corn and soybean yields they ever experienced—early in the year their lands were flooded and new alluvium was deposited. The flood losses were given wide publicity; the high yields that followed have hardly been noted. Here again, only the losses are stressed and magnified, partly to justify big engineering works.

That too much stress has been given to land destruction is well indicated in news releases by agricultural specialists at Kansas State College, Manhattan. Under the date of Sept. 11, 1951, Manhattan, Kansas, comes this news item:

"Flood a Soil Aid—K-State Scientist Says Most of the Kaw Valley Will Produce Better as a Result—Can Build Up the Sand—Only Loamy Earth Is Damaged by Deposits—Some Drainage Problems Erased.

"A Kansas State College soil scientist says a large part of the land flooded by the Kansas river in July will produce better crops in the future because of the flood.

"Describing the popular conception of soil damage as 'grossly exaggerated,' Harry C. Atkinson, associate professor of soils, said the sandy soil many persons think is ruined will be the best sweet potato and watermelon land in the valley within a short time.

"Atkinson and W. A. Badgley, USDA soil scientist, have been surveying the north side of the Kansas river from Wamego to Lawrence since April. They have run a spot survey of the north valley from Wamego to Lawrence, but will not complete their detailed survey until 1952.

"Atkinson said it is too early to give figures, but he estimated that only 10 to 20 per cent of the severely flooded land on which all crops were lost has been damaged by the flood.

"The other 80 to 90 per cent, he said, eventually will yield better crops.

"Pictures the college has of sand deposits after the 1903 flood show they now are part of land that is selling for $400 to $600 an acre, Atkinson said.

"Once the sandy soil is built up with organic material it will produce alfalfa, sweet potatoes, corn and other crops—the same as the 1903 sandbars have been doing consistently, he said.

"Sand deposits on loam soil are detrimental, he continued, but sand on sand makes no change in the ability of the soil to produce. Sand on clay is beneficial so far as workability of the land is concerned.

" 'We've heard nothing but bad news from the flood,' he said. 'Besides enriching a large part of the river valley land, it filled in some low spots that were formerly drainage problems. Now they will drain off.'

"Where raging water scoured and cut away top soil, it definitely lowered the productivity and the value of the soil, he said, but those washed away spots are not completely sterile and will produce lighter crops.

"Atkinson's survey shows much of the flooded land is richer with elements needed for crop production than it was before the flood. There is little or no need for fertilizers except on land with heavy sand deposits, he said, and they need nitrogen added." (Kansas City Times, Sept. 12, 1951.)

The foregoing estimate, it should be noted, comes from a soil scientist who was in the process of studying the flooded lands.

Present methods of figuring cost benefits also do not make allowances for the disturbed hydrological conditions which follow the impounding of large bodies of water in floodplains. Suppose a dam about 100 feet high is thrown across a floodplain and impounds a lake with a depth somewhat less than 100 feet. Ground-water conditions will be disturbed for many miles above the upper part of the lake and deterioration of land will follow. Moreover, the stream debauching into the lake will have its gradient disturbed, will drop part of its sediment before it reaches the lake, and will experience a rapid process of aggradation. Before long it will meander frequently and widely over the floodplain, leaving stranded bridges, causing road problems of many kinds, and also bringing many losses to farmers. A realistic method of cost-benefits computation would have to provide for much land deterioration and loss above impounded lakes, particularly in wide floodplains with gradual slopes.

Many other peculiar cost-benefit manipulations serve to justify a clutter of dams in the wide floodplains of the Midwest. Multiple benefits are usually mixed into this fruitcake which is then wrapped as a gift package. Although flood mitigation may be the main purpose in building a dam, other benefits may be assigned to irrigation, power development, and river navigation. However, these multiple benefits usually create a conflict in purpose. For example, for irrigation, navigation, and hydro-electric power, water needs to be stored in large quantity, but for flood control reservoirs should be empty when a flood season threatens. To serve these partly conflicting purposes, a great reservoir is built, at tremendous cost in money and irreplaceable land, which can be kept partly filled and partly empty.

Particularly the benefits assigned to navigation have no basis in fact or in promise. Expenditures on the Missouri River to bring water navigation to Sioux City are rapidly reaching the half-billion dollar mark. This program was inaugurated in the 30's in terms of a 6-foot channel and this was largely achieved by the early 40's. The traffic at that time, however, needed to be nearly 1000 per cent greater than it was to justify the development costs. Subsequently a 9-foot channel became the objective, and this has largely been achieved. Even with this channel depth, the recent traffic on the river is but an insignificant proportion of the tonnage projected to justify development costs. It is still correct to say that the real cargo hauled on the river needs to be increased by over 1000 per cent to justify the money thrown into the muddy Missouri to make it navigable. Compounding this nonsense, the government has even placed its own barges on the river and thereby increased the waste of the taxpayer's money, for during most years these barges have lost money for the government although they are not required to pay one cent for the use of this expensive waterway. To flood even one acre of good farm land to achieve this sort of waterway is a social, economic, and political iniquity.

GEOGRAPHIC ENGINEERING WILL MITIGATE FLOOD LOSSES

In the lower Kansas River Basin as much as one-half of the best floodplains may be destroyed by present and proposed dams. Justification for the destruction of so much good land is based on flood losses, particularly losses which occurred in 1951. These losses, however, are largely the result of unwise encroachment on the floodplain, particularly city developments. Losses of personal property and permanent improvements were far greater than land and crop losses. Proper geographic engineering with a limited amount of structural engineering could have reduced the latter losses to a small percent of the actual losses, and these limited losses in turn would not have justified the expensive clutter of dams now proposed.

Farmers farm floodplains by necessity but urban and industrial developments in the Missouri Basin encroach on floodplains by choice and not by necessity. No basic resource is lost by zoning enough floodplain land against improvements to allow a stream several stream widths between dikes in urban and industrial areas. If such a program of set-back dikes had been developed in urban areas prior to recent floods, there would have been no big urban losses, basin-wide losses would have been much smaller, and no justification in terms of cost-benefits would have sanctioned the extravagant program of development now underway. Under present plans we will flood many hundreds of acres of the finest agricultural land in the state to protect one acre of urban floodplain land which has only limited site value for improvements that could readily be shifted to secure upland locations.

Farm losses could also be greatly reduced by geographic engineering. Again we refer to the floodplain of the Kansas River for an example. This floodplain has an average width of somewhat more than two miles. At least up to the great flood of 1951, farmers always considered it their privilege to build farmsteads within a stone's throw of the stream. It was this indiscriminate location of farmsteads on the floodplain that contributed to heavy farm losses. Yet, within sight of all these farmsteads, and usually within a distance of less than one mile, there are extensive high and dry uplands ample to accommodate all these misplaced farmsteads. Many of these farmers already negotiate distances of one or several miles to scattered tracts of farmland. Geographic engineering could serve to zone all the flood-threatened areas against farmsteads, and government aid could be extended to relocate improvements now in danger areas. In combination with this program, flood danger could be mitigated by building small wet and dry dams in V-shaped tributary valleys rather than on floodplains several miles wide. Instead of considering this arrangement, which would cost but a fraction of the present big dam program, we are in the process of extinguishing up to 50 per cent of our floodplain in eastern Kansas, which, among other things, will drive more farmers onto the thin erosive soils of the hills.

Summarizing the above observations gives these interesting results:

1. Urban and industrial losses would be largely obviated by set-back levees and zoning and thus cancel the biggest share of the assessed benefits which now justify big dams.

2. Farm improvements in valleys several miles or less in width would be zoned to flood-free elevations and therefore cancel the second highest assessed benefits which now largely justify the big dams.

3. Crop losses on wide floodplains would be mitigated by damming narrow tributary valleys—largely V-shaped valleys—but occasionally losses would be accepted on this usually highly productive land.

4. Land and soil destruction by flooding is largely a myth and therefore does not justify flooding out one set of farmers behind dams to save another set of farmers below the dams.

5. Water navigation on the Missouri as a cheap mode of transportation is a total myth and justifies no expenditures whatsoever.

In combination, the above observations and facts suggest very clearly that flood-control planning and execution is not a task that should be entrusted alone to military technicians. Flooded floodplains are in no way to be compared to an enemy, although our attack on flood problems suggests the lavish expenditures of money and resources thrown into a military campaign. Geographic engineering directed at settlement control can resolve many of the flood-loss problems. Only a secondary role in this effort should be assigned to structural engineers to impound waters in narrow V-shaped valleys and to erect set-back dikes in metropolitan areas. In this way our collective wealth and welfare will be enhanced and not lie buried under vast inland lakes.

STATEMENT ON CHANNELIZATION

(By Georgia Conservancy, Inc., 1025 Candler Building, Atlanta, Ga.)

To the Honorable Clifford Hardin, Secretary, U.S. Department of Agriculture.

Mr. Secretary: The public is becoming increasingly aware of the aesthetic, recreational, and scientific values of free-flowing rivers and streams. Consequently, stream channelization as practiced by the Soil Conservation Service is no longer viewed as being in the public interest, but it is now regarded as willful destruction of valuable outdoor resources. We note that channelization is often used to artifically adjust benefit-cost ratios to make the construction of dams appear economically attractive.

The public's objection to stream channelization is further compounded when it is realized that the Soil Conservation Service would spend millions of tax dollars to work in direct opposition to two other publicly financed federal programs. These programs are improvement of wildlife habitat and outdoor recreational opportunities administered by the Department of the Interior, and the Soil Bank program administered by the Department of Agriculture.

Channelization is an evil in itself: The flagrant destruction of our natural outdoor resources. But, to force the public to finance it during times of high taxation, in direct opposition to other tax supported programs, is an outrage.

We say that if dams are needed to provide people with water and genuine outdoor recreational opportunities, then let the dams be built and justified on their own merits. We do not oppose the construction of reservoirs for valid public benefit, but we strongly oppose the needless sacrifice of our remaining natural streams, and the callous waste of tax dollars by the Soil Conservation Service through its channelization policies.

THE EFFECTS OF CHANNELIZATION UPON THE FISH POPULATIONS OF LOTIC WATERS IN EASTERN NORTH CAROLINA

(By Jack Bayless and William B. Smith, North Carolina Wildlife Resources Commission, Raleigh)

ABSTRACT

This paper concerns an evaluation of the effects of habitat alteration associated with stream channelization in eastern North Carolina. The evaluation was based upon a comparison of fish populations found in 23 channeled streams, and 36 proximate natural streams within the Chowan, Neuse, Northeast Cape Fear, Pamlico, Perquimans, and Tar River Watersheds.

These comparisons indicated that reductions in the magnitude of 90 percent occurred both in weight of game fish per acre, and in number of game fish exceeding six inches total length per acre, following channelization.

The data further revealed that no significant return towards the natural stream population occurred within a 40-year period following channelization.

For some time, fishery workers have realized that alteration of habitat caused by a formal program of channelization of natural stream beds to obtain better drainage and to reduce flooding of surrounding croplands was detrimental to indigenous fish populations. Until now, however, the extent of damages to fishery resources have not been fully evaluated, but the increasing number of channelization projects and particularly their encroachment upon larger and better fishing streams demand that a careful estimate of the fishery losses be made and mitigation of demonstrable damages be sought on behalf of the fishermen.

In North Carolina alone, for example, 235 watersheds have been deemed feasible for assistance under Public Law 566. A total of 62 watershed improvement project applications involving some 2,900,000 acres have already been authorized for planning and 400 miles of streams have been altered or are under construction as of this writing. In addition P.L. 566 projects, many miles of streams have been altered by other agencies. Unfortunately, accurate estimates of the total mileage of streams affected in North Carolina are not available.

When these channelization projects are considered individually, the losses to the fishery resources often appear insignificant because they usually affect small streams. This concept is very misleading in light of a recently completed survey and classification of streams in North Carolina which demonstrated that the small, black-water streams of eastern North Carolina produce some of the best game fish populations to be found in the State. Even if these streams were not so valuable individually, collectively they represent a sizable portion of the public fishing waters. The detrimental effects of excessive siltation and more rapid water-level fluctuations in the receiving waters downstream also must be considered when channelization of the magnitude described above is encountered.

In view of detrimental aspects of stream channelization, data were compiled from various sources to indicate impact of stream channeling upon resident fish populations and more specifically the effects upon game fishes. Correlation of past effects with project types should yield: some gross means for assessing the probable damages that could be anticipated from future projects; possible means for avoiding losses to sport-fishery resources; and mitigation measures for losses which are absolutely unavoidable.

Data used were principally those contained in Survey and Classification Reports upon the Chowan, Neuse, Northeast Cape Fear, Pamlico, Perquimans, and Tar River Watersheds issued by the North Carolina Wildlife Resources Commission. From these data, plus intensive field observations, a total of 23 channeled streams, and 36 proximate natural counterpart streams, were selected (See Figures 1, 2, and 3).

Comparisons between fish populations found in natural streams and channeled streams definitely revealed that stream channelization has serious detrimental effects upon total carrying capacity, number of game fish exceeding six inches in total length, and weight of game fish per surface acre. There is also a significant reduction in average size of the fishes. No appreciable alteration in the ratio between game and nongame species was found.

The channeled streams used in this study were separated into three distinct ecological classifications according to a slight modification of those proposed by Van Deusen (See Figures 1, 2, and 3).[1] Often channelization disrupted physical characteristics and altered fish populations so drastically that it was difficult to determine what the ecological classification of a stream might have been prior to alteration. In such a case, the stream was assigned the same ecological classification as applied to adjacent natural streams of the same approximate size.

With the exception of a greater reduction in the average size of game fishes in the Largemouth-Pickerel streams, there was no appreciable variation in effects of channelization upon fish populations in the three ecological stream types studied (Figure 4). Average reduction per acre for each stream type in the number of game fishes exceeding six inches in total length was generally in the magnitude of 90 percent. Reduction in standing crop approximated 80 percent, and loss in weight of game fishes was approximately 85 percent.

Although percentage loss in the stream types was similar, there was a much greater numerical loss of game fishes exceeding six inches in length, as well as in average weight of game fishes, from the Redfin-Warmouth streams because this stream type invariably contained a much larger standing crop.

When averages from all of the channeled streams used in this report are compared with averages from all of the natural streams, each of the eleven major species of game fishes evidences a significant loss in average number per acre, average weight per acre, and average number exceeding six inches in total length. Alteration of habitat apparently has a more serious adverse effect upon the redfin pickerel, chain pickerel, redbreast sunfish, and largemouth bass; while the bluegill, pumpkinseed, and warmouth appear to be somewhat less seriously affected.

Estimates of the original fish populations found in a stream prior to dredging were predicated upon the assumption that they were equivalent to those currently found in comparable adjacent natural streams. A quantitative estimate of the effects of dredging upon any single species, therefore, is strongly influenced by the number of that species found in the counterpart natural stream. For example, the numerical loss of yellow perch from Largemouth-Pickerel streams is far greater than from Robin-Warmouth streams because the former type of stream naturally contains many more yellow perch in the original standing crop (Figure 4).

Wherever possible, the elapsed time between channelization and population sampling was established. Average weight of game fisheries per surface acre, and number of game fish exceeding six inches in total length per acre, were grouped according to the period of time that had elapsed since construction of channels. From these data, it is apparent that recovery toward a natural game-fish population is very slow, and presumably the population will never recover, if the channels are properly maintained in the interest of flood prevention.

RECOMMENDATIONS

In North Carolina, the Wildlife Resources Commission, U.S. Fish and Wildlife Service, Soil Conservation Service, and the local sponsors of Public Law 566 projects, are cooperatively seeking means for accomplishing a mutually satisfactory program. Progressing toward this end, several proposals for alleviating unavoidable losses have been developed. Although the relative efficacy of individual proposals has not been fully evaluated and may not be applicable in every situation, nevertheless, they are listed below in hope they will be of value to other agencies facing similar problems.

1. Block off oxbows with spoil from stream channels to provide permanent ponds.

2. Replace fish producing waters lost during channelization with impounded water on an acre-for-acre basis.

3. Construct small, deep ponds adjacent to

[1] Van Deusen, R. D., A simplified technique for classifying streams useful in fishery and related resources management. The Progressive Fish-Culturist, Vol. 15, No. 1, pp. 14–19.

channels to serve as sanctuaries for fishes during periods of low water.

4. Off-set the dredged channel from the natural channel to maintain water in the natural stream bed.

5. When a natural stream parallels the main river for an appreciable distance above the confluence, cut the channel directly into the main river.

6. At every opportunity, use flood-water retarding structures or clearing and snagging instead of channelization.

[2] Dredged streams.

REPORT ON THE EFFECTS OF CHANNELIZATION AND DRAINING BY THE U.S. SOIL CONSERVATION SERVICE IN WATERSHEDS IN GEORGIA

(By George T. Bagby, director, State game and fish commission)

The President's Council on Recreation and Natural Beauty made up of the Vice President, Secretary of Interior, Secretary of Commerce, T.V.A., Secretary of Agriculture, under whom is the Soil Conservation Service, and other department heads had this to say about water resource projects in their book "From Sea to Shining Sea." I quote:

"The Council proposes that Federal flood control and other water resource development programs and projects seek to retain or restore natural channels, vegetation, and fish and wildlife habitats on rivers, streams, and creeks and apply the same policy to federally assisted public and private projects affecting rivers, streams, and creeks."

Under the provisions of Public Law 566, the U.S. Soil Conservation Service is authorized to plan and construct with Federal money projects to prevent flood damage and erosion, and to store flood water for municipal and industrial water supplies, irrigation, and recreation.

Public Law 566 does not give veto power over these projects to state game and fish commissions. It does require the U.S. Soil Conservation Service to submit copies of plans to the state game and fish commissions and the U.S. Fish and Wildlife Service.

These two agencies are required by the law to make comments to the Soil Conservation Service on what effects the proposed project plans would have on fish and wildlife. This advice is not binding on the SCS in any way, and that agency can completely disregard the comments of wildlife agencies if they choose.

This has frequently been the case in the last decade since the 566 law was passed. Today, the game and fish agencies of most of our sister states are embroiled in constant conflict with the SCS because of the extensive and widespread damage these projects do to fish and wildlife habitat, primarily from dredging of stream beds and draining of wildlife wetlands, especially riverbottom hardwoods.

Such destructive projects are a national conservation issue. Only last October, the Southern Division of the American Fisheries Society adopted a resolution calling on the SCS, TVA, and the Corps of Engineers to halt any further watershed projects until an economic evaluation can be made of the value of fishing, hunting, boating, and other recreational values of the small streams affects.

Our sister wildlife agencies in the states of North Carolina, Tennessee, Alabama, and Louisiana, to name only a few, have strenuously protested this destruction. The position has been supported fully by the Southeastern Association of Game and Fish Commissioners, and by many state and national conservation organizations. In this connection, I would like to quote a statement by Mr. Charles Kelley, Director of the State of Alabama's wildlife agency, made in his report as president of the Southeastern Association of Game and Fish Commissioners at their 1967 conference in New Orleans:

"A major problem existing in my state at this time concerns watershed projects. The original concept was to design, through federal assistance, watershed projects in such a manner as to improve the renewable natural resources within the watersheds. From the very beginning, public monies have often been used to develop agricultural resources which directly benefit the individual landowner at the sacrifice of such public resources as fish and wildlife: the loss of which is felt by many people. From the trout streams in North Carolina to the shores of the gulf coast, channelization has played havoc with our valuable fish and wildlife habitat."

"Fish and wildlife losses, as a result of channelization of one watershed stream when examined alone, may appear to be insignificant. Not only will stream channelization destroy the fishery resource of the watershed stream itself, but channelization destroys the spawning habitat for such species as walleyed pike, sauger, and white bass. Without adequate stream spawning habitat, these species will ultimately disappear or be greatly reduced."

"Not only is channelization detrimental to the fishery resources, but it destroys feeding and occupational habitat for a number of game and furbearing animals and the wood duck."

". . . If fish and wildlife losses were given proper consideration as a factor in arriving at the cost benefit ratio of the watershed, I am sure that in many cases impoundments would replace channelization in order to arrive at a cost benefit ratio figure which would assure federal funds for the project."

"Fish and wildlife organizations can no longer stand still and watch our natural stream areas turned into man-made ditches devoid of fish and wildlife. We must continue our efforts to gain greater appreciation of our fish and wildlife resources, or most surely we will suffer to an even greater extent in the future."

The destructive effect of channelization and drainage of fish and wildlife is well documented. A study by the North Carolina Wildlife Resources Commission of 23 streams that have been channeled shows that 90 percent of the game fish were lost, both by weight and number. It is important to note that 40 years after channelization there was no significant improvement in the fish population. A Mississippi study before and after a stream was channeled showed drastic reductions of the game fish. In a stream that once had an average of 240 pounds of game fish per acre before channelization, afterward this was reduced to only five pounds of tiny game fish.

We all know that drainage of wetlands means the annihilation of ducks and other waterfowl. Such areas serve as refuges for deer, rabbits, squirrel, raccoon, and many species of furbearing animals.

There are 164 of these watershed projects planned on every major fishing stream or lake in Georgia or just upstream from it. Each one of them includes plans for dredging streams and draining wetlands that are essential for wildlife. Forty-six of these projects have already been approved for construction, and 14 have been completed. A list of these projects is attached to this report.

We have seen these projects and the destruction that they have already caused to wildlife and fishing in Georgia. We are going to show you some pictures of some of these projects in a few minutes so that you can judge for yourself the destruction that they do. After that, we will give the other concerned persons present today a chance to be heard.

But first, I want to clarify for this commission and the public the position which our department has taken on the watershed project proposed on the Alcovy River above Lake Jackson in Gwinnett, Walton, and Newton counties.

The false statement has been deliberately and maliciously made that the State Game and Fish Commission and its director have opposed the approval of the Alcovy River Watershed Project. This is a barefaced lie. We are not trying to kill this project. We don't have that authority. We are not trying to keep these three counties from having seven large lakes for recreation and municipal and industrial water supplies. We are in favor of them, and have publicly stated that we would stock these lakes free of charge and that our fish biologists would help to manage them to produce the best possible fishing. We have not opposed planting cover crops and wildlife food patches. We would favor opening up boat passageways through the Alcovy for fishermen, hunters, and boaters.

We have objected to one portion and one portion only of the proposed watershed plans, and that is the channelization and drainage of the Alcovy River above Lake Jackson.

Under the provisions of Public Law 566, we are required to make comments on the effects of the Alcovy Watershed Project of fish and wildlife habitat. We did not ask to make these comments. We were invited to make them at the recent meeting in Monroe by a letter on February 7, 1969, from Mr. Cecil Chapman, State Conservationist of the U.S. Soil Conservation Service. Previously, in our letter of August 23, 1968, we concurred with a report by the U.S. Fish and Wildlife Service that the Alcovy Project as presently designed by the U.S. Soil Conservation Service would adversely affect fish and wildlife habitat. We have never approved the Alcovy Project from the day when we were first officially notified of it, years after it has been sold to the local landowners by the Soil Conservation Service. We have never changed our position on the Alcovy Project or any other destructive dredging or draining proposals. Our files are filled with letters this department has written the SCS for years and years objecting to such practices. We have held many meetings with the SCS to register our complaints, but they have gone virtually unheeded.

We were asked to comment on the Alcovy Project, as well as required by public law. We have made public our biological comments on the adverse effects that the channeling and drainage portions of the project plan will have as it is now drawn. We have no other step to take. Our department cannot veto the project. It is the responsibility of the Soil Conservation Service and the watershed group to weigh the testimony that we have given them to the best of their ability, and then take whatever action in regard to the project that they wish. The matter is out of our hands.

While we do approve of the reservoirs in this project, we don't believe that it is necessary to destroy the streams and swamps below them in order to build the lakes. There is no doubt that draining the 4,000 acres of swamps will destroy the wildlife that depends on them for their existence. Channelization of miles of streams on the Alcovy and its tributaries will destroy the fishing in them. Even the biologists of the SCS admit this. We believe that this destruction will also adversely affect fishing in Lake Jackson as well. The watershed plans could be changed to prevent this damage. Enlarging the reservoirs instead of channeling the river is the obvious answer.

The engineers of the SCS tell us that the channel they will dredge in the Alcovy won't fill up with silt, because of the swift, shallow water flow that will be created. If the silt from this seven-year construction project won't fill up the Alcovy River channel above Lake Jackson, then where will it go?

What will happen when the swamps are drained where the silt from flood waters once settled out, before it reached Lake Jackson.

The Alcovy River section of Lake Jackson is never the red mud color of the Yellow River and South River sections, even in the winter. In the spring, it is the first section of the lake to clear, producing good largemouth bass and crappie fishing for thousands of Georgians and hundreds of lake cabin owners and their families. In three months in 1966 alone, more than 300,000 crappie were caught in Jackson. With its clear water in the Alcovy arm, Lake Jackson is more fertile than any other reservoir in Georgia, with a rich green plankton bloom just like a well-fertilized farm pond. But with muddy water, it would be no more productive than any muddy pothole spurned by fishermen. Muddy water prevents plankton bloom in the water that is so important in feeding fish. It interferes with their reproduction and it makes them harder to catch.

Our department is spending thousands of dollars attempting to stock white bass in Lake Jackson. These fish will spawn in the Alcovy, unless it is channeled. Their success would give thousands of fishermen a new species to fish for. In addition, the U.S. Fish and Wildlife Service only recently approved our request for 23,000 striped bass to stock in Lake Jackson this fall. These fish will congregate in the Alcovy in the spring attempting to spawn, producing good fishing. This fishery may be wasted if the Alcovy is made into a shallow but swift muddy water ditch.

The Soil Conservation Service would have us believe that there will be no additionaal silt in the Alcovy as a result of this project. We aren't so sure. They don't mention the silt that will be flushed downstream while the bulldozers, the draglines, and the dynamiters are working, let alone the ditches and gullies that will form at every rain.

But the Acovy project is not the most frightening aspect of the small watershed program of the SCS. What disturbs me even more is the list of fine little fishing streams marked for destruction, running into every major lake and river in Georgia. We know that these channeled streams and these swamps are gone during our lifetime, if not forever.

When projects like the Alcovy threaten our irreplaceable wildlife resources, it is the duty and the obligation of the State Game and Fish Commission to inform the people what the effects of these projects will be, without being accused of irresponsible criticism, without being called liars, without being threatened with political reprisals. When the people have been fully informed of all the facts, we believe they will make the right decision, and that is the only right that we ask from the public.

In one of Robert Frost's poems he poses a question which is basic to the future of man on earth. He says:

"Nature within her inmost self divides
To trouble men with having to take sides."

I do not think he means that man must decide to be for nature and against development; but nature itself compels man to decide whether other life is to be allowed to survive along with man, or if all is to be subordinated to the human species. I believe that the Georgia Game and Fish Commission has a vital role in Georgia in taking the side of nature's creatures, in ensuring that we share our world with other species and in this sharing, I am convinced man becomes a better being.

Once man has laid his hand upon a natural environment, change begins to take place.

Unless he considers other species, this change will continue to destroy the conditions necessary for others until, eventually, man finds himself alone in his landscape and he cannot live for himself alone.

The Georgia Game and Fish Commission and the Soil Conservation Service has responsibilities in preservation and conservation of the environment required by wildlife. Together we can provide a measure of balance which we must have if we are to avoid being swallowed up by a complex, technological age in which man can too easily forget that he is but one part of a system of nature, the temporary custodian of a life that has been lived for centuries before and which must go on for centuries to come.

A hundred years ago there was room on earth for all the creatures of field and forest and enough left for man to reap his required harvest. Today man's needs have multiplied, his numbers have increased beyond the wildest dreams of earlier days and we must face the fact that this increase in numbers, this increase in needs for the resources will grow in geometrical measure.

We have little time left and we have much to do, yet we *are* considerably better placed now than once we were. Many Georgians *now* recognize that steps must be taken and taken soon and fortunately there are things happening. It has been said that the best time to plant a tree was thirty years ago, the second best time is today. The same is true for conservation. The best time to conserve the habitat necessary for our wildlife would have been fifty or a hundred years ago. The second best time is now. As Director of the Game and Fish Commission, I am committed to pursuing the ideal of conservation, of creating a balanced environment. I am convinced that our mechanisms for conserving the quality of our natural environment are incomplete and inadequate. Unless we direct ourselves *now* to improving these mechanisms and coping with this question, we will have to pay the price tomorrow, and we might not be able to meet the bill.

Man must learn to control his appetite for immediate benefits if his long term needs are to be met.

EFFECTS OF UNRESTRICTED SWAMP DRAINAGE

(By Walter M. Keller, extension forester)

The broad classification termed "wetland forests" includes many kinds of woodland, and about all some of them have in common is a profuse supply of water. These wetland forests—about 20 million acres in all—stretch more than a thousand miles along the lower coastal plain from the James River in Virginia to southern Florida. The vegetation of these forests, the soils, the wildlife, and even their uses reflect the hydrology of this vast watery domain. The wetlands are the headwaters for countless streams and lakes, as well as the recharge areas for huge groundwater reserves which provide a fresh-water buffer against the intrusion of salt water into coastal plain water supplies. Moreover, they serve as water storage sites for impoundments serving irrigation, fish and waterfowl management, hydropower production, and sundry other human activities.

The lower, wetter sites where running or standing water is present—at least on a seasonal basis—appear to be consistently associated with tupelo-blackgum-cypress production. The effect of drainage to date has been to thoroughly remove the possibility of retaining this water, thus paving the way for replacement by dryland vegetation associations. In any event, changing water relations through drainage, impoundment, or other means will surely modify the whole wetland environment. The Southeastern Forest Experiment Station in their 1962 Annual Report, and McKnight, Furnival and Putnam in Agricultural Handbook No. 181 in discussing tupelo-swamp blackgum stands, states that: "Artificial drainage will decelerate growth or kill older trees if it permanently lowers the water table. Prolonged droughts cause mortality and induce insect attack."

In deep swamps, both tupelo and cypress seed regularly and copiously. They regenerate well only where seedbeds are moist, where competitors are unable to cope with flooding, and where ground cover is limited to anual herbs. Seeds will germinate even if water subsides as late as midsummer, but seedlings and saplings are fairly intolerant and are not aggressive against other competition. When drainage removes the surface water and dries the site, tupelo and cypress regeneration is eliminated by other competition—most often the less valuable maple-ash-button-bush association.

Tupelo produces high-quality veneers and lumber, and is the basic raw materials for a sizeable segment of the eastern North Carolina wood industry. Tupelo is also a high stumpage value species, and provides considerable income to farmers and woodland owners. The latest (1962–63) Forest Survey of North Carolina shows 4,230,000,000 board feet of tupelo-blackgum and 1,200,000,000 board feet of cypress in standing timber in the coastal plain area of North Carolina. It is not surprising that commercial users of lowland timber who depend on wetland trees such as tupelo and cypress are seriously concerned as a result of the reduction in swamp areas where these trees thrive.

More than a million acres (Southwide) of wetland forest have already been altered by drainage since 1950, and the end is nowhere in sight. Much of this drainage work has been done by wood-using industries as a by-product of dredging operations to get spoil for building roads into wetland areas. Recently, however, Public Law 566 (PL 566) entitled the Small Watersheds Act has become increasingly important as a factor affecting wetlands forests.

Individuals and public agencies advocating drainage of tupelo, cypress, ash, and similar bottomland swamp types are proceeding on very tenuous grounds unless they recognize that they may be doing violence to forest production, and wish to proceed despite this result. Tupelo, green ash, swamp blackgum and similar species appear to thrive under regimes of continuous saturation. These are valuable species, capable of continually supplying raw material industry wants and needs, provided the types are managed properly. We do not yet know everything that is needed for optimum production of these species, but with our present state of knowledge, *we cannot endorse drainage of hardwood swamps*, and we know of no one who has the facts in hand to form a basis for recommending the practice. For the present we side with those who hold the view that at least for tupelo, swamp blackgum, green ash and cypress, a saturated habitat comes closer to the right environment than the unrestricted water removal that apparently takes place where drainage is applied with unrestrained vigor.

There is plenty of operational experience and engineering know-how on designing ditch systems and draining wetlands. We would suggest that this know-how be applied in all drainage projects to modify procedures so as to preclude or minimize damages to tupelo-cypress swamps. Rates of flow can be manipulated by wing control structures in the ditches. Variations in pattern and spacing of ditches, use of shallower ditches, and use of peripheral ditches may offer some possibilities in preserving these wetland forest conditions.

There is, however, virtually nothing available on how drainage modifies soil and hydrology for timber production and other purposes. Systematic observations on cause-and-effect relationships are few and far between. It is imperative, therefore, that some early answers be sought to guide new programs and help wetland managers avoid costly enterprises which could be highly damaging to the Southeast's water resources, timber sites, and game habitat.

STATEMENT REGARDING ADVERSE EFFECT OF PUBLIC LAW 566 PROJECTS ON WILDLIFE RESOURCES IN EASTERN NORTH CAROLINA AND SUGGESTIONS FOR PREVENTION

(By Frank B. Barick, chief, Division of Game, North Carolina Wildlife Resources Commission, at meeting in Asheville, N.C., Oct. 21, 1965)

While the situation at hand appears to be a conflict between the North Carolina Wildlife Resources Commission and the United States Soil Conservation Service we should acknowledge at the outset that the Soil Conservation Service has long been recognized as one of the champions of wildlife conservation. Furthermore, the history of the Soil Conservation Service in North Carolina includes a close and harmonious working relationship with the Wildlife Resources Commission. We are proud of this relationship and wish to preserve it.

Our remarks are directed not at an agency but rather at a law—Public Law 566—implementation of which is serious threatening important wildlife resources in some parts of our state. Those of us in the Commission's Division of Game are particularly concerned about the destruction of hardwood swamp habitats in the eastern part of our State.

In opposing this phase of the PL 566 we wish to make it clear that we are not opposing the philosophy of federal help to private landowners, nor are we opposing the right of the landowner to manage his land as he sees fit so long as he is spending his own money to do it. But we *are opposing* the destruction of publicly-owned natural resources through the expnditure of public funds. This is what PL 566 has been doing in some parts of North Carolina. We are here to show you where and how this destruction has been done and to request your assistance in preventing future damage.

By working with our good friends in the Soil Conservation Service we have made some progress, within current limits of the law, in exploring methods of preventing damage. But as of this date we must report that:

(1) Of three completed projects in eastern North Carolina we can point to none which has not been highly destructive to wetland wildlife.

(2) Of several projects currently in the planning or active stage we can point to none for which the final approved plans include adequate provision for the protection of wetland wildlife resources.

(3) If the same pattern of operation continues in the future. PL 566 projects scheduled for eastern North Carolina threaten extensive and serious damage to several species of wildlife that are important in the recreational potential and economy of this region.

(4) We are also advised that destruction of these hardwood swamp habitats has had, and will continue to have unless altered, a seriously adverse effect upon other natural resources such as timber and water.

(5) We find it difficult to reconcile conversion of hardwood swamps to cropland following PL 566 drainage, with agricultural reports indicating a surplus of croplands not only today but for the next 40 years.

For the next few minutes we shall present evidence in support of these contentions and then we shall offer suggested guidelines for solution of the problem. Since we are some four hundred miles removed from the scene of the problem we have arranged to bring the scene to you in a series of color slides which show hardwood swamps before and after drainage.

1. Cashie Swamp north of Windsor in Bertie County, North Carolina. This is a typical hardwood swamp full of water after a period of heavy rainfall in mid-winter (February, 1965). The swamp is bisected by the road on the right, swamp flow is from left to right through the high bridge. Note that the road is high enough and the bridge wide enough so that they are never under water. We are advised by forestry experts that winter flooding such as this is essential to production of the high quality fast growing tupelo gum and the slower growing cypress shown. Swamps such as these serve as resting, roosting and feeding places for mallards and black ducks as well as woodies. They are escape areas for deer and wild turkey and raccoon. There is enough water to provide good fishing (jack, robbin, bass) and trappers catch many mink and otter along these runs.

2. Goshen Swamp near Kenansville in Duplin County, North Carolina. Another typical hardwood swamp showing natural winter water level (December, 1964). This site is near the edge of the swamp and the two large trees are water oaks which produce acorns highly prized by practically all wildlife. Winter flooding of swamps into the zone containing oak trees is essential if waterfowl are to make use of this food. One trapper reported catching 30 otters in this one swamp run. Other trappers used the area also.

3. Stubbs Veneer Mill, Windsor, North Carolina. This mill, and several others like it in eastern North Carolina are dependent upon the high quality tupelo gum which grows in southeastern hardwood swamps. The veneer made at these mills is used in the furniture factories in the central and western parts of the state. North Carolina leads the nation in manufacture of furniture and hardwood plywood. Veneer manufacturers tell us that loss of locally produced raw materials through swamp drainage would be a serious blow to these important segments of the state's economy.

4. Ahoskie Creek drainage ditch in Hertford County, North Carolina. This and the next several pictures were taken in February, 1965, after a period of heavy precipitation which measured 2.3 inches on a local rain gauge. Note that while the ditch in this picture is full, subsequent pictures will show that the swamp through which it runs is dry. Prior to ditching, this swamp looked like the ones shown in pictures one and two. Note the excellent stands of tupelo gum on both sides of the ditch. Some of these already show signs of incipient die-back in the tops during the first year after drainage. Note also that all trees have been removed from the right-of-way which is about 150 feet wide.

5. Same ditch. Culverts placed through the spoil at swamp floor level effectively remove all the water in the swamp since the ditch was dug through the lowest portion. Note that the water level in the ditch even after heavy rain is about four feet *below* swamp floor level. Prior to ditching the water would lie about four feet deep *above* the swamp floor.

This is the other end of the culvert shown in the previous picture, on the swamp side of the spoil. Note that the rapid flow of water from the swamp into the culvert pipe after a period of heavy rainfall has been so effective that the culvert is less than one-fourth full.

7. At another location in the same swamp drainage project, water has eroded through the spoil and cut a channel from the swamp into the main ditch. These natural breaks in the spoil further accelerate swamp drainage and drying.

8. This photo was made behind the spoil and ditch shown in the previous pictures. Immediately after a period of heavy rain in January, 1965, there is no water in the swamp. Similar rains in previous years, prior to ditching, would have resulted in water depths to the top of the butt swell on the large tree in the foreground. Prevention of water accumulation will, within a few years, result in the development of a dense understory of shrubs and vines and a change in forest type which will make it unuseable by waterfowl. Removal of standing water also eliminates the sanctuary effect for deer, bear and wild turkey.

9. This picture shows the swamp edge of the same watershed where ingrowth of briars and honeysuckle has been accelerated by swamp drainage. Even if it were temporarily flooded, waterfowl would be disinclined to use such locations because of the dense tangle of vines and shrubs.

10. Public Law 566 and the administrative directives under which these drainage ditches are dug specify that they shall not be for the purpose of creating additional farm land. This several-acre field of tobacco in the Ahoskie Creek project was planted in 1964 after ditch construction, much of it on "new land" made available by accelerated drainage.

11. In this last picture, note the contrast with the previous few pictures. This is a typical tupelo-cypress swamp showing normal winter water level prior to drainage. Swamps such as these are important wintering grounds for migratory waterfowl as well as production areas for wood ducks. They serve as escape areas for deer being pursued by dogs and constitute the primary reason for the large deer herds in eastern North Carolina. These swamps also serve as hunting season sanctuary for wild turkey and important feeding areas for them during the dry seasons of the year. Excellent stands of valuable high quality fast growing timber are produced in swamps, especially where they are under proper management. These swamps in their natural state serve as detention reservoirs to prevent downstream flooding, and by slowing down runoff help replenish underground water supplies. After the Ahoskie drainage project was completed groundwater monitors of the U.S. Geological Survey reported a drop of four feet in the local groundwater level. Industry and population planners tell us that water shortage constitutes the next major threat to our expanding human populations. Hardwood swamp drainage is hastening the day of confrontation with this problem.

As of July 1, 1965, three Coastal Plain PL 566 projects were listed as having been completed.[1] They covered 24,170 acres and contained 41.9 miles of channel improvement similar to that shown in the above pictures. No provision that we know of was made in any of them to preserve wildlife resources associated with swamp habitats. The completion of these projects and initiation of others similarly designed is what originally aroused the concern of wildlife interests in North Carolina.

[1] U.S.D.A., S.C.S.—Status of PL 566 Watershed Projects in North Carolina, July 1, 1965.

In response to concern expressed by wildlife interests procedures were developed to increase consideration of wildlife values. As a result of coordination efforts several of the 23 Coastal Plain PL 566 projects currently in the planning or active stage were investigated by field biologists of the Wildlife Resources Commission and their reports suggested methods of preventing or mitigating damage. Many conferences were held with personnel of the Soil Conservation Service and with landowners and sponsors.

It may help explain our concern if we were to back up at this point and briefly trace the history of disposal of information provided regarding wildlife resources. In at least one early case [2] the project application contained information contrary to that reported by the state biologist. In some subsequent cases the work plan acknowledged that investigations regarding wildlife resources had been made and that these reports had been filed.[3] In one later case [4] the local sponsors refused to provide recommended mitigation costing them about three cents per acre (as compared with $3.50 per acre for drainage). On more recent projects,[5] sponsors have indicated a more favorable attitude toward wildlife but in considering specific mitigation proposals we are advised that several landowners have refused to accept them. However, work plans on these projects are not yet complete and so we are not in a position to report on the adequacy of consideration given wildlife values.

Now as for the future. The North Carolina Soil and Water Conservation Needs Inventory of 1962 indicates a total of 211 watersheds in North Carolina, and need for conducting works of improvement in 208 of them. Of these, nearly half, or 101, are located in the Coastal Plain. Approximately 5.18% of Coastal Plain watersheds, or 778,389 acres, are classified as wetlands. These make up 53.8% of the state's total wetland types I and VII [6] which are classified as being of highest value to waterfowl, deer and wild turkey. Thus, if no change is made in method of operation. North Carolina stands to lose over half of all her hardwood swamp wildlife habitat to PL 566.

Gentleman, we consider the projected destruction of 54% of a state's timbered wetland game habitat by a federal program to be a serious matter. We earnestly solicit your assistance in preventing it.

Various proposals have been made to prevent this damage—some obviously impossible and others basically unsound. It has been proposed, for example, that the Commission's biologists make recommendations regarding engineering design which would accomplish the drainage of cropland without damaging the swamps. It soon became obvious that lack of an engineering background ill-qualifies a biologist to solve engineering problems.

It was also proposed that after a project had been initiated, the state biologist contact the landowners and convince them that they should participate in underwriting the cost of project modification to provide for wildlife. This approach is basically unsound since it is inconsistent with established principles delineating areas of federal and state responsibilities. It first assumes that it is proper for the federal government to sponsor projects which have the effect of destroying a state's natural resources, then it places the burden of rectification on the State. For the State to suggest that the landowner be assessed for rectification of damage to "state-owned" wildlife resources caused by a federal project is ridiculous. Furthermore, if the landowner needs public assistance to improve production of his privately-owned crops, how can he be expected to finance production of a crop that belongs to the public and over the harvest of which he has little or no control?

When viewed from this perspective it becomes clear that—

(1) Any project established by federal subsidy should include federal funds for the protection of the State's wildlife resources endangered by the project.

(2) Identification of potentially significant damage to a State's wildlife resources is the responsibility of the state agency having jurisdiction over these resources.

(3) Development of project design to provide for protection of the State's wildlife resources is the responsibility of the sponsoring federal agency. The State may help guide this project design by describing the physical conditions necessary to sustain the wildlife values threatened.

(4) Review of projects to determine adequacy of design for protection of wildlife values is the responsibility of the state agency having jurisdiction over wildlife resources.

Gentlemen, we propose these as the basic guidelines within which PL 566 projects operate, in so far as wildlife values are concerned.

[2] Sunbury-Hobbsville, Gates County.
[3] Dunn Swamp, Columbus County.
[4] Caw Caw, Brunswick County.
[5] Little Contentnea, Edgecombe, Pitt, Greene and Wilson counties; Chicod, Pitt and Beaufort counties.

LABOR DEPARTMENT APPROVAL OF ALIEN DOMESTICS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. OTTINGER. Mr. Speaker, earlier this year the Department of Labor amended its regulations on the approval of labor certification for alien live-in domestics. Although I certainly favor protecting the American labor force to the greatest extent possible, these new regulations were just simply too rigid and worked a considerable hardship on many American families—particularly working mothers—who were unable to obtain suitable household help.

I raised this matter with the Secretary of Labor and urged that the Department review and reconsider its policy. In a letter to me last month, Secretary Shultz indicated that important changes were being made.

In view of the importance of this issue, I am inserting herewith, for inclusion in the RECORD, my exchange of correspondence with Secretary Schultz as well as pertinent newspaper articles:

SEPTEMBER 17, 1969.

Hon. GEORGE P. SHULTZ,
Secretary of Labor,
Department of Labor, Washington, D.C.

DEAR MR. SECRETARY: I have recently been informed by one of my constituents that the Department of Labor is approving applications for labor certification for live-in domestics only in those instances where there is either a pre-school child in a motherless home or where there is a pre-school child in a home in which both parents work.

I would appreciate your advising me as to whether this is, in fact, the basis for approving ES-575's. If so, I would be most interested in knowing why this change in policy has been made, whether it is being applied on a nationwide basis or just in New York and how the Labor Department intends to administer it.

Thank you very much for your cooperation and assistance. I will look forward to receiving your report.

Sincerely,

RICHARD L. OTTINGER,
Member of Congress.

U.S. DEPARTMENT OF LABOR,
Washington, D.C., October 6, 1969.

Hon. RICHARD L. OTTINGER,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN OTTINGER: Thank you for your September 17, 1969 letter in which you requested clarification of the circumstances under which an alien household domestic service worker may be certified for employment in the New York City area. As you may be aware, certification for alien employment may only be made in those cases where it has been determined that U.S. workers are not available for a job offered an alien and if the wages and working conditions offered will not adversely affect U.S. workers similarly employed.

Labor Department policy provides for the certification of household domestic service workers wherever circumstances warrant under existing labor market conditions. There has not been any departure from this policy in the New York area or any other area.

Normal job offers to alien household workers require routine household duties such as cleaning, laundry, ironing, cooking, and serving meals, requiring little or no experience. The work week is 40 to 44 hours. In the absence of extenuating circumstances such as an invalid in the household, unreasonable commuting distances, a motherless household with preschool-age children, or a household where both parents work and there are preschool-age children, the duties listed above may be performed by dayworkers, live-out maids, caterers, and babysitters.

This position is based on the fact that workers are available to perform specified duties rather than on any finding that there is a shortage of workers willing to live at their prospective places of employment. In those areas where it can be determined that there is no availability of live-in workers, live-out workers or dayworkers, certification may be made.

In those cases where applicants have limited their availability to jobs requiring unusual duties to be performed, certification may be granted provided all other conditions of employment meet Labor Department regulations and standards.

Within the above framework, applications for alien domestic workers may be approved.

I hope this information clarifies your points in question and will be helpful in replying to your constituents.

Sincerely,

GEORGE P. SHULTZ,
Secretary of Labor.

OCTOBER 7, 1969.

Hon. GEORGE P. SHULTZ,
Secretary of Labor, Department of Labor,
Washington, D.C.

DEAR MR. SECRETARY: Thank you for your October 6 report concerning the certification of alien live-in domestics in the New York City area.

I read your report with interest and appreciate your furnishing me with this information. I cannot, however, disagree more strongly with your findings.

The market really is not the same for day workers and live-in domestics. Many working mothers need sleep-in help and simply cannot depend on three or four different employees, as you recommend. As a lifelong resident of Westchester County, New York,

I know there is a critical shortage of day workers. Even assuming day workers would be available, local intra-county transportation leaves a great deal to be desired and it would be very difficult, if not impossible in some cases, for one to reach his place of employment by public transportation. Finally, I find that many of my constituents require domestic assistance on the weekends, as well as during the week, and day workers are not suitable.

The criteria presently being employed by the Labor Department has little, if any, bearing or relation to reality in many sections of the New York City area—especially my constituency—and I very strongly believe that both prospective employer and employee are being unjustly penalized.

I would be grateful if you and your staff would promptly and thoroughly review the Labor Department's current policy and take immediate corrective action. I will appreciate being kept informed of your progress.

Sincerely,

RICHARD L. OTTINGER,
Member of Congress.

[From the New York Times, November 3, 1969]

LIVE-IN MAIDS FACE TIGHTER VISA RULES ON ENTERING UNITED STATES

(By Paul Delaney)

WASHINGTON.—The Labor Department has moved to tighten its requirements for work visas to make sure that women do not enter the country in the guise of live-in maids only to increase competition with Americans for higher-paying jobs and husbands.

Under a new set of guidelines, to be announced by Secretary of Labor George P. Shultz tomorrow, women applying for visas to work as live-in maids will have to show proof of experience and the promise of a job. They also must be single, and must be able to convince the authorities that they are not planning to enter the country primarily to look for a husband.

The 10 regional manpower administrators will keep track of the women more closely than they have been watched in the past, under the new guidelines that will become effective Dec. 1.

Most of the women affected by the new regulations come from the West Indies or Mexico. Current rules require them to stay single and stick to domestic work, but the controls have been loosely applied.

A department spokesman said 40,457 women received work visas as live-in maids in the fiscal year ending June 30, 1968.

"It's anybody's guess where most of them are now," he said. "They come here as maids and then they shoot off into other jobs for more money, to the detriment of the American worker."

The spokesman said it should be no more difficult for Americans to get live-in help under the new regulations. But he added that prospective maids would not be admitted to work in areas where domestic help was already adequate.

U.S. DEPARTMENT OF LABOR,
Washington, D.C., November 12, 1969.

HON. RICHARD L. OTTINGER,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN OTTINGER: This is to reply further to your September 17 and October 7, 1969 letters concerning the circumstances under which an alien household domestic service worker may be certified for employment in the New York City area and your obligations to the Department's current policies.

I am in complete agreement with you that many working mothers need live-in domestic help and simply cannot depend on three or four different employees through the course of a week. There are situations where live-out workers limit their availability to normal hours of work such as 8 to 5 o'clock or 9 to 6 o'clock. Where there is limited or no availability of live-in workers, I believe applications for alien household domestic service workers should be approved provided there is appropriate justification. Since your September 17 letter, the Labor Department has amended its guidelines on October 10 to amplify and clarify previous guidelines. Accordingly, please note the following criteria applicable to live-in maids.

If there is availability of live-in maid workers, applications must be disapproved in accordance with the law. However, if there is no availability of live-in workers, and the combination of job duties and hours of work are not usual for live-out workers, the application may be approved provided all other conditions meet standards.

If the duties required are such that the job cannot be restructured and an employer demonstrates that he requires the services of a household domestic beyond 5 or 6 o'clock for duties such as cooking, serving meals, occasional child care, and serving at parties, his application may be approved.

When the hours of work and the duties to be performed are customary for live-out household workers, and if these workers are available, applications for alien employment must be disapproved.

I believe that you will agree that this policy is reasonable and serves to meet the the law.

I hope this information meets with your satisfaction and will enable you to reply to your constitutents.

Sincerely,

GEORGE P. SHULTZ,
Secretary of Labor.

[From the New York Times, December 2, 1969]

GOVERNMENT EASING ENTRY OF FOREIGN DOMESTICS—YIELDS TO COMPLAINTS OVER THE DEARTH OF HELP

(By Peter Millones)

The United States Department of Labor, badgered for many months by irate women unable to obtain satisfactory domestic help, has decided to ease its restrictions on the entry of available foreign labor.

"We are not opening the floodgates, but we have changed the emphasis," Frank Busbee, chief of the Division of Immigration Certification, said in an interview.

He and other top Labor Department officials are convinced that they do not have the solution to complaints from women in New York and elsewhere about the rapidly dwindling supply of live-in, child-care women, maids, cooks and daytime household workers.

But they are prepared now to be "more realistic" before denying applications from American families for foreign domestics.

The policy shift comes at a time when some employment agencies, unhappy over fee losses, have been threatening to organize protest marches on the Labor Department, and some immigration lawyers have started suits challenging some of the department's actions on alien domestic applications.

A study of the domestic-help situation has shown the following:

The Labor Department approved 15,500 applications in the last fiscal year—62 per cent of those it received—despite complaints from some agencies, some lawyers and others that few domestics have been allowed to enter the United States in the last year.

The number of American domestics is diminishing each year, in large measure because of low wages, the stigma attached to domestic work, and racial tension between whites and blacks, while rising affluence has made more families seek household help.

Some women, such as teachers, nurses and other professional workers, have remained at home rather than return to work because of their inability to obtain satisfactory live-in help.

The domestics shortage and tight entry restrictions have encouraged many aliens—believed to be in the thousands—to enter the United States on tourist visas, "disappear" throughout the country and take jobs illegally, risking apprehension and deportation.

By and large, the source of domestic help for Americans has come from two areas—low-income Americans, mostly Negroes, and immigrants.

The trend away from domestic work among Americans has been evident for some time. For example, the Bureau of Labor Statistics reports that in 1965, 29.2 per cent of the nonwhite females employed were working in private households. This year, only 18.6 per cent are in private households.

The obvious reason for the decline, aside from the stigma, is the traditionally low pay for domestics, even now $1 an hour in some cases, although many employers meet or exceed the Labor Department's requirement that aliens be paid $1.75 an hour plus room and board.

The other source—immigrants—has been sharply curtailed by the rising prosperity of European countries which has discouraged emigration and more importantly by changes in 1965 in the United States immigration laws.

Those changes are only now having their full effect, namely, making domestics who are reliable highly prized workers.

Even with the Labor Department's "change of emphasis," officials in Washington do not see any short-term answer to the shortage of domestic help.

Dr. Arnold Weber, Assistant Secretary for Manpower, says: "What you have is an industry that is in a state of chronic disequilibrium and you solve it by changing the whole character of the work in terms of the wages and the capital-labor mix, not by relying on a supply that comes in and doesn't last."

WAGES A KEY FACTOR

The Labor Department does not actually acknowledge that there is a shortage of domestics. It contends that those employers who offer prevailing wages, decent working conditions and actively seek help can find it.

Yet the department is financing training programs for domestics in New York and several other major cities.

Mr. Weber notes: "If you tell a housewife that she can't have a live-in (alien) maid, somehow she thinks you're intruding on the sanctity of the home, although she's really an employer. She doesn't distinguish between her roles, but we have to distinguish."

The women he refers to contend that a high percentage of the limited supply of American domestics are unreliable or unavailable when needed.

To Jackson G. Cook, a long-time immigration lawyer and others, the Labor Department's policies and regulations have been "telling the American people they can't have maids or any kind of help."

He adds: "The Labor Department is trying to better the status of workers here to the point where there's nobody to do the menial tasks."

AMBIGUITY IS CHARGED

The Labor Department has been the focal point of public resentment over the domestic shortage primarily because it has left ambiguous—even to its own officials—just who can and who cannot obtain help.

In 1965, changes in the immigration law required that those aliens who wanted to enter the country to work as domestics (and in some other occupations) receive clearance from the Labor Department.

This clearance was to be given only if Americans were not available to do the same

work and only if alien workers would not adversely affect the wages and working conditions of Americans.

On these two grounds, the Labor Department has denied many applications, and as a result discouraged people who would otherwise file applications for alien help from doing so.

The department's reasoning has been that Americans are available when paid reasonable wages, and also that aliens brought into the country usually leave their employer in less than a year and find different work, thus competing with American workers they were not intended to compete with.

The latest survey of the department has found that "74 per cent of the aliens who left their sponsoring employers for other jobs were working in occupations that the Department of Labor would not have certified—clerk, factory laborer, charwoman and food server."

The central problem has been with families that want maids or nursemaids or cooks available at night. Even the Labor Department acknowledges that these live-in workers are in short supply, presumably because many domestics now prefer to have their own family life.

The department's policy on this was characterized privately by one Labor Department official as "tortured logic." Some families needing day and nighttime help were told to hire one day worker and then a babysitter or a caterer or any one else who would be available at night, rather than bring in an alien.

Stanley Mailman, chairman of the New York Chapter of the Association of Immigration and Nationality Lawyers, believes that this view, and some of the department's requirements, encouraged fraud. Many employers, he said, frustrated at obtaining domestic legally hired aliens who were in the country illegally.

SHULTZ EXPLAINS SHIFT

This policy has now been reversed, according to officials. Secretary of Labor George P. Shultz outlined the new policy in a letter to Representative Richard L. Ottinger, Democrat of New York, who has questioned the department's procedures.

In a letter dated Nov. 12, Mr. Shultz said: "If the duties required are such that the job cannot be restructed and an employer demonstrates that he requires the services of a household domestic beyond 5 or 6 o'clock for duties such as cooking, serving meals, occasional child care and serving at parties, his application may be approved."

Although the change will undoubtedly assist many families heretofore unable to obtain live-in help, and thus ease somewhat the over-all demand for domestics, aliens will still have to wait at least several months to enter the country.

This is because of the 1965 immigration law changes, which set a limit of 120,000 entries, including domestics, from the entire Western Hemisphere.

More people apply for entry than there are visas available and domestics, even with Labor Department approval, must wait in line. The Immigration Department and the State Department handle this step.

LIMIT FOR EUROPE, TOO

Entries from the Eastern Hemisphere (Europe) are also limited, under a complicated formula, to a total of 170,000 immigrants a year. How long or short a period a domestic waits for entry depends on the number of other immigrants from his country.

"If we let in the entire quota," Mr. Weber says, "we still wouldn't satisfy the demand. The traditional response is to improve the conditions economic and non-economic, to attract a larger supply of labor."

THE INADEQUACIES OF THE POST OFFICE POLICIES

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. CARTER. Mr. Speaker, for months now my colleagues and I have labored to understand the new policies and operations of the Post Office Department. I have exhausted every effort to reach a cooperative atmosphere in which cooperation can be effected.

The new policies were introduced to us as the answer to increased efficiency and as a method for better service in postal deliveries. It is my conclusion, after studying these policies in operation for several months now, that they have been an obvious failure.

I am going to make three indictments against the Post Office Department that illustrate a few problems that Postmaster General Blount must correct. The first point that I would like to bring up is that by reserving new appointments to persons who have experience in the post office, they are perpetuating the political party which now controls the local post offices. In the rural areas where there are large numbers of second- and third-class post offices, these post offices are operating out of commercial stores. The postmaster is practically always the owner of this commercial enterprise. When the postmaster decides to retire, he will take in a person as his next replacement and give this person experience only if he agrees to purchase his store when he becomes postmaster. The post office, therefore, is becoming a part of the commercial enterprise. This is a practice which should be ended immediately, but as long as the new policies exist, this practice will continue.

The second matter that I would like to bring to your attention is the complete lack of public explanation of the new policies now being followed by Postmaster Blount. In my experience, I have never confronted a more ineffective means of explaining policies being followed by a Government agency. It seems as if those in the post office are perfectly content to enforce new policies but to accept none of the public responsibility for the effects it is having on the persons concerned with the operations of local post offices. I will go even further and state that agents in the post office still place the blame of changes in local post offices on their U.S. Representatives and not on Postmaster General Blount.

The third and final subject that I wish to bring to your attention is the policy now being followed to disregard the legal requirement of confirmation of postmasters. Until new legislation is passed concerning the post office, it is the law that all postmasters must be confirmed by the Senate. In order to bypass this confirmation, Postmaster Blount has decided upon the course of creating permanent temporary postmasters in charge. There has not been one confirmation of a postmaster since January 20, 1969, although thousands of temporary postmasters in charge have been installed. By following such action, the Post Office Department is showing it's complete disrespect for the law and is illustrating a disrespect for the Senate.

Unless their policies are changed, I feel that it will be my duty to introduce legislation that will limit the designation of any person as temporary postmaster in charge for 1 year. If such a position cannot be filled by a permanent postmaster who deserves confirmation from the Senate, the post office should look for a new postmaster.

ATLANTIC PARTNERSHIP

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 10, 1969

Mr. CONTE. Mr. Speaker, I am joining with my colleagues ably led by the distinguished gentleman from Illinois (Mr. FINDLEY) in discussing the concept of Atlantic partnership and European integration which formed the main topic of the recent conference of the American Institute on Problems of European Unity at Georgetown University between October 17–19, 1969.

One of the areas on which discussion was focused was Great Britain and the choice for that country between orientation toward the United States—the "special relationship"—or joining an exclusively European grouping.

The panelists, led by Prof. David Calleo from the School of Advanced International Studies of Johns Hopkins University, generally felt that Britain has made a bona fide move to become a member of the European Economic Community, but that British thinking is still permeated with what is often called "Atlanticism." Another idea expressed by some of the panelists was that Britain would still prefer a Soviet-American condominium of world power to the emergence of Europe as a third force.

The panelists proceeded to analyze the reasons for this ambiguity in British thinking and tried to decipher how the two concepts could be practically reconciled enabling Britain to join the EEC without turning isolationist toward the United States.

It was pointed out that British entry into the EEC would enable the latter to augment its military strength by a merger of the French and English nuclear establishments to which would be added the financial strength and technical know-how of Germany. The panelists generally thought that this would be advantageous to U.S. interests as it would strengthen European defenses against the Soviet Union while certainly it would not be a challenge to our nuclear arsenal.

The panel closed on the note that the concept of Atlantic partnership is in reality much broader than the Anglo-American "special relationship," and it could be well expanded to encompass our relations with all of the Western European countries in EEC and thereby pave the way for British entry into EEC.

ORGANIZED CRIME AND CREDIT CARDS

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. HALPERN. Mr. Speaker, organized crime often seems so distant from the lives of most of us. We hear of narcotics traffic, gangland slayings and so forth, but it never seems to touch our lives. We forget about it.

But recent developments suggest that those of us with this complacent amnesia may have reason to pay a bit more attention to our latter day, button-down Al Capones. Like the rest of the business world, the Mafia has discovered the credit card. And now every one of us with a batch of nifty little plastic charge-whatever things in our wallet cannot rest quite so easily in the belief that our lives will not become involved in the underworld. Organized gangsters have been making a mint through numerous schemes to make fraudulent use of credit cards.

The Washington Post on December 7, 1969, carried a story on one of the more sophisticated techniques employed and I wish to insert the article in the RECORD at this point:

FIGHTING CREDIT CARD FRAUD

(By Robert E. Dallos)

NEW YORK.—To Alphonse Confessore it seemed like a foolproof scheme. As repairman on the machine that embossed the names and numbers of Diners Club credit cards, he was easily able to make about 1,000 cards for himself.

What followed turned into a nightmare for the Diners Club. While members got their renewed cards as usual, the duplicates were sold to the underworld where, as one club official puts it, "they funded criminal specialties."

Diners Club says such cards provided air transportation and luxurious hotel accommodations for narcotics traffickers, stacks of airline tickets for subsequent sale on the black market or to transport highpriced postitutes between cities and rented cars for use in robberies.

DINERS CLUB TAKEN

Before it was over, more than 400 of Confessore's cards had been used and the Diners Club had been taken for $719,887.23.

But Confessore did not figure on a computer. It helped crack the case when it showed the suddenly abnormal spending patterns of the card holders. Confessore recently was found guilty of fraud in federal court with five co-defendants. Early Sunday, while out on bail awaiting sentence, he was found on a New York street with five bullets in his head and neck, an apparent victim of a Mafia execution.

The Confessore case points up both the growing sophistication of credit card crime and the intensified efforts of credit card issuers to come up with a better method to combat it. Their biggest new weapon is the computer.

As the number of credit cards in the United States has proliferated—there are more than 300 million currently in consumer wallets and they are used to charge between $40 billion and $60 billion annually—so has their illegal use.

FRAUD LOSSES SECRET

Exact fraud loss figures are kept secret. But the American mutual insurance companies that pay some of the losses, estimates that more than 1.5 million cards are stolen or lost each year and that fraud losses have jumped from $20 million annually in 1966 to more than $100 million a year today.

With so many cards in circulation it is not surprising that many find their way into the wrong hands. They have, in fact, become an important tool of the underworld.

The 37-year-old son of Joseph (Joe Bananas) Bonanno, the deposed Mafia boss, was found guilty recently in federal court of having fraudulently used another man's Diner's Club card to run up $2,400 in bills on a coast-to-coast tour.

"The major factor in credit card fraud losses is the professional crook," says Milton Lipson, a former FBI agent who now heads the American Express Co.'s 300-man investigative force. "The industry could live with the amateur."

"You can no sooner end the fraudulent use of credit cards than you can end sin," says John J. O'Toole, head of the Diners Club security force. "But the computer can help retard abuses and lower the percentage of fraud losses to sales."

About a year ago American Express—it has 3 million card holders who put $1.3 billion on the cuff last year—put into operation its antifraud computer. It has been programmed to remember the details of all credit accounts, including the numbers of lost, stolen or canceled cards and the purchasing habits of its members.

When an American card is presented to an airline, hotel, restaurant or other of the 250,000 American Express establishment, credit authorization is normally required if the transaction exceeds a fixed amount. (This amount is usually $100 but can be lowered to as little as $10 in areas swamped with stolen cards.)

When credit authorization is required, the establishment contacts the computer in New York by telephone.

When no negative information on a card is uncovered in the computer's memory bank, it will answer verbally (it has a 60-word vocabulary) within seconds that the transaction is authorized.

Where negative information is found, the computer tells the caller to hold the wire and the call it automatically transferred to human authorizer seated in front of a television screen onto which the entire history of the credit card in question is flashed.

RUSSIA REKINDLES SPACE RACE

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. TEAGUE of Texas. Mr. Speaker, the San Diego Union of October 15, 1969, examined the current status of our national space program in writing of the aggressive and continuing effort of the Soviets to develop and use space. As this editorial so aptly points out as we are dismantling our space effort, the Soviet Union continues to press on with the development of their space capability. It is important that we look ahead and strive for a balanced space program which will not only serve to support the economic well-being of our Nation and the world but also to support our national security.

The item follows:

RUSSIA REKINDLES SPACE RACE

Again the thoughts and concerns of the United States of America turn to space as seven Soviet cosmonauts and three Russian vehicles orbit the earth.

The Apollo program which landed Americans on the moon is convincing evidence that the United States still is well ahead in manned space exploration.

But the Soviet attempt to construct a station above the earth dramatically calls our attention to the fact that planetary conquest and satellite development are but one aspect of space applications.

Soyuz 6, 7 and 8 reveal emphatically that Russia was concentrating its space program on manned stations above the earth even as we were reaching for the moon.

We must ask ourselves why.

A space station can be used for cosmic research. It can be a way station for deeper or more thorough planetary exploration. Or a space platform can serve as military high ground from which an enemy could destroy our satellites and perhaps dominate the earth. This is not a comforting thought, but it is one which we must contemplate despite the treaty which supposedly bans weapons of mass destruction from space.

Because of the closed Soviet society and its record of past treaty violations, we may not know the intent of the Soyux program until we see its full application.

To be secure and for peace of mind, we should press forward to prepare ourselves for any possible Soviet space use. Unfortunately, the outlook for progress is not optimistic.

The vast manpower, brainpower and technology that gave the United States its lead in space is being slowly dismantled. For budgetary reasons, the United States has cancelled the Air Force program for a manned orbiting laboratory. A basic National Aeronautics and Space Administration manned space laboratory cannot be sent aloft until 1972 with present financing. Congress has yet to consider a $9 million appropriation for rudimentary research into a more sophisticated civilian laboratory to follow that.

All this is food for thought.

The United States, with a gross national product of $900 billion, is systematically weakening its own national security and space programs. The Soviet Union with a gross national product of less than $400 billion, has a defense budget nearly as large as ours when the Vietnam War is excluded.

It is maintaining a high troop level on two fronts, filling the oceans with its navy, spending millions to assist Cuba, North Korea, North Vietnam and the Arab nations.

And now Moscow is showing the world that it intends to continue the space race with enterprise and vigor.

Soyuz illuminates the value the Soviet Union places on the domination of the area beyond the earth.

It should bring home to us the folly of false economy.

TRANS-ALASKA PIPELINE

HON. JULIA BUTLER HANSEN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mrs. HANSEN of Washington. Mr. Speaker, during the very limited time that the House, sitting as a Committee of the Whole, discussed the supplemental appropriations bill, I did not have the opportunity nor did I wish to take the time of the House unnecessarily to present all the most interesting facets of the trans-Alaska pipeline. However, I do not think it fair to elected Representatives of this Nation that no statement

be presented to them for their ready reference and information. Therefore, I take the opportunity of now summarizing for this House the report in chapter III, Department of the Interior:

SUMMARY OF REPORT

Testimony developed during the hearings created grave concern on the part of the Committee with regard to the approach being taken by Departmental officials in connection with their responsibilities relative to the construction of the proposed Trans-Alaskan Pipeline. The Committee is of the opinion that in many respects the submission of the supplemental fund request for the Bureau of Land Management, the Geological Survey, and the Bureau of Sport Fisheries and Wildlife totaling $2,405,000 was premature.

First of all, the very serious and involved problem of native land claims which has been under consideration by the Congress for several months has not been resolved. None of the testimony given during the hearing reflected the interrelation and probable influence which the granting of the pipeline right-of-way might have in the final settlement of native land claims.

In this same connection, no definite action has been taken by the Congress or the Secretary to date with regard to Secretary Hickel's official notification of his intention to exempt the pipeline right-of-way acreage from Public Land Order 4582 issued January 17, 1969. By law, if this exemption is not obtained, the necessary permit for the right-of-way cannot be issued.

The Committee was surprised and disappointed to learn during the course of the hearings that little, if any serious consideration had been given by Departmental officials to assessing private oil companies who will build the pipeline for additional costs to be incurred by the Department of the Interior directly as a result of the pipeline construction. To repeated questions propounded by the Committee in this connection the answer was "The solicitor has the legality of such action under consideration". No assurance was given the Committee as to when the Solicitor might eventually reach a decision. It should be pointed out that when Departmental officials appeared before the House Committee on Merchant Marine and Fisheries on October 31, 1969, the Under Secretary of the Interior in a direct response to a question by a member of that committee agreed to give further consideration to the matter. (See pp. 656–657 of printed hearings on this bill.)

The Committee strongly feels that any costs incurred by the Department of the Interior for inspection and protection of American natural resources in Alaska are properly chargeable to those oil companies constructing the pipeline, and the Committee directs that in negotiations for issuance of rights-of-way permits, adequate fees and/or reimbursement be charged for recovery of expenses incurred by the Department which are directly attributable to its immediate and continuing supervision of the pipeline.

The Committee was impressed by the myriad of possibilities, both known and unknown, that the ecology of this area could be imperiled as a result of the pipeline construction. The Committee therefore looks to the responsible officials in the Department of the Interior to enforce every reasonable precaution to protect all natural resources of this area from destruction.

Because of the above-described circumstances the Committee was reluctant to recommend funds for this purpose at this time. However, in view of the overall situation, and the urgent necessity for safekeeping the fragile ecology of this region, it was deemed advisable to make funds available in order that there would be no reason from an appropriation standpoint for the best interest of the Federal government not being adequately protected.

The Committee has recommended appropriations in the order of priority. It is first necessary for the Geological Survey to determine the geological feasibility and precise location of the pipeline; after which the Bureau of Sport Fisheries and Wildlife will be responsible for the placement of the pipeline from the standpoint of wildlife and sport fish. The third priority is for the issuance of the rights-of-way permits by the Bureau of Land Management after the previous determinations have been made.

In spite of the fact that Alaska has been heavily dependent upon commercial fisheries as an economical resource, and that the international boundaries of several nations are also related to the well-being of this resource management, the Committee was appalled and surprised that representatives of the Bureau of Commercial Fisheries did not attend the hearings to present the information necessary for total evaluation of the effects construction of the pipeline will have on this natural resource.

I also feel that Members are entitled to some of the facts regarding rights-of-way, the length of line, total cost, et cetera. I herewith list them below:

ALASKA PIPELINE

1. Width of right-of-way: 54 ft.—pipeline; 46 ft.—maintenance, 100 ft.—total.

Additional 100 ft. for access road requested.

2. Size of pipe: 48'' diameter.

3. Length of line: 772 miles, (686—BLM) (54—State) (28—military) (4—private).

4. Total cost: $1 billion—oil companies (est); $9.7 million—BLM, $2.9 million—Sport and commercial fish, $4.0 million—Geo. Survey.

5. Roads built by oil companies: Livengood to Yukon—53 miles, 200 ft. wide—all weather gravel. Will turn over to Alaska upon completion.

In response to the committee hearings, Acting Secretary of the Interior Russell E. Train courteously and immediately forwarded to me the following letter dated December 9:

DEAR MRS. HANSEN: I understand that in connection with that portion of this Department's request for a supplemental appropriation pertaining to the Trans-Alaska Pipeline System right-of-way application, you have asked whether there is adequate statutory authority for us to charge TAPS for certain extraordinary costs necessitated by the pipeline. The problems presented by the TAPS application are unique and are greater than those presented by any land use application previously presented to this Department. Such problems result both from the magnitude of the project and from the nature of the Alaskan terrain and environment through which the pipeline is proposed to pass.

To meet the peculiar problems of the TAPS application, we have developed a series of stipulations which we propose to make a part of the right-of-way permit, if and when that permit issues. These stipulations are unique and contain comprehensive and detailed provisions; they will require extensive supervisory activities by personnel of the Department during construction and operation of the pipeline.

The Solicitor has advised me that, to the extent this Department reasonably incurs supervisory and other associated costs which are necessitated by the unique problems presented by the TAPS project and which are not expenses which this Department otherwise would incur in the normal operations, there is adequate statutory authority for us to charge such reasonable costs to TAPS. These costs, of course, would be charged in addition to the fair market value use and occupancy charges we normally require for pipeline rights-of-way permit is issued TAPS, the Department intends to charge TAPS for these extraordinary costs . . .

Sincerely yours,

RUSSELL E. TRAIN,
Acting Secretary of the Interior.

I also append a memorandum to the Secretary of the Department of the Interior from the Solicitor of the Department of Interior dated December 10:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SOLICITOR,
Washington, D.C., December 10, 1969.

To: The Secretary.
From: The Solicitor.
Subject: Charges to Trans-Alaska Pipeline System for extraordinary Departmental costs.

In connection with that portion of this Department's supplemental appropriation request pertaining to the pipeline right-of-way sought by the Trans-Alaska Pipeline System, Chairman Julia Butler Hansen of the House Interior Appropriation Subcommittee has asked whether there is adequate statutory authority for us to charge TAPS for supervision and other extraordinary costs necessitated by the Pipeline. It is my opinion that you have the discretionary authority, under the appropriate circumstances, to impose on a pipeline right-of-way applicant reasonable charges to reimburse the Department for expenses necessarily incurred by it in connection with the application and the subject matter thereof.

This discretionary authority stems from several statutory sources. The first of these is that section under which any pipeline right-of-way will be issued TAPS, Section 28 of the Mineral Leasing Act, 30 U.S.C. sec. 185. That section provides in part that

"Rights-of-way . . . may be granted by the Secretary of the Interior for pipeline purposes . . . under such regulations and conditions as to survey, location, application, and use as may be prescribed by the Secretary of the Interior. . . .

The broad language of this section grants the Secretary discretionary authority to condition the granting of a right-of-way permit upon the payment by the applicant of reasonable charges; this section does not limit those charges to the fair market value use and occupancy charges we now make under 43 CFR 2234.1–6.

The authority includes the extraordinary costs incurred by the Department resulting from the TAPS application. Section 35 of the Act (30 U.S.C. sec. 191) reinforces this conclusion. That section, by providing for the disposition of monies which are received under section 28 but which do not result from sales, bonuses, royalties or rentals, recognizes that there may be receipts, and hence charges, under section 28 which are not for the use or occupancy of the right-of-way. The nature and amount of those charges, of course, would be set under the discretionary authority contained in section 28.

Section 201 of the Public Land Administration Act, 43 U.S.C. sec. 1371, also is directly in point. That Section provides in part that:

"The Secretary of the Interior may establish reasonable filing fees, service fees and charges, and commissions with respect to applications and other documents relating to public lands and their resources under his jurisdiction, and may change and abolish such fees, charges, and commissions."

(The only restriction made by this section relates to Federal Register publication prior to taking action thereunder.) The Senate report on this act noted that:

"The charges made for various administrative services need to be brought into line with present-day costs . . . Sections 201–204 authorize the Secretary to establish, modify, and abolish fees required to be paid as

service charges with respect to applications and other documents pertaining to the public lands. . . . This authority relates only to such items as filing fees, service fees, and commissions. It does not cover payments for the use, or purchase, of lands or their resources and it will not, therefore, effect schedules of charges for such items as rentals for . . . rights-of-way.

Senate Rep. No. 1755, 86th Congress, 2nd Sess.

The Senate report reproduces in full the Interior Department's report on the House bill. The Department stated therein that:

"Title II would authorize the Secretary to modernize provisions for the payment of fees required as service charges. The Congress has urged charging self-sustaining fees to the fullest extent possible. See act August 31, 1951 (5 U.S.C. sec. 140). . . . In some cases no specific statutory provision has been made for the payment of service charges by those who are the primary beneficiaries of such charges. Examples of such services are the handling and recording of papers . . . and the making of surveys and field examinations."

The peculiar expenses which the Department will incur by virtue of the TAPS application and the right-of-way permit, if granted, are within the ambit of 43 U.S.C. section 1371. I understand that these expenses will consist primarily of on-site inspections and investigations (i.e. "field examinations") and the processing in various ways of the application and subsequent numerous technical and other documents which TAPS will be filing frequently during the construction and operation of the pipeline, if the permit is granted.

Further, these sections of the Mineral Leasing Act and Public Lands Administration Act should be construed in light of the following Congressional pronouncement:

"It is the sense of the Congress that any work, service, publication, report, document, benefit, privilege, authority, use, franchise, license, permit, certificate, registration, or similar thing of value or utility, performed, furnished, provided, granted, prepared or issued by any Federal agency . . . to or for any person . . . shall be self-sustaining to the full extent possible. . . ."

65 Stat. 290, 31 U.S.C. sec. 483a

Based on all of the foregoing, it is my opinion that you have the discretionary authority to charge a pipeline right-of-way applicant for the extraordinary costs incurred by the Department. The peculiar circumstances of the proposed Trans-Alaska Pipeline would warrant the exercise of this discretion and the imposition of such charges.

The problems presented by the TAPS application are unique and greater than those involved in any land use application previously presented to this Department. Such problems result both from the magnitude of the project and from the nature of the Alaskan terrain and environment through which the pipeline will pass if a permit is issued. The stipulations to be made a part of any right-of-way permit that may issue are unique and contain comprehensive and detailed provisions; they will require extensive supervisory activities by personnel of this Department during construction and operation of the pipeline.

The TAPS application and project require the Department to incur extraordinary expenses; these are necessitated by the unique problems presented by the TAPS application and, except for that application, would not be incurred by the Department in its normal program activities. Therefore, under these circumstances, it would be proper for you to exercise the authority granted the Secretary, as set forth above, and to assess such extraordinary charges to TAPS if a permit issues to them.

MITCHELL MELICH,
Solicitor.

Mr. Speaker, I wish to express my appreciation to the Secretary and to the solicitor for their responses and I commend to the Members of the House the hearings on this entire subject. The Geological Survey hearing will be found on page 474 through page 502, the Bureau of Sport Fisheries and Wildlife hearing record will be found on page 503 through page 542, and the Bureau of Land Management hearing record will be found from page 581 through page 672.

I trust that all Members will take the opportunity to thoroughly understand all facets of this immeasurably important problem.

BEN SELVIN

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. WOLFF. Mr. Speaker, for the past 15 years, Roslyn, N.Y., which is part of the Third Congressional District which I am proud to represent in Congress has been the home of a most amazing gentleman. The talents and the accomplishments of Mr. Ben Selvin, of whom I speak, were recently brought to my attention by a friend of mine, Allen C. Miller, receiver of taxes in Manhasset, N.Y.

Since the article he brought to my attention tells the story of a most interesting member of my district, I would like to take this opportunity to include an excerpt from the community newspaper's article in the RECORD:

RECORDS FLOWED FROM HIS BATON: BEN SELVIN: MUSICIAN, FARMER, BUSINESSMAN

(By Diane Bennett)

"Have stop watch; will travel," is what he said after he reached the compulsory retirement age at the company where he was engaged in the third major career job of his life, and he meant it. He's now embarked on a new job—in the music field, of course.

Music is his destiny and his hobby, his love. But in his 71 years, he has owned an alfalfa farm in the California desert, a potato farm on long Island, business property in Philadelphia and a gas station in Queens.

He has recorded the greatest number of song titles in the history of American music, contended with the labor giant of the music industry, James Petrillo, once worked with Rudolph Valentino when the star of "The Sheik" was still a waiter, and was artist and repertoire director for such singers as Bing Crosby, Dinah Shore, Doris Day, Frank Sinatra and Nelson Eddy.

Remember "Dardanella"? If you do recall that song, which was the first million-record seller, you remember Ben Selvin, entrepreneur, businessman and music man extraordinaire. A resident of Roslyn for the past 15 years, Selvin was the originator of one of the big name bands during the era of dance bands, who recorded under nine different names before he left the performing side of show business to enter the recording world.

His various careers defy compression into a story of newspaper feature size. His musical interests have led him from the concert halls, where he made his debut as a violinist at the age of eight, to the beer saloons of Harlem, where he played lugubrious tunes (also on the violin), moving the prostitutes to maudlin tears. He went on to band-leading at elite Broadway clubs and traveled on to the executive suites at RCA Victor and the 3-M Music Co., where he worked on present day institution known as Muzak—the recorded, piped-in music was Selvin's baby.

At 71, Selvin is light years away from the days when he sang as a boy soprano in a New York synagogue, and where he almost headed into a career as a female impersonator. That would-be career folded before it budded. The Broadway impresario who promoted the deal had ordered gowns, bras and other necessary items of feminine apparel for the dimpled, curly-headed youth; at that precise juncture, his voice cracked. The incident bounced him into another show business arena—the movie houses, where he improvised melodies on the piano to synchronize with the silent films that unfolded on the screens.

Today, in his eighth decade, Selvin is still making music pay and having a great time doing so. His new career, just under way, is that of selecting classical music to be recorded to lyrics, to help teach youngsters to remember themes of important musical works.

Selvin is a very canny, friendly man, direct and charming, whose careers though most often show business-oriented, were boosted by sidelines that were seized where offered as the main road away from poverty.

The son of immigrant parents who lived on New York's East Side, Selvin explains his gas-farm investments. "I was raised in poverty; I didn't want that for my kids."

After he had been with Muzak for many years, Selvin was offered a job as president of a record company, in partnership with New York's bon vivant mayor, Jimmy Walker. He had been promised a piece of the Muzak business; it didn't materialize. So the man who early in his career as a bandleader bought a gas station "not because I like to pump gas but because I wanted security," became the mayor's partner.

During a stint with another record company, Columbia, he was an artist and repertoire director, selecting the songs for Crosby et al. He persuaded a reluctant Doris Day to record a song she didn't like and the resulting hit was "It's Magic." He is credited with being the originator of the famed Crosby whistle. That trademark began when Crosby, a singer with the Paul Whiteman Orchestra, recorded his first song with Columbia. "They only gave me a four-piece band to work with. I suggested he whistle during the second chorus to make up for the lack of instruments," Selvin recalled.

His career as an entrepreneur began almost as early as his show business performing—from his first job on Broadway at 15, he graduated to become a member of Charlie Strickland's dance band and supplemented the then somewhat meager salary of a musician by persuading conservative New Englander Strickland, who wouldn't accept tips, to let him be the "financial adjuster" for the band. During a job in Sea Girt, N.J., he topped that, accepting Strickland's bid on the condition that he get the coatroom, auto parking, cigarettes and men's room concessions. "That put me in business," he says in a classic understatement,

He opened at the Moulin Rouge in 1917 with the Ben Selvin Orchestra making its first appearance. He was 19. The club date lasted for seven long years. It was a time of firsts for Selvin; he also recorded his and the industry's first million-selling record—waxed in a manner that seems prehistoric in this age of computers: the band was enclosed in a small room and each instrument was placed in front of a tin horn. All the horns led into one large one, where the music was impregnated onto hot wax. There were no tapes, no amplifiers, no mikes.

Selvin went on to record a total of 9,000 titles, more than any other performers in recording history. The only other person who came even close to that record is Bing Crosby, with a total of 2,600 records.

UNITED STATES IS DEPENDENT ON RUSSIAN IMPORTS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. DERWINSKI. Mr. Speaker, despite growing evidence of the problem facing the United States in trading for certain commodities with the Soviet Union, this matter unfortunately has escaped public attention and has not been adequately or objectively studied by the administration.

Willard Edwards, the veteran Chicago Tribune correspondent, has studied the subject and in his column of Thursday, December 11, he very effectively discusses the complications facing us in certain critical commodities obtained in trade from the Soviet Union:

UNITED STATES IS DEPENDENT ON RUSSIAN IMPORTS

(By Willard Edwards)

WASHINGTON, December 10.—It will come as a shock to most Americans to learn that the United States has permitted itself to become increasingly dependent upon Russia for imports of critical war materials.

The misgivings accompanying this disclosure will be intensified by the discovery that Russia planned it that way, taking advantage of the "bridge-building" policy which became popular in the mid-'60s under the Johnson administration.

All the evidence suggests that the United States has fallen into a trap prepared by Russian strategists and given the label of the "weak link principle" in an analysis by Maj. Gen. A. N. Lagovskiy of the Red army, a leading soviet specialist in economic warfare.

A translation of Lagovskiy's text for study in the soviet armed forces has been made the basis for a perceptive study by A. C. Sutton of the Hoover Institution on War, Revolution, and Peace at Stanford university. It appeared in the December issue of Ordnance, a journal devoted to industrial preparedness for national defense.

Discussing foreign trade as a weak link in the economy during a war, Gen. Lagovskiy noted the great dependence of modern warfare on certain war materials—such as chrome and platinum—and the lack of major deposits of such materials in the United States and other capitalist countries.

He advocated the encouragement of a potential adversary, such as the United States, to accept imports of such "weak link" strategic minerals from the Soviet Union.

A United States military jet airplane, he emphasized, cannot be produced in the United States by utilizing only domestic raw materials. He gave these startling figures: The United States must import 92 per cent of the chrome, 97 per cent of the nickel, 76 per cent of the raw aluminum, and 88 per cent of the cobalt needed for such an aircraft.

Russia's success in exploiting this strategy must have amazed its sponsors. In a recent typical 6-month period, 84 per cent of United States imports from Russia have been in materials related to the "weak link" strategy—not only chrome ore but industrial diamonds, platinum, palladium, rhodium, nickel, and titanium.

How and why did the United States get itself into this fix?

First, it voluntarily cut itself off from supplies of chrome ore from Rhodesia by joining in United Nations sanctions against that small nation. This political decision gave Russia, the only other major source of the ore, a virtual monopoly.

Second, it began to rely on Russia for other critical metals under the "bridge-building" programs of the Johnson administration. The idea was that Russia would respond to trade benefits by reducing supplies to North Viet Nam and the middle east conflict.

Russia happily accepted the profits of trade but the "reciprocity" expected never materialized. It even stepped up its logistic supply of world revolution.

The psychological effect on soviet planners contains a degree of danger, Sutton noted. From their viewpoint, the situation means United States weakness and as such can be considered a sufficient invitation to initiate aggression.

It makes little sense, he conclude, to spend vast sums on a defense against soviet missiles without, at the same time, taking steps, at little cost, to remove the nation from the "potentially dangerous corner" into which it has maneuvered itself.

THE PANTHERS NEED HELP

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. MICHEL. Mr. Speaker, the Black Panther movement has been in the news quite frequently and, to say the least, the picture is rather grim. Some black leaders who have no sympathy for the tactics and policies of the Black Panthers have expressed concern over the recent clashes between the Panthers and police departments in some of our larger cities—and rightly so.

An editorial appearing in the December 10, 1969, edition of the Peoria Journal Star makes the point that the Panthers can be equated with the Ku Klux Klan. I insert the editorial in the RECORD at this point:

THE PANTHERS NEED HELP

The killing of Peorian Mark Clark and the Black Panther leader last week in Chicago may serve to bring to a head the new boil which the Panthers have imbedded under the skin of human relations in America.

Some real questions have been raised by responsible people, both black and white, about the "shootout" in Chicago.

John Kifner of the New York Times reported Sunday that "an inspection of the first floor apartment did not seem to square with the police accounts of a torrid gun battle." The Chicago Daily News, in calling for Chicagoans to "cool it", editorialized Monday that "The nature and order of events inside the apartment remains to be determined," a strong indication of disbelief of the police story.

Since the Chicago incident, other violent confrontations between police and Black Panthers have occurred in Kansas City and Los Angeles and many black leaders who have no sympathy at all with the Black Panther's violent "political" program are deeply concerned about what is happening.

There is no question that a pattern of violence involving the Panthers and the police has evolved across the nation, but the pattern was not made during the past week. It began to take shape with the "ghetto riots" which spawned small groups of violent conspirators in several cities. And it was finally put together under the Panther label by a coterie of articulate ex-convicts and jobless civil rights activists who duped a few young men who were not overly bright to sell their newspapers and play the cannonfodder roles of tough-guy revolutionaries.

The Black Panthers leaders—now mostly safe in jail or self-exile excelled in their ability to express hatred—hatred for white bigots, hatred for black "Uncle Toms", hatred for the American system of law and enterprise which is flawed by racial discrimination. Hate coupled with intimidation and demogoguery made the Panthers into a sort of a black Ku Klux Klan. The white sheet was replaced with the black beret and jacket. And the police, who the Panthers think hold American society together, became the Panthers' Enemy No. 1.

In the past two years, we are told by the Panthers, 27 of their members have been killed by police. We do not know how many policemen—or "pigs" in Panther terminology—have been killed by the Panthers.

After all of the killings the Panthers have consistently argued that the police were assassins, conveniently forgetting that it was the Panthers themselves who declared war on the police.

In most of the cases, the Panther stories of police atrocities have been disbelieved, but in last week's "shoot out" in Chicago at 4:40 a.m. the fight was so one-sided that the Panthers found sympathy if not support.

We doubt very much that anything resembling a murderous police conspiracy against the Panthers exists, but there is no doubt that a violent Panther conspiracy is aimed at police. The Panthers themselves have made no secret of this. They publish self-incriminating statements regularly in their newspapers and urge others at public meetings to join them in their war against the police. The only mystery is why the government has not taken more legal action than it already has against these advocates of violence and revolution.

It would not be a surprise if a policeman, facing a group of armed Panthers, fired the first shot. And it would not be hard to believe that a policeman might fire more shots than necessary to subdue such men. The Panthers have simply invited this to happen by stock-piling guns and threatening the police repeatedly.

It seems plain enough that our society can not tolerate the Panthers any more than it could tolerate the Klan. It seems plain enough that the way to stop the Panther movement is the same way which was used to stop the Klan.

Just as intelligent whites refused to have anything to do with the Klan, intelligent blacks must refuse to tolerate or associate with the Panthers.

The real sympathy that the Panthers need from black leaders of the day is the kind which attempts to protect these young men not from the police but from the idiotic Panther leadership which should not be allowed to continue to drive young men like Mark Clark to early graves.

The idea that the Panthers sell that no black man should speak out against "a brother" no matter what he does must give way to the higher intelligence which recognizes that killers, demagogues, and foolish people come in all skin colors. The Panthers, like the Klan, are proof of that.

LETTERS FROM A MOTHER

HON. ROGER H. ZION

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. ZION. Mr. Speaker, last year a young Evansville soldier died in Vietnam. He was one of many fine young men from

my own community and State who gave their lives that the citizens of another land might determine their own destiny. This particular young man's mother has written me about her son and his life and ideals and I would take this occasion to pass portions of her letters along to my colleagues in the House.

When I asked this lady if I might use portions of her letters in the RECORD, she replied in the affirmative but emphasized that she wished no personal publicity from their use. She stressed that she had no political ax to grind or cause to champion. This mother's letter was, as she wrote:

The anguished cry of an old mother who is broken hearted over the loss of one of her most prized possessions or, "Gifts of God."

One of this lady's letters is a copy of one she wrote to a Vietnam moratorium organizer, Jerome Grossman of Boston, Mass., and I also include portions of this letter to Mr. Grossman. As she wrote to me:

Today, just two years ago, we took our fine young son on his last journey. This was the last time we were to ever see him alive. We took him to the St. Louis airport to get a plane to California and then on to Vietnam. He was killed near Hue during the Tet offensive of Hanoi. He was a medic with the 1st Air Cavlary. My heartfelt sympathy goes out to the parents of these young men being tried for war crimes. I do not condone the crime, but they were trained to kill, yet when they do they are condemned. My son was killed in battle as he tried to move injured soldiers. He had patched up and moved a number of them and was trying to move yet another one when he was killed. He did not carry a gun but only medicine in his back pack and in his hand, and a Bible in his pocket. I'm sure he also had a prayer on his lips. Was not this just as cold-blooded a murder as what these soldiers are accused of? Why aren't the Viet Cong murders given equal time with the American ones? The Viet Cong are killing their own people.

Another thing that bothers me are all these young people demonstrating. They are bringing on an American defeat and are condemning what my young son died for. I thought it was called treason to raise an enemy flag and to help the enemy in time of war. What happened to punishment for this?

To Mr. Jerome Grossman, an organizer of the moratorium effort in October:

Our fine young man was killed in Vietnam last year. He had received a B.A. from Wabash College and had a year and a half in seminary finished. He felt compelled to serve his country so he dropped out of seminary and enlisted. He was trained as a medic and he was a good medic. He has been given 11 medals for his brave deeds. While in college and seminary he worked hard. During the summers and at Christmas holidays he worked for a milling company, cut grass for our church and sold pots and pans to help pay his way. He had also been given a scholarship. Please tell me how all those long-haired "girl figures" are paying their way? Is it men like you who are giving them money? My boy could never have taken time off to demonstrate. He was too busy paying his own way through college. I believe if a lot of these characters who call themselves man but look like ill-groomed girls would see a little of what my boy did they would become better Americans. My boy never had so much as a traffic ticket. He was always clean-shaven with his hair cut and very neat. It makes my blood boil to see these young people in college today. Tell me how they can have the money to spend on these music orgies. Someone is paying the bill.

My boy did not believe in killing but he wrote home and said "After seeing all of the destruction that the Viet Cong have done to these poor small people, I am glad to help wherever I can."

Why is it that these followers of Mao and Hanoi are praised while our good boys come home from the fighting and are looked down on and have a hard time getting a job? You have said that you would not be able to stand it if you lost a son in this war. Well, we have and I'll tell you how you stand it. When the officer comes to your door and tells you he is sorry to tell you your son has been killed, the world seems to fall down on you. You go to bed each night and cry yourself to sleep. You look at his bed and his clothes, especially his shoes, and know that your once fine young man will never fill them again. Then the letters and packages that you sent him, but that he never received because he was in the front lines trying to save all that he could, start coming back and a knife turns in your heart. You go to the cemetery and put flowers on his grave thinking at least you can do that much. He was not a "flower child" but he loved flowers and all living and growing things. You remember the time he gave up a date on New Year's Eve with a girl he was fond of just to sit with his grandmother who had just lost her husband and was lonely. You remember the morning you were ready to take him to the airport for his last journey and he put his arm around you and said "Mom and Pop, no matter what happens I want you to know that I love you."

Surely a man of your wealth and prestige could do more. We should never have gotten into this war in the first place but we ARE in it. Are you just willing to hand over to the enemy everything that my fine young boy stood for?

And, finally, she writes to me:

It hurts me to see my son's name read at these so-called "peace" rallys, when he had nothing in common with these long-haired, bead-wearing, so-called young "men".

My son was a small young man in body, but he had a big, beautiful love of God, country, family, his fellow Americans and also the Vietnamese. In one letter, he wrote that he had a wonderful experience. A Viet Cong prisoner was brought to him seemingly dead. He gave him mouth-to-mouth resuscitation and patched him up and, at the last report, this person was going to make it.

All of these fine young men have given the last ounce of devotion to their country and went to Vietnam thinking they were aiding the U.S., not the Viet Cong. It hurts me so to see these "peace" marchers carrying Viet Cong flags and praising the Viet Cong.

We have a beautiful, vast, productive country—truly a Gift of God to use in the right way. All of these young people have a golden opportunity to get their education and do something worthwhile for their country and their fellow man.

Where has the bravery and love of country and hard work to achieve a goal of our forefathers vanished to? I feel that my son and all of the thousands of other fine young men who died in the service of their country, accepting the harshness of basic training and all the other hurts of war, are true Americans.

Mr. Speaker, there is very little that I would add. These letters from the heart of a mother who loved and lost her son speak for themselves. As was her son, she, too, is a patriot of the highest order. We need more of her kind.

JOHN J. RHODES REPORTS

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. RHODES. Mr. Speaker, from time to time I send a newsletter to my constituents reviewing matters which may be of widespread interest. This week my newsletter centers on some of the major proposals contained in "The Nixon Legislative Program," and I include it at this point in the RECORD for the benefit of those who may be interested:

[From the newsletter of John J. Rhodes, Dec. 10, 1969]

THE NIXON LEGISLATIVE PROGRAM

When President Nixon took office last January, there was a growing sense of frustration with government among Americans. The Federal government continued to spend billions upon billions of dollars while the individual taxpayer saw fewer and fewer results from such massive spending, except for the fact that the purchasing power of his dollar was being drastically eroded.

In addition to a skyrocketing inflation fed by fiscal irresponsibility on the part of the previous Administration, Nixon was confronted by an unprecedented increase in crime in the streets, riots on our campuses, and a welfare system that seemed to reward those who would not work, but failed to provide adequately for those who could not work. We had a draft system that fostered needless uncertainty for our youth and, most tragically, a long and confusing war having no apparent policy direction whatsoever.

President Nixon was summoned to provide new leadership to the nation and offer new approaches to these and other problems. The President responded by setting forth a comprehensive and well thought-out set of legislative proposals designed to speak directly to the needs of our nation. They promise real solutions to our problems and not merely band-aids to cover our wounds.

Specifically, the President has sent some fifty messages to Congress recommending the enactment of needed legislation in almost every area of concern. He has confronted inflation head-on by committing this Administration to a set of policies designed to curb the causes of the dollar's erosion. He has recommended wholesale reform of the Post Office, the draft system, the Electoral College, and the Internal Revenue Code.

At the same time, the President has called for specific changes to deal more adequately with the scourge of organized crime, obscene mail, hunger and malnutrition, narcotics and dangerous drugs. He has become the first Chief Executive to recognize and put forth concrete proposals to cope with the awesome population explosion, the crisis in urban and air transportation and the dismally unsuccessful hand-out programs now passing for welfare.

Let's take a closer look at some of the major proposals contained in "The Nixon Legislative Program" and then turn to the action they have received at the hands of the 91st Congress:

CONTROL OF INFLATION

One of the most serious problems inherited by the Nixon Administration was an intolerably high increase in the cost of living. Everyone seemed to be against inflation, but very few were willing to take the steps needed to bring it under control. President Nixon

rejected the artificial tactics of imposing wage and price controls or ineffectual guidelines, in favor of attacking the root causes of the problem.

The hard fact of the matter is that the government can add force to the steamroller of inflation simply by continuing to spend more money than it takes in. For the eight years preceding 1969, the Federal government had run an uninterrupted string of budget deficits culminating in a deficit of over $25 billion in 1968! Today, the chickens have come home to roost and we are all paying for that spending spree in the form of the cruelest tax of all—inflation.

The President has taken action on his pledge to put this nation's economic house in order. He has proposed a cut in Federal spending of over $7 billion this year. He has asked the Congress to phase out the tax surcharge over one year rather than six months, and to eliminate the 7% investment tax credit.

This is tough medicine. These measures aren't the kind that buy instant votes nor give instant relief. Belt tightening is slow and painful, but a President taking steps to fight inflation must make difficult decisions based on reality and not on artificial popularity.

The prospect of inflation run rampant is a very real one. Over the last two years, the prices of meat, poultry and fish have gone up 13.6%; men's clothing up 12.8%; new homes up 18.2%. This Congress, like the Administration, must match its words with its deeds to restore fiscal integrity to the Federal government and economic stability to the economy.

TAX REFORM

A part of the Administration's economic program is to return equity to the Federal tax system. Back in April, President Nixon initiated these changes by recommending to Congress a sound set of tax reforms that were the most comprehensive since 1954. Last August, the House passed a so-called Tax Reform Act which ran to 368 pages in length. While some changes made by the bill were desirable, many were ill-conceived and potentially harmful. Moreover, real tax reform, in my opinion, requires making the present system more streamlined rather than more complicated. While Americans don't mind paying their fair share, the uncertainty and unintelligibility which are the hallmarks of the present Internal Revenue Code, are not acceptable.

This bill is now before the Senate, where many of us had hoped that the defects in the House measure could be remedied. Unfortunately, action on the bill has turned into a competitive fiasco to see who can tax less through the Internal Revenue Service and more through inflation. As the Senate version of the bill now stands, its tax-reducing provisions would exceed its tax-raising provisions by $5 billion in the next fiscal year! While I would be the last person to oppose tax cuts, I believe that this must be done responsibly, which means that spending must first be cut. A tax "handout" without an accompanying reduction in expenditures could cost more in terms of inflation than would direct taxes, in the long run.

One consolation is the fact that if the tax bill that finally reaches the President makes excessive pie-in-the sky handouts and thereby threatens to cost the nation more than its "reforms" are worth, the President will exercise his veto power. Nevertheless, it will be tragic indeed if Members of Congress lose the opportunity for meaningful tax reform in an exercise of partisan politics.

CONTROL OF CRIME

Many of today's criminal problems result from our failure to enforce laws already on the books. Largely, this responsibility rests with the States. For this reason, a massive program designed to modernize local law enforcement agencies across the country is part of the anti-crime package which the Nixon Administration has recommended to Congress. This package also includes measures to strengthen the attack against organized crime, to stem the tide against pornography and obscene mail within present Supreme Court decisions, and to deal more effectively with the serious problem of narcotics and dangerous drugs. While no single legislative program has a higher priority within this Administration, not a single one of the more than 20 bills on the subject has been passed by the Congress. Again, the Administration has taken the lead in an area of utmost concern to all Americans, but the Democratic leadership of the Congress has not yet acted.

NEW FEDERALISM

In a nationwide address last summer, President Nixon set forth a comprehensive plan designed to revamp a good share of this country's social legislation. The three-pronged approach which the President detailed was referred to as "The New Federalism" emphasizing the fact that power was to be returned to the States rather than continue to become concentrated in Washington.

In the area of welfare, everyone agrees that the present system is a colossal failure. Besides failing to meet the needs of the poor, the cost of welfare has more than tripled since 1960, and continues its upward climb. President Nixon has proposed that the present welfare system be scrapped entirely and be replaced by a Family Assistance Plan having the same qualifications and benefits across the nation, combined with a requirement that those who accept benefits must also accept suitable work or job training. In connection with welfare reform, the President recommended a new Manpower Training Act that would consolidate the maze of confusing and overlapping Federal job training programs. Both of these measures are part of a long-range program designed to get people off the welfare rolls and on to the payrolls, thus reducing the need for welfare and its cost to the nation.

The Administration has also proposed a Revenue Sharing Act whereby a set portion of revenues from the Federal income tax would be returned directly to State and local governments on a "no-strings-attached" basis. While it was an accepted tenet of previous Administrations that centralized Federal planning was necessary in order to meet public needs effectively, the President has advocated decentralization as a means of better dealing with a large number of our problems. There is no doubt that all three of these proposals would bring about unprecedented changes in existing programs that must be fully and carefully analyzed. On the other hand, it is clear that the present programs are leading us toward disaster, and that Congress should address itself to the positive proposals put forward by the President.

POSTAL REFORM

The Post Office is in a race with catastrophe and, as President Nixon stated in his message to Congress last May, "Total reform of the nation's postal system is absolutely essential." This year the postal service is expected to run a budget deficit of more than $1.2 billion and this red ink is being underwritten by the taxpayers, rather than by the users of the postal service who should rightly bear this cost. The Post Office Department is badly in need of modernization and improved management techniques. After a careful analysis of the problems besetting the postal service, the Administraton proposed a comprehensive reorganization of the Department aimed at removing it from 18th century politics and establishing a government-owned corporation to provide prompt and efficient mail service to all Americans. Despite the broad support that this measure has, the Democratic Congress has not acted favorably upon it and has indicated that it does not intend to do so.

DRAFT REFORM

President Nixon recognized that the draft law presented an intolerable situation which imposed a needless uncertainty on the lives of young Americans. Last May he forwarded a message to the Congress calling for authority to institute a lottery and change to the "youngest first" method of selection. After the House had passed the measure the Senate Democratic Leadership declared that no action would be taken on it this year. Fortunately, the full impact of this callous disregard for the interests of young Americans for political considerations was brought to bear, with the result that the draft reform law is one of the few pieces of major legislation to have passed the Congress this year.

CONGRESSIONAL ACTION

There are, of course, a number of other important proposals comprising "The Nixon Legislative Program." The Administration is sponsoring or endorsing around 120 bills supporting its position in such diverse areas as the merchant marine, hunger and malnutrition, the population explosion, and unemployment insurance reforms. The unfortunate fact is that of all the measures submitted to it, the 91st Congress has completed action on only two major bills—draft reform and an increase in the limit on the national debt (the interest on which is now running in excess of $45 million a day!).

With regard to money bills, we are almost at the half-way point in the current fiscal year and the Congress has completed action on only 4 of some 13 regular appropriations bills. Since last July 1, the Congress has kept the Federal government in business by passing emergency resolutions providing temporary funds to the various government agencies to continue their day-to-day operations. If it were not for these so-called "continuing resolutions" the government would simply not be able to pay its bills. Needless to say, it is both bad business and bad government when Congress abandons its function of closely regulating government expenditures by simply providing funds to the government at last year's levels.

At this writing, Congress has yet to pass appropriations for Defense; the District of Columbia; Foreign Aid; Labor, Health, Education and Welfare; Military Construction; the Legislative Branch; Public Works; State, Justice and Commerce Departments and Transportation. The delay is so serious that President Nixon warned Democratic leaders last week that he may have to call Congress back into special session on December 26 unless it acts on all the appropriations measures before adjourning.

The simple fact remains that while the President can propose legislation, the Congress must enact it into law. Many persons do not realize the importance of the Leadership of the Congress. The majority party controls the flow of legislation to the Congress and determines what legislation will be acted upon. Its members chair all of the standing committees and subcommittees in the House and the Senate and hold hearings on subjects of their choosing. To date, the Democrat-controlled Congress has been quite remiss in bringing important measures to the floor so that the House and Senate may work their will upon them. The fact is clear that if the 91st Congress is to rid itself of the "do-nothing" label, it must stop dragging its feet in the next session beginning in January.

CHANGE OF ADDRESS

In a large mailing such as this, it is sometimes difficult to correctly indicate everyone's name and address. If there are any changes that should be made in your mailing address, I would appreciate it if you would tear off the address on the brown envelope and return it to me with the applicable changes indicated thereon. (2312 Rayburn House Office Building, Washington, D.C. 20515)

BIG-TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorial for today is from the Casper Star-Tribune, in the State of Wyoming. The editorial follows:

CONTROVERSY OVER TRUCK LEGISLATION

(By James J. Kilpatrick)

WASHINGTON.—At one time or another, every motorist has known the miserable experience—sometimes the terrifying experience—of trying to pass a tractor-trailer truck in foul weather conditions. The boxcar profile blocks the road ahead. One gropes through rain and flying spume, hands gripping the wheel. Just a couple of feet to the side, 35 tons of steel are rolling along at 60 miles an hour. At last you get around; and behold: Another truck ahead.

A House subcommittee resumes hearings this week on a bill that brings these recollections vividly to mind. The bill would set new permissible maximum width, weight, and length limits for the interstate highway system. Truck and bus companies are ardently supporting the bill; the American Automobile Association, representing passenger car drivers, is just as dead set against it. For my own part, I wish there were some way to find a compromise down a middle lane.

Proponents of the bill make an excellent case—up to a point. The present interstate width and load limits were fixed 13 years ago, according to standards laid down in 1946. Since then, the interstate highways have come into being. It is a plausible contention that these magnificent freeways are capable of handling wider and heavier loads than the old primary highways could take.

The bill would permit the States to authorize an increase in single-axle loads from 18,000 to 20,000 pounds; an increase in tandem-axle loads from 32,000 to 34,000 pounds; and an increase in the gross load limit from 73,280 pounds to a higher figure obtained from a length and axle formula. The maximum permissible width would be increased from 96 to 102 inches.

These changes are recommended by the U.S. Bureau of Public Roads. They are not opposed by the American Association of State Highway Officials (AASHO). The point is made that roughly half the States already permit these higher load limits, under a grandfather clause inserted in the basic Federal act of 1956. The proposed increase in maximum width would make it possible for trucks to carry cargoes (such as plyboard) that come in multiples of eight feet; the extra six inches, it is said, also would contribute to greater stability and to greater safety.

So far, so good. The ordinary motorist may wince at the greater width, but it is hard to object to the proposed new limits on weight. At about this point in the debate, however, the proponents run out of gas; the remainder of their case is much less impressive.

The bill proposes a Federal length limit of 70 feet. It's too much. Oregon now allows up to 75 feet on designated highways, and Nevada has a 70-foot limit, but 27 States hold to 65 feet, Iowa limits length to 60 feet, and 20 States have a 55-foot limit. Both the Bureau of Public Roads and AASHO recommend 65 feet. In asking for this added length, the truckers are getting grabby.

Proponents of the bill emphasize that the bill is "only permissive"—no State would have to approve the higher limits; and they point out that the new dimensions would apply to the interstate highways only. The answer to this is, unh-hunh, or who's kidding whom? Once the higher limits were authorized, the truckers' lobby would roll into high gear; few legislatures would resist. And as spokesmen for counties and cities have observed, the new behemoth trucks would have to get on and come off the interstate system by way of old highways and bridges not meant for the mastodon size.

The truckers say that larger trucks will produce economies in freight expenses, which economies in turn will be passed along to consumers. It seems doubtful. Consumers have not seen many such economies lately. The truth is that this bill would benefit truck and bus companies. Okay, but let's leave it at that.

Substantially this same bill passed the Senate last year, but died in the House when the 90th Congress ran out of time. On balance, the better arguments still lie against the bill. Unless a reasonable compromise can be found, the resurrected measure ought to be interred again.

TRIBUTE TO DR. ROBERT LEE JACKSON

HON. SAMUEL N. FRIEDEL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. FRIEDEL. Mr. Speaker, I recently came across a copy of the December 1968 edition of the Journal of the Kappa Alpha Psi Fraternity, which contains a biographical sketch of Dr. Robert Lee Jackson of Baltimore, Md.

Dr. Jackson is one of Baltimore's distinguished citizens, and a man whom I have been proud to call my friend for many years. Throughout his career, both as a physician and as a public servant, Dr. Jackson has made a habit of overcoming obstacles, which I am sure would have discouraged a lesser man. His refusal to accept anything less than the best has motivated him through a lifetime, which has brought him personal success and prestige, and during which he has made a long series of significant contributions to the health and welfare of his community and his fellow citizens.

I believe my colleagues will be interested in and encouraged by this heartwarming story of one Negro American who stayed with the fight when the going was tough and who by his efforts, has enriched the lives of thousands of people.

I include the article on Dr. Robert Lee Jackson at this point in the RECORD:

DR. ROBERT LEE JACKSON, BELOVED VETERAN MEDIC

(By G. James Fleming)

He was there when Kappa Chapter was founded at Meharry Medical College in 1919. He was a co-founder of Baltimore Alumni Chapter. He has been active in both the fraternity and in medicine most of his life, and—at age 74—he still practices medicine. He is Robert Lee Jackson.

With due respect, he is "The Grand Old Man of Medicine" in Baltimore.

Brother Jackson was born in Birmingham in 1894; was graduated from Walden University in 1917, and received the M.D. degree from Meharry in 1921. After a postgraduate year at Meharry and the taking of a bride (Clara V. Cleveland), he headed for Baltimore ("up North") where he set himself up in the practice of medicine.

But he did more.

At once he began trying to establish Kappa Alpha Psi in Baltimore; at once he started trying to secure more professional opportunities for Negro physicians; at once he began trying to enlarge and upgrade Provident Hospital.

Before long, Brother Jackson found three Lincoln (Pa.) Kappamen—Drs. Newman, Scott and Harris (their first names escape him) and, in 1923, the Baltimore Alumni Chapter was chartered, when George F. David was Grand Polemarch and C. Leon Wilson was Grand Keeper of Records.

The chapter met in members' homes, but Kappa was also much alive at Provident Hospital, since most of the Kappa physicians were also on the hospital's staff. The chapter observed the fraternity's programs but, according to Brother Jackson, "it also became noted for grand social affairs with finely printed invitations. This was the period when there was great competition among the Greek-letter societies."

"The chapter brought the first Grand Chapter to Baltimore in 1920 or 1921 and we also were the leading spirits in establishing Alpha Iota Chapter at Morgan State College," according to Brother Jackson.

Brother Jackson received the 18th Distinguished Medal, highest award of the National Medical Association, at its 68th annual convention in Los Angeles, in 1963. The award was in recognition of Brother Jackson's contributions to the founding and maintenance of Provident Hospital in Baltimore, as a recognized and accredited training institution, his efforts in the actions which resulted in the acceptance of Negro physicians into membership by the Baltimore City Medical Society and the Medical and Chirurgical Faculty of the State of Maryland, and his role in securing the admission of Negro surgeons as Fellows in the American College of Surgeons. The award acknowledged also the wider influence he had exerted through the men trained at Provident and his activities in stimulating others to make contributions to medical literature.

He was honored for becoming the first Negro physician to serve in the chest clinics of the Maryland Tuberculosis Association. In those early days, when the walls of segregation were thick and high, the established hospitals of the city were closed to Negro physicians. The dream of a hospital where Negro physicians could practice and train continually inspired Brother Jackson. He succeeded in interesting Dr. J. M. T. Finney, Sr., Dr. Richard TeLinde and many other leading Baltimore surgeons and physicians from the Johns Hopkins and the University of Maryland Hospitals and Medical Schools to begin a campaign to remodel the Union Protestant Infirmary on Division Street to accommodate the Provident Hospital, which was then located in small, inadequate quarters on Biddle Street.

In 1925 these men recommended his appointment as the first resident in surgery at the Provident Hospital. They served as consultants and continued to support the effort to transfer the hospital to the building on Division Street. This was accomplished in 1928 and Brother Jackson was named medical director.

In these relatively early days of postgraduate training in medicine, when racial barriers seemed immovable, the new Provident assumed important significance as an institution in which Negro doctors might practice and take supervised training in the specialties of surgery, medicine, and obstetrics and gynecology. A new resource for the training of Negro nurses was also provided.

Brother Jackson completed his residency training in 1930 and was appointed junior consultant in surgery at Provident in 1931. In 1935, he was made associate chief of surgery with Dr. George G. Finney, son of the late Dr. J. M. T. Finney. When Dr. George Finney entered the armed forces in 1941, Brother Jackson remained associate chief of surgery with Dr. Samuel McLanahan.

In 1940, Brother Jackson became chief of

staff at Provident. Under his leadership, the hospital developed a training program in the major services, particularly general surgery, which attracted many young Negro men and women of medicine. Through the years they have gone on to become certified in their specialties, Fellows in the respective national and international clinical colleges, heads of departments, teachers, and contributors to medical literature and research. These physicians, too numerous to mention, may be found in almost every state in the Union, and some foreign countries. In 1950 Brother Jackson, appointed chief of surgical service, Provident Hospital, continued to carry on a service recognized by the American Board of Surgery for resident training.

In 1957, many of the Jackson-trained doctors returned to Baltimore when the former House Officers of Provident Hospital paid tribute to him at the hospital's annual banquet, which was specifically designated as in his honor. Here they joined with the Governor of Maryland, the Mayor of Baltimore, prominent civic leaders, patients and friends in hailing the contributions "Dr. Jackson" had made to the advancement of medical care and training under difficult circumstances.

In semi-retirement now, Brother Jackson still continues his interest in Provident Hospital, is helping to make possible the new ($12,000,000) Provident now being built.

Brother Jackson has served as a member of the Baltimore City Relief Commission, the Department of Public Welfare, the Baltimore City Criminal Justice Commission, the Baltimore City Planning Commission, and the Selective Service Board.

Brother Jackson has pursued many postgraduate courses. These include: Intestinal surgery at the Cook County Graduate School of Medicine, 1930; rectal surgery at Cook County, 1935; general surgery, Presbyterian, and Mount Sinai hospitals, New York, 1937; blood banks, New York University Postgraduate School of Medicine, 1944; female urology, New York University Postgraduate School of Medicine, 1946; male urology, Cook County, 1947; gall bladder surgery, Cook County, 1949; general surgery, George Washington Postgraduate School of Medicine, 1952. He has attended all the clinical congresses of the American College of Surgeons since his inclusion in 1948.

Brother Jackson has been a member of the National Medical Association since 1924. He also belongs to the Monumental City Medical Society, Maryland Medical Society, Baltimore City Medical Society, Medical and Chirurgical Faculty of the State of Maryland, and is a Fellow of the American College of Surgeons He also belongs to the Masons, the Elks, and the Presbyterian Church.

Certainly Robert Lee Jackson is Kappaman of the month; certainly, too, a Kappaman of the Year; and—by his life—Kappaman of two centuries.

GLASS TARIFFS

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. DENT. Mr. Speaker, the following is the text of a letter I sent to the president of the Kiwanis Club, of New Kensington, Pa., located in my congressional district. He expressed his vital concern over the lowering of glass tariffs, and their effect on our community. I think my letter to him should be read by all Members of Congress so they may be further alerted to the danger of lowering glass tariffs.

KARL P. KARSTEN,
President, Kiwanis Club,
New Kensington, Pa.

DEAR MR. KARSTEN: I have been receiving a number of letters from Arnold, Lower Burrell, and New Kensington concerning the very serious problem of glass imports. Since many of the letters have been coming in from Kiwanis members please feel free to make my letter public by publishing it in your newsletter.

The glass industry has suffered for a long time from increasing pressure from low-wage produced glass from almost every country in the world, especially Europe, Japan, and the Red Curtain countries.

The problem has become so serious that the American-St. Gobain Company has closed their Arnold plant, and reduced its production in its remaining plants. Unless relief is forthcoming they may well close one or all of its remaining facilities. This fact was brought to the attention of the Tariff Commission by industry, the worker's union, and your Congressman acting for and in behalf of Arnold, Lower Burrell, New Kensington, and surrounding areas that are seriously affected by the closing of this facility.

The mayors of these three cities have been very co-operative and helpful. The citizens were, also, helpful, and rendered substance by sending me thousands of petitions which were signed and presented to the Commission.

For the first time since President Kennedy gave some relief to the Industry, by ruling back tariffs to the pre-Smoot-Hawley days, the Tariff Commission has called a halt to any further decreases in glass tariff.

The Chairman of the Commission, in his opinion on the matter of glass, states that excessive damage is being done in the glass industry. This puts the matter on the shoulders of the President of the United States. His hand is fortified with the Tariff Commission's report on exactly the action taken by President Kennedy. We can be assured that, if the President does put the tariff back to the Kennedy level, we at least will be able to hold off complete destruction of the industry.

I believe more should be done. We cannot sustain our economy if we are going to allow nations, where their highest wage is only 10–50% of our minimum wage, to use this country as a dumping ground.

As you know my hearings start soon on a new wage bill under the F.L.S.A., which may further depreciate American manufacturer's opportunity to hold on to their own market. Many of us intend to fight, as we have in the past, but it can not be done unless the local communities, and citizens finally realize buying foreign products is not always the most economical way to live. Consumers are only fighting themselves when they buy foreign products made by low-wage workers in foreign countries. In most instances consumers who buy foreign products are the producers of American goods competing with the foreign countries' low-waged producers.

I want you to stress the following information: While it is known, of course, to the companies and workers' representatives, there are many citizens who do not know of a certain feature in the trade agreements. It was put in as a sop to Labor, but may well be the greatest single item of relief expenditures in the Federal Government. Under the Foreign Trade law any worker who can show that his job has been taken by imports is entitled to 65% of his weekly wage for a period of one year, or if he is in training for another job—an additional 6 months, or if he is 60 years of age—an additional 3 months of entitlement.

They have not yet decided what to do after this period is over, but it is pretty easy to see that these private workers will end up in dire economic straits.

Here is the most important part of this information. After many attempts by Labor to seek to have this relief granted, the Tariff Commission and the Labor Department have agreed to pay these damages to approximately 500 steelworkers in two Armco plants.

While this may be of some relief to the workers it must not be accepted in lieu of jobs when jobs would be available if the imports were not glutting the American market. It has been estimated that this very small award to less than 500 men will cost $2,232,000 the first year, and this is without counting the loss to local tax authorities, Social Security, and other charges against a worker's payroll.

In face of this situation it is recommended that the 650 workers who have lost their jobs at the Arnold plant make a claim for the import damages which caused the loss of their jobs. That would at least give them a breathing spell during the transition period when they are seeking new employment.

In a very rough calculation I have figured the loss of jobs in the difference between exports and imports of steel, textile products, shoes and leather goods, etc., and find that, giving the imports every benefit of the doubt, there are at least a *minimum* of 400,000 jobs lost by the exchange of goods in exports and imports. This number of jobs would cost the taxpayers in damage relief, if awarded as the law prescribes, better than 2 billion dollars a year. This does not take into consideration the thousands of jobs that have been lost in mushrooms, men and women clothing, cast iron pipes, radios, T.V., automobiles, and every other consumer commodity that has a serious share of the shelves in the American market.

I have given you this information to show that some of us have been aware of this problem and have been like voices in the wilderness in trying to arouse the Congress of the United States to the dangers of this economy.

I do not believe in isolationism, a closed door policy, or a high tariff wall economy. I believe that all goods should flow according to the needs of all nations and not at the cost of our jobs and economy.

The serious thing we have to face is that nations, and oft-times American enterprises, situated in foreign countries, are producing goods solely to export to the U.S. at prices that do not even meet the cost of our labor at the minimum wage level. I believe that nations must work inward for their salvation economically. I do not believe that every nation can sell more than it buys. In a free trade economy, this is the only way a nation can stay solvent in the exchange of money.

No nation should deprive its workers of an opportunity to earn a living simply to make multi-millionaires out of the export-import fraternity, which is international in concept and practice.

Recently, the Sanitary Water Authority of Allegheny County wrote specifications which gave orders for compressors to a foreign producer with one of the finest compressor manufacturers in the Pittsburgh area placing number two on the list of bidders. I have new legislation for the next session dealing with this phase of government financed purchases.

This is just another instance of contracts being given to foreign bidders when our own companies can and should have had the bid. Here is another example of why we should be "buying American".

The only way we can hope to survive and to salvage jobs of our workers, and the welfare of our industries is for the American people to buy their own products.

THE LATE HONORABLE JOHN JANAS

HON. F. BRADFORD MORSE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. MORSE. Mr. Speaker, last week in Lowell, Mass., an outstanding citizen and public servant, State Representative John Janas, succumbed to a heart attack and died. He was 59 and still a vigorous and energetic man who had made a career out of giving of himself to his community and to his State.

I was privileged to know John Janas well. He began his public service when he was elected to the Lowell school committee in 1945. Following that he was elected to the city council in 1947 and subsequently was reelected for eight terms. In 1954, demonstrating the high esteem in which he was held by his colleagues on the city council, he was elected by them to serve as mayor of Lowell—the first Polish American to hold that post.

In 1962, John Janas was elected to the Massachusetts State Legislature from the 15th Middlesex District—the first Republican to be sent from that district in its history. He served with distinction in the State House from that time until his death last week. His dedicated work will surely be missed by his colleagues there.

Throughout his life, John Janas lent his efforts to helping others—through his membership in the Benefit Society of the Polish National Catholic Church, the American National Red Cross, and numerous other groups. In recognition of that service, he was named the "Man of the Year" in 1961, by the Greater Lowell Civic Committee.

Mrs. Morse joins me in extending our deepest sympathy to Nellie Janas and their three sons.

A recent article in the Lowell Sun detailed Representative Janas' many accomplishments and contributions and I insert it at this point in the RECORD:

REPRESENTATIVE JOHN JANAS SUCCUMBS AT 59

LOWELL—State Rep. John Janas, 59, of 4 Viles Ave. was dead on arrival yesterday at St. Joseph's Hospital.

Born in Lowell he was the son of the late Frank and the late Bridget Janas.

He was a graduate of Lowell High School and was a Carney Medal winner. He also was a graduate of the Lowell Technological Institute.

"He, at one time, served as safety director for the American Hide & Leather Co.

For many years he was active in many civic and social affairs throughout the city and state.

In the year 1945 he was elected to the school committee in Lowell for a two-year term. He was elected to the city council in 1947 and was re-elected for eight terms. Out of the eight terms he was elected he was the highest voted candidate for five times. In 1954 Councilor Janas was honored by his colleagues when they elected him mayor, the first Polish American mayor of Lowell.

In April of 1962 a special state election for the 15th Middlesex representative district was held to fill a vacancy which was created when Rep. Cornelius Desmond Jr. was elected City Manager, the then Councilor John Janas was elected to represent the district, the first Republican to ever be elected from that district.

In 1963 he was re-elected to the General Court also in 1966. In 1963 he was also reelected but this time, because of the redistricting, he represented the 29th Middlesex District, consisting of Ward 9 in Lowell and all of Dracut.

In the State House Legislature, he served on three committees, taxation, payroll and banking.

Rep. Janas was a parishoner of St. Casimir's Polish National Catholic Church and held membership in St. Casimir's Benefit society, also the East End Social Club, board member of the American National Red Cross, Greater Lowell Chapter, the B.P.O.E. Lodge 87 of Elks, the Passe Temps club of Lowell, C.C.A. club of Lowell, Pawtucketville Social Club, the Polish National Home Association, (Dom Polski) an Honorary member of the Polish American Veterans of Lowell Inc., the Pulaski Club, Polish National Alliance Group 944, ZNP. Honorary member of the National Army Navy Union, Lowell Heart Association, Lowell Diabetes Association, United Fund, Centralville-Social Club.

He received the "Man of the Year" award in 1961 from Greater-Lowell Civic Committee.

He is survived by his wife, Nellie (Cuipa) Janas; three sons, Dr. John J. Janas Jr. on the staff of St. Joseph's Hospital; Frank Janas, loan officer at the National Shaumut Bank of Boston; and Edward Janas, student at the Mass. College of Pharmacy in Boston; a sister, Mrs. James (Mary) Joyce of Lowell; also six grandchildren.

ALL AMERICAN SOLDIERS ARE NOT TRIGGER-HAPPY KILLERS

HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. BROYHILL of Virginia. Mr. Speaker, Mr. Frank H. Taylor, 318 Grove Avenue, Falls Church, Va., has forwarded to me a copy of a letter written by his son, a lieutenant in Vietnam, to the editor of the Northern Virginia Sun.

This letter was written and published before the release of the alleged massacre of Vietnamese civilians in the village of Mylai 4, and because of this fact it has a bearing on the conduct of our soldiers in the most vexing war ever fought by Americans. I insert the letter from Second Lieutenant Taylor at this point in the RECORD:

[From the Northern Virginia Sun, Nov. 18, 1969]

YOUNG OFFICER DOES WHAT HE MUST

Editor, the Sun:

I have been in recent contact by mail during my tour in Vietnam with my grandfather, a veteran of World War I. Perhaps we don't share the "same" combat experiences for this is a different kind of war. My father and uncle are veterans of a more recent struggle, World War II. Now I am doing my part and my duty to my country in Vietnam. I accepted the responsibilities of a commission as a second lieutenant before I volunteered for duty in Vietnam.

This is a different kind of war than anything my grandfather or father have ever seen. It's a war for hearts and minds, not for a military victory. We can't just attack an enemy; we've got to convince him logically that our way is correct and offers more opportunity. Our goals aren't as clear-cut as "take that objective." They are so complex that they are almost unimaginable. We're here to build a strong vibrant nation that can stand on its own two feet and say "here I am in spite of you." It's a crazy war of inactivity and positive action. A war not of destruction, but of instruction, a war to build as fast as the VC (Viet Cong) destroy. For example, Charlie blew a bridge on a main roadway, and two days later we were using it again—people on their way to the market and town, soldiers on the move.

It is a very different type of war but we're winning, that's for sure. ARVN (South Vietnamese) troops are doing a fine job. They wouldn't stand up to a German army of 1918 or 1939, but they can hold their own against NVA and VC forces here in IV Corps.

But where we're winning is with the people. Many women died as a result of childbirth, but that number is constantly decreasing. It's a war against ignorance, disease and stupidity. We MENEVAC see more people suffering from disease or injury than we do from gunshot wounds. But I'm not a medic, yet I help as a medical advisor.

Not only are we medics, but engineers, repairmen, mechanics and teachers. It takes a diversified person to win this kind of war. And thank God, Americans are that. We deliver babies, build bridges, or fire a weapon with the same hands.

Many people, especially of my generation, want to protest this war. That's fine with me; I respect their right to do so, but I'm afraid they don't know what it is really like over here. They're afraid to do something positive. They are content to criticize, yet not to react positively. They don't realize it takes more to fight this kind of war than just the ability to pull a trigger or kill. It takes people who care about people to win. It takes a person willing to work 24 hours a day, seven days a week for what he believe in.

I can't complain; I enjoy myself here. But I enjoy it because I love people. I'm beginning to understand them as persons, what makes them react. I guess you call it insight. Understanding people are people no matter what the color of their skin or the shape of their eyes.

This is a war we can win with the youth and energy of America. It's the chance of America to prove to the rest of the world the quality of leadership that we have and that the rest of the other generation feels we lack. If you want to protest, protest positively.

Involvement is something that too few people in our country want to do. We don't want to "get involved" but it doesn't work that way in life. I do what I must; I stand for what I believe in.

2d Lt. PETER TAYLOR,
ADV Team 85.

APO SF 96215.

WHITHER THE PASSENGER TRAIN?

HON. ROBERT O. TIERNAN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mr. TIERNAN. Mr. Speaker, on Tuesday of this week the Providence Journal carried an article by Sylvia Porter entitled, "Whither the Passenger Train?" The article is notable in that it underscores the dire straits in which U.S. passenger train service finds itself today. Miss Porter ends her article on the note:

As congestion on our highways and airways intensifies, top-notch trains could have a real appeal to millions of us, even if they take considerably longer. Let's find out how this service can be integrated into our future transportation network.

I concur with Miss Porter's views. It is up to us to find the solutions and put them into practice. At this point I place Miss Porter's timely comments in the RECORD:

[From the Providence Journal, Dec. 9, 1969]

WHITHER THE PASSENGER TRAIN?

(By Sylvia Porter)

Young parents I know living in San Francisco are planning to bring their three children East for a visit next summer. They want to come by Pullman train (do you remember Pullman trains?) because this might be the last chance the children have for a long-distance overnight train ride.

Even so, my friends cannot go directly from California to New York without changing trains in Chicago or flying the last leg of their trip. The last through California-New York sleeping car, in fact, was discontinued back in 1958.

Today you cannot get a direct train between such major cities as Pittsburgh and Cleveland, Memphis and Nashville, Tulsa and Oklahoma City, Boston and Portland, Maine.

The blunt fact is that you and I are abandoning the passenger train in 1969:

We cut our long-haul train travel 20 per cent—the biggest drop in passenger miles for any post-War War II year.

The number of passengers carried by the long distance lines dropped to 296 million—one third the number carried in 1944.

Railroad passenger revenue on long-haul lines dropped to $291 million, against $1.7 billion a quarter century before.

The number of sleeping cars dwindled to 1,037 vs. 6,223 in 1948 and the number of dining cars to 627 from 1,730.

In 1929 there were 20,000 passenger trains. There are now fewer than 500.

Enough of the figures: so complete is our abandonment of the railroad that today only 1 per cent of long-distance travelers in the U.S. go via trains. In contrast, the number of miles we travel on car trips each year has soared past one trillion and the number of miles we travel by plane each year is over 100 billion.

A major factor in this, to be sure, has been the railroads' utter contempt for our convenience and comfort. Frequently, the dirt and discomfort, lack of dining cars, filthy bathrooms, etc. are enough to turn even the most sympathetic into a train hater.

But whatever the causes, the big long-haul trains are losing huge amounts today on passenger service—at a time when mail revenues, which for years have helped subsidize passenger trains, have also been dropping sharply.

Congress is now grappling with a half dozen different proposals for saving long-distance railroad passenger service. The key bill, introduced by Sen. Vance Hartke, D-Ind., would require the federal government to cover the deficits on any long-haul passenger service it requires the railroads to continue for the public good. In addition, it would authorize the Federal Transportation Department to invest in modern, new equipment which would then be rented to the railroads for long-haul runs. The precedents are: Washington already has invested billions in highways for automobiles and now wants to invest more billions in airports.

The Transportation Department wants to set up a Comsat-type private corporation which would try to run good, profitable, high-speed trains in high density corridors such as San Francisco-Los Angeles, Chicago-Cleveland, Houston-New Orleans, Chicago-Indianapolis-Cincinnati, Milwaukee-Chicago.

But, despite the instant success of the fast trains running between New York and Washington and New York and Boston, an astonishing point is that neither government officials nor the railroads have undertaken a definitive nationwide market survey to find out what kind of service you really want.

As congestion on our highways and airways intensifies top-notch trains could have a real appeal to millions of us, even if they take considerably longer. Let's find out how this service can be integrated into our future transportation network.

EVENTS IN THE 10TH DISTRICT

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 12, 1969

Mrs. HECKLER of Massachusetts. Mr. Speaker, as I look back over the months of a very active fall season in the 10th Congressional District, there are many outstanding events which it is indeed pleasant to recall. One of the foremost among these is the 275th Anniversary Celebration of the City of Attleboro, Mass. The weeklong observance began on Saturday, October 4, and featured many exciting and unusual events. There were numerous historical displays, a historic tour of the city was conducted, and a gala parade concluded the week of festivities in a climactic way.

A wonderful historical pageant given by the townspeople served to emphasize the historical meaning of the anniversary celebration. The four phases of the community's development were stressed. The pageant was not only an enjoyable form of entertainment for all, but it was a vivid means of educating citizens to their distinguished local heritage.

A most outstanding feature of the anniversary week was an educational exhibition entitled "Expo 275." The people of Attleboro were rightfully proud of this comprehensive presentation of more than 40 different industrial displays. The production required long planning and patience as well as concerted community and individual effort. A special debt of gratitud.. is owed the Attleboro Chamber of Commerce, the organization underwriting Expo 275.

In developing a focus for the 275th anniversary celebration, the people of Attleboro took advantage of the wealth of skill and artistic workmanship which forms the economic lifetime of the city. But Expo 275 was more than the usual exhibition of industrial arts and handiwork; it was a living demonstration of craftsmen at their work. Seeing the creative process evolve—and in a festive but noncommercial atmosphere—was not only educational but also an effective means of inspiring youth to become interested in the work of their neighbors, interested in industrial processes, and interested in developing their own abilities.

The individual artisan, it is said, is fading away from the American scene. But in Attleboro, Mass., Expo 275 provided living evidence of man's importance in an industrial economy. Through exhibitions of this kind, the dignity of man and the beauty of craftsmanship are upheld in the finest traditions of the past.

Mr. Speaker, I take this opportunity to congratulate Attleboro for a most inventive way of commemorating the 275th anniversary and to compliment the many persons who contributed time and effort to develop the events of the celebration. A special salute goes to the anniversary committee chairman, Robert F. Collins, Jr., who was responsible for the comprehensive planning and execution of the celebration and to Mayor Thomas Piggott, who contributed endless enthusiasm and energy toward the realization of the 275th anniversary observance week.

It will be of further interest to my colleagues to note that the celebration was financed by the sale of a most attractive commemorative coin, struck by a local firm, the Robbins Co., to enable sponsorship of most of the week's events free of charge. The 275th Anniversary Celebration Week of Attleboro, Mass., was truly a wholehearted community effort in every sense. The local newspaper, the Attleboro Daily Sun, which provided comprehensive coverage of the week's festivities as well as a most enlightening special historical edition, quoted Chairman Collins as describing Attleboro participation, support, and enthusiasm as "phenomenal." I should like to add, Mr. Speaker, that I was there to enjoy this wonderful community-oriented celebration; and I, too, found it an absolutely "phenomenal" success.

HOUSE OF REPRESENTATIVES—*Monday, December 15, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Fear not: for, behold, I bring you good tidings of great joy, which shall be to all people.—Luke 2: 10.

O Thou who art the source of light and life, whose glory is in all the world, without whom no one is good, no one is wise: we remember with joy that the universe is Thy creation, life is Thy gift, and Thy love is offered to all the children of men. Lift our thoughts from the littleness of our own works to the greatness and the goodness of Thine and help us so to behold Thy glory that we may grow into the likeness of Christ. Help us to worthily celebrate His nativity this Advent season with hearts of compassion, deeds of kindly service, and the spirit of good will toward all mankind. In the name of Him who gives life to men, we pray. Amen.

THE JOURNAL

The Journal of the proceedings of Friday, December 12, 1969, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed, with amendments

in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 6543. An act to extend public health protection with respect to cigarette smoking, and for other purposes; and

H.R. 13000. An act to implement the Federal employee pay comparability system, to establish a Federal Employee Salary Commission and a Board of Arbitration, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to a concurrent resolution of the Senate of the following title:

S. Con. Res. 44. A concurrent resolution to authorize printing of manuscript entitled "Separation of Powers and the Independent Agencies: Cases and Selected Readings," as a Senate document.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 778. An act to amend the 1964 amendments to the Alaska Omnibus Act; and

S. 3014. An act to designate certain lands as wilderness.

PERSONAL EXPLANATION

Mr. BEVILL. Mr. Speaker, on November 13, 1969, on rollcall No. 271, on H.R. 14751, I was on my way to my district on official business and missed the vote. Had I been present, I would have voted "yea."

Mr. Speaker, on November 13, 1969, on rollcall No. 272, on H.R. 14705, I was on my way to my district on official business and missed the vote. Had I been present, I would have voted "yea."

Mr. Speaker, on November 18, 1969, I was out on official business, and on rollcall No. 277, on H.R. 14794, I would have voted for the passage of the bill, had I been present.

Mr. Speaker, on November 20, 1969, on rollcall No. 284, on the Sikes amendment to H.R. 14580, I was in my district on official business and missed the vote. Had I been present, I would have voted "yea."

Mr. Speaker, on November 20, 1969, on rollcall No. 286, on H.R. 14580, the foreign aid authorization bill, I was in my district on official business and missed the vote. Had I been present, I would have voted "no."

STATUS OF THE APPROPRIATION BILLS

(Mr. MAHON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAHON. Mr. Speaker, seven of the annual appropriation bills have now been enacted. They are: Interior, Agriculture, Treasury-Post Office, independent offices-HUD, public works-AEC, State-Justice-Commerce, judiciary, and legislative.

Two bills are under active consideration in conferences between the House and Senate: Military construction and District of Columbia.

Five bills await action in the Senate, as follows:

Defense, authorization signed by the President on November 19.

Labor-HEW, passed the House on July 31.

Transportation, passed the House on November 18; authorization of mass transportation and highway safety programs not yet enacted but these items were included in the House-passed appropriation bill under a rule waiving points of order.

Foreign assistance, passed the House on December 9; authorization passed House on November 20, passed Senate December 12; now pending in conference.

Supplemental, requests received from the President on November 24; approved by House on December 11.

PERMISSION FOR COMMITTEE ON BANKING AND CURRENCY TO FILE REPORT ON H.R. 15091, TO LOWER INTEREST RATES AND FIGHT INFLATION

Mr. PATMAN. Mr. Speaker, this request has been cleared by the ranking minority member on the Banking and Currency Committee and by the minority leader.

Mr. Speaker, I ask unanimous consent that the House Committee on Banking and Currency may have until midnight tonight, December 15, to file its report on H.R. 15091, a bill to lower interest rates and fight inflation, to help housing, small business, and employment, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

TRIBUTE TO THE HONORABLE MARIO BIAGGI

(Mr. CELLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CELLER. Mr. Speaker, I rise on behalf of the entire New York City delegation in recognition of the outstanding work of our distinguished colleague, MARIO BIAGGI, who has been looking into conditions at some of our military bases.

It is our belief that pioneering efforts of the gentleman from New York (Mr. BIAGGI) to improve conditions for our enlisted men deserve the strongest support from all Members of this Congress.

Singlehandedly, he undertook a very difficult and challenging task a few months ago. He has indeed aroused the conscience, the interest, the support, and the admiration of the New York delegation.

In spite of a normally heavy workload, he has made the time to travel to military bases to get a firsthand view of some of the difficulties confronting so many of our enlisted men. He has listened patiently to their problems, has checked and rechecked the information given to him and at his own expense has done everything within his power to improve their lot.

In one instance alone, he was instrumental in getting a contingent of some 500 marine reservists from New York City moved to safer quarters at Camp Lejeune, N.C., after racial violence erupted there last July 20, claiming the life of one regular marine.

At the Third Naval District brig in Brooklyn, N.Y., the commanding officer curtailed the use of "disciplinary chow" after the gentleman from New York (Mr. BIAGGI) had described the diet as "inadequate and primitive." Happily the House Armed Services Committee has undertaken an investigation at some of our military bases.

The gentleman from New York (Mr. BIAGGI) is extremely well-equipped to handle the task he has chosen for himself. He had a very distinguished career as a member of the New York City Police Department for 23 years. It was a career that is almost legendary. He was a detective-lieutenant when he retired and probably received more decorations for heroism than any police officer in the United States.

It is our intention to give him all of the assistance that he might require to accomplish the very worthy objective of improving conditions for the enlisted man.

APPOINTMENT OF ADDITIONAL CONFEREES ON S. 3016, ECONOMIC OPPORTUNITY ACT AMENDMENTS OF 1969

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the Speaker be allowed to appoint two additional conferees on S. 3016, the Economic Opportunity Act Amendments of 1969.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. GROSS. Mr. Speaker, reserving the right to object, how many conferees do we now have?

Mr. PERKINS. I am adding the name of Mr. ASHBROOK here. I have discussed the subject matter with the minority leader on the committee.

Mr. GROSS. The gentleman is not answering my question. How many conferees are there now?

Mr. PERKINS. I believe this makes 13 and nine.

Mr. GROSS. I thought perhaps the entire committee was going to conference, on the announcement the other day.

Mr. Speaker, I withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and appoints the following additional conferees: Messrs. STOKES and ASHBROOK.

The Clerk will notify the Senate of the action of the House.

SOCIAL SECURITY AMENDMENTS

(Mr. BURTON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of California. Mr. Speaker, I am taking this time to note that the social security bill is going to be brought up under a suspension of the rules procedure, therefore precluding any possibility of subjecting the legislation to a motion to recommit with instructions.

I think it is very lamentable that once again this year we find that about 3 million of the poorest aged, crippled, and blind in our country have been over-

looked by this legislation. The Senate adopted a provision by Senator HARRIS that I was privileged to assist him with—that guaranteed all elderly blind and disabled people on public assistance—receive at least a $7.50 per month increase. The House bill this year, just as 2 years ago, paid no heed to nor did it solve the dilemma of the elderly poor whose social security benefits are so low that they also receive some State public assistance. In this legislation, if the House conferees do not recede to the Senate amendment, we will find so many of our constituents, some 3 million or so throughout the country, will get the social security increase—but suffer a dollar-for-dollar public assistance reduction and will end up again this year with not a single dime in their pockets as a result of the action of this Congress. I think that is outrageous as well as lamentable. I plead that the limitation that the rules impose on us be recognized and that the conferees proceed to pay some heed to these people who are victimized just as much as or more than any others in our country by the increase in the cost of living.

The following tables show the number of people in each of the States that are "forgotten" in the House version.

PUBLIC ASSISTANCE STATISTICS, JULY 1969

State	Old-age assistance, number of recipients	Aid to the permanently and totally disabled	Aid to the blind
Total	2,041,000	763,000	80,100
Alabama	114,000	17,000	1,900
Alaska	1,500	620	93
Arizona	11,900	6,300	550
Arkansas	60,600	11,300	1,800
California	310,000	151,000	13,000
Colorado	38,100	7,700	200
Connecticut	7,700	6,000	240

PRESIDENT NIXON'S SPEECH OF NOVEMBER 3 TO SILENT MAJORITY HAS RECEIVED OVERWHELMING BACKING

(Mr. MIZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MIZE. Mr. Speaker, for the record, I should like to point out that the President's speech of November 3 to the silent majority has received overwhelming backing.

At last count, the White House informs me, the President received more than 450,000 messages. Of these, 425,000 were favorable.

This, of course, does not include the literally millions of petitions, wires, letters, and other messages that have been sent to such organizations backing the President's Vietnam policies, such as "United We Stand."

Mr. Speaker, among the messages, the editorial comment and the polls, it has become obvious that Americans, when they know the facts, will rally to a just cause and support a just peace.

That is what the President seeks. This is obviously what most Americans want.

YOUNG DEMOCRATS SWITCHING OVER TO REPUBLICAN PARTY

(Mr. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLACKBURN. Mr. Speaker, I have noticed with some interest a news article published in the Evening Star of December 12, 1969, relating to the convention of Young Democrats.

In this news article it was reported that the delegations from the States of New York and Georgia had been asked to leave the convention.

What particularly interested me was the reason for the failure to seat the Georgia delegation. The leader of the Georgia delegation said it was not his fault that they had not had a State convention. The leader called for one and no one came.

Mr. Speaker, I think this is symbolic of the trend of the times—the young people of America are switching over to the Republican Party and I commend them for this action.

The article referred to follows:

YOUNG DEMOCRATS TELL TWO DELEGATIONS TO PACK, GO HOME

LAS VEGAS, NEV.—The national convention of Young Democrats of America has told the New York and Georgia delegations to pack their bags and go home.

The New Yorkers want their money—charter membership and registration fees—back, and the Georgians say it isn't their fault they haven't lately had a state convention as required. Their leader called for one and nobody came.

Both delegations' credentials were rejected on a floor vote last night after vigorous debate.

The credentials committee had recommended against seating asserting neither had the blessing of the regular Democratic party.

The floor vote against seating the 86-member New York delegation, about 10 percent of the convention's total, was 470.7 against and 352.3 for, with 52 abstaining. The vote was 514.25 against 352 for and 32.75 absentions in Georgia's case.

TELEVISION SHOWS SHOULD EXEMPLIFY LOVE OF FAMILY, COURAGE, AND SACRIFICE

(Mr. CARTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARTER. Mr. Speaker, last night it was a rare privilege to see the play "Hans Brinker" on channel 4, NBC. It is so seldom that we see shows which exemplify love of family, courage, sacrifice, that I wish to compliment NBC on this production and ask for more.

What our children think is determined by what they see, hear, and read. Then it behooves us to see that they have at least an opportunity to see the beautiful, read words of meaning, and hear music of enduring charm.

For years the prurient and pornographic have been in ascendency. Surely, there is some way we can afford our youngsters and our citizenry the opportunity to see and hear television and read literature with greater moral purpose.

THE SO-CALLED BLACK PANTHER PARTY

(Mr. EDWARDS of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Alabama. Mr. Speaker, in the last 2 years, 28 members of the so-called Black Panther Party have been killed in run-ins with the police.

And now we hear talk by the Panthers and their sympathizers that there is a conspiracy by the police to wipe them out.

What nonsense.

There is a conspiracy by the police, of course, and one that most of us support—a conspiracy to wipe out crime and put criminals behind bars.

Mr. Speaker, when Panthers have been killed by police, it is because they have been engaged in illegal activities. They have been killed in the course of robberies, assaults, and attempted murders.

They have been killed resisting arrest.

Wherever they go they go armed.

In 1967, a group of armed Black Panthers invaded the State Legislature of California while the legislature was in session.

David Hilliard, who heads the Los Angeles Black Panthers, is under indictment for threatening to kill the President.

Panther literature threatens the life of the President.

In Los Angeles, where police raided Panther headquarters, the Panthers had turned a building into a fort and had stocked it with rifles, shotguns, submachineguns, and Molotov cocktails.

Mr. Speaker, the Panthers are not a peaceful, lawful organization. They are racists and revolutionaries and criminals. In my opinion, they have been given kid-glove treatment. I hope we put a stop to that.

CHANGE OF CONFEREE ON S. 3016, ECONOMIC OPPORTUNITY ACT AMENDMENTS OF 1969

(Mr. PERKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PERKINS. Mr. Speaker, when I consulted with the minority concerning the appointment of conferees last Friday night on the bill, S. 3016, the Economic Opportunity Act Amendments of 1969, I definitely understood at that time that if senior members elected to be conferees that I would like to cooperate in obtaining a revision of the conferees.

Mr. Speaker, I now ask unanimous consent that the gentleman from Wisconsin (Mr. STEIGER) be removed from the list that was handed to me last week and that the Speaker be empowered to appoint another conferee.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER. The Chair appoints as a conferee the gentleman from California (Mr. BELL).

The Clerk will notify the Senate of the action of the House.

H.R. 14646

(Mr. WOLFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLFF. Mr. Speaker, we are told that the bill to set up a New York-Connecticut passenger transportation compact is an enabling act; that it is just a simple bill; in effect this bill will overturn the ruling of the Interstate Commerce Commission and reverse the decision of the Supreme Court which permitted the merger of the Pennsylvania and Central Railroads with the proviso that they continue operations of the New Haven Railroad and provide improved service to the commuters.

The committee says this pact involves a principle—just the ability of the States to get together. It is not the principle that is at stake, it is the interest—the public interest in preventing a giveaway to the Penn Central of $23,000,000 and a $1,000,000-a-year subsidy for an operating deficit—not to mention that the cause of all of this is the failure of the Penn Central to provide adequate service. In a talk with the Transit Authority of New York State they will have to rehabilitate the entire line, new cars, new equipment, another $56,000,000. If you have to replace this equipment, what you are paying $23,000,000 for, why pay for this outmoded equipment? Who is getting what? Is it $23,000,000 for nothing? Why, that is just the big train robbery revisited.

Now if that was not enough, this commuter railroad—the New Haven—was bankrupt. Both the Pennsylvania and New York Central wanted to merge. The ICC objected for they feared the new giant would force the New York-New Haven service to be discontinued. The case was brought before the Supreme Court for judicial review. What did they say? No merger—nothing—unless the new company, the Penn Central, which would affect savings of $80 million annually, to quote the ICC "irrevocably stipulate the inclusion of the New Haven."

The ICC stated further:

> The Penn Central merger would not be in the public interest without the complete inclusion of the New Haven.

According to the decision the Court has designated the New Haven a "protected" line. And to quote the Court decision:

> The ICC has itself stated the Penn Central merger would not be in the public interest without the complete inclusion of the New Haven.

Why then do the taxpayers have to pick up the tab for what is the responsibility of a private giant, the Penn Central?

The Court report on page 2 specifically states that they are "hopeful additional Federal funds will be granted." On page 4:

> Large sums of money are involved.

All States today are crying for more State aid. Why then fritter away any available money. The States have or can obtain in Federal funding to pay off private interest debts.

Add to this fact no hearings were held by the committee. I have taken this time because I have been refused time by the committee to oppose this legislation. This gravy train must be stopped in its tracks.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

CONNECTICUT-NEW YORK RAILROAD PASSENGER TRANSPORTATION COMPACT

The Clerk called the bill (H.R. 14646) granting the consent of Congress to the Connecticut-New York railroad passenger transportation compact.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BURKE of Massachusetts, Mr. WOLFF, and Mr. TIERNAN objected; and, under the rule, the bill was stricken from the Consent Calendar.

AMENDING SECTION 2401 OF TITLE 28, UNITED STATES CODE, TO EXTEND THE TIME FOR FILING TORT ACTIONS BY CERTAIN PERSONS

The Clerk called the bill (H.R. 10124) to amend section 2401 of title 28, United States Code, to extend the time for filing tort actions by persons under the age of 21, or insane or mentally ill, or imprisoned on a criminal charge.

Mr. JOHNSON of Pennsylvania. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

PROVIDING FOR ADMISSION TO THE UNITED STATES OF CERTAIN INHABITANTS OF THE BONIN ISLANDS

The Clerk called the bill (H.R. 4574) to provide for the admission to the United States of certain inhabitants of the Bonin Islands.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. ASPINALL. Mr. Speaker, reserving the right to object, I asked for some additional information concerning this legislation. I have not yet received that information. I have been told that there is some information that apparently does indicate some answer, but my question has to go to the question of whether or not we have requests from residents of Chichi Jima or Iwo Jima, either one, to ask for the privileges which this legislation grants. If there is anyone who can answer this question, I would be glad to yield for that purpose.

Mr. ROGERS of Colorado. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. Yes; I yield to my colleague from Colorado.

Mr. ROGERS of Colorado. The proposed legislation merely exempts the Bonin Islands from certain kinds of exclusion, to make it easier for the people on those islands to apply for entry into the United States as defined by section 101(a)(38) of the Immigration and Nationality Act, which means the continental United States, Alaska, Hawaii, Puerto Rico, Guam, and the Virgin Islands of the United States and the outlying possessions defined in section 101(a)(29) means American Samoa and Swains Island. Does that answer your question?

Mr. ASPINALL. No; that does not answer fully my question at the present time. I am one of the few Members who have been on these islands, who have ever been on Chichi Jima. I want to know whether or not there is any information in the record of the committee, which handled this legislation, from any of the citizens of the Bonin Islands to the effect that they want to come to some area of the United States. That is the information I would like to have.

Mr. MESKILL. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Connecticut.

Mr. MESKILL. I would answer the gentleman by saying that the Navy took a survey of the residents of the Bonin Islands and learned that between 25 and 30 families of some 200 families involved indicated that they would want to take advantage of the option. The other families indicated that they would want to stay where they are.

Mr. ASPINALL. May I ask my colleague this question: Do you have in your possession or does the committee have in its possession this information which you have given to the House, or is this just hearsay information which has come from some member of the Department of the Navy?

Mr. MESKILL. I believe the gentleman's colleague from Colorado has the information, if the gentleman would yield to him.

Mr. ASPINALL. I yield to my colleague from Colorado.

Mr. ROGERS of Colorado. There is information set forth in the report that is based upon an informal poll taken in December 1967. It is believed a sizable number of this group would desire to emigrate to the United States. The committee has a letter addressed to it from Bruce G. Karolle wherein it is stated that at least students on the island had petitioned the Government regarding their residency status.

Mr. ASPINALL. I regret to report to my colleague from Colorado that I did not get that information. Is there any request from any resident of Iwo Jima or from Chichi Jima?

Mr. ROGERS of Colorado. What I am trying to point out is that the letter I have in my hand states that there are at least two who are interested in petitioning.

Mr. ASPINALL. Would my colleague be willing to place that letter in the RECORD?

Mr. ROGERS of Colorado. Yes; I will.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that the letter referred to be made part of the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The letter is as follows:

UNIVERSITY OF GUAM,
December 12, 1968.

Congressman EMANUEL CELLER,
10th Congressional District,
Brooklyn, N.Y.

DEAR MR. CELLER: Congratulations on your recent election victory. Being a registered voter of the 30th District (Rep. Carleton King), it does our minds and hearts good to have progressive candidates like yourself win public office.

As a member of the teaching faculty here at the University of Guam, may I urge you to reintroduce Bill H.R. 16803 in the next congressional session? This legislation, although limited in scope, does in some way implement the theories of American democracy, and makes possible rectification of inaction which can lead to frustration and disillusionment for many people.

Two of my students, Irene (Savory) Bonewitz and Miles Washington, both from Chichijima Island, the largest of the Beechey Group (Chichishima-Rettō) of Bonin Islands (Ogasawara-guntō), have petitioned our government for consideration regarding residency status. Both are excellent students, skilled in professional education, which is especially needed here in Guam.

There are others, mainly young people who have been educated in U.S. schools, taught American values and tastes, who now wish the chance of deciding between Japanese and American cultures.

Please feel free to call upon me for anything that might enhance the passage of this legislation.

Sincerely yours,

BRUCE G. KAROLLE.

Mr. GROSS. Mr. Speaker, further reserving the right to object, I was handed a statement this morning, apparently from the Judiciary Committee, concerning this matter, in which the Navy is reported to have said this would not be a precedent. I want assurance from some high level source other than the Navy, as much as I respect that branch of the service, that this legislation will not be a precedent for unloading refugees from Okinawa into U.S. territory.

We have made the bad mistake, in my opinion, of turning back the Bonin Island to Japan, and now this administration has compounded that mistake of returning Okinawa to Japan under the circumstances that exist in the Far East. I want to know whether we are going to be compelled to accept from Okinawa as in the Bonin Islands, those who do not want to go back under Japanese dominion. I have not had the information I feel I can rely on, and until I do, Mr. Speaker, as long as this bill comes up under unanimous consent, I will object to passage.

Therefore, Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

COMMENDING THE AMERICAN SERVICEMAN AND VETERAN OF VIETNAM FOR HIS EFFORTS AND SACRIFICES

The Clerk called House Resolution 661, commending the American Serviceman and Veteran of Vietnam for his efforts and sacrifices.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to ask someone who sponsored or cosponsored this resolution what is meant by the final resolution on page 2, which reads as follows:

Resolved, That the House of Representatives will do all in its power to lift from his shoulders the heavy burden he has carried for so long.

Mr. Speaker, what is meant by this language? How is it proposed to go about lifting this burden?

Mr. RIVERS. If the gentleman will yield, I will explain the entire resolution and then I will answer his question specifically.

The purpose of this resolution is to express the highest tribute of the House of Representatives to American servicemen who have given their lives or been wounded in Vietnam and to express also the House's commendation to the individual serviceman and veteran who serves or has served in Vietnam for his bravery, sacrifice, dedication, initiative, and devotion to duty.

The resolution also expresses the will of the House to do all in its power to lift from the shoulders of the American serviceman in Vietnam the heavy burden he has carried for so long.

The man who serves his country in combat always carries a special share of the burden of service to his country. Such service is difficult enough even when the purpose is etched in stark black and white, the national policy it supports is unequivocal and there is no question of full support from the people back home.

The present emotional debate over our future course in Vietnam has overshadowed the efforts and the sacrifices of the individual American serviceman in this tragic conflict. The American serviceman in Vietnam, in addition to the trials of combat, has seen shifts in national policy, has seen demonstrations and protests against the war to an extent never known to American servicemen in combat before. In such a situation, it is of special importance that the serviceman be made aware that the statements and actions of citizens opposed to the war, those in Government as well as those out, are not to be taken as a reflection on the quality of his individual service; and that regardless of their opinions of the overall conflict, the American people and the Congress recognize the bravery and the dedication which he has exhibited.

The American servicemen in Vietnam perform on an alien battlefield largely unrelated to our past military experience either in terms of physical combat conditions or psychological conditions. All of the testimony and evidence available to the Committee on Armed Services has repeatedly indicated that the American servicemen in Vietnam are performing with a military professionalism unexcelled by any servicemen in our history. This resolution would let these brave men know that the House of Representatives honors their sacrifices and their devotion to duty as much as that of any generation of young Americans who have served their country.

House Resolution 661 and identical or similar resolutions were cosponsored by more than 140 Members of the House.

Stated very simply, therefore, we are reflecting the determination of this body to do all in its power to lift from the shoulders of our men in uniform the heavy burden they have carried for so long.

Among other things, we hope to accomplish this by assisting the President in every way possible, to Vietnamize the war.

We know our military has been fighting a war, the objective of which is not final victory on the battlefield. This is one generation of Americans who have been called upon to face something that no generation of my acquaintance has been faced with save, possibly in Korea, where the GI has been called upon to do so much while operating under political restraints.

Mr. GROSS. Mr. Speaker, then the

answer of the gentleman is that he feels the South Vietnamese are now capable of taking over this war; is that correct?

Mr RIVERS. I believe they have the capability of eventually taking it over if we give them the proper time, training and equipment.

Mr. GROSS. If we give them what?

Mr. RIVERS. If we give them the proper time in which to do it. They just cannot do it today; they require further training and equipment.

Mr. GROSS. So that is what is meant rather than that the President of the United States should set aside the politically motivated order by former President Johnson that stopped the bombing of North Vietnam and other military activities?

The gentleman thinks that removing the burden can be accomplished by Vietnamizing the war?

Mr. RIVERS. I think the stopping of the bombing laid an additional burden on the shoulders of the GI's, regardless of how that decision was arrived at.

Mr. GROSS. I am glad to hear the gentleman say that, and I agree with him completely.

This resolution does in no way and perhaps should not be expected to go to that issue.

Mr. RIVERS. This resolution, sponsored by more than 140 Members of the House, just tries to tell the GI, "Thank you for carrying the burden, the like of which no group of Americans ever has undertaken."

Mr. GROSS. But I would also like to say to the serviceman in Vietnam that he is not going to be there for the next 10 or 20 years, unable to fight, as he is capable of fighting, because of certain political considerations in the United States.

Mr. RIVERS. Positively.

Mr. GROSS. This is what I would like to say to him. I think we ought to apologize to him for the way in which he has been shackled, the way in which he has been prohibited from fighting this war to a conclusion long ago.

I am in favor of the resolution, do not misunderstand me, but I think it falls far short of what we ought to long ago have said to our fighting men over there, that they should go ahead and do the job. If we are going to get into these wars, the military ought to be able to fight them and not be handcuffed by political considerations in the United States.

Mr. Speaker, I withdraw my reservation of objection.

Mr. BINGHAM. Mr. Speaker, I am glad to join in supporting a resolution which pays tribute to American servicemen in Vietnam, which recognizes the "efforts and sacrifices" they have been called upon to make, which particularly pays tribute to those who have given their lives or been wounded, and which asserts that the House of Representatives "will do all in its power" to bring an end to the war, so as to lift from the servicemen's shoulders "the heavy burdens" they have carried for so long.

Had the resolution been subject to amendment, I would have proposed a change in the language of the second "resolved" clause. I know that the intention of those who drafted the resolution was to commend, collectively, those who are now serving or who have served in Vietnam for their "sacrifices, bravery, dedication, initiative, and devotion to duty." However, the word "each" was used, and this was unfortunate, especially at the present time when we are so concerned about the apparent massacre at Mylai. Obviously, some of our servicemen in Vietnam have not conducted themselves properly; some have been convicted of crimes against Vietnamese.

Passage of House Resolution 661 should not be construed as condoning any such crimes, nor should it be construed as supporting in any way the policies we have been following in Vietnam, both strategic and tactical.

Mr. McCLORY. Mr. Speaker, it is with pride and deep compassion that I raise my voice in behalf of House Resolution 661 to commend our American servicemen and veterans of Vietnam for their efforts and sacrifices.

Mr. Speaker, most of us have contributed to help brighten the Christmas of our men in Vietnam, as well as those who have returned from that bloody conflict, including those with broken minds and bodies in our military hospitals. But, Mr. Speaker, it is fitting also that we should pause today and pay public tribute to these dedicated young men who, in the highest tradition of our Nation, have risked their lives that our free Nation may fulfill its destiny.

Mr. Speaker, I have not favored the deployment of large American ground forces in the Vietnamese conflict, and I am in full support of the President's decision to withdraw our men at the earliest date practicable. Sitll, I do not underestimate the sacrifice or the consecration of those who are fighting there, or who have fought there and are now returning home.

Mr. Speaker, I salute every one of them, and by my vote in favor of this resolution I wish to communicate my gratitude and my respect. Truly, the fighting men and veterans of Vietnam and, may I say, those who have lost their lieves there, are as heroic as any Americans in our history who have defended our Nation.

Mr. Speaker, it is thus that I want my vote on this resolution—House Resolution 611—to be interpreted, and I vote proudly for its adoption.

Mr. GIAIMO. Mr. Speaker, it is obvious that few wars in this Nation's history have created such a difference of opinion among the American people as has the conflict in Vietnam. The events of Veterans Day and the November moratorium show clearly the deep division which exists over our future course in that war-torn land. Yet in our haste to condemn or support our policy, we have too often ignored the effort and sacrifice of the individual who has fought and died in Vietnam.

I speak today not as an advocate or opponent of our Vietnam policy, but as an American who wishes to recognize this individual sacrifice, an American who wishes to let this serviceman know that I am aware of the awful price which he has had to pay.

This man does not make American policy. We should not involve him in our ideological debates and partisan politics. We must instead recognize his effort and commend him for his sacrifice, not as a justification of our overall Vietnam policy but as a proper, heartfelt gesture of gratitude and respect.

Is the American serviceman less brave because he is fighting a war which many people do not fully understand? Is his effort less difficult because the American people are not 100 percent behind him? Is his sacrifice less meaningful because many people disagree with the policy which caused him to make that sacrifice?

I asked these questions when I introduced this resolution last month. I ask them again today because they must be answered by us and by the American people. Considering what these men have had to face, considering what they have lost, it is the least we can do.

No, Mr. Speaker, we cannot allow criticism of this war, regardless of its merit, to detract from the overall conduct of our servicemen. Whatever our feelings about the war, we must remember that each man, in one way or another, has been forced to make a sacrifice; he has been involved in a dangerous and difficult conflict. In almost every case, each serviceman has shown his courage, intelligence, and compassion. This outstanding conduct by some of America's finest young men cannot and must not be ignored.

More than 140 of our colleagues, Democrats and Republicans, liberals and conservatives, hawks and doves, have joined with me to pay the highest tribute to those who have given their lives or who have been wounded in Vietnam, to commend each serviceman and veteran for his individual sacrifice, and to pledge to do all in our power "to lift from his shoulders the heavy burden he has carried for so long."

I am truly gratified that so many of my colleagues with diverse and deep convictions about this war have joined to pay tribute to our American servicemen. I am pleased that the members of the Committee on Armed Services unanimously recommended that this resolution be enacted. I am confident that this House will let our young men know that we honor their sacrifices as much as those of any other generation of men who have served our country.

There comes a time, Mr. Speaker, when we must transcend politics, when we must rise above ideology, when we must recognize what is as well as what should be. Now is the time. Let us show these brave men that we know of their performance. Let us show them that our statements and actions for or against the war itself do not detract from the overall excellence of their conduct or from the degree of their sacrifice.

Above all, let us show them we are pledged to do all we can to bring them home and that we pray that neither they nor their sons will ever again be exposed to the horror of war.

For their sake, I urge the adoption of House Resolution 661.

Mr. BROYHILL of Virginia. Mr. Speaker, I rise in enthusiastic support of House Resolution 661, to express the highest tribute this House can pay to American servicemen who have given their lives or been wounded in Vietnam, and to express commendation to those who serve or have served there for their bravery, sacrifice, dedication, initiative, and devotion to duty.

In the past few months we have witnessed trial, denunciation, and conviction by press of a small number of American servicemen who may or may not have participated in what is described in vivid and gory detail as the "Pinkville Massacre." While we have acknowledged, however belatedly, that no massacre has yet been proven, and that if one did occur, only a small number of men, more than a year and a half ago, committed it, the truth will be known only after all the facts are in.

Meantime, Mr. Speaker, public preoccupation with trying to establish the truth in this isolated incident has almost obliterated from the minds of many the knowledge that Medals of Honor, Silver Stars, and Purple Hearts are being awarded and won and earned every single day by brave Americans—Americans who think not just of themselves but of their fellow man—Vietnamese or American.

Our servicemen today carry an especially heavy burden as they fight for us. The war they fight is declared "immoral" in some quarters from pulpits and soapboxes, and they know it. Thousands of protesters have run through our city streets carrying the flag of the enemy and burning our own, and they know it. But even though they may not fully understand or even agree with our reason for fighting, they know they owe loyalty to the greatest Nation on earth, the United States of America, their Nation and ours, and they fight on.

Mr. Speaker, we must make these loyal Americans know that no word they have received in opposition to the war they fight has lessened the intense pride the American people and the Congress feel for their bravery and dedication. I urge our colleagues to make them hear a public expression of our pride, Mr. Speaker. And may the enthusiasm with which we express it be heard around the world.

Mr. BIAGGI. Mr. Speaker, as a means of recognizing the efforts and sacrifices of American servicemen and veterans of Vietnam, I eagerly support House Resolution 661. Regardless of our opinions about the war in Vietnam, these Americans are worthy of the highest tribute.

The present emotional debate over the future course in Vietnam has overshadowed the great sacrifices of American servicemen in this tragic conflict. So many of these fine Americans have carried a heavy burden for too long.

In addition to the trials of combat, American servicemen have seen shifts in national policy and demonstrations and protests against the war to an extent never before known in our Nation. It is most important, therefore, that our servicemen be made aware that the statements and actions of those opposed to the war should not be taken as a reflection on their efforts and sacrifices.

All of the evidence and testimony that is available to this Congress shows clearly that American servicemen in Vietnam are performing with a military professionalism unexcelled in our history.

I am deeply grateful for this opportunity to recognize those American servicemen for their bravery, sacrifice, dedication, initiative, and devotion to duty.

While I hope and pray for the safe return of the American servicemen who are still in Vietnam, I am proud to be able to say that they are upholding the traditions of America in the finest manner.

Mr. MATSUNAGA. Mr. Speaker, as a cosponsor of an identical resolution, I rise in support of House Resolution 661, which would express the highest tribute of the House of Representatives to American servicemen who are serving or have served in Vietnam.

It is entirely fitting and proper for this body, in behalf of the American people, to commend our servicemen who have carried the heavy burden of serving their country in combat.

Mr. Speaker, it is tragic that in the emotional debate over our future course in Vietnam, the heroic efforts and sacrifices of American servicemen may have been overshadowed.

This House resolution, if adopted, would, in a significant way show our appreciation to American servicemen in Vietnam for their bravery, sacrifice, dedication, initiative, and devotion to duty. In truth, American servicemen in Vietnam are performing their duties with a military professionalism that is unexcelled by servicemen of any other period in our history. These brave and unselfish Americans ought to be reassured that their sacrifices have not gone unnoticed or unappreciated.

Mr. Speaker, for these reasons, I urge a favorable vote on this worthy resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

There being no objection, the Clerk read the resolution, as follows:

Whereas the efforts and sacrifices of the American serviceman in Vietnam has been overshadowed by the emotional debate over our future course in Vietnam; and

Whereas he is involved in a dangerous and bloody conflict being fought under the worst possible conditions; and

Whereas the American people, regardless of their opinions about the overall conflict, should take note of the bravery and dedication which he has exhibited and the sacrifices which he has made: Now, therefore, be it

Resolved, That the House of Representatives pays the highest tribute to the American serviceman who has given his life or has been wounded in the Vietnam conflict; and be it further

Resolved, That the House of Representatives commends each serviceman and veteran of Vietnam for his individual sacrifice, bravery, dedication, initiative, devotion to duty; and be it further

Resolved, That the House of Representatives will do all in its power to lift from his shoulders the heavy burden he has carried for so long.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. RIVERS. Mr. Speaker, I ask unanimous consent that all Members have 3 legislative days to extend their remarks on House Resolution 661, just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

AUTHORIZING SUBSISTENCE, WITHOUT CHARGE, TO CERTAIN AIR EVACUATION PATIENTS

The Clerk called the bill (H.R. 9654) to authorize subsistence, without charge, to certain air evacuation patients.

There being no objection, the Clerk read the bill, as follows:

H.R. 9654

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subchapter I of chapter 57 of title 5, United States Code, is amended as follows:

(1) By adding the following new section:

"§ 5709. Air evacuation patients; furnished subsistence

"Notwithstanding any other provision of law, and under regulations prescribed under section 5707 of this title, an employee and his dependents may be furnished subsistence without charge while being evacuated as a patient by military aircraft of the United States."

(2) By adding the following new item at the end of the analysis:

"5709. Air evacuation patients; furnished subsistence."

SEC. 2. Chapter 55 of title 10, United States Code, is amended as follows:

(1) By adding the following new section:

"§ 1088. Air evacuation patients: furnished subsistence

"Notwithstanding any other provision of law, and under regulations to be prescribed by the Secretary concerned, a person entitled to medical and dental care under this chapter may be furnished subsistence without charge while being evacuated as a patient by military aircraft of the United States."

(2) By adding the following new item at the end of the analysis:

"1088. Air evacuation patients: furnished subsistence."

(Mr. PRICE of Illinois asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. PRICE of Illinois. Mr. Speaker, H.R. 9654 authorizes subsistence without charge to certain air evacuation patients; namely, to officers of the uni-

formed services, to civilian Government employees, and to the dependents of these two groups.

At the present time military officers, civilian Government personnel, and their dependents who travel in the air evacuation system as patients are required to pay for meals furnished them while they are in the air evacuation chain. Enlisted personnel are entitled to subsistence in kind and thus are not charged. On the other hand an officer, a civilian, or one of their dependents is charged for meals consumed while aboard the evacuation aircraft and further, while he is hospitalized at the casualty staging unit, he is required to pay the hospitalization subsistence charge whether or not the meals are consumed.

These subsistence charges may not be waived. The annual DOD appropriation acts, such as section 409 of Public Law 90–580, provide that officers and civilians in a travel status who receive a per diem allowance for subsistence must be charged for Government-furnished meals at a rate of not less than $2.50 per day. In the case of hospitalized patients who are not receiving per diem—including aeromedical evacuation patients while at a casualty staging unit—a hospitalization subsistence charge is required by 10 U.S.C. 1075. Under the Claims Collection Act of 1966, sections 951–53 of title 31, United States Code, there is an affirmative statutory duty to collect these charges.

The annual cost of this legislation is estimated to be $175,000 which would be partially offset by an estimated administrative savings of $124,000 per year. In fiscal year 1968 a total of 170,000 patients were transported in the air evacuation system, and out of this number 39,000 were required to pay for their meals.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONSENTING TO AMENDMENT OF PACIFIC MARINE FISHERIES COMPACT

The Clerk called the bill (H.R. 13407) to consent to the amendment of the Pacific Marine Fisheries Compact.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, may we have assurance that this extension or amendment of this compact will not result in any expenditure from the Federal Treasury?

Mr. DOWNING. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from Virginia.

Mr. DOWNING. I can assure the gentleman from Iowa that the enactment of this legislation will not cost the Government anything. In fact, on page 4 of the report it is stated:

> Since all of the expenses of the Commission are paid by the compacting States, there would be no cost to the Federal Government in the event this legislation is enacted.

Mr. GROSS. I thank the gentleman.

Mr. Speaker, I withdraw my reservation.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

H.R. 13407

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of the Congress is hereby given to the amendments to articles I, II, IV, and X of the Pacific Marine Fisheries Compact, as amended.

SEC. 2. Article I of the Pacific Marine Fisheries Compact, as amended, would read substantially as follows:

"ARTICLE I

"The purposes of this compact are and shall be to promote the better utilization of fisheries, marine, shell and anadromous, which are of mutual concern, and to develop a joint program of protection and prevention of physical waste of such fisheries in all of those areas of the Pacific Ocean and adjacent water over which the compacting States jointly or separately now have or may hereafter acquire jurisdiction.

"Nothing herein contained shall be construed so as to authorize the compacting States or any of them to limit the production of fish or fish products for the purpose of establishing or fixing the prices thereof or creating and perpetuating a monopoly."

SEC. 3. Article II of the Pacific Marine Fisheries Compact, as amended, would substantially read as follows:

"ARTICLE II

"This agreement shall become operative immediately as to those States executing it whenever two or more of the compacting States have executed it in the form that is in accordance with the laws of the executing States and the Congress has given its consent."

SEC. 4 Article IV of the Pacific Marine Fisheries Compact, as amended, would read substantially as follows:

"ARTICLE IV

"The duty of the said commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances and conditions as may be disclosed for bringing about the conservation and the prevention of the depletion and physical waste of the fisheries, marine, shell and anadromous, in all of those areas of the Pacific Ocean over which the States signatory to this compact jointly or separately now have or may hereafter acquire jurisdiction. The commission shall have power to recommend the coordination of the exercise of the police powers of the several States within their respective jurisdictions and said conservation zones to promote the preservation of those fisheries and their protection against over-fishing, waste, depletion, or any abuse whatsoever and to assure a continuing yield from the fisheries resources of the signatory parties hereto.

"To that end the commission shall draft and, after consultation with the advisory committee hereinafter authorized, recommend to the Governors and legislative branches of the various signatory States hereto legislation dealing with the conservation of the marine, shell and anadromous fisheries in all of those areas of the Pacific Ocean over which the signatory States jointly or separately now have or may hereafter acquire jurisdiction. The commission shall, more than one month prior to any regular meeting of the legislative branch in any State signatory hereto, present to the Governors of such State its recommendations relating to enactment by the legislative branch of that State in furthering the intents and purposes of this compact.

"The commission shall consult with and advise the pertinent administrative agencies in the signatory States with regard to problems connected with the fisheries and recommend the adoption of such regulations as it deems advisable and which lie within the jurisdiction of such agencies.

"The commission shall have power to recommend to the States signatory hereto the stocking of the waters of such States with marine, shell, or anadromous fish and fish eggs or joint stocking by some or all of such States, and when two or more of the said States shall jointly stock waters, the commission shall act as the coordinating agency for such stocking."

SEC. 5. Article X of the Pacific Marine Fisheries Compact, as amended, would read substantially as follows:

"ARTICLE X

"The States agree to make available annual funds for the support of the Commission on the following basis:

"Eighty percent (80%) of the annual budget shall be shared equally by those member States having as a boundary the Pacific Ocean; and five percent (5%) of the annual budget shall be contributed by any other member State; the balance of the annual budget shall be shared by those member States, having as a boundary the Pacific Ocean, in proportion to the primary market value of the products of their commercial fisheries on the basis of the latest five-year catch records.

"The annual contribution of each member State shall be figured to the nearest one hundred dollars.

"This amended article shall become effective upon its enactment by the States of Alaska, California, Idaho, Oregon, and Washington and upon ratification by Congress by virtue of the authority vested in it under Article I, section 10, of the Constitution of the United States."

SEC. 6. The right to alter, amend, or repeal this Act is expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

JOSE ANTONIO NAVARRO MEDAL

The Clerk called the bill (H.R. 13959) to provide for the striking of medals in commemoration of the many contributions to the founding and early development of the State of Texas and the city of San Antonio by Jose Antonio Navarro.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, do I correctly understand that certain of these medals may be made of gold or silver or both?

Mrs. SULLIVAN. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. We do not specify what metals are to be used. Most of them will be bronze. But the sponsoring organizations at times want to make a few medals of gold or silver. If they do, they must go out on the market and buy the gold or silver at the market prices. None

of the Treasury's gold is used; they must buy the gold commercially. The silver must also be procured at the market price.

Mr. GROSS. Does the gentlewoman mean there is no prohibition in this legislation against the use of gold or silver?

Mrs. SULLIVAN. No, there is not. The legislation is written in such a way that it is up to the Secretary to decide what metals may be used. I believe, in a few instances we have had recently, that sponsors of commemorative medals have had several hundred or more silver medals, and, in a few instances, one or two gold medals. The Secretary of the Treasury must review any such request and decide if it can be approved.

Mr. GROSS. The gentlewoman is well aware that the use of gold in this country, certainly as a supporting metal for our currency, has been called an anachronism and even barbaric.

Would the gentlewoman or the Committee on Banking and Currency want to sully the name of Jose Antonio Navarro by permitting the use of a barbaric metal in a medal? Would she or would the committee, having used this argument to debase and debauch the currency of this country, want to do that? Surely the Banking and Currency Committee would not want to sully the name of a patriot of the character of Navarro by using even silver. That has also been banned from our coins, you know.

Mrs. SULLIVAN. Mr. Speaker, will the gentleman yield further?

Mr. GROSS. I am glad to yield further.

Mrs. SULLIVAN. These commemorative medals are not coins of course; they are keepsakes, remembrances, a sort of jewelry, or something of that sort. It would be much, much too expensive for them to go out on the market and buy silver at the market price for any large quantity of these medals because that would make them too expensive for most collectors.

However, a small number of people who are deeply interested in this particular medal may wish to buy silver ones, and the sponsors may want to order a few gold medals made for presentation to certain officials of the organization, or to the historic society or something of that nature. Otherwise only bronze will be used. That is the pattern usually followed on commemorative medals.

Mr. GROSS. Mr. Speaker, I find it hard to believe that the committee would permit the use of gold and silver for the making of medals, having branded gold as a barbaric metal and having so little regard for silver that they have taken it out of our coins and given us scrap metal currency instead in this country. I find it hard to believe that the committee would now turn around and try to honor any one with a gold or silver medal.

Mr. Speaker, I withdraw my reservation of objection.

(Mrs. SULLIVAN asked and was given permission to extend her remarks at this point in the RECORD.)

Mrs. SULLIVAN. Mr. Speaker, this bill involves no cost whatsoever to the Federal Government. It is similar to numerous such bills we have unanimously approved in the Committee on Banking and Currency to authorize the striking of commemorative medals for nonprofit organizations in connection with anniversaries of events of national significance or in the honoring of outstanding individuals whose contributions to the United States have been of national importance.

Every cent of cost associated with the striking of these medals must be paid by the sponsoring organizations. Before the Bureau of the Mint takes any steps whatsoever toward the design or manufacture of these medals, security must be provided to indemnify the Treasury for all expenses.

The sponsor of this bill, Mr. GONZALEZ of Texas, has introduced it in behalf of the San Antonio Conservation Society, which is, I understand, a representative group of San Antonio citizens interested in the preservation of physical reminders of Texas history. This organization purchased and restored the home of the Texas patriot who these medals would honor, Jose Antonio Navarro.

As to the possible use of gold or silver in these medals, the policy of the Treasury Department is to require a sponsoring organization which may want some presentation medals made in gold, or which may want a certain number of the medals made in silver, to obtain the gold or silver at the market price so that none of the Treasury's gold or silver is diverted for these purposes.

Hence there need be no fear that in authorizing the striking of any of these medals in gold or silver, or any other precious metal, that the organization would be charged only the Government's cost price for the materials. On silver, for instance, the average price paid by the Government for its current supply of silver was far below the current market value of silver. If the organization were charged only what the Government itself had paid years ago for silver, this would, in effect, be a substantial subsidy to the sponsoring organization. That is not involved in this instance. If the price of silver on the open market is $1.77 an ounce, or whatever it might be at the time the silver is obtained, that is what the organization would have to pay for any silver used in these medals.

Essentially, however, these would be bronze medals and any which are manufactured from any different alloys or metals could be obtained only upon the express approval of the Secretary of the Treasury. He would have control over the use of any materials used in the medals, just as he would have control over the designs, sizes, and so on.

One final word: It has been the policy of the Treasury and of the Committee on Banking and Currency to encourage the manufacture of commemorative medals honoring events, or achievements of individuals, of national historic importance whenever this can be done without interference with regular coinage operations. The commemorative medals originated as a substitute for the minting of commemorative coins. The subcommittee of which I am chairman, which handles this kind of legislation in the Committee on Banking and Currency, has not approved a single bill, since the subcommittee was formed in 1963, which would authorize the minting of a commemorative coin. There is growing interest among numismatists in commemorative medals and we have been glad to encourage this interest by approving bills of this nature.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

H.R. 13959

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

MEDALS AUTHORIZED

SECTION 1. In commemoration of the many contributions to the founding and early development of the State of Texas and the city of San Antonio by Jose Antonio Navarro (a signer of the Texas Declaration of Independence, a representative to the Texas Congress, a senator before and after the annexation of Texas, a participant of the constitutional convention of 1845, and in the highest sense, a noble man, one of the few Mexican patriots who stood by Texas in her struggle for liberty), the Secretary of the Treasury (referred to in this Act as the Secretary) shall furnish medals in accordance with this Act to the San Antonio Conservation Society (referred to in this Act as the society). The medals authorized under this Act are national medals within the meaning of section 3351 of the Revised Statute (31 U.S.C. 368).

DESIGN AND MATERIALS

SEC. 2. The medals shall bear such emblems, devices, and inscriptions, shall be of such size or sizes, and shall be made of such materials as the society may determine with the approval of the Secretary.

MINIMUM QUANTITIES

SEC. 3. Except for such quantities, if any, of gold or silver medals as may be approved by the Secretary, the medals may not be made in quantities of less than two thousand nor in an aggregate quantity greater than one hundred thousand. They shall be made and delivered at such times as may be required by the society.

DETERMINATION OF COST; SECURITY FOR PAYMENT

SEC. 4. The medals shall be furnished at a price or prices equal to the costs of manufacture as estimated by the Secretary, including labor, materials, dies, use of machinery, and overhead expenses. The medals may not be made unless security satisfactory to the Secretary is furnished to indemnify the United States for full payment of these costs.

With the following committee amendment:

Page 2, line 21, immediately before the period insert, "but no medals shall be made after December 31, 1970".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WAIVING ACREAGE LIMITATIONS WITH RESPECT TO CONVEYANCE OF LANDS TO STATE OF NEVADA

The Clerk called the bill (S. 1108) to waive the acreage limitations of section 1(b) of the act of June 14, 1926, as amended, with respect to conveyance of lands to the State of Nevada for inclusion in the Valley of Fire State Park.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, may I inquire, is this bill eligible for consideration on the calendar?

The SPEAKER. All the Chair can say is, it is on the calendar. Since it is, in the absence of evidence to the contrary, the presumption is that it is. The Chair will inquire as to whether it is. Does the gentleman mean in relation to the three legislative days?

Mr. GROSS. That is right, Mr. Speaker.

The SPEAKER. The Chair is informed that the bill is eligible for consideration.

Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

S. 1108

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the acreage limitations on conveyances in any one calendar year set forth in section 1(b) of the Act of June 14, 1926, as amended (43 U.S.C. 869(b)) shall not apply to or be affected by any conveyances of lands for inclusion in the Valley of Fire State Park made under that Act to the State of Nevada.

Mr. ASPINALL. Mr. Speaker, S. 1108 waives the acreage limitation in the Recreation and Public Purposes Act, as amended, to permit the State of Nevada to acquire a tract of public land in Clark County, Nev., for the Valley of Fire State Park.

The Recreation and Public Purposes Act limits the amount of public land that can be conveyed to a State for recreational purposes to 6,400 acres per year except that it permits States to acquire additional acreages for small roadside parks and rest sites of not more than 10 acres each. The present proposal would waive this 6,400-acre limitation in the act as it appears to the conveyance of lands to the State of Nevada for public lands to be included in the Valley of Fire State Park. This would permit the State of Nevada to acquire 26,160 acres of public lands at one time rather than over a period of several years.

The State has already acquired some 26,000 acres for this park, most of it coming from the public domain. The existing plan calls for a State park of some 52,500 acres and the passage of S. 1108 will permit the State to make very substantial progress in rounding out a much needed State park in southern Nevada.

The land is not suitable for agriculture use; it has only marginal grazing value and its minerals, including gypsum, silica sand and some uranium, have not been developed because of economic disadvantage due to location and grade. All minerals, under the terms of the Recreation and Public Purposes Act, are reserved to the United States.

Development of this park unit has been in progress by the State for about 11 years. Several sites have already been developed on lands previously acquired by the State. Money and plans are available for development of the remaining 26,160 acres, subject of this proposal, and there is every reason to believe the State will develop the lands into a logical and efficient park unit.

It seems logical the State should assume jurisdiction of these lands for recreation development.

I recommend passage of S. 1108.

The bill was ordered to be read a third time, was read the third time, and passed and a motion to reconsider was laid on the table.

COAST GUARD OMNIBUS

The Clerk called the bill (H.R. 13816) to improve and clarify certain laws affecting the Coast Guard.

The SPEAKER. Is there objection to the present consideration of the bill?

PARLIAMENTARY INQUIRY

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GROSS. Mr. Speaker, are we considering H.R. 13716?

The SPEAKER. H.R. 13816, a bill to improve and clarify certain laws affecting the Coast Guard.

Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

H.R. 13816

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 14, United States Code, is amended as follows:

(1) Section 2 is amended—

(A) by deleting the word "upon" and substituting therefor the words "on and under", in the clause preceding the first semicolon;

(B) by inserting "and under" after the phrase "life and property on" and deleting the word "on" after the phrase "the high seas and" in the clause preceding the second semicolon; and

(C) by correctly spelling icebreaking as an unhyphenated word and inserting ", under," after the phrase "promotion of safety on" in the clause preceding the third semicolon.

(2) Section 41a(a) is amended by deleting the comma after the word "components" in the last sentence and inserting the words "or assigned to the Selective Service System," in lieu thereof.

(3) The beginning of the first sentence of subsection (a) of section 88 is amended to read as follows:

"(a) In order to render aid to distressed persons, vessels, and aircraft on and under the high seas and on and under the waters over which the United States has jurisdiction and in order to render aid to persons and property imperiled by flood, the Coast Guard may:"

(4) Section 182 is amended—

(A) by striking the word "four" and inserting the word "six" in lieu thereof in the first sentence;

(B) by inserting the words "to complete the course of instruction at the Coast Guard Academy and" after the word "prescribe," in the penultimate sentence;

(C) by designating the amended section as subsection (a); and

(D) by adding a new subsection (b) as follows:

"(b) A cadet who does not fulfill his obligation to complete the course of instruction or refuses to accept an appointment as an officer in the Coast Guard may be transferred by the Secretary to the Coast Guard Reserve in an appropriate enlisted grade or rating, and, notwithstanding section 651 of title 10, United States Code, may be ordered to active duty to serve in that grade or rating for such period of time as the Secretary prescribes, but not for more than four years."

(5) The first sentence of section 190 is amended by inserting at the end thereof, the words, ", nor shall they be required to retire at age sixty-two but may be permitted to serve until age sixty-four at which time unless earlier retired or separated they shall be retired".

(6) Chapter 9 is amended by adding at the end thereof a new section 195 as follows:

"§ 195. Admission of foreigners for instruction; restrictions; conditions

"(a) The Secretary may permit not to exceed four persons at a time from the Republic of the Philippines designated by the President to receive instuction at the Academy.

"(b) A person receiving instruction under this section is entitled to the same pay and allowances, to be paid from the same appropriations, as cadets at the Academy.

"(c) Except as the Secretary determines, a person receiving instruction under this section is subject to the same regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as a cadet; however, a person receiving instruction under this section is not entitled to an appointment in the Coast Guard by reason of his graduation from the Academy."

(7) The analysis of chapter 9 is amended by inserting at the end thereof:

"Sec. 195. Admission of foreigners for instruction: restrictions; conditions."

(8) Section 271 is amended by striking the word "eighteen" and inserting the word "twelve" in lieu thereof in the first sentence of subsection (c).

(9) Subsection 332(a) is amended by striking all after the word "perform" and inserting a period at that point.

(10) Subsection (g) of section 432 is amended by striking out the figures "5,100" and inserting in lieu thereof the figures "7,500".

(11) Section 475 is amended—

(A) by amending the catchline to read as follows:

"Leasing and hiring of quarters; rental of inadequate housing";

(B) by designating the existing paragraph as subsection (d); and

(C) by adding new subsections (a), (b), and (c) as follows:

"(a) The Secretary is authorized to lease housing facilities at or near Coast Guard installations, wherever located, for assignment as public quarters to military personnel and their dependents, if any, without rental charge upon a determination by the Secre-

tary, or his designee, that there is a lack of adequate housing facilities at or near such Coast Guard installations. Such public housing facilities may be leased on an individual or multiple-unit basis. Expenditures for the rental of such housing facilities may not exceed the average authorized for the Department of Defense in any year.

"(b) Notwithstanding the provisions of any other law, members of the Coast Guard, with dependents, may occupy on a rental basis, without loss of basic allowance for quarters, inadequate quarters under the jurisdiction of the Coast Guard notwithstanding that such quarters may have been constructed or converted for assignment as public quarters. The net difference between the basic allowance for quarters and the fair rental value of such quarters shall be paid from otherwise available appropriations; however, no rental charge for such quarters shall be made against the basic allowance for quarters of a member of the Coast Guard in excess of 75 per centum of such allowance except that in no event shall the net rental value charged to the member's basic allowance for quarters be less than the cost of maintaining and operating the housing.

"(c) The Secretary is authorized, subject to regulations approved by the President—

"(1) to designate as rental housing such housing as he may determine to be inadequate as public quarters; and

"(2) to lease inadequate housing to members of the Coast Guard for occupancy by them and their dependents."

(12) The analysis of chapter 13 is amended by striking out—

"475. Hiring of quarters for personnel."

and inserting in lieu thereof

"475. Leasing and hiring of quarters; rental of inadequate housing."

(13) Section 650 is amended—

(A) by designating the existing paragraph as subsection (a); and

(B) by adding a new subsection (b) as follows:

"(b) Obligations may, without regard to fiscal year limitations, be incurred against anticipated reimbursement to the Coast Guard Supply Fund in such amount and for such period, as the Secretary, with approval of the Director of the Bureau of the Budget, may determine to be necessary to maintain stock levels consistently with planned operations for the next year."

(14) By adding the following new section after section 656:

"§ 657. Dependent school children; transportation of

"Whenever the Secretary, under such regulations as he may prescribe, determines that schools located in the same area in which a Coast Guard facility is located are not accessible by public means of transportation on a regular basis, he may provide, out of funds appropriated to or for the use of the Coast Guard, for the transportation of dependents of Coast Guard personnel between the schools serving the area and the Coast Guard facility."

(15) The analysis of chapter 17 is amended by adding the following new item:

"657. Dependent school children; transportation of."

SEC. 2. Title 10, United States Code, is amended as follows:

(1) The catchline of section 2002 is amended to read as follows:

"§ 2002. Dependents of members of armed forces: language training"

(2) Subsection (a) of section 2002 is amended—

(A) by deleting the comma after the phrase "Secretary of Defense" and inserting "or, with respect to the Coast Guard when it is not operating as a service in the Navy, the Secretary of Transportation," in lieu thereof; and

(B) by deleting "Army, Navy, Air Force, or Marine Corps" and inserting "armed forces" in lieu thereof in subparagraph (3).

(3) The analysis of chapter 101 is amended by striking out—

"2002. Dependents of members of Army, Navy, Air Force, or Marine Corps: language training."

and inserting in lieu thereof

"2002. Dependents of members of armed forces: language training."

SEC. 3. Title 37, United States Code, is amended as follows:

(1) Subsection (e) of section 201 is amended by striking the word "or" before "Marine Corps" and by inserting the words ", or Coast Guard" after "Marine Corps".

(2) The first sentence of subsection (b) of section 203 is amended by adding the words "or as a member of the permanent commissioned teaching staff at the United States Coast Guard Academy" after the words "United States Air Force Academy".

(3) Subsection (e) of section 415 is amended by inserting the words "or a warrant officer under section 213 of title 14," after the words "section 214 of title 14,".

With the following committee amendments:

On page 4, line 10, delete "Subsection" and insert in lieu thereof "Section".

On page 5, line 9, delete the period and insert in lieu thereof "except where the Secretary of the Department in which the Coast Guard is operating finds that the average is so low as to prevent rental of necessary housing facilities in which event he is authorized to exceed the authorized average."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the able.

TO IMPROVE AND CLARIFY CERTAIN LAWS AFFECTING THE COAST GUARD RESERVE

The Clerk called the bill (H.R. 13716) to improve and clarify certain laws affecting the Coast Guard Reserve.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object—and I shall object on this bill—as late as noon Saturday, I tried to obtain a report on this bill by personally appearing at the House Document Room and found that there was no report available.

Therefore, Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The SPEAKER. This concludes the call of the Consent Calendar.

CALL OF THE HOUSE

Mr. ASHBROOK. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 322]

Abbitt	Dent	Leggett
Anderson, Tenn.	Dingell	Lipscomb
Blatnik	Dorn	Long, La.
Bolling	Eilberg	Lukens
Brooks	Esch	McFall
Button	Gallagher	Mollohan
Cahill	Gettys	Ottinger
Carey	Giaimo	Pelly
Carter	Goldwater	Pollock
Casey	Gray	Powell
Chisholm	Hall	Ryan
Clay	Halpern	Sisk
Conyers	Hébert	Tunney
Cowger	Hunt	Van Deerlin
Cunningham	Ichord	Whalley
Dawson	Jacobs	
	Kirwan	

The SPEAKER pro tempore (Mr. OLSEN). On this rollcall 385 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR HOUSE MANAGERS TO FILE CONFERENCE REPORT ON H.R. 14916, DISTRICT OF COLUMBIA APPROPRIATIONS, 1970

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 14916) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

SOCIAL SECURITY AMENDMENTS OF 1969

Mr. MILLS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 15095) to amend the Social Security Act to provide a 15-percent across-the-board increase in benefits under the old-age, survivors, and disability insurance program.

The Clerk read as follows:

H.R. 15095

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Social Security Amendments of 1969".

INCREASE IN OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE BENEFITS

SEC. 2. (a) Section 215(a) of the Social Security Act is amended by striking out the table and inserting in lieu thereof the following:

"TABLE FOR DETERMINING PRIMARY INSURANCE AMOUNT AND MAXIMUM FAMILY BENEFITS

"I (Primary insurance benefit under 1939 act, as modified)		II (Primary insurance amount under 1967 act)	III (Average monthly wage)		IV (Primary insurance amount)	V (Maximum family benefits)
If an individual's primary insurance benefit (as determined under subsec. (d)) is—		Or his primary insurance amount (as determined under subsec. (c)) is—	Or his average monthly wage (as determined under subsec. (b)) is—		The amount referred to in the preceding paragraphs of this subsection shall be—	And the maximum amount of benefits payable (as provided in sec. 203(a)) on the basis of his wages and self-employment income shall be—
At least—	But not more than—		At least—	But not more than—		
----------	$16.20	$55.40 or less	----------	$76	$64.00	$96.00

		218.00	649	650	250.70	434.40".

(b) Section 203(a) of such Act is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) when two or more persons were entitled (without the application of section 202(j)(1) and section 223(b)) to monthly benefits under section 202 or 223 for January 1970 on the basis of the wages and self-employment income of such insured individual and at least one such person was so entitled for December 1969 on the basis of such wages and self-employment income, such total of benefits for January 1970 or any subsequent month shall not be reduced to less than the larger of—

"(A) the amount determined under this subsection without regard to this paragraph, or

"(B) an amount equal to the sum of the amounts derived by multiplying the benefit amount determined under this title (including this subsection, but without the application of section 222(b), section 202(q), and subsections (b), (c), and (d) of this section), as in effect prior to January 1970, for each such person for such month, by 115 percent and raising each such increased amount, if it is not a multiple of $0.10, to the next higher multiple of $0.10;

but in any such case (i) paragraph (1) of this subsection shall not be applied to such total of benefits after the application of subparagraph (B), and (ii) if section 202(k)(2)(A) was applicable in the case of any such benefits for January 1970, and ceases to apply

after such month, the provisions of subparagraph (B) shall be applied, for and after the month in which section 202(k)(2)(A) ceases to apply, as though paragraph (1) had not been applicable to such total of benefits for January 1970, or".

(c) Section 215(b)(4) of such Act is amended by striking out "January 1968" each time it appears and inserting in lieu thereof "December 1969".

(d) Section 215(c) of such Act is amended to read as follows:

"Primary Insurance Amount Under 1967 Act

"(c)(1) For the purposes of column II of the table appearing in subsection (a) of this section, an individual's primary insurance amount shall be computed on the basis of the law in effect prior to the enactment of the Social Security Amendments of 1969.

"(2) The provisions of this subsection shall be applicable only in the case of an individual who became entitled to benefit under section 202(a) or section 223 before January 1970, or who died before such month."

(e) The amendments made by this section shall apply with respect to monthly benefits under title II of the Social Security Act for months after December 1969 and with respect to lump-sum death payments under such title in the case of deaths occurring after December 1969.

(f) If an individual was entitled to a disability insurance benefit under section 223 of the Social Security Act for December 1969 and became entitled to old-age insurance benefits under section 202(a) of such Act for January 1970, or he died in such month, then, for purposes of section 215(a)(4) of the Social Security Act (if applicable), the amount in column IV of the table appearing in such section 215(a) for such individual shall be the amount in such column on the line on which in column II appears his primary insurance amount (as determined under section 215(c) of such Act) instead of the amount in column IV equal to the primary insurance amount on which his disability insurance benefit is based.

INCREASE IN BENEFITS FOR CERTAIN INDIVIDUALS AGE 72 AND OVER

SEC. 3. (a)(1) Section 227(a) of the Social Security Act is amended by striking out "$40" and inserting in lieu thereof "$46," and by striking out "$20" and inserting in lieu thereof "$23".

(2) Section 227(b) of such Act is amended by striking out in the second sentence "$40" and inserting in lieu thereof "$46".

(b)(1) Section 228(b)(1) of such Act is amended by striking out "$40" and inserting in lieu thereof "$46".

(2) Section 228(b)(2) of such Act is amended by striking out "$40" and inserting in lieu thereof "$46", and by striking out "$20"and inserting in lieu thereof "$23".

(3) Section 228(c)(2) of such Act is amended by striking out "$20" and inserting in lieu thereof "$23".

(4) Section 228(c)(3)(A) of such Act is amended by striking out "$40" and inserting in lieu thereof "$46".

(5) Section 228(c)(3)(B) of such Act is amended by striking out "$20" and inserting in lieu thereof "$23".

(c) The amendments made by subsections (a) and (b) shall apply with respect to monthly benefits under title II of the Social Security Act for months after December 1969.

MAXIMUM AMOUNT OF A WIFE'S OR HUSBAND'S INSURANCE BENEFITS

SEC. 4. (a) Section 202(b)(2) of the Social Security Act is amended to read as follows:

"(2) Except as provided in subsection (q), such wife's insurance benefit for each month shall be equal to one-half of the primary insurance amount of her husband (or, in the case of a divorced wife, her former husband) for such month."

(b) Section 202(c)(3) of such Act is amended to read as follows:

"(3) Except as provided in subsection (q), such husband's insurance benefit for each month shall be equal to one-half of the primary insurance amount of his wife for such month."

(c) Sections 202(e)(4) and 202(f)(5) of such Act are each amended by striking out "whichever of the following is the smaller: (A) one-half of the primary insurance amount of the deceased individual on whose wages and self-employment income such benefit is based, or (B) $105" and inserting in lieu thereof "one-half of the primary insurance amount of the deceased individual on whose wages and self-employment income such benefit is based".

(d) The amendments made by subsections (a), (b), and (c) shall apply with respect to monthly benefits under title II of the Social Security Act for months after December 1969.

ALLOCATION TO DISABILITY INSURANCE TRUST FUND

SEC. 5. (a) Section 201(b)(1) of the Social Security Act is amended by—

(1) striking out "and" at the end of clause (B);

(2) striking out "1967, and so reported," and inserting in lieu thereof the following: "1967, and before January 1, 1970, and so reported, and (D) 1.10 per centum of the wages (as so defined) paid after December 31, 1969, and so reported,".

(b) Section 201(b)(2) of such Act is amended by—

(1) striking out "and" at the end of clause (B);

(2) striking out "1967," and inserting in lieu thereof the following: "1967, and before January 1, 1970, and (D) 0.825 of 1 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1969,".

The SPEAKER pro tempore. Is a second demanded?

Mr. BYRNES of Wisconsin. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Arkansas (Mr. MILLS) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. BYRNES) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Arkansas.

Mr. MILLS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the legislation before us, H.R. 15095, would increase all social security benefits by 15 percent effective with respect to benefits payable for January 1970 and thereafter. This is extraordinary social security legislation, in my opinion, in that it is unique to present a bill increasing benefits while withholding action on other needed improvements in the social security program. The situation, however, is such that the Committee on Ways and Means unanimously recommended this course of action. Many, if not all, of the members of the committee were reluctant to take this step, but in the light of a 9.1-percent rise in the cost of living since the last benefit increase in February 1968, we felt that the need for a significant increase in social security benefits was pressing and that such an increase should be provided as quickly as possible. Moreover, we were informed even if we acted now, the earliest the increased amounts could be reflected would be in benefit checks mailed next April. Of course, those checks would be for benefits for the month of March.

One thing which I want to make clear is that this is not our final recomendation for changes in social security and welfare programs. The pending business of the committee, the business which we will take up immediately on our return in the next session, is further consideration of the entire Social Security Act, old-age and survivors insurance, disability insurance, hospital insurance, supplementary medical insurance, and all of the welfare programs, including medicaid and aid to dependent children. It is my firm intention, as far as I am concerned, to report a comprehensive social security bill dealing with these programs by next March.

The action we have taken in presenting H.R. 15095 in no way prejudges any of the recommendations made to the committee by the President, by Members of Congress, or by private organizations and individuals. All of these recommendations are still on the agenda of the committee. In the course of the executive sessions in which we considered the present legislation, we attempted to choose from among the many worthwhile recommendations made to the committee those improvements in the program which were important enough to be included as emergency legislation along with the proposed 15-percent increase. However, it is our judgment—and this judgment was not made lightly—that none of the other changes proposed was in the same class as the benefit increase, so far as the matter of time was concerned.

As worthwhile as some of these other proposals were, we could not bring them up as an emergency measure this late in the session, in our opinion.

Mr. Speaker, as the bill now stands, it is a simple bill. It would provide nothing more than a 15-percent across-the-board increase in social security benefits to everyone who is entitled to social security benefits next January or any month thereafter.

An important factor in arriving at the decision to recommend a 15-percent increase at this time was the recent review of the long-range cost estimates made by the Chief Actuary of the Social Security Administration. These estimates show at the present time the cash benefits part of the social security program has an actuarial surplus of 1.16 percent of taxable payroll. This is sufficient, entirely sufficient, to meet the cost of a 15-percent benefit increase. Accordingly, it would not seem reasonable to withhold the benefit increase—a benefit increase that witness after witness testified was very badly needed—until all the other problems connected with amending the social security law are solved.

The SPEAKER pro tempore (Mr. OLSEN). The time of the gentleman from Arkansas has expired.

Mr. MILLS. Mr. Speaker, I yield myself 5 additional minutes.

The SPEAKER pro tempore. The gentleman from Arkansas is recognized for 5 additional minutes.

Mr. MILLS. Mr. Speaker, I am sure that the Members would be interested in some examples of the effect of the bill on social security payments. I am informed that under the bill the following increases would take place:

First, the average benefit paid to a retired worker would be increased from around $100 to $116 a month.

Second, the average benefit paid to an aged couple would go from approximately $170 to $196 a month.

Third, the average benefit paid to an aged widow would go from $88 a month to $100 a month.

Fourth, the average benefit paid to a widow with two children would be increased from $254 a month to $292 a month.

Fifth, the average benefit paid to a disabled worker would be increased from $113 to $130.

Sixth, the average benefit paid to a disabled worker with a wife and children would go up from $237 to $273 a month.

Seventh, in addition to special benefits paid to certain people aged 72 and over would be increased from the present $40 for an individual and $60 for a couple to $46 and $69, respectively.

Mr. Speaker, altogether about 25 million social security beneficiaries, nearly 1 out of every 8 people in the country, would be benefited from the increases provided for in this bill.

As I mentioned earlier, the long-range surplus of 1.16 percent of taxable payroll is sufficient to meet the costs of the bill.

The cost of H.R. 15095 is 1.24 percent of taxable payroll, leaving an actuarial balance of minus 0.08 percent of taxable payroll after enactment of the bill. That still enables us to say that the fund is actuarially in balance, because the actuary for HEW has said that any amount not in excess of a minus 0.10 is an acceptable margin.

Actually, levels of earnings go up and have been for years at not less than about 3 percent a year. So, when you look to the 1970 figures in place of the 1969 figures, as this does, you may find that based upon 1970 wages, there would be a positive act and balance rather than a negative balance.

In dollar terms, enactment of the bill will mean higher benefit payments of $1.7 billion in fiscal year 1970. This compares to the program submitted by the President of some $600 million in fiscal year 1970, and is explained by two factors.

First of all, there would be 5 monthly payments under the committee bill, the bill before you. if it is enacted. Whereas under the President's program there would have been only 3 monthly payments. Second, his recommendation was for a 10-percent benefit increase while the bill provides for a 15-percent increase.

Before concluding, I would like to point out that there are two typographical errors in the committee report. On page 2 of the report there is a statement to the effect that the benefit increase will be reflected in the checks issued on April 13, 1970. This date should be April 3, 1970, since the third day of the month is the day when checks are normally sent out. On page 3 there is a table showing some illustrative benefit increases under the bill. The first figure in the last column of that table is H. 84. It should be $64.

It will be recalled that on Friday a week ago the Senate included the language of this bill as an amendment to the Tax Reform Act. After the House passes this bill it would be my desire to ask the House conferees to accept the language of the Senate amendment that is identical with the language of this bill as a part of the Tax Reform Act. I say that because I think it is much better for us to include it on that basis than to send another bill to the Senate, where the season of the year might well affect the number of amendments that would be offered to it.

Mr. Speaker, I would urge that the Members vote for the bill, and let us then take it to conference.

The SPEAKER pro tempore. The time of the gentleman from Arkansas has again expired.

Mr. MILLS. Mr. Speaker, I yield myself 1 additional minute.

Mr. PEPPER. Mr. Speaker, will the gentleman yield?

Mr. MILLER. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Speaker, in order to make the record clear, did the House Committee on Ways and Means report the bill that the able gentleman from Arkansas is now presenting prior to the time that the other body acted?

Mr. MILLS. The answer is yes; we sent them a copy of the bill on the day we ordered it reported so that they could adopt it as we had written it.

Mr. PEPPER. I thank the gentleman.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from California.

Mr. BURTON of California. Mr. Speaker, if I understood the distinguished chairman of the Committee on Ways and Means, the gentleman stated that it would be his position to urge only that the language in the House bill be that approved by the House conferees.

Mr. MILLS. What I am talking about, if the gentleman will permit me to attempt to clarify it quickly, is this: I would not be in a position, and I would urge the conferees not to accept all of the amendments that were adopted to the Social Security Act, particularly the amendment that has to do with the $100 minimum.

We can handle that later.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield further?

Mr. MILLS. I will be glad to yield further to the gentleman from California.

Mr. BURTON of California. Mr. Speaker, in light of the lateness of the year I would urge that all of our distinguished conferees on both sides view objectively the very difficult problem posed to the concurrent recipients of public assistance and social security, because they really will not get anything under the bill.

I would seek no assurances in that regard, but I would urge that you look at this matter, particularly as contained in the Harris amendment.

As the distinguished ranking minority member of the Committee on Ways and Means and the distinguished chairman know, there is another procedural difficulty in the bill that will cost the State and Federal Governments from $30 to $50 million in grant computation changes unless the retroactive increases be required to be disregarded by the States.

It is somewhat a technicality, but there is $30 to $50 million that should not be wasted in bureaucratic grant changes, if we have got that kind of money we really ought to see to it that all the elderly people get some measure of increase under this bill. I am not advocating at this time the entire Senate social security package, obviously some of that can wait for further hearings by the committees on our side.

Mr. MILLS. Mr. Speaker, I would state to the gentleman that he may be assured that the matter is in the mind at least of the chairman of the Committee on Ways and Means for future consideration.

Furthermore, the Department of Health, Education, and Welfare has assured me that it has no intention of requiring the States to take this retroactive payment into account in determining the needs of welfare receipents. The States will be free to treat this payment as they choose, just as under present law and practice they are free to ignore as unconsequential a $25 or casual income as inconsequential or casual income a $25 Christmas gift in determining a recipient's needs. The States will, therefore, not be forced to undertake any unnecessary paperwork to redetermine recipients' needs on account of the retroactive payment.

Mr. BURTON of California. I thank the gentleman.

GENERAL LEAVE

Mr. MILLS. Mr. Speaker, I would ask unanimous consent that all Members may be permitted to extend their remarks just prior to the vote on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Wisconsin (Mr. BYRNES).

Mr. BYRNES of Wisconsin. Mr. Speaker, I strongly support H.R. 15095, which provides an across-the-board 15-percent increase in social security benefits. The benefit increase is effective January 1 and will first be reflected in the check received on April 3 for March benefits. An additional check will be mailed in April to cover the increase attributable to the months of January and February. The increase will benefit 25 million individuals, including those who receive the special benefit payable to uninsured individuals age 72 and over.

Our citizens living on fixed incomes are hardest hit by the ravages of inflation. Those who have studied problems of the elderly agree that one of their greatest needs is an adequate income to meet their daily living expenses. Inflation is the greatest threat to an adequate income for our elderly citizens.

The inflation we have been experiencing in recent years has severely eroded the purchasing power of social security benefits. Since social security beneficiaries are the aged, the disabled, and widows who often have small children to care for, they comprise the segment of the population least able through their own efforts to protect themselves against inflation. Although the wages of those currently working have been increasing, often faster than increases in the general cost of living, the income of these individuals has remained constant. Since benefits were last increased in February 1968, the Consumer Price Index has risen by 9 percent. The Consumer Price Index increased 0.5 percent during September, paralleling the nearly 6-percent annual increase we have experienced in the last year.

Runaway inflation was a part of the fiscal mess the new administration inherited when it took office earlier this year. The highest priority has been assigned to economic policies that will put the Nation's fiscal house in order and control inflation consistent with avoiding intolerable levels of unemployment and other economic dislocations. The economists agree that this delicate task necessarily involves some delay between the period during which the new policies are implemented and when they become fully effective, particularly in view of the full head of steam inflation was permitted to build up. In view of the inflation that we have been experiencing and will probably experience in the next few months, it is important that Congress enact an increase in social security benefits before adjourning this year.

In view of the urgency of action and the lateness of the hour in the current legislative session, the committee's bill is limited to restoring and protecting the purchasing power of social security benefits. This should not be interpreted as a lack of support for other needed improvements in our social security law.

The President has recommended and I have introduced comprehensive legislation for improving social security which includes not only an across-the-board benefit increase, but provisions automatically adjusting benefits in the future to cost-of-living increases, increasing the amount of income that can be earned without losing benefits, increasing a widow's benefit from 82½ percent to 100 percent of her husband's benefit, providing more equity in benefit computations for men, and making many other changes that will improve the equity, administration, and financial soundness of the social security program.

In my judgment, we must also develop amendments that provide greater equity for working women and for individuals who continue to work after attaining retirement age. The retirement test should be simplified, particularly as it affects the self-employed. I have developed proposals in these areas that will make substantial improvements in existing law. It is my hope that these proposals will be favorably considered by the committee when we consider further social security amendments early next year.

All of these structural improvements are important, Mr. Speaker, and should be assigned a high priority. Automatic adjustments in benefits commensurate with cost-of-living increases should be enacted to provide social security beneficiaries with the same protection against inflation that civil service and military retirees have long enjoyed—as the platforms of both major political parties recognized last year. Simple justice requires providing widows with the same level of benefits their husbands would receive as a widower. Increasing the amount an individual can earn without losing benefits must also have a high priority. But the appropriate means of achieving these goals may be the subject of disagreements, and technical details of these provisions require time to work out. Also, these amendments will require additional financing—either through a rate increase, an increase in the wage base, or a combination of the two. Financing decisions involve controversy and again, the technical details take time to work out.

Mr. Speaker, it would simply not be fair to social security recipients to delay an across-the-board increase for several months while these details are being worked out. However, I do want to assure the Members that all of these improvements in the social security program will be on the first order of business when the new Congress convenes, and must be given a high priority.

I want to be equally emphatic in also pointing out that the committee's action does not indicate a lack of determination to act on the President's recommendation for comprehensive reform of our welfare laws, and to reexamine and enact needed amendments to our medicare and medicaid programs. Although the comprehensive hearings the Ways and Means Committee recently conducted encompassed welfare, medicare, and medicaid, as well as social security, the time available simply did not permit action in all of those important and difficult areas. These issues will, along with structural improvements in the social security law, be the first order of business for the Ways and Means Committee in the new Congress. I share the hope of the chairman that the committee will be able to recommend some very fundamental improvement in these programs by at least the end of next March. But we should not delay action on the urgently needed increase in social security benefits until that time.

The Ways and Means Committee has carefully reviewed the financing of the present program and exercised the same solicitude for its actuarial soundness that has characterized our efforts in the past. The Chief Actuary of Social Security has assured the committee that on the basis of his latest estimates, the existing tax schedule is adequate to finance an across-the-board 15-percent benefit increase.

The hospital insurance fund, which finances a service benefit and is a separate trust fund from the trust funds associated with the cash benefits program, is currently running an actuarial deficit. The committee will have to correct this situation when it considers amendments to the medicare program next year—including the Health Cost Effectiveness Act recommended by the President—that are designed to reduce costs and improve the efficiency of the program. In this connection, it should be noted that the President's recommendation for automatic adjustments in the earnings base, which will be considered next year, will also have a favorable impact on the actuarial imbalance in the hospital insurance trust fund.

Mr. Speaker, this is urgent legislation. It is noncontroversial. It is required by simple justice. It simply cannot be deferred until next year. I share the sentiment expressed by the chairman that passage of this legislation by an overwhelming vote may facilitate acceptance by the House conferees of the basic 15-percent increase in benefits voted by the Senate. This might expedite action on this increase which has already been delayed too long. I hope that all of my colleagues will join me in supporting this bill to provide prompt relief to our social security beneficiaries.

Mr. MILLS. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio.

Mr. VANIK. Mr. Speaker, the effort to raise social security benefits began early this year when Members of this body recognized the dire circumstances imposed upon millions of senior citizens as a result of the spiraling cost of living under runaway inflation. An overwhelming majority of the Members of this body introduced bills to increase benefits.

On May 8, over 100 Members of this body cosponsored a bill which I introduced providing for an across-the-board increase of 15 percent. At that time, the President was requesting a 7-percent increase in benefits, effective in January 1970. He stated that any increase beyond this amount would be inflationary.

On September 18, I served notice that I would seek a Democratic caucus action on a resolution increasing benefits to 15 percent across the board effective this year. On September 25, the President sent up a message recommending only a 10 percent increase with checks to be mailed in April.

On October 7, the Democratic caucus unanimously adopted the resolution which I offered to increase social security benefits across the board by 15 percent.

Thereafter, the administration continued to press for its inadequate and meager 10-percent increase despite the overwhelming evidence that a 15-percent increase was justified and fiscally sound.

While the administration was challenging the inflationary impact of a 15-percent increase to the elderly, it was also sponsoring proposals to divert billions of dollars out of the social security fund by recommending a stretchout in already enacted provisions of the law which would reduce contributions by $22.7 billion in the next 4 years and by $160 billion in the next 20 years. The administration was in the incredible position of denying a 15-percent increase in social security benefits while at the same time the administration was proposing a stretchout in the law which would re-

duce the income of the social security fund. The inflation argument was a cruel hoax on the elderly.

These policies of the administration seemed determined to fight inflation at the peril of driving our senior citizens into poverty.

Although the 15-percent increase in social security benefits will soon be a reality, it did not come easily. The action of the Democratic caucus—in the creation of this essential national policy—was the decisive factor.

The senior citizens of America have been the most patient of Americans. This increase in benefits will make it possible for millions to remain self-sufficient with dignity. A further delay or a lesser distribution would have been a cruel setback to those who exist with no other supplemental income. For many, our action is already too late. Less and later would have been a crushing blow.

For our senior citizens, for the young, and for those in between, we owe a paramount duty to contain the inflation which threatens to overwhelm the retreating standard of American life. Unless we can reverse the inflationary thrust—what we do today may be in vain.

It is my further hope that our first order of business next year will be to resume where we leave off today in updating the social security program. It is my hope that we can develop a meaningful program of improvements in social security and needed reforms in the medicare program.

The minimum payment must be made realistic. Provisions must be adopted to insure that those on old-age pensions, the disabled, and the blind actually receive the increased benefits we provide today. It would be tragic if their benefits under State programs were reduced to provide a windfall for the States instead of better standards for these needy groups. Widows and survivor's benefits must be increased. The retirement test must be increased to realistic levels. The income base for benefits should reflect a worker's best years of contributions and not penalize those who must retire early because of industry practices. Medicare must be extended to the disabled.

Our work on social security and medicare has only begun.

The 15-percent increase in social security benefits will have the following effect on benefit payments:

Average monthly earnings	Worker [1]		Man and wife [1 2]		Widow, widower, or parent, age 62	
	Present law	Bill	Present law	Bill	Present law	Bill
Minimum [3]	$55.00	$64.00	$82.50	$96.00	$55.00	$84.00
$150	88.40	101.70	132.60	152.60	73.00	83.90
$250	115.00	132.30	172.50	198.50	94.90	109.20
$350	140.40	161.50	210.60	242.30	115.90	133.30
$450	165.00	189.80	247.50	284.70	136.20	156.60
$550	189.90	218.40	284.90	327.60	156.70	180.20
$650	218.00	250.70	323.00	[4] 376.10	179.90	206.09

[1] For a worker who is disabled or who is age 65 or older at the time of retirement and a wife age 65 or older at the time when she comes on the rolls.
[2] Survivor benefit amounts for a widow and 1 child or for 2 parents would be the same as the benefits for a man and wife, except that the total benefits would always equal 150 percent of the worker's primary insurance amount; it would not be limited to $323 as it is under the present law.
[3] Average monthly earnings of $74 or less under the present law, and of $76 or less under the bill.
[4] $105 limit on wife's benefit is removed.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I support this legislation. I urge my colleagues to do the same. I think most of them will want to join me in voting this needed increase.

While doing so, I think there are several points that must be made if we are to face up to the economic implications of this legislation.

First of all, there is no question that it is inflationary. That does not mean we should oppose it. Despite the rampant inflation in this country, it is necessary to compensate for the effects of inflation, on those most vulnerable, even though, inflation being a spiral, the compensation itself will inevitably have an inflationary impact.

I think, therefore, the point must be made that we still have a basic obligation to continue to move against the inflation that is damaging our economy, even though we are providing this symptomatic relief to those most vulnerable to inflation.

Why do I consider this inflationary? First of all, it is pumping $4.2 billion in a calendar year into the hands of people who by their unfortunate circumstances and because of their age are not likely to save much of it. They are going to spend it and spend it quickly. Inflation has made certain that most of them need to spend it. Inevitably, therefore, it has more cumulative inflationary impact than if we were giving the money to people in a position to save.

Second, I think we must face up to the fact that this bill is going to have a serious impact on our hoped-for surplus. Under the unified budget concept, we would have run our trust fund accumulation in the social security trust fund up by $1.7 billion more than we will, having passed this bill. In other words, in the remaining part of the fiscal year, $1.7 billion will be paid out that otherwise would have gone into the trust fund, and been counted as part of our surplus.

Once again, I am not complaining about this so much as I am pointing out to my colleagues that this bill will be a major factor in dissipating a hoped-for budget surplus which we deemed fiscally necessary at the beginning of the year.

I hope, Mr. Speaker, that these two points I have made about this bill will indicate to the Members of this body an increased need for fiscal restraint. We have a class of people in this country, those who are elderly and those who are disabled and those who are widows, who need the protection of this added spendable income, but we must understand the additional obligations imposed on us by the economic implications of our efforts to protect them with this compensatory piece of legislation.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr CONABLE. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise today in support of the legislation now before us to increase benefits to this country's millions of social security recipients.

It is absolutely essential, in my judgment, that this Congress act immediately, before irreparable harm is done to the senior citizens of our country. As we are well aware, present benefits are lagging far behind and remedial legislation is long overdue because of the effects of the present inflationary trends on the elderly.

Those living on fixed incomes are being forced to pay the price of inflation and, combined with the present "tight money" situation, it is virtually impossible for these people to borrow money to meet current expenses or obtain suitable housing.

This situation is totally unrealistic and unacceptable, and we can and must act now to relieve this intolerable condition. An immediate increase in benefits to the millions of elderly citizens now on social security will make it possible for them to, partially, take care of escalating costs of living. But, regrettably, this increase will offer only temporary relief at best.

In addition to this increase in benefits, I am firm in the conviction that the most realistic approach to this problem is to enact legislation whereby social security increases in the future will be tied into and automatically governed by the cost-of-living index and I have introduced legislation in this session to bring this about. And, I shall continue my efforts in this regard.

The increase we are considering today will soon be obsolete and totally negated, if the spiraling cost of living continues to outdistance social security and other retirement benefits for our elderly. The inflationary trends must be checked. Certainly, this Nation must be more responsive to its senior citizens on social security and more responsible in fiscal matters, than it has been in recent years. This business of legislating "too little, too late" for those in their "golden years" has gone on far too long, and a solution is within our reach.

In this regard, I also hope the committee will give early consideration to the concept of permitting social security recipients to earn more than the current ceiling. This would help relieve the serious financial bind that many social security recipients find themselves in, due to inflation and/or their limited income and contributions to the social securiy system.

Mr. MILLS. Mr. Speaker, I yield to

the gentleman from Massachusetts (Mr. BURKE) such time as he may consume.

Mr. BURKE of Massachusetts. Mr. Speaker, I rise to endorse the 15-percent benefit increase provided by H.R. 15095, the bill which the distinguished chairman and ranking minority member on the Committee on Ways and Means have introduced. I would rather that the bill provided a more generous increase than 15 percent and I offered a motion to provide a greater increase in committee before the bill was reported out.

Social security was enacted some 35 years ago to help assure a decent, dignified retirement to our Nation's older citizens. Since 1935, we have relied on this system of contributory insurance to provide a measure of economic protection against the income loss that accompanies retirement. And since that time the program has been expanded to provide protection for widows and orphans and the disabled. Today some 25 million, or about one out of every eight Americans, are getting monthly social security benefits.

Social security is virtually the sole source of income for about half of these beneficiaries and the major source for just about all. The importance of maintaining the purchasing power of social security benefits is obvious and cannot be overemphasized.

Since 1968, when we last increased benefits, inflation has eroded the value of social security benefits. We cannot turn our backs on the elderly or the widows and orphans or the disabled who rely on their social security benefits. To fail to increase social security benefits now would be doing just that. That is why I urge that this bill, which reflects the wisdom and experience of our Committee on Ways and Means, be enacted as quickly as possible.

Mr. Speaker, I would also like to reiterate what the chairman of the Ways and Means Committee himself has stressed in his statement. That is that the Committee on Ways and Means has already put on its agenda, as its first order of business when Congress reconvenes in January, the resumption of consideration of social security legislation, including welfare reform, medicare and medicaid operations, and the need for further increases in social security benefits.

Mr. MILLS. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. GILBERT).

Mr. GILBERT. Mr. Speaker, may I extend congratulations to the distinguished chairman of the Ways and Means Committee, to the distinguished ranking minority member of the committee, and to my fellow members of the committee for having the foresight to vote out a social security bill at this particular point in the legislative session.

We all know that inflation is one of the main problems of our elderly citizens, and, in fact, the President came out for an increase of 10 percent. Recognizing that 10 percent would be totally inadequate, and in order to give a quick and almost emergency-type increase to our senior citizens, our committee voted out a 15-percent increase.

Mr. Speaker, this 15-percent increase has my support, of course, and I am going to vote for it. But I consider this a stopgap measure. It must be a simple prelude to the consideration of genuine and meaningful social security reforms next year.

Separating an immediate increase from other social security legislation permits Congress to offer the fastest possible relief to social security beneficiaries beset by rapidly rising living costs. This approach will allow my committee the time necessary to give major social security reform the comprehensive review such complex proposals require without penalizing social security beneficiaries by delay.

Simple justice requires that our social security beneficiaries receive an immediate increase in benefits in order to maintain the buying power of their benefits in these times of rapid inflation. Since the last increase in social security benefits, prices have risen by almost 10 percent. If one takes the position that benefits were adequate then, there might be some justification for just a 15-percent increase now. Ten percent would catch beneficiaries up to where they were before—and the additional 5 percent would help them pay for what inflation has cost them in recent years. But I do not agree that benefits were adequate then. And certainly we must do more than provide the 15-percent increase in the bill before us today.

My bill, H.R. 14430, which is pending before the committee, would provide additional benefit increases, a two-step increase in the minimum benefit to $120 a month by January 1, 1972, and would abolish the premium for medicare part B—now $4 monthly—and make other much needed improvements in the social security and medicare programs. I am sure that in the coming months the committee will consider the proposals under my bill, H.R. 14430, and other pending social security legislation.

Mr. Speaker, I urge my colleagues to vote today for H.R. 15095, to provide a 15-percent increase in social security benefits. I urge my colleagues to vote for this humane measure, but with the recognition of its inadequacy and the determination to have benefits raised to a livable level next year.

Mr. MILLS. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I rise in support of this bill.

Mr. Speaker, in passing a 15-percent across-the-board increase in social security benefits, this House has only taken a stopgap step. It has not finished its work in this important area.

We could not, in the time available, attack such matters as increasing the earnings allowed to retirees without reduction of payments, possible inclusion of out-of-hospital drugs under medicare and other overall revampments of both the social security law and the medicare and medicaid sections of it.

We had to act, in an emergency fashion, to rescue many of our elderly from a strangling economic grip in which near runaway inflation has placed them. They were far behind the rocketing cost of living and painfully so.

This interim increase will help to ease that economic burden which our inability to control our economy has placed on them. It will increase the pension incomes of some 25 million beneficiaries by about $1.7 billion in fiscal 1970.

Though the first actual increase will not reach them until April 1, 1970, it will be retroactive to January 1. Better a little late than never.

I am sure that a majority of this House is aware that we still must adopt a social security system which is realistically in tune with our current economic situation. To accomplish this, fundamental facts must be reviewed and the House Ways and Means Committee plans to do this when we return next year.

I feel confident that we will come up with a revision of the social security law which will be both progressive and economically possible to carry.

Mr. CLANCY. Mr. Speaker, I rise in support of H.R. 15095, Social Security Amendments of 1969. As we all know too well, the cost of living has been steadily increasing at an alarming rate. The spiraling inflation we are experiencing today has a particularly harmful effect on those older persons living on fixed incomes, such as those whose chief or only income is derived from social security benefits. As prices go up for necessary goods and services, and the purchasing power of the dollar declines, those dependent upon social security are placed in an increasingly difficult position.

The legislation before us today, which has been favorably reported by the committee without amendment and with the recommendation that the bill pass, will provide a measure of relief. This 15 percent across-the-board increase will aid the 25 million elderly people, disabled persons and their dependents, widows and orphans who presently receive monthly benefits under this program. The increase also applies to those persons coming on the benefit rolls in the future.

It is my understanding that under this bill, both the minimum and maximum benefits will be increased for retired workers entering the benefit rolls at or after age 65 and for disabled workers.

Another important section provides for special payments for certain persons aged 72 and older who have either not worked long enough to qualify for regular cash benefits or have not worked at all under social security. Their benefits will also be raised by 15 percent.

Justice requires that our social security beneficiaries receive this increase immediately to enable them to maintain the buying power of their benefits in this time of rapid inflation. I had hoped however, that the provisions of this legislation would have been retroactive.

This legislation should pass unanimously.

Mr. ZABLOCKI. Mr. Speaker, I would like to take this opportunity to commend the distinguished chairman, the gentleman from Arkansas (Mr. MILLS), for expediting House action on H.R. 15095. A 15-percent increase in social security

benefits will indeed be a welcome Christmas present for the more than 25 million beneficiaries who will be affected.

The inflation which has hit us all has struck particularly hard at retired Americans who are trying to make ends meet in the face of alarming increases in prices and taxes. Their fixed incomes and often scant retirement resources have literally been stretched to the breaking point by inflation.

In view of the seriousness of this situation I am especially pleased that the House has today taken an important step toward improving these conditions by approving H.R. 15095. This bill will increase regular and special social security payments by 15 percent. In addition, it will increase minimum social security payments from $55 to $64 a month.

Nonetheless, none of us suffers from the illusion that these increases will in themselves eliminate the hardship which is the lot of so many of our senior citizens. In this regard, the chairman of the Ways and Means Committee is again to be commended for promising early committee action on other needed amendments to the Social Security Act, including welfare reform.

We welcomed the opportunity to present our views on this important subject at the committee's recent extensive hearings. We welcome the prospect that the committee will report comprehensive revisions in the social security, medicare and welfare programs to the House for action early in the next session of Congress.

Mr. FEIGHAN. Mr. Speaker, the need to increase social security payments has been apparent to me for some time. On May 21 I cosponsored a bill to provide a 15-percent across-the-board increase for the 25 million elderly people, disabled people and their dependents and widows and orphans presently receiving social security benefits. The bill also provided for annual cost-of-living increases and a minimum primary benefit of $80.

It is very gratifying to me, therefore, that the House of Representatives today has an opportunity to endorse at least one of these high-priority items. H.R. 15095 provides a 15-percent across-the-board increase for social security recipients, increase the minimum monthly payments from $55 to $64 for a retired or disabled worker. The bill becomes effective in January 1970 and the increases will be reflected in the March check, payable in April. A separate check covering the retroactive increase for the January and February payments would be paid in April.

These increases are long overdue and although this legislation encompasses only one aspect of the social security program, the distinguished membership of the Committee on Ways and Means has assured this body that it intends to consider the many issues affecting the various programs under the Social Security Act as its first order of business when Congress convenes next year. The committee's plans to study the social security program in depth and to act on its inadequacies will be a great relief to the millions of people presently enrolled in the program, many of whom have written to me this year to express their dissatisfaction with the social security program. These people feel that they have been treated as second-class citizens by the Federal Government; that the Government has neglected them and ignored their needs.

This bill is only the initial activity we plan in behalf of our senior citizens. While it will be helpful, nothing will suffice but a program that responds fully to the deficiencies of the present system. I look forward to enacting such legislation next year.

Mr. MILLER of Ohio. Mr. Speaker, the House action in passing legislation providing for a 15-percent across-the-board increase in social security benefits effective January 1 is to be lauded.

This measure is long overdue. For many, many months now, retired Americans have watched helplessly as the purchasing power of their savings and pensions has eroded away under the pressure of the mounting costs of living. For those who must support themselves on their earned social security benefits, it has become increasingly more difficult. Rapidly rising costs have meant lower living standards and increased efforts to obtain the essentials of a decent existence.

I strongly supported and voted for this immediate 15-percent increase in benefits, and I will continue to work for even more comprehensive reforms in the social security system.

There are two major reforms that deserve special mention: It is imperative that an automatic cost of living escalation clause be written into the social security statutes. This would eliminate the serious time lag that is now present between the fact of increased costs, and the compensating increases in benefits. I have introduced legislation to accomplish this and I believe its enactment would markedly improve the faith of our older people in the fairness of the system. Future cost-of-living benefit increases should not depend on the political process but rather should be guaranteed by law.

In addition, a substantial increase in the outside earnings limitation for social security recipients is necessary. I am likewise sponsoring legislation to achieve this. Those who wish to continue their productive years should be permitted to do so without losing benefits to which they are entitled after a career of hard work and contributions to the social security system.

We should not be satisfied with less than genuine security and dignity for America's retired citizens.

Mr. BROYHILL of Virginia. Mr. Speaker, I rise in support of H.R. 15095, a bill which, appropriately at this season, assures our elderly citizens and our other social security recipients who generally are on a fixed income that Congress cares. It would be cruel indeed to watch the continued erosion of fixed incomes through inflation, and fail to do something about it.

The 15-percent across-the-board increase, effective January 1, of social security payments will put the social security recipients only about 5 percent ahead of the cost-of-living increase for the period since the last social security rate increase.

I wholeheartedly support this action to grant this increase at this time, ahead of the full consideration of many other needed improvements to be made to the social security and welfare program. This increase is actuarially sound without any increase in the tax rate or the wage base.

When the Ways and Means Committee resumes its study after the first of the year of the comprehensive welfare reform program and the social security system, there are a number of improvements that I will support.

Among these improvements are provisions for an escalator clause that will provide automatic increases in benefits in step with the cost of living, an increase in widows' benefits from 82½ percent to 100 percent of their husbands' benefits, and liberalization of the retirement test to permit those who continue in full- or part-time employment to supplement their social security benefits.

Other improvements I will urge include the extension of medicare to active and retired Federal employees 65 years of age and over. I also believe that we should update the retirement income credit to recognize a level that reflects inflationary consequences.

Presently, Federal employees covered for the basic hospital plan under medicare include only those who retired before February 16, 1965, and who did not have coverage under the Federal Employees Health Benefit Act—FEHBA—on that date, and those who have the requisite number of quarters of social security coverage for their age group.

Hospital insurance benefits should be made available to Federal employees who do not have such benefits.

All Federal employees age 65 and over are eligible to participate in the voluntary supplemental medical insurance plan. Since the voluntary supplemental plan does not provide basic hospital benefits, it is inadvisable for the Federal employee to elect to participate in the voluntary supplemental plan and drop his coverage under FEHBA. The voluntary supplemental plan alone is inadequate. It is exactly what its name implies—"supplemental" to a basic hospital plan.

Thus, the Federal employee who is not eligible for the basic hospital plan will want to retain his FEHBA coverage. There is a general prohibition in the FEHBA plans against paying duplicate benefits. Under certain circumstances the voluntary supplemental plan would pay the deductible applicable to nonhospital treatment under the FEHBA plan and also the coinsurance factor of 20 to 25 percent that the insured individual pays for certain services under these plans.

The cost for a man and his wife under supplemental medical insurance is $4 per month, and is to be increased soon. Since part of the premiums will be attributable to the duplicate coverage, many individuals will feel they are unlikely to derive benefits commensurate with their contributions. In any event, coverage is an individual decision.

A Cabinet Committee on Federal Staff

Retirement System on February 15, 1966, recommended that Federal employees covered by a staff retirement system should have health insurance protection under social security health insurance provisions, after age 62 on the same basis as other workers.

The Social Security Administration in January 1969, filed a report requested by the Ways and Means Committee and the Senate Finance Committee recommending medicare coverage for Federal employees or retirees and their spouses, not insured under social security, with the cost of part A protection borne by the Government, as employer. New health insurance designed to complement medicare would be available under the FEHB program to Federal retirees and employees who would become entitled to part A protection. This complementary insurance, together with part A and part B of medicare, would provide health insurance protection approximately at the level of the Government-wide high option FEHBA plans.

This will correct an inequity where Federal civilian employees, who are also citizens, are not given certain health benefits provided by the Government to its citizens who have not been employees of the Federal Government. The cost of hospital insurance benefits should be borne by the Federal Government for the nearly half of such persons involved and not now so insured.

The additional cost to the Federal Government can be justified because under the present financing of FEHBA, the Government share as an employer is unduly low, especially when compared with what is done in private industry plans.

The retirement income credit provisions were designed to give those persons, such as our retired teachers, whose retirement income is taxable, a tax exemption approximately the same as that received by beneficiaries of tax-exempt social security payments. An individual who is 65 years of age is granted a credit against the tax liability on his retirement income—which includes annuities, interest, dividends, and rents—up to $1,524.

This limitation no longer is fair or realistic, and should give heed to cost-of-living increases. Congress has failed to adjust the retirement income credit provisions of the Internal Revenue Code to reflect either the Social Security Amendments of 1965 or those of 1967—and, of course, the 15-percent increase in benefits in the bill before us now.

There has been no increase in the retirement income base since 1962 despite the 7-percent social security increase in 1965 and the 13-percent increase in 1967. Therefore, the intent to give fair treatment to those who do not have tax-exempt social security benefits has been neglected.

Mr. ADDABBO. Mr. Speaker, I rise in support of H.R. 15095, to provide a 15-percent across-the-board increase in social security benefits. In addition to the general across-the-board increase, the legislation increases the minimum benefit from $55 to $64 for single persons and $82.50 to $96 for couples and increases special payments to persons over 72 years of age as well as maximum payments.

One of our colleagues on the Committee on Ways and Means has called this legislation a "stopgap" measure to enable the committee to devote more time to the social security amendments and major reform items pending at this time. I share that view and it is my hope that the Ways and Means Committee will approve a far-reaching overhaul of the social security laws early in the second session of the 91st Congress. My bill, H.R. 14431, provides for major reform, including two increases of 20 percent each in benefits in 1970 and 1972 and would more than double the minimum benefit, increasing the amount from $55 to $120 a month by January 1972.

Mr. Speaker, our goal must be to see to it that the social security system provides real economic security to the elderly. That is not the goal of H.R. 15095 but as a stopgap measure it is clearly more realistic than the meager 10-percent increase proposed by the administration. Let us commit ourselves to major social security reform today by approving this increase and immediately turning our attention to the real needs of our elderly citizens who have been caught in the inflationary spirals which have wiped out previous social security benefit increases.

Mr. MYERS. Mr. Speaker, I speak in favor of H.R. 15095. In our country today there are more than 25 million Americans age 65 and over who have become what could easily be called our "slighted society." These are the people who during good times and bad strived to put a little something aside for their retirement years, paid taxes, sent their children to school, went to war, and who in the main were all-around good citizens who came through World War I, the depression years of the 1930's, World War II, and Korea. These are the Americans who made this country great, but they are also near the bottom of our list of legislative priorities.

I am glad that we have finally realized that these Americans desperately need an increase in social security benefits to meet today's spiraling inflation. The last benefit increase was 2 years ago. Taking into account the rate of inflation the last 2 years plus the price rise expected this year, the 15-percent increase contained in this bill will barely cover past shortfalls and our "slighted society" will again fall back a step or two on the cost-of-living escalator. This increase does not make up for the fact that the retired have had to scrimp these past 2 years, nor will it offset any of the increase in the cost of living that may occur in the next 2 years.

Historically, social security has never done more than barely keep up with the cost of living. It certainly has not kept pace with the rising standard of living.

Let us not linger any longer on this legislation. Let us pass this bill and then immediately upon our return next year take up the other provisions of the social security law that desperately need improvement. Let us, among other things, make certain that future increases will be given when the cost of living goes up, raise the income limitation from $1,680 to $3,000 per year, raise the minimum payment from $55 to $100 per month for single persons and $150 for couples, and not reduce the social security income into a household when the primary recipient dies.

I realize that social security was originally intended to be a supplement to a person's retirement income, yet we know that changing times, rampant inflation, and circumstances beyond control have wiped away their precious savings. It seems to me that those who have been tax contributors all of their lives, not tax eaters, have a right to bitterly complain when they see welfare recipients receive more monthly assistance than they do along with surplus food, food stamps, and medical treatment, the latter of which social security recipients pay for.

Our elderly citizens are entitled to the guarantee of a brighter day, not because they, like some, demand it, but because they have earned their right to a better future.

Mr. REID of New York. Mr. Speaker, I rise in strong support of H.R. 15095, the Social Security Amendments of 1969.

I am delighted that the Ways and Means Committee and the House and the Senate are finally taking action to compensate the 25 million beneficiaries of the social security program for recent increases in the cost of living, which has been rising at a rapid rate. The inflationary spiral curtails the spending power of all consumers, as my colleagues are well aware, but it most seriously penalizes those who live on fixed incomes. It is high time we took this action to increase social security benefits by 15 percent, effective January 1, 1970, and thus to provide our retired citizens with a more reasonable income.

There are, of course, other changes which must be made in the social security law if it is to be equitable to all. Specifically, the $1,680 limit on annual earned income should be removed or, at the very least, increased. Increases should be made in the benefits provided under the program of aid to families with dependent children, and we should do more for the 3 million poorest aged, blind, and disabled persons in this country, as the gentleman from California (Mr. BURTON) pointed out last week.

I hope Congress will act early in the next session to make additional needed changes in the social security law. In the meantime, I strongly urge the passage of the measure before us today.

Mr. CHAPPELL. Mr. Speaker, we have relegated many of our most valuable citizens to a position of pauperism in this country. I say "most valuable citizens," Mr. Speaker, because this is an era for calling on the experience and knowledge of our older citizens, for it is from the storehouse of their souls that we can chart our destiny clear of the shoals of self-destruction. The very preservation of our way of life in this country depends on our putting daily into practice the principles tested and secured by the generation which preceded us.

Yet this wonderful generation of people have been hurt so deeply by the inflationary situation we are in that their

contributions to our society are strongly limited. Goods and services that cost them $10 in 1959 now cost over $12.50. What an unfair and shameful situation.

These citizens paid hard-earned dollars into the social security program when a dollar was worth a dollar. We cannot—and must not—ask our people to try to keep living on the same number of dollars which have so diminished in value.

We must not let the elderly people of our country become political whipping boys. Congress has the duty to do what is right for the people. I know we will.

We can afford to do more for our senior citizens, Mr. Speaker, and I, therefore, urge the passage of H.R. 15095 to give them these increased benefits.

We need the advice, the wisdom, and the knowledge of our older citizens, but we can ask very little of them unless we can also respond to their needs. Our bill is threatened by a Presidential veto, Mr. Speaker, but I hope that the Members of Congress can unanimously—and in a nonpartistan spirit, grant these increased and very much deserved benefits.

Mr. ROSENTHAL. Mr. Speaker, I support the limited social security bill which we consider today but only as an immediate and temporary solution to the long-range problems of the social security system.

This bill provides for a 15-percent increase in social security benefits, effective January 1, 1970. It also increases the minimum benefit from $55 to $64 for single persons and from $82.50 to $96 for couples.

This bill raises the special benefits for persons over age 72 from $40 to $46 for single persons and from $60 to $69 for couples.

Finally, this bill would provide for eventual maximum benefits of $250.70, instead of the present limit of $218 for single persons, and for a new maximum of $376 for couples, instead of $323.

But the bigger problems of social security reform are not included in this bill. And the benefit increases, while important, are clearly not adequate. I urge Congress to consider early next year the comprehensive reforms which our older citizens need and deserve.

I have proposed, in my comprehensive social security bill—H.R. 14487—a 35-percent flat increase in benefits and an automatic cost-of-living increase regularly to eliminate the effects of inflation. Under my bill average benefits would rise to $133 for individuals and to $220 for couples, with minimum benefits of $100 and $150 respectively.

My bill also provides:

Full benefits to both men and women who retire at age 60 and restore to full benefits those who are already retired on reduced annuities;

Full benefits at age 55 for women who retire with 120 quarters of coverage;

Prescription drug coverage, for an optional $1 a month;

An increase in ceilings on earned income for persons over 65;

Full benefits to widows and dependent widowers at age 50 and to disabled widows and widowers regardless of age;

Reducing to age 60 the eligibility date for medicare benefits;

Identical benefit rights for single persons who support brothers and sisters as those given married couples;

Giving Federal employees the right to elect social security coverage; and

Financing the social security system through whatever general revenues are needed to keep it actuarily solvent.

Mr. FARBSTEIN. Mr. Speaker, H.R. 15095, the Social Security Amendments of 1969, has been presented to us as emergency legislation to provide a badly needed benefit increase to approximately 25 million people. I am happy to support this legislation and regret that it is not more. I am heartened, however, by the statement in the report of the Committee on Ways and Means that its first order of business for the next session will be a continued study of comprehensive changes in the social security and welfare programs.

The reports from my district bear out the statement in the committee's report that there is a "pressing and urgent need for an across-the-board increase in social security benefits."

The last time we considered a social security benefit increase we provided a 13-percent benefit increase effective for February 1968. In February 1968 the Consumer Price Index was 119. The latest index is for October when it was 129.8, a rise of more than 9 percent in 20 months. If the index continues to rise at this rate—average of 0.45 percent a month—the rise will be more than 11 percent by next April when the benefit increase will actually be cash in the beneficiaries pockets.

Although, I would prefer a bill making more comprehensive changes in the social security program, I can understand the reasons why the committee did not want to delay the benefit increase. Funds are available to provide an immediate 15-percent increase in social security benefits.

I want to commend the Committee on Ways and Means for its responsible action in bringing a 15-percent social security benefit increase to the floor. And, I appreciate the forthright way in which the committee states in its report that it is "necessary to consider without unnecessary delay" other changes in the social security and welfare programs. I would hope that the changes which the committee will take up next session will include a significant increase in the minimum benefit. When one considers today's prices and the studies of the Social Security Administration which show that social security benefits are the major source of income for most beneficiaries, I do not see how we can justify the minimum benefit of $55 a month provided under present law or even the minimum benefit of $64 a month which would be provided by H.R. 15095.

I, myself, have introduced legislation to increase social security benefits an average of 35 percent and provide a minimum benefit of $100 a month for an individual and $150 for a couple as well as to expand the scope of medicare coverage. This is the type of social security reform we need, and I am confident that the Ways and Means Committee will act favorably to bring it about.

Mr. FULTON of Tennessee. Mr. Speaker, passage of this bill to increase social security benefits by 15 percent is a legislative must for this session of the 91st Congress.

Fifteen percent—this sounds like a very generous figure. In normal times and under normal economic conditions it would be. But these are not normal times nor are we operating under normal economic conditions.

Actually, this 15-percent benefit will barely enable the average social security recipient to keep pace with the inflation which has eroded his benefit check since the last increase in March of 1968.

At that time the Consumer Price Index, according to the Department of Labor, stood at 119.50. As of October of this year, the latest figures available, it had climbed 10.30 to 129.80. This represents an actual percentage increase in the cost of living of about 8.6 percent over the last 20 months. At this rate we are assured of a cost-of-living increase of 1.5 to 2 percent before this increase is actually forwarded to the social security beneficiary. Thus, the actual increase in real income is 5 percent or less which will do little other than make up for purchasing power eroded by intervening inflation.

Unfortunately, a cost-of-living increase feature is not a part of this bill. I very much favor this approach as it has been found successful in other Government retirement systems. This can be taken up, however, when the Ways and Means Committee considers additional changes in the social security law early next year.

At this time I would like to commend all my colleagues on the Ways and Means Committee for their expeditious handling of this benefit increase.

To have waited until other problems dealing with the social security law, including welfare reform, had been disposed of before bringing this legislation to the floor would have been unfair and an injustice to the social security recipients who, month by discouraging month, see their benefit checks eroded by inflation.

Fifteen percent seems like a very generous increase. But, as we have seen, it is not. It is barely adequate and it is my hope that we must further increase benefits in the year to come.

Mr. SCHERLE. Mr. Speaker, no group of Americans is more entitled to adequate financial assistance than our senior citizens. For years working people have paid sound dollars into the Federal fund to provide for a dignified retirement. Now as they reach the time of rest and relaxation, they face the horrible realization that the "sound" dollar they paid into this program no longer exists and the social security payment they once relied upon has diminished in value. Inflation and extravagant Government spending have deflated the purchasing power of the dollar.

The law prevents social security recipients from earning incomes above a prescribed level without losing their annuity. Some are disabled and cannot seek

employment; others are unable to find work to supplement their meager incomes. These unfortunate people are victims of circumstance—captives of a situation beyond their control. These people I am determined to help now. Inflation caused by prolific Government spending will not be arrested overnight. An immediate solution is to increase the social security benefits, and this I will support.

Mr. ANDERSON of Illinois. Mr. Speaker, I rise in support of H.R. 15095, a bill to increase social security benefits for the eldery, the disabled, and for widows and orphans. This bill calls for a 15-percent across-the-board increase in benefits for the 25 million people covered by the Social Security Act. I support this increase because I think it is long overdue. Those covered under the act have been the most severely victimized by inflation; the value of their social security checks has been steadily decreasing as the cost of living has soared to new heights. As President Nixon said in his September 25 message to Congress:

> This nation must not break faith with those Americans who have a right to expect that Social Security payments will protect them and their families.

Mr. Speaker, while I support this legislation before us today, I do want to indicate that I consider it little more than a stopgap measure. This Congress must still face up to the need for a comprehensive overhaul of our social security system along the lines proposed by the President in his message to Congress. This should include a provision for an automatic adjustment in benefits that would reflect increases in the cost of living. I have introduced a bill to that effect, and I am pleased that this approach is also a part of the President's proposal.

The President has also called for an increase in the amounts beneficiaries can earn annually without a reduction in their benefits; a revision in the one-dollar-for-one-dollar reduction in benefits for income earned in excess of $2,880 to a reduction of $1 in benefits for every $2 earned; an increase in the contribution and benefit base from $7,800 to $9,000, beginning in 1972; and a series of additional reforms, in the President's words, "to insure more equitable treatment for widows, recipients above age 72, veterans, for persons disabled from childhood, and for the dependent parents of disabled and retired workers."

I strongly urge the passage of the bill before us today, and I also urge the continued efforts of the Congress to work for more comprehensive social security reform aimed at equitable and more realistic protection of our citizens.

Mr. MINISH. Mr. Speaker, I rise in support of H.R. 15095, the Social Security Amendments of 1969. The 15-percent across-the-board increase in benefits contained in this legislation is the best Christmas present our senior citizens could possibly receive.

Improvement and strengthening of the Social Security Act should be accorded top priority in the second session of the 91st Congress. In a recent statement to the Ways and Means Committee, I outlined some of the major issues which must be dealt with during consideration of social security next year. I include the statement at this point in the RECORD:

STATEMENT OF CONGRESSMAN JOSEPH G. MINISH TO COMMITTEE ON WAYS AND MEANS ON SOCIAL SECURITY

Mr. Chairman and members of the Committee, first, let me thank you for the opportunity to submit this statement on pending social security legislation. I am grateful that the Ways and Means Committee has seen fit to schedule consideration of this vital subject so soon after completion of its exhaustive work on tax reform and tax relief.

The Tax Reform Act, as passed by the House, provides relief which will be most beneficial to our poor and middle income families for whom the high cost of living, coupled with heavy taxes at all levels, has caused deep anxiety and resentment. However, there is one group whose financial plight will not be eased by lower taxes since their incomes fall far below the poverty level where in most cases they are not required to pay taxes. I refer, of course, to social security beneficiaries—the most poverty stricken group in our society. It is a sad fact that 40 percent of persons 65 years of age or older are classified as poor or near-poor.

On May 21, 1969, I introduced H.R. 11554 to provide a 15 percent across-the-board increase in social security benefits effective July 1, 1969. My bill would increase the minimum monthly benefit from $55 to $80 and raise maximum benefits from $218 to $250.70. Under this legislation, the level of benefits would be reviewed every three months and the benefit schedule adjusted upward when the cost of living increases 3 percent or more above the previous base period. This periodic cost-of-living mechanism is necessary to insure that social security benefits will not be eroded by rising prices as they have so often in the past. By this means we will combat the shameful situation which permits our senior citizens to fall deeper and deeper into poverty while the majority of Americans enjoy relative prosperity.

Naturally, I was disappointed when President Nixon recommended that social security benefits be increased by only 10 percent and that this meager increase be deferred until next April. The President, in his message to Congress, noted an increase was necessary in order to enable older Americans to keep pace with the inflationary spiral and the rising cost-of-living. Yet inflation, which strikes retirees and older persons hardest, has driven the cost-of-living up more than 13 percent since Congress last enacted a social security increase in February, 1968. Prices, no doubt, will rise even further by April of 1970. The Administration request, in short, is too little and too late.

Mr. Chairman, an increase in social security benefits of at least 15 percent retroactive to this past July is imperative this year if our senior citizens are to hold their own in a time of greatly increasing prices. If we do not act promptly on a significant social security increase, this country's retirees will find themselves in a terrible financial bind. Social Security is a misnomer—a cruel hoax—if it does not enable its beneficiaries to at least keep pace with the cost-of-living.

Among other improvements I believe should be made in the Social Security Act are the following: an increase in the earnings limitation, the equalization of treatment for wives working under the social securiy system, and increased benefits for blind citizens.

Mr. Chairman, persons reaching the age of 65 today can look forward, thanks to improved health care, to a longer life span and the ability to continue to contribute to their society. We ought, therefore, to encourage our senior citizens to employ their talents, knowledge, and experience in worthwhile and gainful endeavors. One means of achieving this goal is to increase substantially the annual earnings limitation for social security recipients.

Under present law, couples working under social security do not receive a fair return on their contributions to the fund. To remedy this situation I would call the Committee's attention to H.R. 9064, which I introduced on March 17, 1969. The purpose of this legislation is to treat a working husband and wife as a unit and to increase the "earnings base" used in the computation of their benefits. The result would be a more equitable level of benefits for both husband and wife.

Mr. Chairman, I also urge the Committee to approve a liberalization of the conditions governing eligibility of blind persons to receive disability insurance benefits under the Social Security Act. My bill, H.R. 10252, would provide a partial solution to the financial catastrophe which engulfs many persons as a result of blindness. It would permit a blind person, who has worked in social security work for six quarters, to qualify for disability insurance payments and to continue qualified so long as he remains blind regardless of his earnings.

Moving to Medicare, Mr. Chairman, I believe the Committee should include a section in its legislation which would extend medicare coverage to the cost of drugs purchased by the elderly. Constantly soaring drug prices constitute a major element in the severe economic problems of the elderly. Today drug items account for a significant proportion of the budgets of aged citizens. By 1975 drug costs are expected to rise by 65% for our population as a whole and the increase for senior citizens will be significantly greater—already, in fact, drug costs for the aged are twice as high as for the young and four out of five persons 65 or older have a disability or chronic condition requiring the purchase of drugs.

I believe our elderly citizens ought to enjoy the right to choose the type of health care they believe best suited to their needs. Therefore, I urge approval of my bill, H.R. 14343, which would extend medicare coverage to chiropractic.

Another area of importance to medicare beneficiaries is the issue of home maintenance care. On July 17 I introduced H.R. 12924 to authorize payment under the medicare program for services furnished by a home maintenance worker as part of a home health services plan. Presently only personal care, such as feeding, bathing, transfer in and out of a wheelchair, etc., is afforded to a medicare recipient in his home. We should recognize that many patients are able to care for their personal needs, but are not capable of performing household tasks, shopping, and cooking without assistance. By providing these services, we will allow convalescent or ill older citizens to remain in the familiar surroundings of their home in their own community. Moreover, this legislation would save both medicare recipients and the public the cost of more expensive types of institutional care.

Mr. Chairman, the improvements I have covered, together with other areas I am sure will be developed by the Committee, provide the basis for expanding the horizons of our nation's senior citizens. Each year a larger proportion of our population joins their ranks. Presently there are close to 20 million Americans over the age of 65. We should not consider the increasing number of senior citizens as a burden for our nation, but as an opportunity to enrich their lives and, through them, the lives of all of us.

Mr. KASTENMEIER. Mr. Speaker, while I am somewhat relieved that the Ways and Means Committee has acted on the financial crisis our elderly citi-

zens are facing by reporting a social security increase bill now, I feel a 15-percent raise is actually too little. Although I will vote for this bill, I am disappointed that the committee did not approve a larger increase. I frankly believe that the 25-percent across-the-board hike in benefits and doubling of the minimum payments—to $110 a month for individuals and $165 for couples—which I recommended in my bill, is essential to meet the needs of our elderly.

Many of our senior citizens simply do not have enough income to meet the most basic living expenses and yet they now are told they must wait three and a half more months before they actually receive a modest increase in benefits although the raise would be retroactive to January 1970. I am particularly concerned about those who receive a small amount of monthly benefits since this 15-percent across-the-board increase will mean only $9 to $11 more a month for them.

Consequently, I would like to express my support for the social security increase provision the Senate has approved since they would at least provide a substantial hike for those with lower payments—to a minimum of $100 a month for an individual and $150 for a couple—as well as authorizing persons to take a reduced level of retirement benefits at age 60.

It seems certain the House will approve this bill, in an effort to provide a benefit increase as soon as administratively possible. However, the passage of this bill will not bring to an end the effort to make needed improvements in our social security and medicare programs and I hope the committee will consider additional legislation, including certain other benefit increases, at an early date.

Mr. EDMONDSON. Mr. Speaker, I support H.R. 15095 and commend the Committee on Ways and Means for bringing it to the floor.

Social security payments cannot be allowed to lag far behind increases in the cost of living without real hardship for the elderly Americans who depend upon this income for life itself.

The 15-percent increase in payments provided by this bill is the minimum required to keep pace with cost-of-living increases, and must be approved. I cannot conceive of a veto of this measure, and feel confident the President will give it his approval.

Mr. Speaker, I urge and predict overwhelming approval of this bill.

Mr. ANDERSON of California. Mr. Speaker, I rise in support of H.R. 15095, the Social Security Amendments of 1969, but I do so with reservation. I commend the Committee on Ways and Means for rejecting the President's proposed 7-percent increase—later revised to a 10-percent increase—in benefits. Neither the 7-percent nor the 10-percent increase is enough as neither would keep up with the cost of living. I also realize that pressure from the administration, with the threat of a veto, has kept the committee from enacting a truly comprehensive measure designed to benefit those who really need the legislation—the elderly, the disabled, and their dependents, widows and orphans. I commend the committee for recognizing that this bill is only a stopgap measure and I, therefore, urge early consideration of a measure that would make major benefit increases and other improvements in social security.

Under H.R. 15095, the minimum benefit for a retired worker coming on the benefit rolls at or after age 65, and for a disabled worker, would be increased from $55 to $64 per month. This is not enough. Social Security Administration studies have shown that most retired beneficiaries have little or no income in addition to their social security benefits.

H.R. 15095 does not provide for automatic cost-of-living increases in benefits. The last time Congress considered a social security benefit increase—December 1967—the Consumer Price Index was 118.2. In October 1969, the Consumer Price Index was up to 129.8. The 15-percent increase in benefits now barely keeps pace with the cost of living.

For these reasons, I supported a 20-percent increase in benefits with an automatic cost of living increase in benefits whenever the Consumer Price Index rises more than 3 percent.

Many States have an old-age benefit plan which makes payments to complement the social security payments. In the past, as social security benefits increased, some State payments decreased, resulting in a benefactor receiving the same sum of money—only less comes out of the State treasury. Thus, social security increases in these cases did nothing for the aged, disabled, widowed, or orphaned. I believe that Congress intends for social security benefit increases to go to those eligible to receive payments. Thus, I believe we must provide legislation to make certain that an increase in social security is meaningful.

I support H.R. 15095 because I believe that action must be taken immediately to increase the inadequate retirement income of the elderly. But I urge the Committee on Ways and Means to promptly consider the suggestions I have outlined above.

Mr. SIKES. Mr. Speaker, I consider this one of the most important and necessary actions taken during the entire session. Congress should complete action without fail on the 15-percent increase in social security benefits prior to the Christmas recess. I can think of no finer Christmas present to those who have been subsisting on a bare minimum for so long. The increase is needed and it should be very helpful to those who are affected. Actually the action now in prospect is long overdue. The economic plight of retirees has been aggravated by steadily advancing costs of living. Their retirement dollars just will not go far enough, and there is actual hardship in some instances.

I applaud the proposal advanced by Congressman WILBUR MILLS and the House Ways and Means Committee to provide a 15-percent increase. Anything less would be totally inadequate to meet the advance of living costs since the last increase in benefits.

I hope that our work for those of inadequate income, particularly among the aged, will not stop with this action. A great deal of concern is expressed for people of inadequate income in America. In this, the aged and the disabled too often are neglected. It is seldom that Americans of 65 or over are even mentioned in this connection. Yet they are among those whose plight is the most serious. There are 20 million Americans who are over 65, and many of these are existing on inadequate incomes. Few of them are able to earn an adequate income. The others are dependent upon social security or welfare benefits. There are still others who are not yet 65 who are unable to earn a livelihood because of poor health or lack of training for today's competitive job market, and who are in dire straits.

It is obvious that insufficient attention has been given to the problem of inadequate income among the Nation's elderly. Discussions now in progress by congressional committees on aging are moving so slowly that realistic improvement cannot be anticipated at any early date. The grave problem of these people, many of them ill and most of them living on less than minimum income, is sufficiently acute that immediate action should be initiated by the administration and by the responsible committees of Congress.

There is now discussion which I trust will very soon be supported by positive action by the administration and by Congress, an increase in the amount a retired person can earn without losing benefits, and higher payments to recipients of old-age assistance. These along with the current increase in social security payments are sorely needed. Living costs have escalated beyond reason. Frequently overlooked but an area of tragic need is that of the old-age assistance group who are presently held to a bare subsistence level. People in this group should be receiving twice as much as they now get.

There is equal need for major reforms in the Nation's welfare system. New emphasis on training programs to enable people to find and hold jobs is a must. Present welfare programs place no incentive on earnings. In fact, efforts to be self-supporting are discouraged in the operation of the program. As a result, the welfare rolls get bigger and bigger, despite the growing prosperity of the Nation. Improvement in the welfare program which will result in great benefit to the Nation can be achieved with little cost to the taxpayer.

All these attest to a job before Congress which is still to be completed, I urge action. These are problems which will not wait indefinitely for solutions.

Mr. GAYDOS. Mr. Speaker, I would like to compliment the distinguished chairman of the Committee on Ways and Means and other members of this committee for recognizing the critical need for an immediate increase in social security benefits and bringing H.R. 15095 to the floor as expeditiously as possible. We must remember, however, that this bill must not be viewed as a panacea for all social security ills, but merely a stopgap measure until a complete reevaluation of the Social Security Act can be undertaken.

I, along with other Members of this body have been besieged with mail from

our senior citizens, all carrying the same message. Inflation has eroded their social security dollar to the point where it has become a daily battle of survival.

H.R. 15095 will raise the minimum benefit from $55 to $64 for single persons and raise the benefit from $82.50 to $96 for married couples. A $6 increase of special payments for single people over 72 years of age will raise their benefits from $40 to $46 with a $9 increase from $60 to $69 for married couples. Maximum benefits will eventually go from $218 to $250.70 for single persons and from $323 to $376 for married couples.

This is a start. The forgotten American is getting some recognition. We must continue to recognize his needs. If present trends continue, the insatiable appetite of inflation will have already begun gnawing away at the modest increase provided in this bill.

It is heartening to note that the distinguished chairman of the Committee on Ways and Means has addressed himself to the problem and has promised a "full dress review' of the Social Security Act. I give my unqualified support to the bill before us today and hope that the next session will produce a bill which will not only provide social security recipients with a decent standard of living, but also protect them from the merciless bite of inflation.

Mr. MATSUNAGA. Mr. Speaker, as a cosponsor of a similar bill, I rise in support of H.R. 15095, which would provide for a 15 percent across-the-board increase in social security benefits effective in January 1970.

I commend our Committee on Ways and Means, chaired by our distinguished colleague, the gentleman from Arkansas (Mr. MILLS), for recognizing the urgency of providing this increase and acting promptly to bring this legislation before this body.

Social security payments are the major source of income today for some 25 million Americans—the elderly, the disabled and their dependents, and widows and orphans. The number of recipients seems to be growing yearly as the average lifespan of man is lengthened and more of our workers join the ranks of the retired. Those who depend solely on their social security check to defray current living expenses have found the benefits to be totally inadequate to meet even the minimum needs of life. The Department of Labor has pegged a "moderate" living standard at $4,200 a year for a retired couple. An estimated 10 million retirees are reportedly kept above the poverty line by their social security benefits. However, it takes very little imagination to picture the plight of the millions of other elderly Americans who, even with their social security payments, are forced to live in want and despair after completing their working years. Surely, our senior citizens and other social security beneficiaries deserve better.

To meet this clearly demonstrated need, Congress must provide dramatic and significant increases in benefits under the old-age, survivors, and disability insurance program of the Social Security Act. Anything less could fall far short of our goal of elevating our elderly Americans to the desired level of self-respect and dignity.

Mr. Speaker, there should be no difficulty in voting for this bill, for to meet the demonstrated need the federal system is in a position to pay. We have been informed that there is an actuarial surplus of 1.16 percent of taxable payroll—an amount sufficient to pay the cost of the proposed 15-percent benefit increase.

This bill deserves our support, and I, accordingly, urge a unanimous vote in favor of the measure.

Mr. BROTZMAN. Mr. Speaker, I support the bill which is today being considered by the House to raise social security benefits by 15 percent. The senior citizens of America have worked hard all of their lives. They have saved and they have paid their social security taxes. They would probably have enough on which to live were it not for the cruel tax of inflation which has eroded the purchasing power of their savings and their social security checks.

While the across-the-board increase we are considering today is necessary to restore the inflationary losses already suffered by social security recipients, it is only a stopgap measure. I feel strongly that the time has come to provide for automatic cost-of-living increases in benefits. Enactment of such a provision would do away with the necessity of senior citizens having to come to Congress with an outstretched hand every time their Government pursues a policy of inflation.

Mr. Speaker, it is my sincere hope that when the remainder of the social security bill is reported during the next session, it will contain a provision for automatic cost-of-living increases.

Mr. SPRINGER. Mr. Speaker, the 25 million people who receive monthly social security benefits have been hit harder by inflation than anybody else. They have had to pay the rapidly rising living costs but they have not shared the higher incomes that inflation has brought to most segments of the economy. Now it is their fair turn to receive in the form of a 15-percent across-the-board increase in social security benefits effective January 1.

We call this an inflation bonus because we are able to pay increased benefits without any boost in the social security tax rate due to a large actuarial surplus that has built up in the social security trust fund. The surplus derives from the fact that higher wages and salaries mean a bigger intake in social security taxes by the Government even while the tax rate itself remains unchanged. It is simple justice that we distribute some of this surplus promptly among all the retired and disabled persons, their dependents and widows and orphans, who are eligible for social security benefits.

I congratulate our Committee on Ways and Means for recognizing the pressing and urgent need for increasing the income of people on social security. I share the committee's judgment that the 15-percent benefit increase should not be delayed by consideration of more complicated legislative proposals for the improvement of the social security system. The committee has promised to make these issues its first order of business when Congress reconvenes in January. Meantime, it has gone ahead to assure a much-needed income boost for all social security recipients without getting it involved in arguments about other changes which may be more controversial.

As it is, the increase we are approving today will not actually be paid until next April because of the time it will take the Social Security Administration to make the change effective. The first checks reflecting the new rates will be for March. They will go out in early April along with a separate check covering the retroactive increase for the months of January and February.

Mr. Speaker, this bill has my wholehearted support. These increases in social security benefits are long overdue. In the future we should see to it that social security beneficiaries should not have to wait so long to be compensated for their losses of income resulting from inflation. President Nixon has proposed tying future social security increases to rises in the cost of living on an annual basis. That is the best way to handle the problem and I hope Congress will give serious consideration to it in the next session.

Mr. McCLORY. Mr. Speaker, in my opinion the House is acting responsibly today in the passage of amendments to the social security law—increasing benefits across the board at the rate of 15 percent.

While this increase exceeds the amount requested by the President, it should be pointed out that the President had requested an additional cost-of-living provision so that benefits could be automatically adjusted to reflect the rising prices of food, lodging, and other essentials.

There is a tendency to play politics with the welfare of our older citizens—and to depart from the philosophy upon which social security was established—of a self-sustaining program—by asking to dole out benefits for which no corresponding revenue is provided.

By acting on the present needs of existing beneficiaries, the committee has recommended increases which do not require an immediate increase in rates or total of social security taxes.

It is heartening to know that other subjects related to those which we are acting upon today will be reviewed carefully by the Ways and Means Committee early next year, with the production of a supplemental bill scheduled by March 1.

Mr. Speaker, I am pleased to indicate my support of the bill, H.R. 15095, and in this way to communicate with the 25 million persons benefiting from social security that the Members of the Congress are conscious of their problems and their needs, and are endeavoring by this legislation to act responsively as well as responsibly consistent with our roles as lawmakers.

Mr. TUNNEY. Mr. Speaker, we can all take heart in the prompt, decisive action of Congress to increase social security benefits by 15 percent, and to raise minimum monthly payments, effective in January. I was unable to be present for the vote on this bill because of previously

scheduled meetings with local officials in my district. Had I been present, I would have joined in the unanimous expression of approval, and voted in favor of the bill.

These increases represent a significant first step enabling more than 25 million Americans to share more equitably in the prosperity which they helped to create. For those who must rely almost exclusively on social security benefits, however, the increases barely compensate for the accumulated burdens of inflation since the last increase in benefits. I have cosponsored legislation which would have resulted in greater improvement in benefit levels. I feel that we must move further ahead than we have today, before our laws do full justice to the aged and disabled.

Mr. PELLY. Mr. Speaker, the 25 million elderly people, disabled people and their dependents, and widows and orphans who now get monthly social security benefits need help badly. The effect of inflation is seriously striking at those living on a fixed income, and I support the Social Security Amendments of 1969 which would raise the benefits by 15 percent.

Not only is the increase necessary, it should be passed with no unnecessary delay. I only wish it could be seen in the checks sooner than next April, but I realize that with the effective date of January 1970, the time required to make the necessary changes in records and procedures that are needed to pay the new, higher amounts, keep it from appearing in benefit checks until April. In addition, I am told, a separate check covering the retroactive increase for the January and February payments would be paid in April if this legislation passes.

Mr. Speaker, I have long supported increasing benefits along with any increase in the cost of living, and I hope this someday will become law. But, in the meantime, I strongly support increasing the social security benefits 15 percent, and I urge my colleagues to vote for this very necessary increase.

Mr. BOLAND. Mr. Speaker, I want to express my support for H.R. 15095—the Social Security Amendments of 1969. I believe Congress must act now to increase social security benefits. Today, 25 million Americans—elderly people, disabled people, widows, and orphans—depend upon these benefits as their primary source of income. It is essential, quite obviously, that their payments must increase as the cost of living rises.

This legislation, providing an across-the-board increase in benefits of 15 percent, will demonstrate to the people of the United States that Congress is concerned about the welfare of those persons who, by reasons of advanced age or unfortunate circumstance, are no longer able to provide fully for themselves and their dependents. H.R. 15095 is legislation that, I feel, demands immediate action, so that the benefit increases can go into effect at the earliest possible date. According to the report of the Committee on Ways and Means, the first social security checks which could reflect the new rates would be for next March, payable in April, with a separate check retroactively covering the increased payment for January and February. This check will also be paid in April. Under this bill, the minimum benefit for a disabled worker, or a retired worker coming on the rolls at the age of 65 would increase from $55 to $64 per month. There would also be an increase in the special payments for those people, who, at age 72 and older, may not have worked long enough to qualify for regular benefits. These payments would be increased from $40 to $46 for an individual, from $60 to $69 for a couple. These increases would help relieve the immediate problems that people on social security face in coping with the rising cost of living.

The last social security increase was for February 1968. Since then, the cost of living has soared 9.1 percent. This increase alone demands that we pass this legislation, and the fact that the cost of living will be up, probably more than 10 percent, by the time the increased benefit checks can be mailed in April, should reemphasize the need for passage of this bill. This is a time of rapid inflation, and H.R. 15095 is a necessary measure if we are to help our older and disabled citizens to maintain the purchasing power of their social security benefits.

Mr. JOHNSON of California. Mr. Speaker, I rise in support of H.R. 15095, to amend the Social Security Act to provide a 15-percent, across-the-board increase under the old-age, survivors insurance program.

Any of us familiar with the increases in the cost of living fully recognizes the problems which people on a limited fixed income face in meeting our day-to-day living expenses. Those people forced to exist on fixed incomes, and especially limited fixed incomes such as social security, find their resources grow smaller and smaller from day to day.

During the 2 years since Congress authorized its last increase in social security benefits, consumer prices for all commodities and services have increased from 116.3 points, based on a 1957–59 mean, to 129.3 points. You can see that what we are proposing to extend to social security beneficiaries reflects little more than that required to break even, assuming that what we voted in 1967 was adequate.

The 15-percent increase in no way reflects any gain in the net income of our social security beneficiaries, nor does it make any provisions for the future when even the most optimistic predictions express the hope that inflation will increase the cost of living by no more than 5 percent a year.

Accordingly, Mr. Speaker, I am firmly convinced that the 15-percent increase is an absolute minimum which the Congress can consider at this time. As the Representative of the largest congressional district in the State of California, both geographically and in population, I urge my colleagues to support the bill reported from the Committee on Ways and Means.

Mr. Speaker, in supporting this minimal increase in our social security benefits, I would like to make one additional comment. As you know, social security benefits are modest at best and many people receiving them also are receiving other sources of income by which they augment their meager incomes. While most of these other sources of income are from private retirement plans, those with the most limited resources are receiving welfare assistance by reason of being blind, aged, or disabled.

It has been our sad experience in the past that whenever the social security benefits are increased, the net result for these, probably the most deserving of social security recipients, has been no increase at all. The reason for this is that the States have reduced the welfare assistance by an amount equal to the increase in social security benefits which the States contend is income.

If we are going to provide increased incomes in order to meet the rising cost of living for these people, we should do just that and insure that the benefits are given to those elderly blind and disabled welfare recipients who deserve it. This 15-percent increase we are voting here today should in no way be a windfall for the State welfare department and provisions must be made in the final analysis, that the increase we vote be passed on to the beneficiary.

Mr. Speaker, I rise to mention this specifically because the provisions to insure this are contained in the Senate bill and hope that in the final analysis, the Senate bill will prevail as far as this aspect is concerned. I am sure that if H.R. 15095 came to us in a manner in which it could be subject to an amendment, that this language would be incorporated into the bill by the House of Representatives.

With this comment, Mr. Speaker, I would like to conclude with a strong endorsement for H.R. 15095.

Mr. DINGELL. Mr. Speaker, the Committee on Ways and Means is to be commended for coming forward in an expeditious fashion with H.R. 15095, the proposed Social Security Amendments of 1969. The 15-percent across-the-board increase in social security benefits provided in this measure is sorely needed by recipients to meet substantially increased living costs.

The legislation properly makes adjustments in minimum and maximum benefit levels which reflect the 15-percent general increase.

I also am pleased that the legislation provides that the general increase in benefit payments shall become effective on January 1, 1970. Unfortunately, the time required for bookkeeping changes is such that the increases will not show up in beneficiaries' checks until April 1970. However, it is my understanding that the Social Security Administration will include a retroactive payment in the checks mailed on April 1, 1970, so that beneficiaries will in due course receive the additional payments.

The legislation recommended by the committee goes well beyond that administration's proposal for a 10-percent across-the-board increase both in terms of the size of the increase and its due date. I feel that the committee's recommendation is very much more equitable than is that of the administration. In fact, I believe that to be fully equitable the legislation should be more generous than that proposed by the committee.

However, in view of President Nixon's veto threat the committee's proposal is probably the best that can be hoped for at this time.

This being the case I want to voice my support of H.R. 15095.

However, I look upon H.R. 15095 as essentially a stopgap measure. The Committee on Ways and Means has promised to proceed with its full scale review of the social security program. I am confident that the committee will report out an omnibus reform measure early next year which I hope will include, among other things, provisions for cost-of-living benefit increases, substantial liberalization of disability provisions, improvements in the medicare program, and necessary financing revisions.

Mr. COHELAN. Mr. Speaker, I rise to support H.R. 15095, to provide a 15-percent across-the-board increase in social security benefits.

The need for this change cannot, in my mind, be overemphasized. According to the Census Bureau, there are today 19,530,000 persons, nearly 10 percent of our country's population, who are 65 years old or older. Of this group nearly 18 million receive social security benefits and, for the most part, these 18 million persons rely on their social security benefits to live.

A few older people work. Many, however, are forced to retire; many justifiably wish to retire, many cannot work because of poor health, and many are widows who lack training and work experience.

In earlier times the problems of old age, disability and unemployment did not constitute major potential problems. In those times a higher death rate at younger ages, the need for farm labor, and the family farm usually provided social care for the aged and disabled. Today, however, the social, cultural and economic forces have changed. We have a large, and growing group of older citizens. We are faced with an economy that is causing untold hardship on people with fixed incomes.

In our industrialized society, there is a premium placed on youth. What this means is that many of our older citizens are forced to retire at a designated age and they are unable to find jobs to supplement their retirement pensions. The increasing urbanization of our society has resulted in a shortage of space in young families to provide even room for older relations. In addition, the cost of maintenance of an older relative can be crushing and burdensome to younger families whose limited resources are already stretched.

It was the promotion of these conditions, exacerbated by the depression, that led to the adoption of the Social Security Act of 1935. The basic premises of the Social Security Act of 1935 have been accepted throughout this country. What has not been fully recognized is that once we accept the social security system, inter alia, we must make sure that it provides adequate coverage for people who rely on it. I know from firsthand experience the hardships faced by our retired citizens. When I am home in the district, I hold neighborhood meetings in which my constituents discuss problems that require legislation. It is heart-rending to see justifiably proud retired people asking for congressional relief from the low and inadequate social security benefits. I do not have to tell the Members of this body the difficulty people over 65 have trying to live on a minimum social security payment of $55 per month.

According to the Social Security Administration, the average payment to persons over 65 is a mere $98 a month. Is it any wonder then that in this period of galloping inflation, this pittance is insufficient to cover the bare necessities of life? I realize that many older citizens have additional sources of income, but there are literally millions who rely solely on their social security benefits.

Elderly persons on fixed income cannot continue to exist in their present circumstances. This bill will provide a 15-percent across-the-board increase in social security benefits, effective January 1, 1970. It also allows for the following additional benefits: First, increase in the minimum benefit from $55 to $64 for single persons and $82.50 to $96 for couples; second, increase the special payments for persons 72 and over from $40 to $46 for single persons and $60 to $69 for couples; and third, provide maximum benefit increases of $218 to $250 for single persons and from $323 to $476 for couple.

My colleague, the gentleman from Ohio (Mr. VANIK) has recently said on the floor of the House that Mr. Robert Myers, respected actuary for the social security system, concluded that a 15-percent across-the-board increase could be made in social security benefits without increasing the taxable base or the taxable rate.

In addition, Mr. William Hayward, district manager of the Social Security Administration in my home district of Oakland, has informed me that a 15-percent increase falls in line with actuarial estiates of the elderly's needs.

Mr. Hayward stated that a 15-percent increase would cover past increases in the cost of living and also bring the minimum benefits to a liveable standard.

Mr. Speaker, this is a matter of urgent importance. We can no longer afford to ignore and bypass those of our people who live on fixed incomes and who rely on social security as their main means of existence. For all practical purposes, it is these people who, in large measure, bear the cruel and unfair burden of inflation. This bill represents a marked improvement in our social security system—an improvement long overdue. I urge the support of my colleagues for this important bill.

In conclusion, Mr. Speaker, I hope that the committee will act quickly next session, as I am informed they will, to further modify the social security laws.

Mr. NELSEN. Mr. Speaker, I wish to place myself firmly on record in support of the proposal on which we will be voting today which increases social security benefits by 15 percent across the board. These increases would become effective this coming January.

Because of devastating rises in the cost of living over the last few years, many of the elderly simply cannot get by any longer without an upward adjustment in benefits. Inflation has been ruinous to the small, fixed incomes upon which they must rely.

Furthermore, because of an existing surplus in the old age and survivors fund, this increase in benefits will not necessitate any increase in withholding tax rates among employees and employers, who are also suffering from the sharp pinch of inflation.

It is to be hoped, therefore, that the House will speedily approve the recommendations of our Ways and Means Committee, so that final action can be completed before Congress adjourns.

Mr. FASCELL. Mr. Speaker, since monthly social security benefits were first paid in 1940, there have been increases from time to time to take into account rises in the cost of living as well as to improve the economic position of social security beneficiaries. The most recent increase was provided by the Social Security Amendments of 1967 and was effective with the benefits payable for February 1968.

Between February 1968 and October of this year, the Consumer Price Index rose approximately 9.1 percent from 119.0 to 129.8. Moreover, it can be expected to rise an additional 2 percent or so before the increased social security benefits are received next April.

The need for a social security benefit increase at this time is obvious. As the report of the Ways and Means Committee points out, recent revisions in the cost estimates for the social security program show that a 15 percent benefit increase is possible at this time with no increase in social security taxes. In addition, the evidence presented to the committee showed a positive need for an immediate across-the-board increase in benefits.

I wish to congratulate the chairman of the Ways and Means Committee for bringing this matter to the floor as quickly as he did and to urge swift passage of this proposal.

Mr. DONOHUE. Mr. Speaker, as a sponsor of similar legislation, I most earnestly urge and hope that this House will speedily approve this bill, H.R. 15095, to provide at least a 15-percent across-the-board increase in benefits under the old-age, survivors, and disability insurance program, an increase that is desperately needed by millions of older people in this country today.

It is an established but unfortunate fact that an insufficient income is still the major problem deeply distressing over one-third of the some 25 million Americans, now over 65 years of age.

Mr. Speaker, it is a further harsh reality that insufficient income will continue to be the major problem of most all of our senior citizens if we do not promptly approve social security benefit increases.

It is inconceivable to expect some 25 million Americans, all nearly totally dependent upon social security benefits, to exist on income that is at or very near the poverty level.

Today, one out of every eight Americans count on their monthly social security check for the mere essentials of a decent life and the stark economic fact

is that their present check is not large enough to provide these essentials.

Therefore, Mr. Speaker, the imperative need of these social security recipients, in the face of continuous inflationary advances, in the costs of every service, food staple and medicine necessary to minimal living in this affluent land is an immediate and substantial increase in their social security benefits and allowances.

Let us, then, in simple justice, enact and approve this proposed increase before us, without delay, while we look forward to further and essential improvements in our social security system in the near future, such as automatic cost-of-living increases, reduction of the retirement eligibility age, income ceiling elimination, liberalization of the definition of disability, and many other strengthening changes that I and others have proposed to bring this social security system into more realistic accord with the demands of our modern economy and to enable our older citizens to improve the quality of their lives in this country, for which and to which they have sacrificed and contributed so much, in the past.

Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of H.R. 15095 to provide urgently needed increases in social security benefits.

The some 25 million now receiving benefits under this program are the elderly, disabled and their dependents, and widows and orphans. This group is the least able to bear the cruel brunt of inflation. The impact of the spiral in living costs has undermined the value of every social security check—three-quarters of the recipients are older Americans to whom the check generally represents the greater part of total income. Millions of younger people receive benefits under the disability or survivor provisions. Again, I say, these groups can ill afford these losses.

Our older citizens have had some $3 billion in purchasing power taken away by inflation since 1965. Even with the 7-percent increase in 1965 and the 13 percent last February, the benefits are worth less than they were in 1958 and the 15-percent increase will compensate for the erosion that has taken place and allow them to live in some degree of dignity.

We must act now to protect the needy, the elderly, and less fortunate—those who have a very modest means of livelihood. We can defer consideration of time-consuming reforms needed in the overall program but we cannot defer any longer the worsening economic conditions of the millions who benefit by the program. We must remedy the real losses suffered by those who now receive social security benefits by increasing payments to meet today's prices.

Mr. Speaker, I urge and support immediate action to alleviate the hardships of those who must depend on these benefits to live.

Mr. MONAGAN. Mr. Speaker, I rise in support of H.R. 15095, a bill which provides an across-the-board increase of 15 percent in social security benefits.

The need for this legislation is clear and pressing. Many of our elderly and disabled citizens rely upon their social security payments as their sole source of income, and in these times of skyrocketing prices it is no wonder that people such as they who are on fixed incomes have a difficult time making ends meet. The cost of living has risen 9.7 percent since February 1968 when the last social security increase was voted. It is incumbent upon Congress to raise payments as much as we can within the limits of fiscal responsibility. On September 9, I joined with a number of my colleagues in calling upon the Ways and Means Committee to open hearings on social security legislation and I then maintained that an increase of at least 15 percent was in order. At that time I stated my belief that such an increase could be granted without a tax increase and I am pleased to know that the committee report on this bill bears out my belief. The rise in payrolls also provides a rise in payroll taxes.

I congratulate Chairman WILBUR D. MILLS and the Ways and Means Committee for recognizing the need for increased payments and for speedily reporting out this bill, and also for making the consideration of other social security reform proposals the first order of business when the Congress reconvenes next year.

Twenty-five million elderly or disabled people, widows, and orphans who now receive monthly social security payments will directly benefit from this measure, and I urge my colleagues to suspend the rules and pass the bill.

Mr. CRAMER. Mr. Speaker, I am delighted to have this opportunity to lend my wholehearted and unqualified support to the action of the House today in approving a 15-percent benefit increase for all recipients of social security payments. I have over the years strongly supported across-the-board increases in benefits to enable our senior citizens to at least partially cope with the ever spiraling cost of living. Earlier this year I specifically recommended a 15-percent increase, retroactive to January 1 of this year. While I am disappointed that the increase was not made retroactive, I am nevertheless gratified that the House has acted expeditiously to grant desperately needed relief to the millions of social security beneficiaries across the Nation. The House bill proposes that the 15-percent increase become effective with the benefits payable for January 1970 and I hope the Senate will agree to prompt approval of the House bill so that the legislation will be enacted before the first of the year. The President has pledged his support of the proposed increase if it is sent to him as a separate bill and, since the House has now passed such a bill, I would hope the Senate will cooperate in speeding the bill to the White House for signature.

As a longtime supporter of legislation for the benefit of our senior citizens living on limited social security payments, I can see no more urgent business before us than the immediate enactment of the proposed increase. As the representative of a district where a large number of senior citizens reside, I can personally attest to the undeniable need of our retirees for immediate economic relief to help them to afford the most basic necessities of life, and to thus live with dignity.

I have also in the past strongly recommended the enactment of legislation to provide for automatic increases in social security benefits as the cost of living increases. As living costs rise, those presently employed receive increased wages to help them meet this rise. Further, certain groups of retirees already enjoy automatic cost-of-living increases. I believe it is only equitable that social security recipients should be entitled to automatic increases as well and I want to again recommend, in future legislation, that a provision for such automatic increases be included, along with certain other proposals I have suggested, including increases in the amount of outside earnings permitted without loss of benefits, and the inclusion of prescription drugs under medicare coverage.

Again, I am pleased to join my colleagues today in supporting passage of the current 15-percent increase bill and I respectfully urge its immediate approval by the Senate.

Mr. CHAMBERLAIN. Mr. Speaker, I rise in support of H.R. 15095, providing for an across-the-board increase in social security benefits of 15 percent effective January 1, 1970.

This action is imperative in view of the inflation that has occurred since the last cost-of-living adjustment some 2 years ago. It is obvious that if we do not act now we are requiring 25 million Americans—the elderly, the disabled, the widows, and orphans—to take further benefit reductions in terms of real income.

The bill before us today does not include all of the reforms that are needed in our social security system. While I had hoped that the committee's study of these other areas would have been completed by now, it is apparent that more review and deliberation is necessary. At the earliest possible date I believe the Ways and Means Committee must, and I have every reason to believe that it will, resume consideration of these areas. I am encouraged by the assurances given by Chairman MILLS in this regard. I would particularly hope that favorable consideration would be given to the Administration's request for automatic cost-of-living benefit increases in order to eliminate the problem of these benefits lagging behind the rest of the economy. I also want to urge that changes be made in the retirement test to minimize as much as possible the present limitations which stifle the incentive to work. Too many of our people in their later years are having a difficult enough time as it is without being penalized for wanting to supplement their modest incomes. I further agree with the President's recommendation that the level of permissible outside earnings be tied automatically to the cost of living to insure continued fairness. The administration proposal that would permit a widow at age 65 to receive the full benefits of the amount her husband would have received at age 65, rather than the 82½ percent as under present law, should also be adopted.

These are just some of the areas that need action. By what we do today, we are making a good start but we must make these other concerns the first order of business next year and finish the job.

Mr. GRAY. Mr. Speaker, this day is long overdue for 25 million Americans

who draw social security. H.R. 15095, granting a 15 percent across-the-board increase in all forms of social security benefits, will mean much to the disabled, the elderly, widows, orphans, and retirees. In the 21st Congressional District of Illinois we now have approximately 69,000 persons drawing social security benefits with total annual payments of over $74 million. When this bill becomes, law it will mean an additional $11,800,000 per year to my people.

Mr. Speaker, I am concerned that some beneficiaries will not get the 15-percent increase effective January 1 because they are drawing public aid, veterans pensions, miners pensions, and other supplementary income, because the States or other agencies will merely reduce the other pensions or public aid by the 15-percent increase we are allowing here. I am happy that my distinguished friend, the gentleman from Arkansas (Mr. MILLS), has given us assurance that this matter will be considered by his committee on Ways and Means in January. These people are entitled to both pensions and I certainly want to see them get both. I want to commend the gentleman from Arkansas (Mr. MILLS) and his entire committee for reporting out the social security bill for passage. I am happy to be a cosponsor of this needed legislation.

Mr. MADDEN. Mr. Speaker, the passage of H.R. 15095, legislation providing for a 15-percent increase in social security for over 25 million social security recipients throughout the Nation will, indeed, be welcome news for millions of our citizens who are struggling to meet the unreasonable high cost of living burdens which exist today.

I wish to commend the Ways and Means Committee of the House for reporting favorably on this legislation and also for the committee's long and arduous work in this session to enact a general tax reform bill for the first time in almost 25 years.

When the members of the Ways and Means Committee come before our Rules Committee each year with tax legislation, I have been urging them to present the Congress with an effective tax reform bill for the last 8 or 10 years. In this session the Ways and Means Committee started in January and held over 4 months of hearings and reported out a tax reform bill which was passed by the House several months ago and was acted on by the Senate last week. The conference committee, composed of five members of the Senate Finance Committee and five members of the Ways and Means Committee, began deliberations today to iron out and compromise on the differences between the tax reform bill passed by the House and the bill passed by the Senate last week. If the conferees will only keep in mind the necessity to aid the millions of salary and wage earners, and elderly and retired folks over the Nation, to help in meeting the high cost of living, it will not only contribute considerably to restoring unemployment but relieve the threat of a possible depression over the Nation.

Older folks will remember that the greatest depression in the history of the country took place in the early 1930's and was caused by millions of unemployed, low wages, and lack of buying power. In those days, industry, manufacturers, banks, and real estate operators were making big profits but when the public buying power became low, factories and business slackened or closed—over 14 million were out of work and the financial pillars of our Government were shattered. Our system of Government was on the verge of collapse. Communist agitators were active in the major cities of our Nation creating more discontent and consternation among the unemployed and the millions who were on relief rolls. It took over 10 years during the middle 1930's to rebuild the foundation of our economic system and establish prosperity and buying power for our citizens.

I do hope the conference committee, when they return their verdict on the tax reform bill, will not disregard the fact that this social security increase legislation, the $200 increase in Federal tax exemption to millions of families, will be a major stroke in building a barrier against the threat of another depression. The theory expounded that increasing the buying power of millions will create inflation is a fallacy. High interest rates, high profits, and high prices created by profiteers is the basic foundation that creates inflation which was demonstrated in the 1920's and brought on the great depression of the early 1930's.

If the Congress could only resist the powerful lobbies that infest Washington and eliminate the fabulous, and in most cases, fraudulent loopholes so that the billions of dollars which are now enjoyed by tax-dodging industries and corporations, it would aid in relieving the tax burden on the salary and wage earners who constitute the buying power of the country and prosperity and full employment could be restored.

I do hope that the Ways and Means Committee in the next session of Congress will continue the good work that it has only started in this first session of the 91st Congress and equalize the tax burden and relieve the burden on wage and salary and low-income citizens who pay almost two-thirds of the Federal taxes of the Nation.

I congratulate the Ways and Means Committee and the Congress for making a good start on tax reform in this the first session of the 91st Congress.

Mr. PEPPER. Mr. Speaker, we are all deeply gratified that the able chairman of the Ways and Means Committee brings before the House this afternoon H.R. 15095 providing for a 15-percent across-the-board increase for all benficiaries of the social security program. While a 15-percent increase for all social security beneficiaries is very much better than the 10 percent the President recommended it little more than makes up for the cost-of-living increase which social security beneficiaries have had to bear. We all recognize that a 15-percent increase in social security benefits however desirable as an emergency measure is grossly inadequate to meet the needs of our citizens who are social security beneficiaries—many of whom wholly or largely are dependent for their livelihood upon their social security benefits. I have introduced and presented to the Ways and Means Committee H.R. 14745 which increases all social security benefits 25 percent for the present, provides a minimum of $100 a month and in many respects expands our social security program in a way I deemed to be very much needed. My able friend from New York (Mr. GILBERT) has pending before the Ways and Means Committee, H.R. 14430, providing for a 20-percent increase in social security benefits and in many other commendable ways expanding our present social security law. I would support Mr. GILBERT's bill as well as mine if it appears that that bill has the best chance of future passage. I will support the best bill we can get to meet the tragic need of the social security beneficiaries of this country, so many of whom either wholly or largely are dependent for their living upon what they derive under social security legislation.

But the pending bill providing for an increase of 15 percent in social security benefits across the board effective January 1 is a very excellent beginning by this House in the adoption of an enlarged and expanded social security program consistent with the needs of the people of this country. I am hoping that we shall be able very much to expand this program and increase the benefits of it during 1970 and I hope early in the year.

Mr. PHILBIN. Mr. Speaker, I am delighted that at long last this fine bill, increasing social security benefits across the board by 15 percent has come before the House for action. Of course, it will be unanimously passed in this body.

I compliment the able, distinguished chairman and the committee members for bringing it to the floor. While I was hoping that it would be here before, I am, nevertheless, very happy and grateful that it has come to be passed by our eager membership before Christmas. I know that the committee has worked laboriously and very ably to produce this bill.

Sometime ago, I introduced my own bill, H.R. 11603 also providing for a 15-percent increase in social security benefits across the board. I did this, even though I felt that the plight of social security recipients in these days of high inflation, exorbitant prices and living costs warranted a much higher increase than the one authorized by the bill.

There were those who hesitated to accept the 15-percent increase proposal because they said the President would not sign such a bill.

With this conclusion, I did not agree, because I believed the President, notwithstanding his reservations because of the high budget, would, nevertheless, sign the bill, and because he will be convinced, as we are, that it is just, right, proper and urgently needed.

I also found out some time ago from the actuaries handling the social security funds that a 15-percent raise would be possible this year, because present funds in the pool would justify that kind of withdrawal, and this is another very strong argument; namely, that the bill is not going to cost the Treasury anything from the national revenues.

While I am greatly delighted and en-

thused that Congress is passing this bill, I still remain very much concerned about skyrocketing costs, and the inadequacy of current, social programs.

I think one of the most critical questions pending in the country today is the rapid development of poverty conditions affecting social security and old age assistance recipients and victims of hunger and privation in this country.

It must be obvious to anyone who understands current benefit allowances that these fine people—veterans of industry, agriculture, the professions, and other callings in American life—who worked hard during their active, gainful years to sustain and educate their families and now in their declining years find themselves without the means to support themselves in common decency must be helped now.

I have been a longtime supporter of social security. Before I came to Congress in my early youth and later, when I worked at different times, during college vacations, under the great late Senator David I. Walsh of Massachusetts, on the Senate side, I played an active role in helping to shape up the original social security bill and related legislation.

I was never satisfied, however, with the benefits, nor with the particular overall plan, that was set up then as the basis of the original bill presented to the Congress.

I had other thoughts about the way the social security problems should be handled but they entailed a merger of various concepts relating to social security and survivor benefits, sickness, health, and unemployment compensation, which would provide adequate, annual income to cover the needs of our older people, adjusted to economic indexes and price levels, so that these benefits would fall and rise with the general prosperity and price levels in the country, and thus do justice to many ordinary people in their advanced years.

While labor, industry, and the Congress, to some considerable extent have sought to implement these principles, I am sorry to state that the Federal Government has not as yet done so fittingly, nor is it moving fast enough, by any means, to correct the shortcomings, inadequacies and maladjustments that exist in social security, medicare, and medicaid, hospitalization and other basic, urgently needed, social programs.

However, I will not elaborate on this subject at this time, because I merely want to get across this idea—that social security benefits and medical benefits programs, across the board, and other related programs to help the aged and retired people and the disabled, are not functioning properly, adequately or efficiently in our society at the present time. I blame no one for this, but urge corrective action to come to grips with these programs.

Let me insist that these benefits are woefully inadequate in this modern age of skyrocketing prices, hospital costs, and medical fees, drugs, medicines, rents, and about everything else we use in this economy necessary for comfort and decency in sustaining tolerable conditions in the home, and providing proper care and treatment in event of disability and sickness.

It is obvious that current funds and administrative mechanisms cannot do this job, as they are presently constituted.

Congress should and must, as I have urged many times, move in these areas without further delay, not just with a design to do patchwork, but with a major purpose and plan to reorganize, revamp, reshape, reconstitute and, if necessary, consolidate, all the agencies that are involved, above all, to find a way to meet the mandatory demands and needs of the aged, the disabled, elderly people, and retirees in this country, who cannot possibly get along as they are at present, but must have much larger incomes to keep body and soul together, to pay for necessary food, clothing, medical care, and other needs, to make these people as comfortable, and happy as possible in their advanced years.

This cannot be a casual, short-time, stopgap program. It must be a concentrated, broad, long-time, accelerated drive featuring recodification, restructure, and new alinements of the contributions, grants, entitlements, services, and fund benefits to make this great, social legislation what it should be, to do the big job that has to be done, to rescue our older people from dire poverty, and speedily give them a place of comfort, decency, and adequate care and services of many kinds that they need to live as decent human beings. Speed, scope, simplification, efficiency, system, and sense must prevail in such a massive, corrective, and renovative effort.

I hope that the leadership of the Congress will give this matter top priority as a great national program, which cannot be subordinated, downgraded or deferred, but must be restructured on a crash basis to meet current contingencies and urgent social needs of countless fellow citizens and residents of our country now and in the future.

Mr. Speaker, I intend to continue my labors to press for early consideration and action on such a program. Few things have higher priority in our contemporary society than prompt justice for social security recipients and other people in advanced years.

I urge our appropriate committees to plan and carry out a crash basis program in this field.

Congress must act now.

Mr. O'NEILL of Massachusetts. Mr. Speaker, I am happy to vote for an increase in social security benefits. I do not consider this an ideal reform of the social security law nor a sufficient increase in benefits. But I know that more comprehensive and substantial changes in the social security law will be forthcoming in the second session of this Congress, and I certainly hope it will be in the early part of the second session.

At the beginning of the 91st Congress, I supported as a minimum 15-percent across-the-board increase in social security benefits with automatic cost-of-living increases. I still believe that this is the absolute minimum increase that must be enacted. I have supported and will continue to fight for legislation that will contain these improvements in the social security system:

First, two 20-percent across-the-board benefit increases—the first on January 1, 1970, and the second on January 1, 1972, and a two-step boost in the minimum benefit bringing it to $120 a month by the beginning of 1972.

Second, base a worker's social security benefit on his highest 10 years' earnings out of any 15 consecutive years after 1950.

Third, at age 65, provide a widow's benefit amounting to 100 percent of the deceased spouse's benefit—the present law limits it to 81½ percent at age 65.

Fourth, for beneficiaries who continue working, increase the income a person can earn and still get full social security benefits.

Fifth, raise the lump sum death benefit to $500.

Sixth, reduce the disability benefit waiting period from 6 months to 3 months and liberalize the definition of disability.

Seventh, eliminate the age-50 limitation for disabled widows and increase the benefit for them to that of regular widows' benefits.

Eighth, do away with the requirement that men who retire at age 62 must comput their average earnings by including years up to age 65, thus lowering their retirement benefits excessively.

It is difficult for me to imagine that anyone could be opposed to these necessary and minimum increases in social security benefits. It is impossible, absolutely impossible, for any senior citizen to live a healthy life in a decent environment on present social security benefit levels. I would not ask anyone to try to live on anything near $100 a month. With that type of income, one can have no recreation, only a half decent diet, poor housing facilities and no new clothing, even infrequently.

Adequate social security benefits are the right of those people who have contributed to the social security system or have worked during their earlier years. Every man who has worked in the United States has contributed to the growth and productivity of this Nation. He deserves to share in the wealth of that nation and to partake in the bountiful goods he has helped make available. It is our duty in the Congress to provide those retired persons with sufficient funds to have a decent and happy retirement. They must not be plagued with thoughts of where the next meal will come from, they must not be forced to deny themselves a movie because it would mean less food on the table.

There are those few who say that this increase or any further increases will be inflationary. Perhaps this added increase, which will surely go for staples and very minor pleasure, will be inflationary. I am not so sure it will be. But even if it is, I am somewhat bemused by those stalwart opponents of inflation that are quite willing to fight the artificial expansion of our economy with unemployment, decreases in homebuilding, and the inadequate income of our senior citizens. I do not know why recipients of social security, the working man, and postal workers

always have to bear the brunt of anti-inflation measures, particularly the senior citizens. Those people on fixed incomes suffer the most from inflation. They get the same number of dollars, but each dollar is worth less. Why must they be asked to hold the line to resist the inflation caused by others? Why must those who suffer the most be asked to suffer some more to benefit the whole? I would rather see cuts in nonessential defense spending and our space program than to deny an increase in social security or funds for medical research, or providing food for the hungry. For the elderly and the poor can least afford inflation and most critically need added income during inflationary periods.

The senior citizens of this Nation helped to build it. Most of them contributed to social security in the belief that it would provide for them in their old age. We must keep that promise and massive increments in social security benefits are necessary to do so. This increase is the right, not a privilege, but the right of every senior citizen, and if there is anyone here who thinks this 15 percent increase is sufficient, I would like him to read the following acticle from the Boston Record American of Tuesday, December 9. At the present time in the United States there are 2.1 million people receiving the minimum social security payment of $55 a month and 53,000 disability workers who receive the minimum allotment. In many States, including the Commonwealth of Massachusetts, these people will not benefit from the social security increase we passed today. Every additional dollar they get from social security is counted as increased income against old age assistance. After the social security amendments of 1967, I, along with many of my colleagues, sponsored legislation that would not allow increases in social security to be counted against old age assistance. I have spoken with the chairman of the Ways and Means Committee about a need for a change in the law so that legislation passed by the Congress to increase the income of our neediest citizens will not be thwarted and these people will get the gains and benefits they so rightly deserve.

I submit the following article:

FIFTEEN PERCENT INCREASE WON'T BE HELP TO SS NEEDIEST

Nearly 52,000 of the neediest Social Security pensioners in Massachusetts and 1.81 million in the nation won't receive a penny more when and if Congress approves the 15 percent increase in SS payments.

Involved in that group are the people whose income is so low that it is supplemented by Old Age Assistance.

Under present laws, persons receiving state welfare payments—called Old Age Assistance in Massachusetts—are allowed a fixed amount of income.

That total includes any income from Social Security.

If the SS allotment is increased the increase must be deducted from the state welfare figure set for the recipient.

Presently, the average monthly payment for Old Age Assistance recipients in Massachusetts is $155.26.

It is expected the cost of living increase will push that figure to $156.70.

And there are expected to be nearly 55,000 OAA recipients in the state next year.

If the 15 percent Social Security increase comes through as expected, they will actually get the Social Security increase but that amount will be deducted from their OAA payments, so that, in effect, they will not receive any more money.

The state Dept. of Public Welfare has a budget of $101,700,000 for the fiscal year, 1970, and a 15 percent Social Security increase will actually benefit the department as it will be able to slice its OAA payments.

The House Ways and Means Committee was aware that the needy would not benefit by the 15 percent increase when the legislation was drafted.

However, it was felt it could not get involved in the intricacies of welfare legislation and still produce a Social Security increase bill in time for enactment this year.

It is expected the problem will be considered early next year when the committee undertakes extensive overhaul of both the Social Security system and the welfare program.

In Massachusetts, Sen. Sam Harmon (D-Mattapan) has already filed a bill for consideration next year to make any Social Security increases non-deductible from monthly checks of Old Age Assistance recipients.

One way to ease the situation would be for the states to re-estimate minimum living budgets, thus giving all welfare recipients an increase.

There are more than 25 million Social Security beneficiaries in the nation. Included are 12.4 million retired workers, including 2.1 million receiving the minimum payment of $55 monthly, and 1.3 million disabled workers, among whom 53,000 receive the minimum.

Mr. FLOWERS. Mr. Speaker, I wholeheartedly join in support of H.R. 15095 to provide an across-the-board increase in social security benefits of 15 percent for the 25 million elderly people, disabled people, and their dependents, and widows and orphans who now get monthly social security benefits. Were it not for the terrible effect of inflation on our citizens with fixed income, one might be led to believe that 15 percent as provided by the bill was a very sizable increase in benefits. However, Mr. Speaker, inflation has taken care long ago of this increase, and the bill that is before us now is absolutely necessary and even long past due to take care of the mounting needs of our citizens now on social security and those soon to be included.

Therefore, Mr. Speaker, I rise in support of the social security amendments of 1969 as included in H.R. 15095 and urge the adoption of the committee bill.

Mr. OBEY. Mr. Speaker, to start at the beginning, I should like to state the plight of older Americans in a simple, nonstatistical way, using the words of one of my constituents. With straightforward declarative eloquence, this farmer explained:

My machinery is getting old like I am.

Then, after discussing the hardships ahead, this 62-year-old man—a farmer for 40 years—wrote:

I hope you see fit to pass some kind of bill to retire gracefully and still keep our farm.

His statements are worth repeating because of the axion that no one ever really believes he will grow old. When an older American speaks for his generation so poignantly, even the youngest Member of this House can appreciate what it is like to realize that the past is outdistancing the future.

Mr. Speaker, I support this legislation to increase social security benefits by 15 percent, effective January 1. It will mean a timely boost for the 25 million people—the elderly, the disabled, the widows and orphans—who now receive monthly social security payments.

As the Ways and Means Committee acknowledges in its report on this bill, there was—and is—"a pressing and urgent need for an increase in social security payments." Just as significantly, the committee has promised to make social security programs its first order of business when the Congress reconvenes next month. I commend the committee for delivering this 15-percent benefit increase, but I hope we can go further before dropping social security considerations.

Areas where additional action is needed include:

First. A greater increase in the minimum payment than is contained in the bill. A flat 15-percent increase is not as fair as it should be to those who receive the minimum social security benefit.

Second. Provision for automatic cost-of-living adjustments in social security payments.

Third. Provisions assuring pensioners that increases in social security will not result in a disproportionate decrease in veterans or other types of pension benefits.

In the 90th Congress, for example, when social security benefits were increased, over 173,000 persons consequently lost veteran's pension benefits. This produced a significant hardship on many of our older persons.

The Ways and Means Committee's bill would increase social security payouts by $1.7 billion through the middle of 1970, for the worthy purpose of helping Americans face old age or disability with dignity.

When the Congress can provide money for supersonic transports and extra moon shots, we ought to be able to provide that dignified retirement for elderly Americans.

Mr. Speaker, as you know, the Senate's social security reform includes raising the minimum benefit from $55 to $100 per month. I would hope the House conferees on the tax reform bill would give strong consideration to accepting this Senate provision so that we can pass much more adequate social security legislation.

Mr. RANDALL. Mr. Speaker, the passage of H.R. 15095 is the vehicle by which 25,000,000 recipients of social security benefits can start the new year with some reassurance that they have not been forgotten by the Congress of the United States. It is a privilege to support H.R. 15095 and, yet it is with a sense of some guilt that this increase has not been acted upon much earlier and that we delayed our action until so late in the year.

On May 15, 1969, H.R. 11348 was introduced by a member of the Ways and Means Committee, the gentleman from Ohio (Mr. VANIK) for himself and on behalf of 24 others including myself. Then 5 days later, I introduced by own

bill, H.R. 11495, which was substantially similar to H.R. 11348. Both bills called for a 15-percent increase long before committee consideration. This was at a time when the administration was suggesting a 7 percent social security increase. Much later the present administration came up to 10-percent increase in social security payments but not to be effective until April 1, 1970.

Relying on my conversations with several friends on the House Committee on Ways and Means, I was assured the 15-percent increase would be actuarily sound and now today in the well of the House Chairman MILLS proved that point by saying there was an actuarial surplus of 1.16 percent of taxable payroll which would be an amount sufficient to meet the cost of a 15-percent benefit increase.

It is discouraging to hear minority Members on the other side of the aisle say the passage of this increase will be a symptomatic relief of one of the facts of inflation and proceed to be concerned that this increase will contribute toward inflation. We all want to fight inflation but do we want to fight it at the peril of driving our senior citizens into poverty?

Last week the House passed the so-called poverty bill. Some few of its provisions may be meritorious. Many others are not. But if we go ahead today and approve this 15-percent across-the-board increase in social security payments, and the other body acts promptly we will be taking a step in the right direction to fight poverty. This bill will go further to combat poverty than all the programs of the Office of Economic Opportunity put together because there is a built-in method, ready made by these increases going into the hands of people who desperately need these funds and who will spend these increases quickly to satisfy their needs and thus prevent our senior citizens from being driven below the poverty line.

This is an important piece of legislation. It is estimated that it will affect one out of every eight persons in the country. Ordinarily I would voice strong protest against consideration of such an important measure under the suspension of the rules, but in this instance there may be sufficient justification to warrant a parliamentary situation which allows no amendment and provides only a limited amount of time to each side of the aisle.

The bill provides for a 15-percent across-the-board increase effective January 1, 1970, but of course it will take some time to make the necessary changes in the social security records and procedures, and the experts tell us that the first check which could reflect the new rates will be for March, payable in April. But then there should be a separate check covering the retroactive increase for January and February also to be payable in April.

Now, Mr. Speaker, late last winter after the House was so overly generous to grant itself a raise of unprecedented proportions, I commented on the floor that because of this ill-advised and unwarranted congressional pay increase we had all literally thrown our guns out the window, and lost all of our weapons to fight inflation. We could no longer say we had set a good example. How could we accept a 40-percent increase and then shake our heads when the classified Federal employees and our faithful postal workers asked for a reasonable increase in pay? Worst of all, how could we delay as long as we have the consideration for our senior citizens dependent upon social security who are hurt the worst by the cruelty of inflation?

In recognition of this situation which the Members of Congress let themselves in for, on last May 15, 1969, under the 1-minute rule I took the floor of the House upon the occasion of the introduction of my own bill—companion to several others—calling for a 15 percent increase in social security payments. At that time my verbatim comments were as follows:

I admonish and warn the Members of the House that if we adjourn this Session and go home with large salary increases for ourselves without approving an increase in Social Security benefits we deserve the wrath that will come down on our heads.

With only a few days left before the Christmas recess we have allowed ourselves to be placed in the unseemly situation of enacting cliff-hanger legislation. Notwithstanding that we are in these waning days of the first session of the 91st Congress, we at least and at last have a chance to say to those forgotten recipients of social security who have been hurt most due to fixed and limited income that we are determined not to adjourn this first session without in some degree redeeming ourselves. We will have to admit we are late. We have been slow. But today we have the opportunity to demonstrate affirmative action by a positive move to quickly improve the income for our senior citizens dependent upon social security. Let us call the roll.

Mr. RYAN. Mr. Speaker, the plight of approximately 25 million people—older people, disabled people and their dependents, widows and orphans—evidences the urgent need for an immediate increase in social security benefits.

The bill before us today, H.R. 15095, provides for an across-the-board increase of 15 percent, effective January 1, 1970.

Lest any of my colleagues be deluded by thinking that this increase will be a cure-all for the dire situation which exists among those attempting to live on social security benefits amidst the spiraling cost of living, I would like to call attention to the fact that the last time benefits were increased was February of 1968. President Johnson had signed into law the social security amendments of 1967, which called for an increase of 13 percent.

However, that bill—as the one before us today—was long overdue. While it did provide for an increase of 13 percent, it fell short of bringing the benefits in line with the rising cost of living.

When that bill was signed into law, it was based on calculations for early 1967.

In January of 1968, the Consumer Price Index was at 119.0. The CPI reading for the month of October 1969 was 129.8—an increase of 9.1 percent alone.

Similarly, when this bill is finally signed into law, it will reflect the needs of a year earlier and the 25 million social security beneficiaries will still be without adequate income. Remember, that this increase is not an increase of 15 percent on incomes of $10,000, $15,000, or $20,000 a year. Rather, it is an increase of 15 percent on a $55 a month minimum benefit—or $660 a year. It is an increase of $8.25 a month, or $99 a year.

While I support H.R. 15095, I recognize that it is only a stopgap measure. The House Ways and Means Committee has pledged in its report that its first order of business for the coming session of Congress will be to continue its work on comprehensive social security and welfare legislation.

H.R. 15095, falls far short of the recommendations which I made in introducing legislation to increase benefits—H.R. 14521—and in my testimony before the committee on November 13. However, as I said to the committee, a 15-percent increase is the minimum which Congress should provide this year.

The daily conditions under which the aged, the poor, and the infirm live are growing constantly more acute.

Too many social security beneficiaries, who worked hard and contributed part of their earnings for their old age, now find that they must choose between living on social security benefits in near poverty level conditions, or going on the welfare rolls.

As a matter of human dignity, we cannot continue to expend $70 billion per year on the military, subsidize a commercial supersonic airplane, and lavish unnecessary fighter planes on other nations, while the aged lack basic necessities of life, including an adequate diet and proper health care.

H.R. 15095 is only another block on the crazy quilt mosaic known as the Social Security Act. Instead of odd-shaped-varied-colored patches on that quilt, there must be comprehensive reform of social security legislation so that the needs of our citizens are fully met.

Mr. Speaker, I include at this point in the RECORD my testimony of November 13 before the House Ways and Means Committee at which time I outlined a number of needed revisions in social security legislation:

STATEMENT OF CONGRESSMAN WILLIAM F. RYAN BEFORE THE HOUSE WAYS AND MEANS COMMITTEE IN SUPPORT OF SOCIAL SECURITY AMENDMENTS, NOVEMBER 13, 1969

There must be a multiple strategy for providing a living income, and realistic social security benefits for retired and disabled workers, widows, and dependent wives, husbands, children and parents are essential.

We have an obligation to insure adequate benefits for the 25 million social security beneficiaries, and an increase of 7 percent, 10 percent, or even 15 percent—the least Congress should do this year—will not be sufficient.

Some beneficiaries are able to augment to some degree their benefits by earning supplemental incomes. However, for the vast majority the only means of income is a monthly social security check. Sometimes we lose sight of one very important fact, and that is that at one time they were gainfully employed and set aside a little of their earnings each month to provide for their old age, and the care of their loved ones, under social security.

All the information I have received points out the fact that a benefit increase of 10 percent, effective in March of 1970, as proposed by the Administration will not be adequate to meet the needs of Social Security beneficiaries. Since the last increase in social security benefits in February of 1968, the cost-of-living has risen by 9.1 percent. If the present trend continues, and there is little or no indication that it will not, then the rise in the cost-of-living from February of 1967 to March of 1970 will be more than 10 percent.

H.R. 11349 AND H.R. 14521

I have cosponsored two bills which would increase benefits. The first is H.R. 11349 (the Vanik Bill), which calls for a 15 percent across-the-board increase, with a minimum retirement benefit of $80 payable to those who qualify for benefits at age 65 or older, and also provides for cost-of-living increases. To me, this is the minimum increase this Committee should report out this year. Anything less would be totally inadequate.

The second bill I have cosponsored is H.R. 14521 (the Gilbert Bill). This bill is a comprehensive proposal which provides for a realistic program geared to meet today's needs.

There are many outstanding features contained in H.R. 14521, the most significant of which are: its staged 20 percent across-the-board increases in the monthly benefits—20 percent in 1970 and 20 percent in January of 1972; cost-of-living increases; raising the monthly minimum benefit to $90 in January, 1970 and to $120 in January, 1972; increasing the lump sum death payment to $500 by January of 1970—which doubles the existing ceiling which has been in effect since 1952; and the coverage of legend drugs and some non-legend drugs—such as insulin—under the medicare program.

It also calls for the coverage of disabled workers under the medicare program. But the most notable provision is that which gradually increases the Government contribution to approximately one-third the total cost of the program.

This is a bold program which deserves support.

H.R. 610

Under present law a social security beneficiary who is under age 72, is permitted to earn as much as $1680 a year and still receive all of his benefits. When a beneficiary earns more than the stipulated $1680 a year, his benefits are reduced $1 for every $2 he earns, up to $2880 per year. Over $2880, his benefits are reduced $1 for every $1 he earns. And, no benefits are withheld for any month which he earns less than $140, regardless of his total earnings in the year.

I have introduced H.R. 610, which would amend the Social Security Act so that a beneficiary would be permitted to earn as much as $3600 a year and still receive all of his benefits. If he earns more than $3600 a year, his benefits would then be reduced $1 for every $2 earned, up to $4800 a year. Over $4800, his benefits would be then reduced $1 for every $1 earned. Benefits would not be withheld in any month in which the beneficiary earns less than $300, regardless of his total year's earnings.

Under our present economic condition, the existing retirement test is far too severe. It prevents a beneficiary from supplementing his benefits in a substantial manner. For the average retired worker, who now gets a monthly benefit of $100, and which Congress may raise to about $115 a month, this amendment would mean that he could have an annual income of $6180 a year before suffering any reduction in his social security benefits. In light of present wage scales it would seem reasonable to permit beneficiaries to work, and earn, as much as $3600 a year.

H.R. 616

I would further amend the retirement test by permitting a beneficiary to deduct his out-of-pocket medical expenses from his earned income prior to the determination of his yearly earnings. I have introduced H.R. 616, which contains this provision. These expenses would be allowed only if not compensated by insurance.

Although, medicare takes care of a great part of the medical expenses of people age 65 and over, it does not provide anything for beneficiaries who are under 65, widowed mothers and children, for example. Also many people 65 and over have medical expenses which are not reimbursable under medicare. In many cases, social security recipients must go to work in order to help pay regular or extra-ordinary medical expenses. When they do go to work their social security benefits are reduced by an amount that is determined on the basis of their gross earnings. This reduction in income may make the effort of working self-defeating. In order to alleviate this situation, it would be appropriate to provide that in applying the retirement test, earned income would be reduced by the amount of a beneficiaries' out-of-pocket medical expenses.

H.R. 612

I am encouraged to find that the Administration's bill, H.R. 14080, contains a similar provision as that which is provided in my bill, H.R. 612. This bill would provide benefits for dependent parents of retired or disabled workers.

Under the present law, benefits are provided for dependent parents of a deceased worker, but it does not provide benefits for a dependent parent if the worker is retired or disabled.

A parent who is dependent on a worker who retires, or who has become disabled, is just as dependent on the worker as his wife or children. The parent, as well as the wife and children, loses a source of support when the worker retires, or becomes disabled. My bill provides that the parent would have to be age 62, and to have received one-half of his support from the worker at the time the worker is retired, or becomes disabled, to qualify for such benefits.

H.R. 613

I have also introduced H.R. 613, which would provide benefits for additional dependents. The present law provides monthly benefits for a worker's dependent children, his wife, his widow, and for his dependent parent (if the worker is deceased).

One of the purposes of the social security program is to provide the dependents of a worker with a continuing income when the worker's income stops. It would therefore be in keeping with this purpose to provide benefits to every person who is dependent on a worker for his support. However, practical considerations preclude this, and the law presently provides a limit on the total amount that may be paid to any one worker's account.

On the other hand, it does not seem reasonable to deny benefits to other people who may also be dependent on a worker, particularly in cases where paying benefits to these people would not reduce the payments to the worker's wife and children, or when the worker has no wife or child.

Recognizing that a worker's wife and children have first claims to the fruits of his labor, H.R. 613 would provide that benefits would be paid to a wife or widow, to a child and to a parent, including those of retired and disabled workers, before benefits would be payable to any other dependent. Benefits to other dependents would be paid in the following priority: first to a grandchild, second to a brother or sister, and third to a niece or nephew. In order to qualify for these benefits the dependent would have to be under age 18 or over age 62, and to have been receiving one-half of his support from the worker at the time the worker retired, became disabled, or died.

H.R. 11104

Under the present law a blind person can qualify for disability benefits if he is unable to do any substantial work, or, if he is age 55 or over, and unable to do his regular kind of work. In order to qualify for these benefits, he must have worked in 5 out of the last 10 years, and he can not be presently employed.

I have introduced H.R. 11104, which would provide for the payment of monthly disability benefits to any blind person who, regardless of his age had worked in employment covered by the social security program in any 6 calendar quarters. Once a person became entitled to benefits, he would receive these benefits regardless of how much he worked or how much he earned.

The case for a change such as this proposal suggests, was presented to this Committee by Mr. John F. Nagle, of the National Federation of the Blind on October 27. In his statement, he said,

"Blindness is not a worse disability than any other, but it is different. . . .

"A man may lose both legs, secure artificial limbs and after learning their use, function as he functioned before. The blind person, however, never reaches the point where he is freed from a dependence upon sight. . . .

"The fact is, that whatever level of earnings a blind man may achieve, whatever position he may attain, he functions at an economic disadvantage for he must function without sight in competition with sighted men, he must compete without sight in an economy based on sight."

H.R. 615

At the present time social security laws exempt from coverage Federal civilian employees of the United States. My bill, H.R. 615, would extend such coverage to all employees of the United States on the same terms and conditions which apply to other covered employees.

Federal employees are the only major group not eligible for coverage. Members of the Armed Forces have been covered since January of 1957.

Although Federal civilian workers have a staff retirement program, the present situation is unsatisfactory in a number of ways. Many people work for the Federal government for too short a period of time to qualify for benefits under the staff retirement program. Moreover, if these people eventually get protection under the social security program, they receive no credit at all under the social security program for the time they worked for the Federal government. Therefore, it seems reasonable to extend the social security coverage to Federal employees thereby giving them the opportunity to receive sufficient quarters by their Federal employment to qualify for social security benefits when they retire.

The social security program is the universal income maintenance program in this country and it does not seem equitable to exclude Federal employees—some of whom even administer the program—from its protection.

H.R. 611

H.R. 611, would eliminate the provision in the Social Security Amendments of 1965 which was intended to deny hospital insurance benefits to uninsured individuals who are members of certain organizations or have been convicted of certain offenses, and also eliminates the provision which denies supplementary medical insurance benefits to persons who have been convicted of certain offenses.

Since I first introduced legislation to repeal these provisions, a Federal court has found

them to be contrary to the Constitution and they are not being enforced by the Department of Health, Education, and Welfare. Now these unconstitutional restrictions should be stricken from the statute.

H.R. 614

H.R. 614, would amend the public assistance provisions of the Social Security Act to prohibit the imposition of any durational residence requirement as a condition of eligibility for public assistance. The Supreme Court having declared durational residency laws to be unconstitutional, the Social Security laws should reflect the findings of the Court.

H.R. 620

I believe the limitations on the payment of benefits to aliens which were added by the Social Security Amendments of 1967 are unfair; and I have introduced H.R. 620 to remove them.

H.R. 644

Although it does not pertain directly to the social security program, I should like to again call the attention of the Committee to the plight of handicapped and disabled workers who are unable to use, without undue hardship or danger, public transportation to travel to and from work. I was keenly disappointed that the recent tax bill did not deal with this problem. For many years I have introduced legislation (H.R. 644 in this Congress) to provide a deduction for income tax purposes for expenses paid for transportation to and from work.

In addition, H.R. 644, provides an additional exemption for income tax purposes for a taxpayer or spouse who is physically or mentally incapable of caring for himself.

I urge the Committee to act promptly on this matter.

Mr. DULSKI. Mr. Speaker, I am in full support of the pending legislation, H.R. 15095, to increase all social security benefits by 15 percent effective next month.

I commend the Committee on Ways and Means and particularly its chairman, the gentleman from Arkansas (Mr. MILLS) for bringing this measure before the House at this time.

Obviously, there are other adjustments which should also be made in the social security law. But the current need for an across-the-board increase in benefits cannot wait for the necessary deliberations of the committee on those details.

Our senior citizens, with their fixed incomes, are feeling the effects of inflation more than anyone else. For example, there is no provision in their benefits for escalation in line with the steady increase in the cost of living.

Incidentally, because of the timelag necessary to adjust the payment schedules of all of the individual beneficiaries, the first monthly check to show the proposed increase will not be received until the first week in April. But shortly thereafter an additional check will be sent to each beneficiary to cover the monthly increases for January through March.

Since January, I have sponsored a number of bills calling for changes in the social security law. One provided for the across-the-board 15-percent increase—the same amount called for in the pending bill—but it also provided for an automatic system to cover increases in the cost of living.

I remain convinced that we must install a semiautomatic system tied to the cost of living. However, I recognize the problem of the Ways and Means Committee in trying to deal with anything beyond the across-the-board increase at this point in the legislative session.

In this connection, I appreciate the assurance from the chairman that his committee will consider the other social security law changes when Congress reconvenes next month. There are a number of glaring inequities which must be acted upon.

Mr. Speaker, I hope that the pending bill, H.R. 15095, will have the unanimous support of the House and thus give assurance to our senior citizens in particular and to all Americans in general, that we recognize the inadequacy of the present system of benefits.

Mr. CLAY. Mr. Speaker, I support H.R. 15095, to provide for a 15-percent across-the-board increase in social security payments. One of my first acts in Congress was to introduce similar legislation—providing for a 15-percent benefit increase, and for cost-of-living adjustments in benefits. Since social security payments were increased, a year and a half ago, the cost of living has increased 10 percent. And the meager increase at that time still left the majority of social security recipients living on incomes below the subsistence level.

Inflation has had its most harsh effect upon older Americans. They have no way to fight it—no way out of the cycle. Sources of income for older Americans are limited. Full-time employment for the elderly is exceedingly difficult to find. Due to the restriction on the outside earnings imposed by social security regulations, the senior citizen suffers another squeeze.

Many of these citizens were not so fortunate as to participate in pension plans which would guarantee them sufficient retirement income. Many who felt they had saved and invested for their later years have seen their dollars washed away by inflation until their plans for self-sufficiency have become lost dreams.

These citizens cannot be blamed for their plight and they should not be required to suffer as they now do. There are 1.2 million social security recipients who must rely on old age assistance to supplement their meager social security payments. Many have lost their dignity through public assistance and others have humbly called upon offspring and other relatives to supplement their inadequate incomes.

At a time when all middle- and low-income Americans must pinch pennies, a father of three finds it difficult, if not impossible, to support parents and/or grandparents in addition to his immediate family.

It is shameful that we have delegated our older citizens to such an existence. Today, the average social security benefit is less than one-third the $3,900 which the Bureau of Labor Statistics says is necessary for a modest standard of living. The 2.5 million widows drawing survivor's benefits are living on average payments of $87 a month—or only $1,044 a year. For 80 percent of the older Americans dependent upon social security, the basic necessities of life must be compromised. They go without sufficient food, or clothing, or heat or lights, or housing.

These Americans have been robbed of their dignity—dignity and respect which should be a reward for the toil and tribulations of having lived and worked in this society.

Poverty knows no age limits. It hits the old and the young with equal strength, and equal cruelty. The young must cling to some hope for relief—that things will get better. The old who have had hard times in youth, the old who have worked but who could not anticipate the nature of the present economy, the old who are disabled, widowed, and those who have no families—none of these senior citizens deserve the hardships of old age which they now reap.

The 15-percent increase in social security benefits to be effective January 1, 1970—is the very least we can do for senior citizens now.

Mr. CULVER. Mr. Speaker, I am pleased that the House of Representatives has approved an across-the-board increase in social security benefits, at the full 15-percent rate contained in the legislation which I joined in sponsoring earlier this year.

To do less would have been to ignore the serious plight of more than 25 million Americans who depend upon social security as their primary, if not sole, source of income.

All of us in this House are concerned about inflation. But we cannot fight it at the expense of those same people who are already suffering most from it—senior citizens and persons on fixed income.

Three out of 10 older Americans live in poverty today, and another 20 percent are just above the poverty line. Nearly all of their income is spent on those items whose prices rise most in inflationary periods—food, medicine, and housing. Yet they have been receiving the same social security benefits during a period when living costs have risen by more than 9 percent, and the costs of many of these essential items even more.

We cannot allow this shocking situation to continue. It is our senior citizens who, through a lifetime of work and service in a less technologically advanced period, have provided the foundation for the present economic prosperity and well-being which most Americans enjoy today. It is our responsibility now to assure them a dignified and secure retirement in this society which they helped create.

The 15-percent increase, applicable to benefits payable for January 1970, is the very minimum we can do. Enactment of this bill is not the end, but only the beginning of the action of the 91st Congress in this whole area.

We must also look to such questions as the adequacy of the minimum payment, an automatic cost-of-living increase, increased benefits for the disabled and the blind, more realistic payments for widows and survivors, a new retirement test and income base for benefits, and revision and extension of medicare.

The distinguished chairman of the Ways and Means Committee has already indicated that his committee will continue its examination of these issues, and

will report a comprehensive social security and medicare bill to this House by next March.

I hope that the Members of the House will continue the support of our senior citizens which they have shown in their vote for the 15-percent increase, and that we will set a new standard for the seventies, by enacting the most meaningful and comprehensive social security legislation in the new year.

Mr. MESKILL. Mr. Speaker, I rise to state my strong endorsement of H.R. 15095, the Social Security Amendments of 1969.

The intent of this bill is very simple. It is designed to give a 15-percent across-the-board increase in social security benefits to those in our society who have been the most hard pressed by the rampant inflation that besets our economy at the present time.

Mr. Speaker, our senior citizens, those 65 and over; our disabled; and our widows and orphans; these individuals must be provided with an adequate income to meet their daily living expenses. These are not, for the most part, people who wish to live off the Government. These are people who have worked hard to accumulate their savings only to see them eaten up by rapidly escalating prices and a rising cost of living that has persisted stubbornly in the face of inflationary controls.

The rising cost of living, coupled with the fact that these individuals are largely forced to live on fixed incomes which do not adjust to the rising cost of living, has left these individuals in a desperate situation.

For most of these people, the major source of their income is their social security check each month, their savings having been gobbled up by rising prices. Now, inflation has even decimated the purchasing power of their social security dollars.

Since the last social security benefit increase in February of 1968, the cost of living has risen 9.1 percent. This year alone we have experienced nearly a 6-percent increase in the Consumer Price Index.

Inflation, combined with the administration's tough anti-inflation policy of tight fiscal and monetary control, has left those least able to cope with the situation, caught in the middle.

Justice demands that the Congress take immediate action to grant relief from inflation to 25 million Americans who will be on the social security rolls as of January 1, 1970.

The 15-percent increase in benefits is more generous than the 13-percent increase called for in a bill that I introduced at the beginning of the session. However, since the time I introduced my bill, the cost of living has continued to spiral upward, making the 15-percent increase necessary.

While I fully support this 15-percent increase, I wish to emphasize that this is only a temporary solution to a problem that promises to be with us in the future. Looking at the trend in the cost of living, it seems obvious to me that we must tie future increases in social security benefits to the cost of living index. As the cost of living increases, there should be automatic increases in social security benefits to accurately compensate the decreasing purchasing power of the dollar. Since coming to Congress, I have sponsored legislation to tie future benefit increases to the cost of living. I am disappointed that this proposal was not included in the legislation under consideration by the House. However, I realize that the chairman of the Ways and Means Committee has brought a simple benefit increase bill before the House because of the urgent need for speedy action on this measure. I would hope, however, that the Ways and Means Committee will make consideration of this proposal one of the first orders of business next year.

I would also like to see the committee recommend the abolition of the limitation on the amount an individual may earn and still remain eligible for social security benefits. I hope the committee will give favorable consideration to H.R. 6252, a bill I introduced to remove the earnings limitation.

The Social Security Act is in need of other reforms as well. The Ways and Means Committee has announced its intention to tackle the entire social security and welfare program when it returns to work after the first of the year. This is encouraging. I look forward to their recommendations.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield back my remaining time.

Mr. MILLS. Mr. Speaker, I yield back the remaining time on this side.

The SPEAKER pro tempore. All time has expired.

The question is on the motion of the gentleman from Arkansas that the House suspend the rules and pass the bill H.R. 15095.

The question was taken.

Mr. MILLS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 400, nays 0, not voting 33, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Hall.
Mr. Brooks with Mr. Goldwater.
Mr. Abbitt with Mr. Lukens.
Mr. McFall with Mr. Pelly.
Mr. Dingell with Mr. Cahill.
Mr. Hanna with Mr. Lipscomb.
Mr. Button with Nichols.
Mr. Cowger with Mr. Tunney.
Mr. Van Deerlin with Mr. Conyers.
Mr. Dawson with Mr. Clay.
Mr. Kirwan with Mrs. Chisholm.
Mr. Leggett with Mr. Powell.
Mr. Cunningham with Mr. Anderson of Tennessee.
Mr. Giaimo with Mr. Halpern.
Mr. Hogan with Mr. Gallagher.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

House Resolution 740 was laid on the table.

GENERAL LEAVE

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed (H.R. 15095), Social Security Amendments of 1969.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CONNECTICUT-NEW YORK RAILROAD PASSENGER TRANSPORTATION COMPACT

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 14646) granting the consent of Congress to the Connecticut-New York Railroad Passenger Transportation Compact.

The Clerk read as follows:

H.R. 14646

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the Connecticut-New York Railroad Passenger Tranportation Compact in substantially the following form:

"ARTICLE I

"For the purpose of continuing and improving the railroad passenger service of the New York, New Haven and Hartford Railroad (and its successors) between the city of New Haven in the State of Connecticut and the city of New York in the State of New York, including branch lines which are tributary to the main line of that railroad between the said cities; Metropolitan Transportation Authority, a governmental corporation of the State of New York and Connecticut Transportation Authority, an agency of the State of Connecticut, acting individually, but in cooperation with each other, or as co-venturers where they deem it advisable and practical, are hereby authorized to do the following where permissible under the enabling laws of their respective States:

"(a) To acquire through eminent domain proceedings, or by gift, purchase, lease or otherwise, the ownership interest in or the right to the use of all those assets of the said railroad (or of any successor in interest to such assets), be they real property, personal property or a combination of the two (including rights arising out of contract, franchise or otherwise), which are or may reasonably be expected to become necessary, convenient or desirable for the continuation or improvement of such service;

"(b) to repair and rehabilitate such assets, or to acquire by gift, purchase, lease or otherwise, such new or additional assets and rights as they deem necessary, convenient or desirable for such continuation or improvement;

"(c) to dispose of any such assets, new and additional assets and rights, or of the right to the use of the same, by conveyance, lease or otherwise (including without limitation, the grant of trackage rights) when and to the extent that they are not needed for such service by the said agencies; and to abandon or discontinue portions of such service when advisable; and/or

"(d) to operate such service, or to contract for the operation of the whole or any part of such service by others.

"To accomplish the foregoing objectives, the said agencies are authorized, individually and jointly, to apply for aid, federal, state or local, to supplement those funds appropriated or otherwise made available to them under the laws of the party states.

"ARTICLE II

"The provisions of this compact shall be construed liberally to effectuate the purposes thereof. Amendments and supplements to this compact to implement the purposes thereof may be adopted by concurrent legislation of the party states.

"ARTICLE III

"This compact shall be of no force and effect unless and until the congress of the United States of America, on or before December thirty-first, nineteen hundred sixty-nine, has consented thereto."

SEC. 2. The consent herein granted does not constitute consent in advance for any amendments or supplements to the compact which may be adopted by concurrent legislation of the party States pursuant to article II of the compact.

SEC. 3. The right is hereby reserved by the Congress or any of its standing committees to require the disclosure and the furnishing of such information and data by or concerning the Metropolitan Transportation Authority and the Connecticut Transportation Authority in their operation under the compact as is deemed appropriate by the Congress or such committee.

SEC. 4. The right to alter, amend, or repeal this Act is expressly reserved.

The SPEAKER. Is a second demanded?

Mr. TALCOTT. Mr. Speaker, I demand a second.

PARLIAMENTARY INQUIRY

Mr. WOLFF. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WOLFF. Mr. Speaker, is the gentleman from California opposed to the bill?

Mr. TALCOTT. Mr. Speaker, I am.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 20 minutes.

Mr. KASTENMEIER. Mr. Speaker, I yield myself 7 minutes.

Mr. Speaker, the legislation before the House is very simple in purpose and effect. It would grant the consent of Congress to a compact between Connecticut and New York. The compact authorizes joint action, as coadventurers, by an instrumentality of Connecticut, called Connecticut Transportation Authority, and an instrumentality of New York called Metropolitan Transportation Authority, in the operation of the passenger service of the New York, New Haven & Hartford Railroad and its successors between Hartford, Conn., and New York City. The purpose of the compact is to enable the two States to continue and improve the railroad passenger service between these cities.

This is a routine legislative measure. It does not appropriate or authorize the appropriation of any money. It is made necessary by the provision of article I, section 10 of the Constitution of the United States that—

> No State shall, without the consent of Congress . . . enter into any agreement or compact with another State.

In other words, congressional consent is needed in order to give full and unquestioned legal status to the bistate operation of passenger service over the lines of the former New Haven Railroad. Those lines form a vital passenger artery used by thousands of commuters daily. The service is now at the 50,000 passengers-per-day level. Unfortunately, at present these commuters must suffer gross discomfort and inconvenience caused by worn out and dilapidated equipment and undermaintained trackage. The two States want to be in a position jointly to improve this critical situation and restore vitality to the commuter service. The compact consent provided in H.R. 14646 will help them to do this.

The legislatures of the two States have enacted the subject compact in identical statutes, namely, section 1 of chapter 824 of the Laws of New York for 1968, approved June 1, 1968, and section 1 of Public Act 46 of the Laws of Connecticut for 1969, approved April 21, 1969. Certified copies of this legislation is in our files.

The compact by its terms provides that the cooperating State agencies may—

First, acquire assets of the New York, New Haven & Hartford Railroad where needed for the continuation or improvement of the railroad passenger service of that railroad;

Second, repair and rehabilitate such assets;

Third, dispose of such assets where not needed; and

Fourth, operate or contract for the operation of the service.

The cooperating State agencies are

also authorized to apply—I stress the word "apply"—for aid, Federal, State, or local. By its terms the compact legislation lapses if Congress fails to consent to the compact by December 31, 1969.

It should be emphasized that in giving the State agencies the authority to apply for aid, the compact merely expresses the commitment of the two States. It has no effect whatever upon the Federal Government except to vouch for the authority of the two agencies as applicants.

There has been comment on the fact that Federal aid has already been sought and has, to some extent, been approved for the modernization project which is the subject of the compact. I would like to repeat what I have already on occasion stated with regard to this, namely, that the grant or grants of funds were not authorized by compact approval legislation and that compact approval legislation does not authorize the grant of funds.

As regards the financial details of the project under discussion, a very able analysis by the gentleman from Connecticut (Mr. MESKILL) indicates that a matching grant of $28.4 million has been approved by the Department of Transportation. That Department's letter approving the subject legislation reads in part:

> The basic purpose of the bill is to give full and unquestioned legal status to the bi-state operation of rail commuter service over the . . . lines of the former New Haven Railroad . . . The Department recognizes the need for the explicit, legal base the compact provides . . . This Department strongly supports the bills.

Attention of the Members is also directed to sections 2, 3, and 4 of H.R. 14646. Section 2 makes clear that consent of Congress to the compact will not constitute consent in advance for amendments or supplements to the compact which may hereafter be adopted pursuant to article II of the compact. In other words, changes would have to be brought back for congressional approval. Section 3 reserves the right of Congress and its committees to require information from the State agencies in their operation under the compact. Section 4 contains the customary reservation of the right to alter, amend, or repeal.

While the present legislation was pending on the Consent Calendar the other body, on November 19, 1969, enacted identical legislation without dissenting voice, as S. 2734. I urge prompt enactment of H.R. 14646. When it is passed I shall ask unanimous consent to take S. 2734 from the Speaker's table for immediate consideration.

Mr. ADAMS. Mr. Speaker, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Washington.

Mr. ADAMS. According to the letter from the Governor of the State of New York, which is in the report, there is going to be about $56 million at one point, and hopefully $80 million, of Federal funds.

In the Committee on Interstate and Foreign Commerce we have spent 3 weeks of hearings trying to put together a national rail program. This bill means taking it piecemeal.

I want to know if the gentleman has studied the merits of the administration proposals, from DOT and ICC, for the establishment of a national passenger rail net, as a part of the legislative history on this legislation?

Mr. KASTENMEIER. I can state to the gentleman that we have the report of the Department of Transportation approving the legislation.

I realize the Committee on Interstate and Foreign Commerce has been undertaking a study of American railroads.

Mr. ADAMS. It is not just a study. We have executive sessions scheduled on the bills for the middle of January.

The SPEAKER. The gentleman from Wisconsin has consumed 15 minutes.

Mr. KASTENMEIER. Mr. Speaker, I reserve the remainder of my time.

Mr. TALCOTT. Mr. Speaker, I yield 10 minutes to the gentleman from Connecticut (Mr. MESKILL).

(Mr. MESKILL asked and was given permission to revise and extend his remarks and include extraneous matter.)

Mr. MESKILL. Mr. Speaker, first, I wish to reiterate the purpose of this legislation. The sole purpose of H.R. 14646 is to meet a constitutional requirement that all interstate compacts be approved by the Congress of the United States. If I may, I would like to read from the U.S. Constitution. Article I, section 10 states:

> No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in Time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

Compliance with the Constitution, then, is the single reason for this body to take action on this legislation. By acting favorably on H.R. 14646, we are merely giving authority to two legal entities, the Connecticut Transportation Authority—CTA—and the Metropolitan Transportation Authority of the State of New York—MTA—to enter into an agreement to act jointly to improve and modernize railroad passenger transportation services between the two States.

Mr. Speaker, unless we give congressional consent to this interstate compact, the States of Connecticut and New York will not be able to act in concert to improve railroad service between their two borders.

I cannot reiterate strongly enough that favorable action on this bill will only confirm an agreement which has been entered into between the respective transportation authorities of the two States.

Enactment of this legislation in no way commits the Federal Government to the expenditure of any funds.

If we pass this bill, all we are doing is granting legal authority to two legal entities to act together for a specified purpose.

The funding aspect of improving and modernizing the New York, New Haven & Hartford Railroad is an entirely separate issue. Funding is a part of the appropriations process. The time for Congress to question the advisability of spending Federal money for improving transportation is when it is considering the appropriation's bill for the Department of Transportation.

Let me emphasize again, Mr. Speaker, that this legislation does not authorize or appropriate any Federal money for any purpose. I hope that this clears up any confusion or misunderstanding there may have been on this issue.

In December of 1967, President Johnson approved a grant of $28.4 million—the priority program request—to go to the States of New York and Connecticut to assist the States in carrying out the proposed bistate modernization of the bankrupt New York, New Haven & Hartford Railroad. The grant is a 50 percent matching grant. The remainder of the funds for the program is to be made up by the two States.

Mr. WOLFF. Mr. Speaker, will the gentleman yield?

Mr. MESKILL. I yield to the gentleman from New York.

Mr. WOLFF. I thank the gentleman for yielding.

One point that has not been brought up here is the decision of the Supreme Court that permitted the Pennsylvania and the New York Central to merge. Under the opinion of the Court, the Court stated that the ICC emphasized:

> The merger will enable the unified company to accelerate investments in transportation properties and continually modernize plant and equipment and provide for a more adequate and better service.

It also required the Pennsylvania and New York Central in their merger to continue to provide service for the New York, New Haven & Hartford. What we are doing in this case is giving the Penn Central the opportunity of divesting itself of a responsibility that was mandated to it by the Court.

Mr. MESKILL. I would answer the gentleman by saying that the gentleman is not correct. I have read the portion of the opinion that the gentleman refers to. The Court was referring to the Pennsylvania Railroad and the New York Central Railroad. The New Haven Railroad was bankrupt. The New Haven Railroad was not an asset. The New Haven Railroad's freight service was the only thing the Penn Central wanted to take over. Let me tell you what happened.

When the ICC conditioned its approval of the Penn Central merger on the inclusion of the New Haven Railroad, it thereby compelled Penn Central to continue the operation of the service but it made no effort to compel the purchase of new equipment by the railroad. Indeed, the Commission stated that if the two States, Connecticut and New York, did not provide financial assistance to the service, it would entertain a "train-off" application.

Now, the gentleman knows I am sure that the ICC under a train-off application could entertain an application from the railroad to discontinue service. They have said that they would entertain such an application unless the States put in some money of their own. This is what the States are doing, but they cannot do it in concert unless we approve this compact.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. MESKILL. I yield to the gentleman from Massachusetts.

(Mr. BURKE of Massachusetts asked and was given permission to revise and extend his remarks and to include extraneous matter.)

Mr. BURKE of Massachusetts. Mr. Speaker, in order to establish congressional intent with reference to H.R. 14646 may I ask those in charge of this bill to answer the following questions:

Does this legislation in any way relieve the Penn Central Railroad from any of the provisions that were included in the merger of the Penn Central and the New Haven Railroad with respect to through railroad passenger and freight service from Boston to New York or from New York to Boston?

Mr. MESKILL. It certainly does not, and I would go further by saying that I have a letter here—and I shall only read from a part of it and then ask unanimous consent to insert the entire letter in the RECORD. This letter is from Mr. Stuart T. Saunders, chairman of the board of Penn Central. He says:

I understand some question has been raised as to how the remaining passenger service on the former New Haven Railroad, that is, east of the City of New Haven, might be affected. In my opinion, that service can only benefit as a result of relieving the total operation of the present burden of commutation service. As I have pledged before, where there is a public need for passenger transportation, it is our intention to provide safe, dependable, and comfortable service to the best of our capabilities. The prompt approval of H.R. 14646 by the House of Representatives will expand Penn Central capability to meet that pledge.

Mr. Speaker, I ask unanimous consent to insert the contents of the entire letter at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The letter referred to follows:

PENN CENTRAL,
December 12, 1969.

Hon. THOMAS J. MESKILL,
House of Representatives,
Washington, D.C.

DEAR MR. CONGRESSMAN: I am grateful for your leadership in seeking passage through the House of Representatives of H.R. 14646, a bill approving an interstate compact between the States of New York and Connecticut. This compact is the basis of the bistate plan which will permit the rehabilitation of the West End suburban service of the former New Haven Railroad in those two States.

I understand some question has been raised as to how the remaining passenger service on the former New Haven Railroad, that is, east of the City of New Haven, might be affected. In my opinion, that service can only benefit as a result of relieving the total operation of the present burden of commutation service. As I have pledged before, where there is a public need for passenger transportation, it is our intention to provide safe, dependable, and comfortable service to the best of our capabilities. The prompt approval of H.R. 14646 by the House of Representatives will expand Penn Central capability to meet that pledge.

Respectfully,

STUART T. SAUNDERS.

Mr. BURKE of Massachusetts. Mr. Speaker, if the gentleman will yield further, is there anything in this legislation that would allow the Penn Central Railroad to escape from their obligations to the New Haven Railroad as spelled out by the ICC and the U.S. Supreme Court's decision to permit the merger of the Pennsylvania Railroad and the New York Central Railroad?

Mr. MESKILL. In my opinion there is absolutely nothing.

Mr. BURKE of Massachusetts. Mr. Speaker, if the gentleman will yield further, Governor Sargent of Massachusetts sent a telegram to my office last week and I would like to read it and ask the gentleman from Connecticut to comment upon it.

Governor Sargent points out as follows:

While I have no objection to the Connecticut-New York Railroad Passenger Transportation Compact, I would urge that H.R. 14646 require that Pennsylvania Central continue passenger service in the northeast corridor at reasonable rates and that an effort be made to provide Federal financial assistance.

May I now ask in order to establish the intent of H.R. 14646, is there any provision in this legislation which would be considered to be in contradiction to views expressed by the Governor in the Governor's letter?

Mr. MESKILL. I do not believe there is, sir, and I give as my authority both my understanding of the legislation, fortified by the letter of the chairman of the board of Penn Central.

Mr. BURKE of Massachusetts. Mr. Speaker, if the gentleman will yield further, I ask unanimous consent to insert at this point in the RECORD the full text of the Governor's telegram.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

BOSTON, MASS.

Hon. JAMES A. BURKE,
House Office Building,
Washington, D.C.:

While I have no objection to the Connecticut-New York Railroad Passenger Transportation Compact, I would urge that H.R. 14646 require that Pennsylvania Central continue passenger service in the Northeast Corridor at reasonable rates and that an effort be made to provide Federal financial assistance.

GOV. FRANCIS W. SARGENT.

Mr. REID of New York. Mr. Speaker, will the gentleman yield?

Mr. MESKILL. I yield to the gentleman from New York.

Mr. REID of New York. I compliment the gentleman on the statement he is making. As to his comments on the $28.4 million, he is quite correct that this amount is from a grant in the previous administration in 1967 and it is, as the gentleman knows, fully budgeted by the present administration.

Lastly, I would say it is clear that Penn Central has a serious responsibility to fully live up to the provisions of the merger agreement and they must do much more in terms of standards of safety and service.

Further, this matter has dragged for years and years, and the time for action has come.

I think we must approve this compact, which must be passed by the House by December 31 if it is to go into effect and which is all we are voting on today. The States involved must be permitted to maintain and modernize a service which is essential to the public interest and to which many thousands of commuters in New York and Connecticut are entitled.

Mr. KASTENMEIER. Mr. Speaker, I yield 4 minutes to the gentleman from Rhode Island (Mr. TIERNAN).

Mr. TIERNAN. Mr. Speaker and Members of the House, I rise in opposition to this bill because, frankly, I think we are undertaking a piecemeal approach to the problems of railroad transportation, not only in the East, but in the country as a whole. I do this with great reluctance because I realize the problems of New York and Connecticut with regard to their commuter service.

However, I think it has already been indicated to us today that the Committee on Interstate and Foreign Commerce has had before it numerous bills relating to the problems of passenger transportation in our country, and has had the testimony of the people from the Department of Transportation and others who are interested in this transportation problem as a whole. I really think that we should not make or allow a compact which is clearly set up to earmark $56.8 million to the States of Connecticut and New York, and possibly $80 million in the future. I do not say that from a selfish standpoint, because it probably is in the interest of the State of Rhode Island as well if this compact is approved, because eventually I think the improvement of that service certainly could flow and be of benefit to the State of Rhode Island, but I have become concerned about what the effect overall would be, not only on Rhode Island, but on the country as a whole. I think another fact is that we have experienced in the past, petitions to curtail passenger service by the New Haven Railroad, and the fact that the ICC recognized the problem very clearly when as a condition precedent to allowing the merger of the Pennsylvania Railroad and the New York Central Railroad they provided that all of the services would be continued by the railroad.

Mr. PIKE. Mr. Speaker, will the gentleman yield?

Mr. TIERNAN. I yield to the gentleman from New York.

Mr. PIKE. Mr. Speaker, I would like very much to suggest to the gentleman that the total expenses to the Federal Government might reach a great deal higher than that, because if the Metropolitan Transportation Authority does to the State of Connecticut what they have done for Long Island in running the Long Island Railroad, the entire State may well qualify as a disaster area.

Mr. WOLFF. Mr. Speaker, will the gentleman yield?

Mr. TIERNAN. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Speaker, I thank the gentleman for yielding, and I concur in the statements of my colleague from Long Island, the gentleman from New York (Mr. PIKE). If the L.I.R.R. is any indication of the ability of the MTA committee to run a railroad then the commuters on the New Haven had better be concerned. I also wish to point out to

the gentleman the point that he raised earlier, the fact that the court in talking about the continuation of service stated "that only by permitting the merger would it be possible for the Commission to compel the Penn Central to come to the rescue of the New Haven.

In addition, there were no hearings by the Judiciary Committee held on this bill, and it is going to cost the city of New York $700,000 a year to make up the deficit that the Penn Central Railroad is now required to provide.

Mr. ADAMS. Mr. Speaker, will the gentleman yield?

Mr. TIERNAN. Mr. Speaker, I have only 1 minute left of my time, but I will yield to the gentleman.

Mr. ADAMS. Mr. Speaker, I thank the gentleman for yielding, and I want to point out to the gentleman from Connecticut that there are two steps that can be immediately taken to protect the service; the ICC can deny the discontinuance; and, second, we have bills pending to require adequate service, these are being heard, and we hope that they will be passed in the middle of January.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. TIERNAN. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, when this matter was first presented to the House on November 17, I asked this question of the gentleman from Connecticut. I said:

> I want to ask the gentleman from Connecticut if it is contemplated that you will ask the Federal Government for funds for the operation of this compact.

And the gentleman from Connecticut (Mr. MESKILL) said:

> Yes. The answer to the gentleman would be in the affirmative. It is contemplated that one-half of the $56 million would be applied for from the DOT.

So it is clearly indicated that these funds will be asked for.

Mr. Speaker, we have 15 bills relating to assistance of the Federal Government to the railroad industry before our Subcommittee on Transportation now, and we ought to be able to pursue those bills before we get into this matter. The bill before us is premature. And I fear it is a means to evade the appropriation process.

The SPEAKER. The time of the gentleman has expired.

Mr. KASTENMEIER. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. CELLER), the distinguished chairman of the Committee on the Judiciary.

Mr. CELLER. Mr. Speaker, this is a simple bill which under the constitutional requirement provides for the consent of the Congress to a compact made between two States, namely, Connecticut and New York.

The New York, New Haven & Hartford Railroad is in bankruptcy and it has been limping along and giving hardly any service of any consequence to some 50,000 to 60,000 daily commuters who go into New York City from various parts of Connecticut. Without this transportation both New York and Connecticut would suffer immeasurably.

The Pennsylvania Railroad and the New York Central merged, and it was agreed that the combined or merged railroad would operate the New York, New Haven & Hartford Railroad. But there was no provision in that merger agreement whereby new equipment would not be purchased or supplied by the merged railroad. It is difficult to operate a railroad without any new equipment that is constantly required.

The States of New York and Connecticut entered into a compact whereby the two transportation agencies in those States were willing to operate the new railroad because the Penn Central now is in great difficulties and facing almost all kinds and manners of financial troubles. It cannot operate adequately.

Therefore, the States must come in and operate for the sake of these commuters, some 60,000 daily commuters going into New York. They cannot be left high and dry.

Without this compact, I do not know what is going to happen to the continued operation of the New York, New Haven & Hartford Railroad. This compact simply provides that in the operation of these two transportation agencies of the two sovereign States that they shall be permitted to borrow various funds from the States of New York and Connecticut and the Federal Government so as to purchase new equipment.

The arrangement between the two States expires at the end of this very month and unless this compact is entered into, I do not know what is going to happen to the operation of the New York, New Haven & Hartford Railroad and these commuters can then go hang.

You can see the serious consequences that would flow from this. The answer lies in approval of this compact.

There has been a lot of confusion developed here, and for no reason whatsoever. The gentleman from New York (Mr. WOLFF) makes the absurd statement that to the extent that New York puts money into this operation, money is taken away from another railroad—the Long Island Railroad. The Long Island Railroad has naught to do with this arrangement between New York and Connecticut.

I want to tell the gentleman that the New York authorities have already pumped into the Long Island Railroad Company $263 million whereas the request that very likely will be made for purposes of the New York, New Haven & Hartford Railroad by the combined transportation agencies of both States will be only $23 million.

So I do not understand what the gentleman from New York (Mr. WOLFF) is bewailing about. There is no merit whatsoever in his argument. His argument will yield nothing for the Long Island Railroad. I am just as anxious for continued and adequate operation—as is the gentleman from New York (Mr. WOLFF) of the Long Island Railroad but his attack is not well directed and is ill timed. Let him train his guns upon the Metropolitan Transportation Authority, the U.S. Office of Transportation, the Governor of the State of New York and the New York State Legislature. He is indeed in the wrong forum.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. TALCOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Connecticut (Mr. WEICKER).

Mr. WEICKER. Mr. Speaker, I would like to come back to the main point that has been missed as to this compact—why the compact?

In the early sixties, it became very obvious that transportation in the Northeast was a mess. At that time we were not coming to the Congress with any interstate compacts—most States did not even have transportation authorities set up whereby they could deal with the issues and study the problem of transportation.

Then Connecticut and New York formed transportation authorities and started to get together to try to resolve what was their common problem.

It is absolutely necessary to engage in interstate cooperation. Some 30,000 commuters from the State of Connecticut go to the city of New York and will somebody tell me please, how one goes from Stamford, Conn., into New York City without going across a State line.

Mr. Speaker, I think it clearly is an interstate problem and breaks down in the following way: population patterns and commercial and commuting patterns will determine as to what entities of government have to come together.

It could very well be that on long-haul passenger service, the States of New York, Connecticut, Rhode Island, and Massachusetts will have to get together.

This compact relates to the West End commuter service. This is the problem of Connecticut and New York. It could well be that there are problems that exist between New Jersey and New York. It could very well be that on the Boston run, or the eastern end of the service, Connecticut, Rhode Island, and Massachusetts will have to get together.

Commuting patterns determine which entries of government have to get together in order to coordinate their efforts. The West End commuting service, the West End service of the New Haven Division of Penn Central Railroad, is what we are referring to here today. There is only one form of transportation that can take large numbers of people over a limited area and that is the railroad. So this is not just the problem of Connecticut and New York or Massachusetts. Some day it will be the problem of our sister States. Maybe they do not have the population now, but they will, and unless they want to see their land decimated by highway after highway and airport after airport, they had better put their efforts to providing this kind of coordination, and superior rail service.

This is the attempt of a part of the Northeast to bring some order out of chaos and supply such transportation.

Mr. REID of New York. Mr. Speaker, will the gentleman yield?

Mr. WEICKER. I yield to the gentleman from New York.

Mr. REID of New York. I thank the

gentleman for yielding. The point he is making is eminently correct. The health of the New Haven Division in the merged Penn Central system is central to the health of New England.

If this compact permitting takeover by the States of operation of the New Haven Division is not approved by the Congress by December 31, the compact will lapse. There would then be no remedy except renewed legislative action by the State and Federal Governments, and the effect of the resulting delay could be extremely serious.

The West End service is vital to communities in New York and Connecticut, both in terms of their economic health and in terms of the relief of traffic congestion and air pollution from automobiles which the railroad system provides.

We are not voting today to appropriate any funds, but are merely showing congressional approval of and respect for the initiative shown by the States of New York and Connecticut in meeting a critical problem. The Federal funds for the modernization program on the New Haven have already been appropriated and budgeted during a previous administration. The discussion by members of the Interstate and Foreign Commerce Committee of the need for legislation to meet national needs does not face up to the immediate emergency in the New England States. Certainly I will support legislation to meet national needs at such time as it is reported to the House, but the condition of the Penn Central's passenger service is, as the gentleman well knows, an emergency situation. It is not a matter where we can traipse along at a very leisurely pace.

Lastly, I would ask the gentleman, is it not true that the Governors of the several States involved and the Governors of Massachusetts and Rhode Island all strongly support this compact?

Mr. WEICKER. That is true. It is true and has been true for a period of years. As the gentleman aided congressionally, I served in the State of Connecticut on the Connecticut Transporation Authority, working with Rhode Island, Massachusetts, and New York in an effort to resolve this problem. There is no question in my mind that these States, working together, can supply a solution to the problem that confronts us. But we cannot even work together unless we have this kind of legislation. This is not an appropriation bill. It allocates nothing. We are subject to Congress whenever we got to the various departments for assistance. This is the authority to work together, and no more than that. I do not know any other way to conquer a problem which is regional in scope.

Mr. KASTENMEIER. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, our primary interest is in maintaining railroad passenger service between Boston, Providence, New Haven, and New York City. Since the Penn Central Railroad has taken over, they have filed several applications before the ICC for the abandonment of passenger trains running from Springfield and Boston to New York. They have also several applications pending right now for the abandonment of freight service. There are no trains running north of Boston. The Boston & Maine Railroad has been practically dismantled. The Boston & Albany and the Boston & Providence Railroad are practically nonexistent. The Old Colony Railroad, serving the southeastern part of Massachusetts, has gone out of business.

We are faced here with a real problem. I do not want to oppose this legislation, but the answers given to me here today do not seem to solve our problem. Our problem is a continuation of rail service from New York to Boston. They have already proven here from Washington to New York that they can lay a new roadbed to speed up service, and it is now oversubscribed. They could do the same thing from Boston to New York.

But there is no evidence that we can see that the Penn Central or anything in this legislation would lead to that.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield?

Mr. BURKE of Massachusetts. I yield to the gentleman from West Virginia, the chairman of the Interstate and Foreign Commerce Committee.

Mr. STAGGERS. Mr. Speaker, I thank the gentleman for yielding.

I rise with great reluctance to oppose this bill, because of the great committee and the distinguished gentlemen who are proposing it for consideration but our Committee on Interstate and Foreign Commerce has held extensive hearings on this problem for the United States. Several bills have been considered. We have had one executive session, and the first order of business when the Congress reconvenes after the first of the year will be further executive sessions to mark up a bill.

Mr. TALCOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Connecticut (Mr. MONAGAN).

Mr. MONAGAN. Mr. Speaker, I support this legislation. It is important for Connecticut that it pass. It is a matter, of course, of the two State authorities seeking permission to get together to do a specific job. It may be as has been claimed, that there are great plans for something that is going to happen in national planning throughout the country on a broad scale, at some time in the future but the local plight exists at the present time and the proposals to permit this crisis situation to be taken care of by the voluntary action of these two States.

Mr. Speaker, what they are doing is asking permission to go ahead and do a job. It seems to me this is unique enough in itself to grant authority so that they can proceed to take care of these commuters who are moving between the two States in this very critical situation.

Mr. DADDARIO. Mr. Speaker, will the gentleman yield?

Mr. MONAGAN. I yield to the gentleman from Connecticut.

Mr. DADDARIO. Mr. Speaker, I thank the gentleman for yielding.

I would like to comment that though the remarks have been made here today that we should wait for a countrywide solution to the railroad problem, the situation facing our railroads generally is enormous, and that action is needed now, and the case has been clearly made for such action by the gentleman from Connecticut, (Mr. MESKILL, Mr. WEICKER, and Mr. MONAGAN). It has been apparent for many years that we have a problem in Connecticut and New York in providing suitable commuter passenger service. Great sacrifices have been made; for example tax rebates have been granted by both states over a long period of time to keep the service going, and now we must have this compact to do more in this regard.

Mr. Speaker, all we are asking is that a problem that is obvious to us all be faced squarely and fairly and that we allow the two States to meet this particular challenge together.

I do believe the House will be making a great mistake if it does not recognize that this problem is a real one and allow the two States to do what is being asked today, to face reality, and to give us support in this very serious matter. What we do today affects thousands upon thousands of commuters and is of fundamental importance to the economic and business life of Connecticut and New York.

Mr. MONAGAN. Mr. Speaker, I thank the gentleman from Connecticut for his observation.

I would say also that these two States are not trying to exclude anyone. It may very well be that there are other problems in other States which need attention but simply preventing this contract from being ratified, simply preventing these two States from getting together, is not going to provide one single foot of trackage or one bit of service for any other State.

Mr. KASTENMEIER. Mr. Speaker, I yield 3 minutes to the gentleman from Connecticut (Mr. ST. ONGE).

Mr. ST. ONGE. Mr. Speaker, at this stage of the debate, I think it might be well to put this matter into its proper perspective.

The House today is not being asked for Federal help for the Penn Central or the old New York, New Haven & Hartford Railroad. We are simply asking for ratification of a compact between the States of New York and Connecticut, a compact that has already been approved by the State legislatures of the two States. This compact was passed by the Senate unanimously, with the support of the four Senators involved. It allows these two States to go to the Federal Government if necessary for help, but at least to take the initiative and to spend their own funds to keep the commuter service going into New York City.

The purpose of this legislation is not to infringe on the work of the House Interstate and Foreign Commerce Committee. We know that railroad service is a national problem and that a national solution must be found, but on at least two occasions before the New York, New Haven & Hartford Railroad was taken over by the Penn Central we were faced with imminent and complete cessation of the commuter service into New York City from the east.

This would have meant absolute panic in the business community in New York City.

Mr. ROSENTHAL. Mr. Speaker, will the gentleman yield?

Mr. ST. ONGE. I yield to the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. I have just one question for the gentleman. I do not want to take either a narrow parochial point of view or a selfish point of view. My question is this: If this legislation is defeated could I anticipate more money might be made available for the New York City subway system or the Long Island Railway system?

Mr. ST. ONGE. Not one red cent, in answer to the gentleman's question.

Mr. MESKILL. Mr. Speaker, will the gentleman yield?

Mr. ST. ONGE. I yield to the gentleman from Connecticut.

Mr. MESKILL. I thank the gentleman for yielding.

Is it not true there is nothing in this legislation which would prevent another State or two other States from entering into a compact, subject to coming back to the Congress for ratification?

Mr. ST. ONGE. There is absolutely nothing in this legislation to prevent that.

Further, this type of legislation would encourage other States. Certainly, I would encourage the State of Connecticut to enter into a compact with the State of Rhode Island and the State of Massachusetts, to continue and improve rapidly deteriorating rail service.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. ST. ONGE. I yield to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. I am delighted to hear the response of the gentleman from Connecticut in reply to his colleague on the question of whether or not it would be possible for other States to go into this kind of compact. It is my concern, and I am sure the concern of others here from Massachusetts and Rhode Island, as to whether or not, in establishing the compact, it will be possible for New York and Connecticut to enter into agreements with other States to assure that passenger service will be protected over the lines of the New York, New Haven & Hartford outside of the States of New York and Connecticut.

The SPEAKER. The time of the gentleman from Connecticut has expired.

The gentleman from California has 2 minutes remaining, and the gentleman from Wisconsin has 1 minute remaining.

Mr. TALCOTT. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. Mr. Speaker, I just want to assure my colleagues from Connecticut and Westchester that there is a Congressman here today from Long Island who sides with them. The commuters of Long Island need help. So do the commuters on the New Haven Railroad.

This much is clear: they are going to get help. If we do not allow the two States to give them that help, they will end up coming back to the Congress of the United States and we will have to solve this problem. I believe we would be well advised today to allow the States of New York and Connecticut to solve this problem, and not throw it back on the Congress of the United States in the future.

I am fully in support of this proposal. I believe we should keep as our first responsibility the interest of the commuters, who have the right to good railroad service and to the hope for better service in the future. The L.I.R.R. provides hope that railroad service will get better in the future. The commuters of Westchester are entitled to share that hope.

We should make common cause here today for our interests are the same.

The SPEAKER. Each gentleman in charge of time has 1 minute remaining.

Mr. WOLFF. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. WOLFF. The gentleman from California (Mr. TALCOTT) when he was asked whether or not he opposed the legislation, said that he did. However, he has not yielded any time whatsoever to any opponents of the bill.

The SPEAKER. That is not within the province of the Chair.

Mr. KASTENMEIER. Mr. Speaker, I yield myself my remaining time.

Mr. Speaker, when Congress considers interstate compact consent legislation, it normally grants consent to compacts whose effectuation will not be injurious to the Federal interests. It does and should do this, even if the consent may serve the interests of the compacting States by enabling them to take joint action.

In H.R. 14646 we have a very simple proposal. It is to consent to a compact between two adjoining States. The States want to restore a dilapidated commuter railroad within their borders. It is difficult to believe that such a project can be adverse to the Federal interest. On the contrary, it could provide a very useful purpose—that of relieving commuter pressure.

As I have said, the legislation does not appropriate or authorize appropriations. It would merely enable the two States to put their joint plans into effect. We need not and should not be concerned with issues as to how these projects are to be financed. The details of financing are wholly apart from the proposal of the two States that they be permitted to go forward as coventurers.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

The Chair recognizes the gentleman from California (Mr. TALCOTT).

Mr. TALCOTT. Mr. Speaker, I am opposed to the bill.

I just wish to say that I have tried to allot time to anyone who requested it.

I now yield the 1 minute remaining to the gentleman from New York (Mr. SMITH).

Mr. SMITH of New York. Mr. Speaker, I rise in support of this legislation.

I yield to the gentleman from Connecticut (Mr. WEICKER).

Mr. WEICKER. Mr. Speaker, I thank the gentleman from New York for yielding to me.

In quick summation, this problem is interstate—it is unique in that regard—for the simple reason that most commuting exists within a State. Probably the States of New York, New Jersey, and Connecticut provide this unique type of transportation problem. We are getting at that today. We are not making an appropriation but are giving the States the power to create good transportation for the millions living in that section of the country. I request of this House, Mr. Speaker, that regional considerations be thrown aside and you give your favorable consideration to a bill that will improve transportation in the northeast corridor.

The SPEAKER. All time has expired. The question is on the motion of the gentleman from Wisconsin that the House suspend the rules and pass the bill H.R. 14646.

The question was taken; and on a division (demanded by Mr. PIKE) there were—ayes 87, noes 22.

Mr. WOLFF. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 352, nays 49, not voting 32, as follows:

[Roll No. 324]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

Mr. Giaimo with Mr. Lipscomb.
Mr. Hébert with Mr. Hall.
Mr. Brooks with Mr. Cunningham.
Mr. Baring with Mr. Cowger.
Mr. Tunney with Mr. Goldwater.
Mr. Hanna with Mr. Cahill.
Mr. Blatnik with Mr. Pelly.
Mr. Patman with Mr. Halpern.
Mr. Young with Mr. Ruppe.
Mr. Abbitt with Mr. McFall.
Mr. Kirwan with Mr. Dawson.
Mr. Van Deerlin with Mr. Clay.
Mr. Steed with Mr. Anderson of Tennessee.
Mr. Charles H. Wilson with Mr. Conyers.
Mr. Dingell with Mrs. Chisholm.

Mr. TEAGUE of Texas changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table for immediate consideration S. 2734, granting the consent of Congress to the Connecticut-New York railroad passenger transportation compact, a Senate bill identical to H.R. 14646, just passed.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2734

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the Connecticut-New York Railroad Passenger Transportation Compact in substantially the following form:

"CONNECTICUT–NEW YORK RAILROAD PASSENGER TRANSPORTATION COMPACT

"ARTICLE I

"For the purpose of continuing and improving the railroad passenger service of the New York, New Haven and Hartford Railroad (and its successors) between the city of New Haven in the state of Connecticut and the city of New York in the state of New York, including branch lines which are tributary to the main line of that railroad between the said cities; Metropolitan Transportation Authority, a governmental corporation of the state of New York, and Connecticut Transportation Authority, an agency of the state of Connecticut, acting individually, but in cooperation with each other, or as co-venturers where they deem it advisable and practical, are hereby authorized to do the following where permissible under the enabling laws of their respective states:

"(a) to acquire through eminent domain proceedings or by gift, purchase, lease or otherwise, the ownership interest in or the right to use all of those assets of the said railroad (or of any successor in interest to such assets), be they real property, personal property or a combination of the two (including rights arising out of contract, franchise or otherwise), which are or may reasonably be expected to become necessary, convenient or desirable for the continuation or improvement of such service;

"(b) to repair and rehabilitate such assets, or to acquire by gift, purchase, lease, or otherwise, such new or additional assets and rights as they deem necessary, convenient or desirable for such continuation or improvement;

"(c) to dispose of any such assets, new and additional assets and rights, or of the right to the use of the same, by conveyance, lease or otherwise (including, without limitation, the grant of trackage rights) when and to the extent that they are not needed for such service by the said agencies; and to abandon or discontinue portions of such service when advisable; and/or

"(d) to operate such service, or to contract for the operation of the whole or any part of such service by others.

"To accomplish the foregoing objectives, the said agencies are authorized, individually and jointly, to apply for aid, federal, state or local, to supplement those funds appropriated or otherwise made available to them under the laws of the party states.

"ARTICLE II

"The provisions of this compact shall be construed liberally to effectuate the purposes thereof. Amendments and supplements to this compact to implement the purposes thereof may be adopted by concurrent legislation of the party states.

"ARTICLE III

"This compact shall be of no force and effect unless and until the congress of the United States of America, on or before December thirty-first, nineteen hundred sixty-nine, has consented thereto."

SEC. 2. The consent herein granted does not constitute consent in advance for any amendments or supplements to the compact which may be adopted by concurrent legislation of the party States pursuant to article II of the compact.

SEC. 3. The right is hereby reserved by the Congress or any of its standing committees to require the disclosure and the furnishing of such information and data by or concerning the Metropolitan Transportation Authority and the Connecticut Transportation Authority in their operation under the compact as is deemed appropriate by the Congress or such committee.

SEC. 4. The right to alter, amend, or repeal this Act is expressly reserved.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 14646) was laid on the table.

PERSONAL STATEMENT

Mr. HOGAN. Mr. Speaker, on rollcall No. 323 I was unavoidably detained. Had I been present, I would have voted "yea."

AMENDING TITLE 28, UNITED STATES CODE, TO EXTEND THE TIME FOR FILING TORT ACTIONS BY CERTAIN PERSONS

Mr. DONOHUE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10124) to amend section 2401 of title 28, United States Code, to extend the time for filing tort actions by persons under the age of 21, or insane or mentally ill, or imprisoned on a criminal charge, as amended.

The Clerk read as follows:

H.R. 10124

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2401 of title 28, United States Code, is amended to read as follows:

"§ 2401. Time for commencing action against United States

"(a) Every civil action, other than a tort action, commenced against the United States shall be barred unless the complaint is filed within six years after the right of action first accrues. The action of any person under legal disability or beyond the seas at the

time the claim accrues may be commenced within three years after the disability ceases.

"(b) Except as hereinafter provided, a tort claim against the United States shall be forever barred unless it is presented in writing to the appropriate Federal agency within two years after such claim accrues or unless action is begun within six months after the date of mailing, by certified or registered mail, of notice of final denial of the claim by the agency to which it was presented: *Provided,* however, that if a person entitled to assert a tort claim under this title is under legal disability at the time the claim accrues, he or she may present the claim within two years after the disability ceases."

The SPEAKER. Is a second demanded?

Mr. RAILSBACK. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. DONOHUE. Mr. Speaker, the principal amendment which the bill would make to section 2401 of tile 28, is the addition of a new proviso at the end of subsection (b). Section 2401 now provides as follows:

§ 2401. Time for commencing action against United States.

(a) Every civil action commenced against the United States shall be barred unless the complaint is filed within six years after the right of action first accrues. The action of any person under legal disability or beyond the seas at the time the claim accrues may be commenced within three years after the disability ceases.

(b) a tort claim against the United States shall be forever barred unless it is presented in writing to the appropriate Federal agency within two years after such claim accrues or unless action is begun within six months after the date of mailing, by certified or registered mail, of notice of final denial of the claim by the agency to which it was presented.

As amended by the committee, the bill would amend section 2401 to read:

§ 2401. Time for commencing action against United States

(a) Every civil action, *other than a tort action,* commenced against the United States shall be barred unless the complaint is filed within six years after the right of action first accrues. The action of any person under legal disability or beyond the seas at the time the claim accrues may be commenced within three years after the disability ceases.

(b) *Except as hereinafter provided,* a tort claim against the United States shall be forever barred unless it is presented in writing to the appropriate Federal agency within two years after such claim accrues or unless action is begun within six months after the date of mailing, by certified or registered mail, of notice of final denial of the claim by the agency to which it was presented: *Provided, however, that if a person entitled to assert a tort claim under this title is under legal disability at the time the claim accrues, he or she may present the claim within two years after the disability ceases.*

This new language would modify existing law by providing that the 2 year statute of limitations applicable to tort actions against the Government will not run against persons under legal disability at the time the action accrues, and that, such individuals may present the claim within 2 years after the disability ceases. The term "legal disability" was substituted in the committee amendment to the bill in the place of an enumeration of specific categories of disabilities or conditions which would have the effect of suspending the statute of limitations as provided in the amended bill.

Subsection (a) of section 2401, it will be noted has for years provided a similar exception for persons "under legal disability." In the opinion of the committee, this provides a well-established precedent for a parallel provision applicable to tort actions. It is felt that the application and the meaning of the term "under legal disability" has been established in the application of that term in connection with the statute of limitations for actions covered by subsection (a) of the same section. The use of this term in subsection (a) dates from its inclusion in the subsection when title 28 was enacted as a codified title by Public Law 773 of the 80th Congress on June 25, 1948 (ch. 646, 62 Stat. 869, 971).

An examination of the legislative history of the Federal Tort Claims Act does not clearly disclose the reason for the failure to include an exception for persons under a legal disability. The laws of almost all of the State jurisdictions and including Puerto Rico and the District of Columbia do provide for this type of exception to the running of the statute of limitations as to action between private and individuals. Section 1346(b) of title 28 provides jurisdiction for tort actions against the United States based upon the negligent wrongful act or omission of an employee of the Government acting within the scope of his office or employment; "under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred." State law therefore governs the determination of whether the act or omission are negligent or wrongful and whether an action accrues against the United States. However, as has been noted, section 2401(b) fixes the time within which the action must be presented against the United States and Federal law governs the interpretation of the section concerning the limitation period.

The time is overdue for the recognition of the fact that persons suffering from legal disabilities and particularly those who are under age are actually being deprived of their rights because of the presently overstrict limitation provision now found in subsection (b) of section 2401. The unfairness of these strictures has been demonstrated to the committee in cases which have resulted in the introduction of private bills for minors whose rights to assert their actions have been lost because of the failure of someone to present the claim within the 2-year period fixed in the subsection. An example of such a bill was H.R. 4141 of the 88th Congress which concerned a small boy who was mauled by a grizzly bear in a national park while being led on a nature walk by two park rangers. This bill was enacted into law as Private Law 88–137 of that Congress which made it possible for an action to be filed in behalf of the minor in a Federal court under the tort claims provisions of title 28. Clearly, an amendment to section 2401(b) would provide a fair opportunity for all persons suffering under legal disability to assert their claims after the legal disability ceases.

The committee has carefully considered the objections raised by the Department of Justice to this bill and to a companion bill H.R. 4155, proposing a similar amendment to section 2401(b). That report notes that the laws of most of the States suspends the statute of limitations from running for specified legal disabilities in tort litigation involving private persons. However, the Department questions a similar tolling provision as to actions against the United States. As has been noted the Federal Tort Claims Act expressly provides that the United States is to in effect stand in the same position as a private individual for purposes of tort liability. The Department of Justice has urged that a similar approach should not be followed as regards the tolling of the statute of limitations for legal disability and grounds its opposition on the fact that the particular nature of Government operations is such that such a tolling would serve to prejudice the ability of the Government to defend such suits. This objection must be considered in the light of the detriment suffered by persons under legal disability by reason of the strict application of the statute. The more just determination would require a tolling of the statue for the individual.

In view of the precedent for such a tolling of the statute of limitations in subsection (a) of 2401 and the demonstrated need for such a provision, it is recommended that the amended bill be considered favorably.

Mr. GILBERT. Mr. Speaker, I support H.R. 10124, offered by the gentleman from Massachusetts (Mr. DONOHUE), to extend the time for filing tort actions by persons under the age of 21, or insane or mentally ill, or imprisoned on a criminal charge.

I have sponsored a similar bill in past Congresses and in this Congress—H.R. 4155, 91st Congress. The bill will modify existing law by providing that the 2-year statue of limitations applicable to tort actions against the Government will not run against persons under legal disability at the time the action accrues, and that, such individuals may present the claim within 2 years after the disability ceases. We should recognize the fact that persons suffering from legal disabilities and particularly those who are under age are actually being deprived of their rights because of the presently overstrict limitation provision in subsection (b) of section 2401, title 28 of the United States Code.

There is a demonstrated need for this legislation. I support H.R. 10124 and I commend my distinguished colleague (Mr. DONOHUE) for the action of his subcommittee in bringing this bill to the House floor.

The SPEAKER. The question is on the motion of the gentleman from Massachusetts that the House suspend the rules and pass the bill H.R. 10124, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill as amended was passed.

The title was amended so as to read:

"A bill to amend section 2401 of title 28, United States Code, to extend the time for presenting tort claims accruing to persons under legal disability."

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. DONOHUE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALLING FOR HUMANE TREATMENT AND RELEASE OF AMERICAN PRISONERS OF WAR HELD BY NORTH VIETNAM AND THE NATIONAL LIBERATION FRONT

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and pass the concurrent resolution (H. Con. Res. 454) calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front, as amended.

The Clerk read as follows:

H. CON. RES. 454

Whereas more than one thousand three hundred members of the United States Armed Forces are prisoners of war or missing in action in Southeast Asia; and

Whereas North Vietnam and the National Liberation Front of South Vietnam have refused to identify prisoners they hold, to allow impartial inspection of camps, to permit free exchange of mail between prisoners and their families, to release seriously sick or injured prisoners, and to negotiate seriously for the release of all prisoners and thereby have violated the requirements of the 1949 Geneva Convention on prisoners of war, which North Vietnam ratified in 1957; and

Whereas the twenty-first International Conference of the Red Cross, meeting in Istanbul, Turkey, on September 13, 1969, adopted by a vote of 114 to 0 a resolution calling on all parties to armed conflicts to ensure humane treatment of prisoners of war and to prevent violations of the Geneva Convention; and

Whereas the United States has continuously observed the requirements of the Geneva Convention in the treatment of prisoners of war; and

Whereas the United States Government has repeatedly appealed to North Vietnam and to the National Liberation Front to comply with the provisions of the Geneva Convention: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress strongly protests the treatment of United States servicemen held prisoner by North Vietnam and the National Liberation Front of South Vietnam, calls on them to comply with the requirements of the Geneva Convention, and approves and endorses efforts by the United States Government, the United Nations, the International Red Cross, and other leaders and peoples of the world to obtain humane treatment and release of American prisoners of war.

The SPEAKER. Is a second demanded?

Mr. ADAIR. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, this resolution—House Concurrent Resolution 454—and similar resolutions attest to the tremendous congressional interest in, and concern for, the well-being of our American servicemen held captive by North Vietnam and the National Liberation Front of South Vietnam.

More than 275 Members of Congress have sponsored or cosponsored resolutions relating to the problem of American prisoners of war. Their names may be found on pages 2, 3, and 4 of the report.

In introducing and supporting these resolutions, the Members of this body are reflecting the genuine, heartfelt concern of the American people for the men who are missing in action or captured in Vietnam.

That concern is well justified, for North Vietnam and the National Liberation Front have violated virtually every provision of the 1949 Geneva Convention on the humane treatment of prisoners of war in their handling of American prisoners.

Both North Vietnam and the NLF are bound by that convention. Hanoi signed the Geneva Convention on prisoners of war in 1957. The NLF is likewise bound as an arm of Hanoi.

Despite these international legal obligations, North Vietnam and the National Liberation Front have refused to meet their responsibilities under the convention.

They have failed to release information about the prisoners they hold.

They have refused to allow prisoners to exchange letters with their loved ones or to receive gift packages.

They have not permitted the seriously sick or wounded to be repatriated.

And they have not been willing to agree to arrangement for the early release of all prisoners of war, despite the efforts of the United States and its allies in Vietnam.

In addition to these violations, we have direct evidence that the Communists, despite their public claims, have been actively mistreating our men.

In the propaganda films and photographs that North Vietnam has chosen to release, American officials have seen evidence of isolation, physical abuse, and serious loss of weight.

From men released from captivity, we have heard of even graver violations of the humanitarian standards embodied in the Geneva Convention, including severe mental and physical torture.

Mr. Speaker, the magnitude of the American prisoner of war problem can hardly be overemphasized. As of the end of November, there were 1,359 members of the U.S. Armed Forces missing in action in Southeast Asia. Of these, some 420 are believed captured. Some of them have been in captivity for 5 years.

The prospects of their being released in the near future, despite the requirements of the Geneva Convention, are not encouraging. Hanoi has refused even to discuss the matter at the Paris peace talks.

If, as many people now believe possible, the Vietnam war comes to a conclusion without any progress on this issue at the negotiating table, American prisoners of war might be doomed to spend years in captivity.

In that regard, the United States has learned a bitter lesson from the Korean conflict. Because the North Koreans refused to provide information and negotiate the status of Americans in their possession, all prisoners have not been repatriated from that war.

The U.S. Government has made many efforts to obtain Hanoi's compliance with the Geneva Convention of 1949, to no avail.

Initially, these efforts were undertaken discreetly, using normal diplomatic channels, and enlisting the good offices of third parties, such as the International Red Cross, the Vatican, and third countries with contacts in Hanoi.

Earlier this year, however, frustrated and disappointed by the failure of those efforts, the U.S. Government decided to bring this issue squarely out into the open in an effort to make the public in the United States and abroad fully aware of Hanoi's intransigence in this matter.

Statements have been made by the Secretaries of State and Defense, and by our former representative to the Paris peace talks, Ambassador Henry Cabot Lodge. More recently, the United States raised the issue of the denial of basic human rights to our prisoners before the 24th General Assembly of the United Nations.

The American National Red Cross also has been active. Last September it presented to the International Conference of Red Cross Societies a resolution calling on parties to armed conflicts to insure humane treatment of prisoners of war and to prevent violations of the Geneva Convention of 1949.

Clearly aimed at North Vietnam, the resolution passed by a vote of 114 to 0.

More recently, the American National Red Cross has initiated a nationwide campaign, aided by the news media, to urge all Americans to write to the Office of the President, Democratic Republic of Vietnam, Hanoi, North Vietnam, urging North Vietnamese leaders to change their policies.

Further the junior chamber of commerce, the Jaycees and other organizations are asking Americans to send Christmas cards to Xuan Thuy, the chief negotiator for North Vietnam in Paris, asking for better treatment of American prisoners.

By passing the resolution before us today, the House will make its position clear on this important issue.

The resolution approved by the House Foreign Affairs Committee was drafted by the Subcommittee on National Security Policy and Scientific Developments following a careful study of the many resolutions which had been introduced by the Members. Those resolutions, while united in purpose, differed in their phrasing.

The subcommittee, using information developed in 2 days of hearings and with the assistance of representatives of the Departments of State and Defense, prepared the language contained in House Concurrent Resolution 454. It expresses the same concern that prior resolutions did.

This resolution, it is my understanding, has the endorsement of all the sponsors and Members of Congress who have taken a particularly active interest in the prisoner of war problem.

Mr. Speaker, I urge unanimous approval of House Concurrent Resolution 454. Its adoption by the House will encourage and assist other efforts by our Government and agencies such as the Red Cross and Jaycees to alert people at home and abroad to the issue. It will help turn the spotlight of world attention on the outrageous and illegal acts of the North Vietnamese and the NLF in the treatment of American prisoners of war.

Further, passage of this resolution will express to the sorrowing families of men missing or captured our sympathy as we share in their anguish. Particularly at this Christmas season, these families may find some small measure of solace and relief knowing of our deep concern for their loved ones.

Finally and most importantly, adoption of the resolution may help convince North Vietnam and the National Liberation Front that they have made a grave blunder in violating the Geneva Convention on prisoners of war and that a policy change is necessary immediately.

While the fate of perhaps 1,300 Americans is hanging in the balance, we must continue to work toward the release of our servicemen held prisoners of war by North Vietnam and the National Liberation Front.

Mr. ADAIR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in very strong support of this proposal, especially as it now reflects recent action on the part of the Red Cross.

Mr. Speaker, I am pleased to be a cosponsor of House Concurrent Resolution 454, a resolution calling on North Vietnam and the National Liberation Front to give humane treatment and ultimate release to American prisoners of war.

I strongly urge support of this resolution today.

Many of you will recall that on November 6, after consultation with Red Cross officials, I offered House Concurrent Resolution 442 calling upon the House of Representatives to approve and endorse the declaration adopted in Istanbul at the 21st International Conference of the Red Cross, to ensure humane treatment of prisoners of war, such as those held by the Government of North Vietnam.

The action of the Red Cross has been made a part of the resolution before us today, House Concurrent Resolution 454, which was approved by the Committee on Foreign Affairs, is a strong resolution. It spells out in specific terms the inhumanity of North Vietnam and the National Liberation Front to the Americans who have been taken prisoner. It notes the continued refusal of the Communists to identify prisoners they hold, to allow impartial inspection of camps, to permit free exchange of mail between prisoners and their families, to release seriously sick or injured prisoners, and to negotiate seriously for the release of all prisoners.

This resolution deals with a great human tragedy. It deals with the matter of several hundred U.S. servicemen and their families—families who do not know whether their loved ones are dead or alive because Hanoi has refused to identify all of the prisoners it holds.

This action by the Committee on Foreign Affairs should be supported unanimously by the House of Representatives as a clear signal to Hanoi that on this issue we stand united. All Americans—regardless of their views on the Vietnam war—should support this resolution in the name of humanity to man.

Mr. ADAIR. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PRICE).

Mr. PRICE of Texas. Mr. Speaker, I urge my colleagues to give their full support to the proposal before the House. I do this as the sponsor of a similar resolution regarding the treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front.

Having served in combat as a member of our Armed Forces in Korea, I know that the risk of capture by the enemy is a fact of military life. Combat soldiers in armies thoughout the world know this as well as I do. Civilized nation's of the world have also recognized this fundamental fact; and for this reason, have agreed upon certain guidelines to be observed regarding the treatment of prisoners of war. These agreements, known as the Geneva Convention of 1957, reflect the beliefs of the signatory nations that prisoners of war must be treated in accordance with basic principles of humanity and decency.

Regrettably, North Vietnam, an endorser of the convention, and its puppet organization the National Liberation Front, have chosen to dishonor their commitments by their inhumane treatment of American POW's. Almost daily, the evidence mounts that American prisoners are undernourished, denied adequate medical care, kept in solitary confinement for long periods, refused communication with their families, and often used as guinea pigs for trumped up propaganda charges.

On numerous occasions, the United States has unsuccessfully appealed to the enemy to respect the terms of the 1957 Geneva Convention; however, North Vietnam and the Vietcong have consistently refused to release even the names of the U.S. prisoners they hold. In fact, the chief North Vietnamese negotiator to the Paris peace talks has declared that he would never release a list of American prisoners, "as long as the United States continues its aggression and does not withdraw its troops from Vietnam."

In addition to inhumanely treating our captured countrymen, North Vietnam, by its steadfast position, is also creating great hardships for the families of the missing servicemen. Thousands of families throughout the Nation live in daily torment and anxiety for the information they receive regarding the captured is skimpy at best and nonexistent at worst. In the past 5 years, approximately 100 captured servicemen have been allowed to write to their families; however, letters have only trickled in at the average rate of two letters each year per prisoner. If these few writers had been allowed to write the number of letters and cards permitted under the Geneva Convention, their families would have received 18,000 pieces of correspondence, as opposed to the less than 800 they actually received from their captured husbands and fathers.

Mr. Speaker, I submit that the Congress has the clear duty to our servicemen and their families to assert, in the strongest terms, our national feelings on this matter. The resolution before the House accomplishes this in clear and uncompromising terms. I urge my colleagues to vote for its adoption.

Mr. ADAIR. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. GROSS).

Mr. GROSS. Mr. Speaker, I thank the gentleman for yielding.

I certainly support this resolution. However, I regret the reference to the United Nations in the last resolvement of the resolution. I know of nothing the United Nations has done except to give lipservice in protest to the inhumane treatment of our prisoners of war.

Mr. ADAIR. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. I want to compliment my distinguished colleague from Indiana (Mr. ADAIR) for bringing up this resolution. House Concurrent Resolution 454 calls for the humane treatment and release of American POW's held by Hanoi and the NLF. I strongly endorse this resolution and cast my vote for it in the hopes that this body can thereby effect a change in the inhumane policy being followed now by the other side.

Earlier this year, I joined 87 of my colleagues in protesting the treatment of U.S. prisoners by Hanoi. Our statement was sent to both Secretary Rogers and Secretary Laird for forwarding to the North Vietnamese negotiators in Paris.

The statement asked Hanoi to name the men in captivity; to repatriate the sick and wounded; to permit impartial inspection of prison facilities; to assure proper treatment of all prisoners; to make possible a regular flow of mail; and to undertake serious negotiations for the prompt release of all American prisoners of war.

I call upon Hanoi and the NLF again to observe the Geneva Convention. According to Defense Department figures, there were 1,359 U.S. servicemen missing or captured as of November 29. Many of these POW's have been in captivity for more than 5 years.

The evidence of how they are being treated is not good. In the films and photographs that North Vietnam has chosen to release, there have been examples of isolation, physical abuse, and serious loss of weight. The story told by released prisoners is even worse, including forms of mental and physical torture.

The committee report indicates there is clear evidence that the North Vietnamese, despite their ratification of the 1949 Geneva Convention on prisoners of war, have violated virtually every provision of that agreement.

I join my colleagues in calling for an

immediate end to this inhumane treatment of our brave soldiers being held by the other side. I cannot state my appeal too strongly, and I know my colleagues feel the same way.

Mr. ADAIR. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Speaker, I rise in support of this concurrent resolution.

Mr. Speaker, House Concurrent Resolution 454 represents a statement of sincere concern by Members of this body and the American people for the fate of more than 1,300 U.S. servicemen held prisoner by the North Vietnamese and the National Liberation Front. As has been often observed, it represents, perhaps, the single aspect of this tragic war on which all Americans can agree.

It is not a political question, but a humanitarian question—one which transcends our consideration of all of the other specific issues involved in Vietnam.

The simple fact is that each of the parties to the conflict—the U.S. Government, the Republic of Vietnam, and North Vietnam—are all signers of a solemn convention, legally binding on all parties—the Convention on Protection of Prisoners of War, concluded at Geneva in 1949.

Two of those parties—the United States, which ratified it in 1955, and the South Vietnamese, which approved it in 1953—are abiding by its principles. The third, North Vietnam, which acceding in 1957, is not.

The thrust of this resolution is to call this open violation of an international agreement to the attention of the world community. It is an obligation which the President has undertaken and one to which I believe this body must lend its unanimous support.

The convention, to which 125 nations are parties, contains provisions which, if implemented, would tell wives and children whether their husbands and fathers were alive. It would, at minimum, tell parents if their sons are healthy and well treated.

The convention requires that—

> Immediately upon capture, or not more than 1 week after arrival in camp, even if it is a transit camp, likewise in the case of sickness or transfer to hospital or to another camp, every prisoner of war shall be enabled to write directly to his family.

Those brave young women, wives of captive American servicemen, who met with President Nixon last week, testified to the extent to which North Vietnam has failed to live up to this provision of the convention.

The convention assures prisoners of the right to remain in communication with their loved ones and with an international or state organization which has assumed the obligation of safeguarding his rights.

In addition to the right to receive mail and packages, and to send a minimum of two letters and four cards each month, the Geneva Convention specifies minimum humane standards of detention, of hygiene, diet, recreation, and employment. It requires that seriously ill or wounded prisoners be repatriated as soon as they are able to travel.

It specifies that the detaining power shall accept a neutral party to the conflict or a respected international organization, such as the International Committee of the Red Cross, as a protecting power of prisoners. It requires that the detaining power provide the names of the prisoners it holds to their families, as well as to the protecting power, or to the International Committee of the Red Cross, to pass on to their country of origin. It requires the detaining party to permit on the scene inspection of its detention facilities.

These are fundamental humanitarian standards to which all civilized nations adhere. Yet, North Vietnam and the National Liberation Front continue to violate them. We have, as a nation, delayed too long in focusing world opinion on this violation. I call on my colleagues to demonstrate their sincere concern for these principles by providing unanimous support for this resolution.

Mr. ADAIR. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. TAFT).

Mr. TAFT. Mr. Speaker, I rise in favor of House Concurrent Resolution 454, of which I am pleased to be a cosponsor. This resolution calls attention to the intolerable and inexcusable treatment which the Communist North Vietnamese have given American prisoners of war.

At this time of conflict, the attention of most of the world is focused upon Vietnam. The object of that attention is the war in Vietnam, and the desire of all is that the conflict can be honorably settled. With this wealth of attention being centered upon the actual conflict, another equally tragic phase of the war has apparently been lost sight of in the sphere of world opinion. I am referring, of course, to the inhuman treatment and utter disrespect which the North Vietnamese have shown our prisoners of war.

Mr. Speaker, there are certain basic requirements relative to treatment of prisoners of war which, in the spirit of humanity, are contained in the Geneva Convention, an international agreement which has been subscribed to by over 120 nations.

The first requirement of the convention which the North Vietnamese have disregarded is the prompt release of names of those who have been captured, and who are prisoners of war. I ask, Mr. Chairman, what can be more inhumane than to make the families of our servicemen go through the agony of not knowing whether their son or husband is dead or alive, a prisoner of war or a war casualty? There have been instances of prisoners being held for over 3 years without their names being released. This is unconscionable treatment, and it cannot be condoned by any honorable government.

The next requirement which has been abused is the allowance of a regular flow of mail to and from prisoners. If mail is cut off, once again the doubt of a prisoner's safety arises in the minds of his family, as they are uncertain as to the prisoner's status. Further, can you imagine the agony which a mistreated and underfed American prisoner of war experiences when he is denied the right and privilege to hear from his family and friends? This is a barbarous way to treat prisoners of war and I deplore it.

The Geneva Convention also calls for the immediate release of all seriously sick and wounded prisoners of war. The testimony of those prisoners who have been fortunate enough to have been released by the North Vietnamese has indicated that this provision is also ignored by the enemy, and that sick and wounded Americans are not even properly treated, let alone immediately released.

NORTH VIETNAM FORBIDS IMPARTIAL INSPECTION

Finally, the Convention calls for an impartial inspection of all prisoner of war facilities. From what I have pointed out in my testimony, it is not surprising that the North Vietnamese have forbidden such inspection, as it would only reveal the inhumane treatment which is afforded prisoners of war by the North Vietnamese.

Our Government has protested to the North Vietnamese concerning this garish treatment, and Ambassador Lodge has complained vigorously at the Paris peace talks. The unresponsive, irrelevant and irresponsible reply of the North Vietnamese has been that "the question of captured American military personnel will be settled at the same time as all other elements of the overall 10-point solution, and it cannot be separated."

Mr. Speaker, all of us may not be in agreement as to the future conduct of the war, but we can all unite in protesting the cruel and inhumane treatment afforded U.S. prisoners of war, and we can call upon the peace-loving peoples of the world to appeal with us to the North Vietnamese to allow our prisoners of war to be treated in a humane and honorable manner.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. GRAY).

Mr. GRAY. Mr. Speaker, I rise with great satisfaction and pride to support House Concurrent Resolution 454. Our prisoners of war in North Vietnam are truly the forgotten men of this war.

Mr. Speaker, several months ago our distinguished colleague, the gentleman from Alabama (Mr. DICKINSON) held a reception in Washington for many of the wives and other relatives of Vietnam prisoners of war and servicemen missing in action. That was a moving experience to see and talk to these people. Their lives are filled with uncertainty, apprehension, and fear. The President should launch a separate set of negotiations with the North Vietnamese for the release or exchange of our prisoners. The least we should do is to negotiate the release of the information concerning the names and condition of the men being held. This is a minimum.

I want to commend my friend from Wisconsin (Mr. ZABLOCKI) and his committee for bringing out House Concurrent Resolution No. 454 for passage. I know it will pass without a dissenting vote. I hope it will be of great help.

Mr. ADAIR. Mr. Speaker, I yield 5 minutes to the gentleman from Alabama (Mr. DICKINSON), who has been so active in this field.

Mr. DICKINSON. Mr. Speaker, it is very gratifying to me and, I thank the gentleman from Wisconsin (Mr. ZABLOCKI), chairman of the Subcommittee on National Security Policy and Scien-

tific Developments, the members of this subcommittee, and the members of the full Committee on Foreign Affairs for conducting hearings and reporting a favorable resolution on POW's and MIA's with such deliberate speed.

I rise in support of House Concurrent Resolution 454. I urge my colleagues of the House of Representatives to unanimously join in the passage of this resolution. I am a cosponsor of this resolution which is an amended form of the resolution I earlier introduced which had 193 cosponsors. Similar resolutions introduced by the gentleman from Tennessee (Mr. BLANTON), had 99 cosponsors and over 275 Members of the House have sponsored or cosponsored resolutions of this nature.

Mr. Speaker, and Members of the House, I have always been proud to be a Member of this great deliberative body, but I have never been more proud than when we had the special orders recently on the subject of our prisoners of war. We must have set a record when over 200 Members either introduced a resolution or participated in the resolution calling the attention of the world to the deplorable state in which our prisoners of war are held, and to the inhumane treatment that they are receiving and have been accorded by the North Vietnamese and the Vietcong.

Mr. Speaker, we hear a lot about resolutions. We sometimes wonder if they are effective and worthwhile or are they just meaningless gestures:

Mr. Speaker, I am very pleased to say that they are not meaningless gestures. Beginning with the special order that was participated in by so many Members of this House, there followed a statement from the White House and constant negotiations in behalf of our POW's and MIA's have been going on between our Government and Hanoi, all as a result of the special orders taken here.

Also because of that, I hold in my hand a printed copy of over 80 pages taken from the CONGRESSIONAL RECORD, copies of which have been sent to each of the families of those who are missing in action or who are prisoners of war. I hope this helped to show the families of POW's and MIA's that the Members of Congress are not unconcerned, that we are concerned, and that we are very diligently dedicated to the release of those who are being held hostage.

Additionally, just recently it was announced that the International Longshoremen's Association has come forward and has offered by letter to the President, to start for the first time in 18 years, to lift their boycott of Soviet ships and to start unloading them if the Soviet Union would bring its influence and pressure to bear on Hanoi to have our prisoners of war released. At this point, I would like to enter into the RECORD, an article from the Birmingham News:

[From the Birmingham News, Dec. 3, 1969]

BLUNT LETTER ON PWS

(By Victor Riesel)

NEW YORK.—There is on President Nixon's desk a blunt letter from a longshoremen's leader, who is of woven steel, soft voice, lots of heart, lots of gut—and who believes that the womenfolk of some 1,300 American prisoners of war should have their one grim question answered: Are they wives or are they widows?

To cover the waterfront is to cover that dockworkers leader, Johnny Bowers, the International Longshoremen's Association's executive vice president. His missive is not just a "Dear Mr. President:" letter. Johnny Bowers wants to make a deal. In fact, he wants President Nixon to make it.

His "quid pro quo," as he puts it, to Mr. Nixon is crystal clear, as the President is wont to say: The American longshoremen are ready to end their 18-year-old boycott of Soviet cargo and passenger ships if Moscow will convince its ally, Hanoi, to release five prisoners in return for each Red vessel serviced in an American, Atlantic, or Gulf port.

This letter was dispatched to the White House on Nov. 18. If it's presumptuous, it is presumption wrung from the gut of waterfront workers whose sons are fighting or have been cut to death in Vietnam. In this note, Johnny Bowers tells the President that the longshoremen are not specialists in international affairs. But the communication does say that "very recently International (ILA) President Thomas W. Gleason and I were asked by a spokesman for the State Department to consider working some Soviet ships if they entered New York Harbor. At that time we told him our answer was still no . . ."

The State Department men, in their fashion, were blunt with Johnny and Teddy (they'd rather you did not call them mister). It would be good diplomacy, said the American diplomats some weeks ago, if the American longshoremen serviced a Soviet passenger ship or two now that there is a reciprocal flight arrangement between Aeroflot Soviet Airlines and Pan American Airways. Why not handle Red craft in U.S. ports.

Johnny and I discussed the ILA's rejection of this request. He was bitter.

"The Soviets must believe we're fools," said he. "They pressure the State Department into pressuring us on the theory that free entry of Soviet ships into American ports would speed amity between America and Russia. Then on Nov. 13 Nikolai Tarassov, the Soviet delegate to the U.N. Social, Humanitarian and Cultural Committee, says loudly and publicly that our boys, who are prisoners of the North Vietnamese Communists, are criminals and pirates not covered by international agreements and should not be given any mercy. But they ask for amity and the State Department asks us to help their shipping trust. It's ridiculous."

But five days later Johnny Bowers wrote to President Nixon offering the exchange deal. The longshoremen's leader had before him truly tear-stained letters from prisoners' wives who had read this column's earlier report on the union's discussion of the prisoners-for-ships strategy.

One telegram from a young woman in South Carolina said: "Thank you for the concern over the prisoners of war. My husband has been a prisoner for four and a half years and during this time haven't received a word from him . . ." Another communication says "Thank God for men like you. I am an Air Force wife whose husband Lt. Col. Bobby R. Bazley was shot down in North Vietnam Sept. 16, 1967.

"His status remains missing in action although he was seen to eject from his aircraft and they got a beeper on his parachute. But as you know the North Vietnamese won't give out a list of the prisoners' names. Anyway it makes me so proud to know there are still men like you in our country who care, who are concerned over 1,300 downed, forgotten, suffering men in North and South Vietnam. . . ."

There are scores of such letters. If Johnny Bowers had no heart, only the steel which toughens a dockwalloper on the West Side piers, he could not stand mute.

Now, Mr. Speaker, and Members of the House, this is not an empty gesture. This is not some futile gesture on the part of anyone. This is as a direct result of what we are doing here, and of the growing interest of the public on behalf of our prisoners of war, and those who are missing in action.

I have had the opportunity to discuss at great length with several former prisoners and numerous wives and other relatives what the impact of a unified Congress will have on the North Vietnamese and the Vietcong. They agree that a unified Congress can be a real plus in forcing Hanoi to divulge the names of those prisoners which she holds. Hanoi is sensitive to world opinion. Why else would she go to such great lengths to publicize and propagandize that Americans are receiving humane treatment? Why would she parade prisoners in the streets if in actuality they are not aware of the value of propaganda and they are not sensitive to world opinion?

Yes, Hanoi is sensitive to world opinion and the Congress of these United States must dramatically express its disgust at the inhumane treatment and the violations of the tenets of the Geneva Convention which Hanoi so flagrantly abuses.

Why do the NLF and the North Vietnamese refuse to comply with the simplest of requests—identify the prisoners they hold. Maj. James Rowe, a prisoner for 5 years and 2 months, who escaped last year, believes as I do, that the reason they will not identify the prisoners is that anyone whose name they divulge or whom they admit holding prisoner must be cared for. If they do not admit having them, they do not have to be responsible for them. When they admit they have them as prisoners, then they have to assume the responsibility for them, and this is one of the reasons it is so important that we push this effort and at least get them to list the people that they have. In this way, they then will be held accountable—not only to us—but to world opinion.

Mr. Speaker, you can imagine the anguish at the uncertainty faced by the wives and relatives who do not know whether their loved ones are living or dead. We must not let this issue go unnoticed.

Just recently, Mr. Speaker, last week, in fact, I had the distinct pleasure of having luncheon here in the House with two of the wives—and that same afternoon they were joined by other wives—whose husbands are missing in action or prisoners of war. They met in the White House and were assured in person by the President of the United States that he was concerned, and he was keeping pressure to bear to bring about the release of those who are being held captive behind the Bamboo Curtain, plus, Mr. Speaker, the release of the names of those who are being held, and to see that they are accorded humane treatment.

Under the terms of the Geneva Convention, which North Vietnam ratified in 1957, our men held prisoner are entitled

to certain rights. Those rights to which they are entitled are:

First, identify the prisoners they hold; second, allow partial inspection of camps; third, permit free exchange of mail between prisoners and their families; fourth, release seriously sick or injured prisoners; and fifth, negotiate seriously for the release of all prisoners.

Mr. Speaker, all of these rights have been violated time and time again by the North Vietnamese and the Vietcong. The United States has continuously observed all requirements of the Geneva Convention in the treatment of POW's.

I appeal for unanimous passage of this resolution before us. Regardless of the moral or political stand one takes on the war and our involvement, we cannot allow the inhumane treatment to continue. President Nixon has vowed efforts to win humane treatment of our POW's. Our efforts can be a great boost in that direction.

Mr. ZABLOCKI. Mr. Speaker, I yield to the gentleman from North Carolina (Mr. FOUNTAIN).

Mr. FOUNTAIN. Mr. Speaker, as one of the cosponsors of this concurrent resolution, House Concurrent Resolution 454, I want to associate myself with those who have spoken in support of it. It may not accomplish the results we all desire, but it is the least we can do for our fighting men who are prisoners of the enemy. It will also let the world know again how we stand.

Mr. McCLORY. Mr. Speaker, I am proud to express my support of House Concurrent Resolution 454 calling for the humane treatment and release of the American prisoners of war held by the North Vietnamese and the National Liberation Front. The subject of this resolution reaches into many American homes and affects the families of those who have served our Nation valiantly in the tragic struggle in Vietnam. We ask today where are those loved ones who have been taken prisoner by the forces of North Vietnam or by the Vietcong? What has been the ultimate fate of those who have fallen into enemy hands by accident, by downed planes and helicopters, or have otherwise disappeared into areas held by our enemies in Southeast Asia.

The Geneva Convention of 1949, which the Government of North Vietnam ratified in 1957, binds the forces directed from Hanoi to identify all prisoners whom they hold, to permit inspection of prison camps, to negotiate for the release of prisoners and to comply with other humane requirements. The resolution of the International Red Cross as well as many unwritten and written practices of international law and custom, articulate the obligations which civilization imposes upon the Governments of North Vietnam and the shadow government of the Vietcong.

Mr. Speaker, Maj. Crosley J. Fitton, Jr., who is the brother of one of my constituents—Mrs. George W. Stone, Jr., of Libertyville—was lost behind enemy lines. No word has been received from or about Major Fitton since he was shot down and seen parachuting into an area of North Vietnam in February 1968. I find no justifiable reason or excuse for a failure to report on this brave American, or any other American fighting man who has fallen into enemy hands.

Mr. Speaker, in the hope that adoption of this concurrent resolution may help in bringing world public pressure to bear on the Governments of North Vietnam and the National Liberation Front of South Vietnam, I join in strong support of the adoption today of House Concurrent Resolution 454.

Mr. PELLY. Mr. Speaker, I fully support this resolution concerning American prisoners of war in Vietnam. No stone should remain unturned in aiding U.S. efforts to turn world attention to Hanoi's inhumane treatment of American prisoners of war, and this resolution is another step in this concern.

There is no protest strong enough regarding the treatment of U.S. servicemen held by the North Vietnamese. The treatment suffered by so many of our returned men at the hands of the Communists is unconscionable.

The requirement that North Vietnam and the National Liberation Front of South Vietnam comply with the Geneva Convention on Prisoners of War is a reasonable one. The United States has continuously observed the requirements of the Geneva Convention and has repeatedly appealed to North Vietnam to comply as well. This has been to no avail.

I firmly support the provisions of this resolution, Mr. Speaker, and endorse the efforts by the U.S. Government, the United Nations, the International Red Cross, and other leaders and peoples of the world to obtain humane treatment and release of American prisoners of war.

At this holiday season, a traditional time of family gatherings in America, may our prayers go to these men and their families here in the United States who are being kept so far apart both physically and mentally.

Mr. Speaker, I endorse this resolution and urge its passage.

Mr. FARBSTEIN. Mr. Speaker, I support House Concurrent Resolution 454.

It is intolerable that there are now over 1,300 Americans unaccounted for as a result of the Vietnam war. Some of these young Americans have been prisoners of the North Vietnamese for over 5 years. How many we are not quite certain.

To the government in Hanoi these prisoners are not human beings, they are instruments of propaganda. The North Vietnamese do not treat our prisoners humanely. In the propaganda films and pictures that we see there have been examples of isolation, physical abuse, and serious loss of weight. From those pitifully few who have been released we have heard of even greater violations of the rights of prisoners of war as outlined in the Geneva Convention on Prisoners of War.

In spite of the fact that Hanoi has signed the Geneva Convention of 1949, they refuse to abide by its provisions. They even refuse to release the names of those American soldiers who are being held. This is cruelty to the extreme. Think of the anguish and heartache this causes among the wives and mothers, fathers, children and other loved ones of these unfortunate Americans.

Despite efforts by the U.S. Government, the American Red Cross, the 21st International Conference of Red Cross Societies, and the United Nations to bring about a change in Hanoi's policy, they refuse. The question is, How can the Government of North Vietnam be prevailed upon to ameliorate this situation?

The only way that I can think of is to bring this matter before every international forum in the world. People from around the world should be encouraged to write to the Government of North Vietnam demanding that they begin to obey the legal requirements of the Geneva Convention.

The governments of the world, regardless of social systems or attitudes toward the Vietnam war, must make it plain to Hanoi that they do not approve of their treatment of the American prisoners of war. They must make it clear that there is no justification to inflict upon individuals animosities that they feel toward the Government of the United States. This is what the Geneva Convention is all about—to protect the human and civil rights of those individuals who fall into the hands of a belligerent nation, and to preclude their becoming pawns in an international chess game.

If we do this, if the world reacts, then perhaps the leadership in Hanoi will realize that there is more to lose by their present policy than there is to gain.

Mr. Speaker, I move the adoption of this resolution.

Mr. DONOHUE. Mr. Speaker, as the author of identical legislation, I most earnestly urge and hope that House Concurrent Resolution 454, now before us, expressing our combined sentiments, in condemnation and appeal of the inhumane treatment of American prisoners of war by the North Vietnamese, will be speedily and unanimously approved by this House.

We may trust that by our unanimous approval, we will graphically demonstrate here that, whatever other differences may exist among us, the Congress of the United States and the American people are completely united in their conviction and appeal that the North Vietnamese Government, in accord with international agreement, will promptly provide full information about the names condition, and whereabouts of all American prisoners of war and furnish all other knowledge they may have about American servicemen who have been reported missing in action.

It is a matter of the most grievous dismay and disappointment to the U.S. Congress and the American people that North Vietnamese officials have thus far shown an utter disregard for the provisions of the Geneva Convention covering the control and treatment of war prisoners and particularly so in their refusal to permit them to correspond with their families.

It is nearly impossible to conceive that there are any people on this earth who are so removed from ordinary human experience, conscience, understanding, and motivation that they will not respond to the anguish and grief of fellow human beings who suffer continuing uncertainty as to whether their beloved serviceman

husband, father, son, or brother is dead or alive.

Global history reveals that, with all its admitted evils, there is still the highest individual honor and courage in war and a mutual respect and esteem for the bravery and loyalty of the opposition. To engage in war differences cannot and will not justify any suspension or departure from the commonly accepted rules and procedures of the civilized world.

We have reason to believe that the North Vietnamese and their allies are especially interested and impressed by the weight of congressional and American public opinion. We would hope they may be equally and rightfully concerned about world judgment.

If this is so, and we pray that it is, we trust that the North Vietnamese Government will promptly respond to this united and universal appeal for them to provide complete information about and to insure the most complete medical and humane treatment of the hundreds of American prisoners of war they are now holding. It is only by this humane action that they can yet, and I hope they will, historically escape condemnatory judgment before the bar of united American and world opinion.

Mr. CRAMER. Mr. Speaker, as the sponsor of the first resolution introduced in the current Congress calling for the extension of the rights under the Geneva Convention to U.S. military personnel held captive in North Vietnam, I feel privileged to support the resolution before us today, House Concurrent Resolution 454, calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front.

I indicated my grave concern over the treatment of our American prisoners when I first introduced a resolution on the matter in April of 1967, and later, following my sponsorship of House Concurrent Resolution 7 on January 3, 1969, the opening day of the 91st Congress, I then joined a number of my colleagues in cosponsoring a further resolution with respect to North Vietnam and the National Liberation Front of South Vietnam complying with the requirements of the Geneva Convention.

In a related action, I also cosponsored a House resolution authorizing and directing the Committee on Internal Security to conduct a full and complete study and investigation of the New Mobilization Committee To End the War in Vietnam. This self-styled liberation committee, as we know, has had a demoralizing effect upon our American soldiers in Vietnam, and an even more tragic impact on those courageous Americans held as prisoners by the North Vietnamese.

Following up my persistent efforts in behalf of these brave Americans, and their loved ones here at home whose constant grief is further deepened by the uncertainty of the identification, the condition and the care of the prisoners, I recently called for an exchange of United States and North Vietnamese prisoners on Christmas Eve. I have urged American officials to extend such a proposal to the North Vietnamese negotiators in Paris at the earliest possible date.

The Defense Department reports that slightly more than 6,000 North Vietnamese prisoners are being held in South Vietnam, while 346 Americans are known to be prisoners in North Vietnam. In addition, 914 Americans are listed as missing, their fate unknown. It was with great personal sadness that I recently learned that one of those missing is James White, son of Gen. Ed White of my district, and brother of Ed White, the astronaut killed on a space mission at Cape Kennedy. Jimmy White had also been one of my Air Force academy appointments and a young man in whom all of us who know him take great personal pride in his bravery and his patriotism.

In letters addressed to President Nixon, to Secretary of State Rogers, and to Secretary of Defense Laird, I have urged a Yuletide exchange of prisoners as the most blessed gift to the prisoners' loved ones and hopefully, as a forward step to understanding and eventual peace with honor in Vietnam and lasting peace throughout the world.

Mr. FEIGHAN. Mr. Speaker, the unknown status of American prisoners in enemy hands is one of the saddest stories of the Vietnam war. We have no information regarding their state of health, and no information telling us at this stage how many may still be alive or dead. Some of these prisoners were captured as far back as 6 years ago. Many have been subjected to solitary confinement, and a considerable number are known to be suffering from malnutrition and tropical diseases. Because of this thousands of relatives in this country are living in daily suspense and anguish.

Knowing the enemy's behavior in this situation, and recalling their tactics in Korea, I have on several occasions insisted that we give the welfare of our prisoners in Vietnam the highest priority in our negotiations with Hanoi. During the Korean armistice discussions we left the prisoner of war issue to the last item of the agenda which extended the negotiations another 2 years, while the enemy improved its military fortunes, and many of our boys in the meantime died in captivity. On this subject Adm. Turner Joy, our chief negotiator at Panmungjom has stated that his opposition across the conference table there resorted to every conceivable tactic to consume time and misrepresent the issue at hand.

This subject is now a matter of national conscience. If the Paris talks resume we must insist that Hanoi's representatives discuss the prisoner of war issue at the very outset. Also, we must prevail upon the United Nations to intervene in this humanitarian cause, and we must determine for ourselves whether or not it would be advisable for us to use our present communications with the Chinese Communists in Warsaw to resolve this issue.

Mr. GRIFFIN. Mr. Speaker, it is most gratifying that the House is taking up today House Concurrent Resolution 454 and I hope the vote for it will be unanimous. The resolution clearly expresses the feeling of Congress that American prisoners should be treated humanely while captives and released soon.

This resolution is an obvious showing that the American people are united in this effort and that an affirmative response is expected from Hanoi. Additionally, the North Vietnamese should take note that world opinion demands that American prisoners be given a proper diet, environment, and medical attention.

Mr. Speaker, I take this opportunity to commend the U.S. Junior Chamber of Commerce in its efforts to deliver Christmas cards to Xuan Thuy, chief North Vietnam negotiator in Paris with written message calling for compliance with the Geneva Convention. I think a million cards would be of immense help and have sent one myself. Cards can be mailed to Project Xuan Thuy, Box 2600, Washington, D.C. 20013.

Also, I wish to commend Fairchild Hiller Corp. for its recent full-page advertisement in many metropolitan newspapers urging participation by the public in writing international figures and requesting an end to prisoner abuse. The names and addresses of these are listed below:

PERSONS WHOSE ASSISTANCE COULD BE HELPFUL IN CAUSING NORTH VIETNAM TO PROVIDE HUMANE TREATMENT FOR WAR PRISONERS

UNITED NATIONS

Secretary General U Thant, United Nations Headquarters, New York, New York.

USSR

The Honorable Andrei Gromyko, Minister of Foreign Affairs, Moscow, USSR.

His excellency Anatoliy F. Dobrynin, Embassy of the Union of Soviet Socialist Republics, 1125 16th Street, N.W., Washington, D.C. 22236.

SWEDEN

The Honorable Torsten Nilsson, Minister of Foreign Affairs, Stockholm, Sweden.

His excellency Hubert de Besche, Embassy of Sweden, 2249 R Street, N.W., Washington, D.C. 20008.

ROMANIA

The Honorable Corneliu Manescu, Minister of Foreign Affairs, Bucharest, Romania.

His Excellency Corneliu Bogdan, Embassy of the Socialist Republic of Romania, 1607 23rd Street, N.W., Washington, D.C. 20008.

POLAND

The Honorable Stefan Jedrychowski, Minister of Foreign Affairs, Warsaw, Poland.

His Excellency Jerzy Michalowski, Embassy of the Polish Peoples Republic, 2640 16th Street, N.W., Washington, D.C. 20009.

Mr. BINGHAM. Mr. Speaker, I rise in support of House Concurrent Resolution 454. I was a cosponsor of an almost identical resolution—House Concurrent Resolution 366—and I am enthusiastically in support of the main thrust of House Concurrent Resolution 454, and particularly of the resolved or action paragraph.

However, I do not want my support of this resolution to be construed as approval of the way the United States has handled the problem of Vietcong and North Vietnamese prisoners taken in South Vietnam. We have tended to leave the problem entirely in the hands of the Saigon government and to turn our backs on any mistreatment of prisoners by that government.

When I was in Vietnam in December

1966, I discovered that only a small fraction of those whom we claimed to have captured during that year were being held in prisoner of war camps by the Government of South Vietnam. Upon inquiry, it developed that a very high proportion of those who had been claimed as captured were actually being treated as criminals, for whom protections of the Geneva Convention do not apply.

Since that time, it has become difficult, if not impossible, to get the figures for those captured by U.S. forces in South Vietnam. I am afraid that the reason for this is the continuation of the practice by the Government of South Vietnam of denying prisoner of war status to many in this category.

The fourth whereas clause of House Concurrent Resolution 454 reads:

Whereas the United States has continually observed the requirements of the Geneva Convention in treatment of prisoners of war.

This statement is probably, by and large, technically correct. However, it could not be said with any accuracy that the United States has made all possible efforts to insist on compliance with the Geneva Convention by the Saigon government.

Mr. MAYNE. Mr. Speaker, for the anxious families of more than 1,300 American prisoners of war detained by the Hanoi government, today's activities by this House will rank in importance just behind that glorious day itself when their loved ones are actually returned.

Waiting is torturous in any circumstance. It is especially agonizing when one must wait helplessly, incapable of action, and virtually powerless to induce action by those with higher authority to act.

This has been the desolating fate so far of those afflicted families with men in Hanoi's custody.

A concurrent resolution merely states the sense of Congress on an issue, and for the most part is regarded as meaningless, having no effect. But in this instance, I think an expression of strong protest about the behavior of the North Vietnamese in violation of the Geneva Convention is bound to have some beneficial force. In the forum of world opinion, which we have reason to believe Hanoi respects, this effort, plus the concerted efforts of other organized Americans, may very well induce Hanoi to honor the terms of an accord to which North Vietnam became a signatory as long ago as 1957.

I was pleased to see that the First Family invited more than two dozen wives and mothers of missing servicemen to the White House last Friday. Last month President Nixon proclaimed November 9 as a National Day of Prayer.

I applaud all these efforts to bring to public notice this continuing criminal violation by Hanoi of one of the fundamental precepts of humane treatment. Not only have we evidence that they have abused the men we know they have, they are failing to confirm the identities of some 70 percent of the men presumed to be captive.

An eloquent plea for recognition of this problem at the highest level has been made by the wife of an American officer shot down over North Vietnam in May of 1967. Mrs. Peggy Naughton of Sheldon, Iowa, has singlehandedly tried to inspire action toward relief of American prisoners, by making appearances before schools and civic groups, writing letters to editors and public officials, and being interviewed on the electronic media. Mr. Speaker, I include a copy of the comments she has made on such occasions at this point in the RECORD.

STATEMENT OF MRS. ROBERT NAUGHTON

The plight of the American prisoner of war is tragically familiar to me. Two and one-half years ago my husband, Lt. Robert Naughton, USN, while on a mission over North Vietnam ejected from his disabled aircraft. After parachuting safely to the ground, he radioed his wingman, "I'm okay, I'm not hurt." For the next 15 minutes attempts were made to fly air cover over him to provide protection for him until a helicopter could be brought in to pick him up. The enemy gradually moved closer. My husband carried out his final order, destroying his radio just minutes before capture. One last pass by his mates showed him seated on the ground surrounded by the enemy. From that day on no one has seen or heard about or from my husband.

On that sad day in May 1967 I joined the ranks of the some 1300 families who lived silently, prayerfully, hopefully in desperate uncertainty. Just over 400 families now know that their loved one is held captive, but they know little about their health or safety. We other 900 families cannot even learn if our loved one is alive or dead.

On June 28, 1957 North Vietnam adhered to the Geneva Convention of 1949 relative to the treatment of prisoners of war. It requires that the names of the prisoners held be made available, that the sick and wounded be released immediately, that camps be inspected, and that mail be allowed to flow regularly. The North Vietnamese have violated this convention on each point.

Hanoi charges that these fine young men who have answered the call of their country are "war criminals" and therefore the Geneva convention does not apply. We know this is untrue. We know that these are simply men who served their country loyally as directed. We also recognize that these men who are held are helpless, that they pose no threat to the enemy, and that they have no means of defending themselves.

Regardless of one's private view of the war, no one can condone Hanoi's treatment of these prisoners.

Until May 1969, the U.S. Government's policy was to avoid publicity about the prisoner situation. Little was said publicly, but privately many avenues were pursued. Nothing was effective. Consequently, our government's policy changed in May, 1969, and the prisoner issue was placed in the public arena.

Secretary of Defense Laird began the activity by calling a news conference and calling upon Hanoi to change its policy. Secretary of State Rogers followed closely behind. In August, 1969, the biggest revelation was made when 3 men recently returned from prison camps in North Vietnam called a news conference at which time they blew the whistle on North Vietnam. They charged that the treatment was not humane. Men were tortured. Statements were forced. But possibly the most difficult of all to tolerate was the isolation. The average day was summarized as rising at 5 or 5:30, eating at ten, one trip to empty a waste bucket, another meal at four in the afternoon. Some days they heard radio Hanoi twice daily. On occasion they were allowed to sweep leaves. But for the most part they were left in isolation; left in single cells that had no windows and little ventilation. Most of the day they simply sat with nothing to do.

Let your imagination place you in those circumstances for one day, then a week, then a month, then several months, and then years. No one needs to tell you it would be terrible. These are energetic, active, well-educated men who are not allowed to do anything.

As the wife of a man who has been held more than 900 days, I am coming forward to tell our story in attempt to add force to the administration policy. I am in favor of telling the world about the plight of the prisoner. I am in agreement that if we call out loudly enough we can sway world opinion and awaken Hanoi to its responsibilities. But even in this torture of Hanoi is extended to me, for we must bare our hearts and souls in order to create enough interest for action.

I am one person alone whose cry is without weight. I am joining forces with wives, parents, friends all over the country to ask people to join in our campaign and cry out for the American prisoners of war. We are asking that you write letters to our own officials in Washington and to the Embassies of Sweden, England and France, asking them to help the American prisoners of war receive humane treatment.

These men responded when their country called upon them. Misfortune struck them, and they can no longer cry out. It is time for each American to respond to the silent cry of these men.

Mr. MANN. Mr. Speaker, I would like to take this opportunity to thank the House Committee on Foreign Affairs and the Subcommittee on National Security Policy and Scientific Developments for bringing House Concurrent Resolution 454 before the House. I feel that this resolution is an important contribution to the efforts of the Departments of State and Defense toward securing humane treatment for American prisoners of war.

Earlier in this session, I was privileged to cosponsor House Concurrent Resolution 334, a resolution that called on Hanoi to identify prisoners whom they hold, release seriously sick or injured prisoners, permit impartial inspections of all prisoner-of-war facilities, and permit the free exchange of mail between families and prisoners. I am happy to see that House Concurrent Resolution 454 is essentially the same as the one I cosponsored.

Mr. Speaker, I do not think the gravity of the situation can be overemphasized. The bitter lessons we learned regarding prisoners of war during the Korean conflict must not be wasted. The passage of this resolution is important, and we must seek to rally public opinion in this country so that the American people demand, not merely ask, humane treatment of prisoners.

In testimony before the Committee on Foreign Relations, Defense Department witnesses listed the number of U.S. servicemen missing or captured in Southeast Asia at 1,359. Since North Vietnam and the National Liberation Front refuse to release the names of those held captive, it is impossible to get an accurate count. I think the suffering caused to the wives, children, and parents of servicemen by this refusal to list prisoners is the most diabolical aspect of all.

To me, the fate of those held captive represents a paramount point in any settlement of the Vietnam conflict. We owe an obligation to the families of the

POW's and, for that matter, to all our fighting men who have taken the soldier's oath when they were sworn into uniform. Our evidence indicates that our men held captive by the Vietnamese Communists have kept the faith traditional with our military forces. This resolution seeks to dramatize their plight, and we must diligently pursue this matter and see that these servicemen are not forgotten in our quest for a settlement to the Vietnam war.

Mr. Speaker, among the many editorials appearing recently on this subject, I have found the following to be of particular interest. The editorial was written by Mr. George Chaplin, a native of Greenville, S.C., now serving as editor of the Honolulu Advertiser. At this point, I would like to insert the editorial into the RECORD:

WORTHY PROTEST

The Vietnam moratorium will be renewed in a couple of weeks and that is all right but there is another protest under way that merits attention.

The American Red Cross has called for a nationwide protest to North Vietnam against the inhumane treatment of American prisoners of war.

Although North Vietnam is a signatory to the Geneva conventions it has completely ignored them.

In Congress recently, Rep. James R. Mann, D.-South Carolina, noted that Defense Secretary Melvin R. Laird's request for information about the prisoners brought no response.

"It is possible," said Representative Mann, "that an expression of outrage on the part of the American public over the treatment given our servicemen held captive would cause the Communists to improve conditions."

Specifically, North Vietnam has consistently refused to release the names of captives. It has continued to hold seriously ill and wounded prisoners. It has declined to permit inspection of prisoner camps by a neutral party. And it has declined to permit exchange of mail between prisoners and their families.

The U.S. government knows that a minimum of 413 prisoners are being held and believes another 918 who are missing may be prisoners.

In Hawaii, Red Cross Chapter Chairman Nelson Prather urges Island residents to join in the nationwide protest by writing the government of North Vietnam "to express concern about Hanoi's failure to give captured military personnel the benefits of the Geneva convention."

Culturally, humane treatment of prisoners is not a characteristic of the North Vietnamese and an official appeal does not move them. But public opinion sometimes does and it is worth a try.

Mr. Chaplin points out that public opinion may have an effect on the North Vietnamese, and I agree that it is "worth a try." I think that a program sponsored by the U.S. Junior Chamber of Commerce is a good example of what the individual citizen can contribute in an effort to secure humane treatment for POW's. The Jaycees are sponsoring a project calling on citizens to send a type of Christmas card to Mr. Xuan Thuy, head of the North Vietnamese delegation to the Paris peace talks. The Jaycees are asking that cards call for the release of prisoners' names and for humane treatment in accordance with the Geneva Convention standards. I understand that a 707 jetliner will be chartered to fly the cards from Washington to Paris where they will be delivered to the North Vietnamese delegation. I hope this project will be successful and I urge all Americans to join in this effort to bring direct pressure on North Vietnam. Interested parties should send cards to: Project Xuan Thuy, Box 2600, Washington, D.C. 20013.

Mr. BROYHILL of Virginia. Mr. Speaker, I rise in support of House Concurrent Resolution 454, as a cosponsor of two companion bills.

At the end of November, 1,359 American servicemen were missing or captured in Southeast Asia. Today the number is greater. From the reports of the few prisoners who have been freed, we have learned of atrocities more unthinkable than any ever committed against Americans throughout our history.

As I have said before in this House, I was once a prisoner of the Nazis during World War II, and I have personal knowledge and disturbing memories of the disease, the isolation, the dirt, starvation, and fear. Yet even as we were being bombed, and in some cases wounded and killed, by allied planes, my fellow prisoners and I were proud of the bombers and of the men still fighting for us and our country.

We were sustained then by the inner conviction that this country is worth fighting for. But I wonder how many American soldiers being jabbed by Communist bayonets, jeered and ridiculed in street parades, and subjected to inhuman forms of physical and mental torture, believe that it is worth fighting for. What have they to sustain hope. Where is the pressure for decency from our allies; the unity and purpose, and united pursuit of peace at home?

Mr. Speaker, war is very personal when you are fighting; even more personal when you are its prisoner. The hours of loneliness and misery dissolve hope unless you are certain always that you are not forgotten; that you are not the victim of some grand strategy that leads to half victories and uncontrollable stalemates. As an American I would be ashamed if we could not offer the men in the darkness of Communist cells hope for relief of their suffering; for return to their homes.

The time to remain silent is long past. The Congress of the United States must officially protest inhumane treatment of American prisoners by the Communists. If they have no standards of decency, we must teach them some. If they have no qualities of mercy, then they should not be dealt with as equals among humankind. We must serve notice that we have had enough, and that we can and will use every means to insure fair and humane treatment for our American servicemen. And we must insist that the leaders of all other civilized nations join in our efforts, and demand that the tenets of fair and humane treatment, as expressed in the Geneva Convention of 1949, and signed by the Government of North Vietnam, are accorded all American prisoners of war.

Mr. Speaker, I urge unanimous approval of House Concurrent Resolution 454.

Mr. FLOWERS. Mr. Speaker, it was a great privilege for me to participate in cosponsoring legislation similar to the resolution before the House today. I feel certain that the broad support by Members of this House is an indication of the deep feeling of concern of all Americans for the terrible suffering by American servicemen and their families at the hands of the government of North Vietnam and the Vietcong.

To date, more than 1,300 U.S. servicemen have been classified as either prisoners of war or missing in action, some of these dating back as far as 1964. Of the total, nearly 800 are pilots or other aircrew members who were downed over North Vietnam, and until convincing evidence is produced to the contrary, I must believe that a substantial percentage are in fact now prisoners of the Communist government there. The families of these hundreds of servicemen have lived for months and years under the anxiety and pressure of uncertainty as to the status of their loved ones. Continuing attempts by the U.S. Government and neutral organizations such as the International Red Cross and individual efforts to obtain information on the prisoners and men missing in action have all gone for naught. The North Vietnamese and the Vietcong have not seen fit to release even the names of those prisoners they hold. The magnitude of this unnecessary inhumanity by man to his fellow man increases with each passing day.

Therefore, Mr. Speaker, it is certainly fitting that the House of Representatives of the U.S. Congress, where the people of our great Nation are represented, adopt House Concurrent Resolution 454. In so doing, we can all be certain that we are clearly giving effect to the will of the vast majority of our great Nation in calling the world's attention to this matter.

Mr. BIAGGI. Mr. Speaker, as we observe another Christmas season with heavy hearts over the war in Vietnam, my thoughts and my prayers are especially concentrated on American servicemen who are prisoners of war.

If the spirit of the holiday would cause the Government of North Vietnam to make just one concession with regard to prisoners of war, how grateful and happy so many of us would be this Christmas season. It is a concession that would require only the release of the names of the 1,339 Americans who are prisoners of war.

It would be a relatively small concession, but what consolation and peace-of-mind it would bring to those American families who are now forced to say that they do not know whether a loved one is dead or alive. I am sure that their anxiety, uncertainty, and sorrow is especially difficult to bear during this time of the year.

If only the spirit of Christmas would manifest itself in this manner, it would also contribute so much to a better understanding of our fellow man. The message would be heard loudly and clearly—not only in America, but throughout the world.

Therefore, with renewed hope this Christmas season, I wholeheartedly support House Concurrent Resolution 454

which expresses the concern of this Congress in respect to the treatment of American servicemen held as prisoners of war and calls for a humanitarian response from Hanoi.

In addition, I urge that we and all Americans participate in a very humane and worthy project that has been undertaken by the U.S. Jaycees, one of America's great service organizations. The Jaycees are asking Americans to send Christmas cards for peace to: Project Xuan Thuy, Box 2600, Washington, D.C. 20013.

The Jaycees have promised to deliver the Christmas cards for peace to the chief negotiator for North Vietnam in Paris on December 29. To convey American opinion effectively, I believe it is important for the vast majority of Americans to participate in this worthwhile project.

Above all, let us hope that the Government of North Vietnam will respond in the spirit that we have spoken this Christmas season.

Mr. MATSUNAGA. Mr. Speaker, I rise in support of House Concurrent Resolution 454, calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front.

As a cosponsor of this resolution, I would like to add my voice to the rising tide of outraged world opinion against the Government of North Vietnam as the result of its inhumane treatment of American prisoners of war. I firmly believe that there is a clear need for the Congress of the United States to help crystallize world opinion and force Hanoi to honor the basic codes of human decency.

In 1957, North Vietnam became a signatory to the Geneva convention. In essence, the Geneva covenants provide that each of the contracting parties, even in a state of undeclared war, would, as to prisoners in its custody:

First, identify the prisoners it holds;

Second, release the sick and wounded;

Third, allow neutral inspections of its prisons; and

Fourth, permit the free exchange of mail between the prisoners and their families.

The resolution we are considering merely calls upon the Government of North Vietnam and its allies to observe these basic tenets of the Geneva Convention. These provisions are not special or unusual. They merely represent a code of decent and civilized behavior by a warring nation with respect to the prisoners of war it detains.

The Defense Department has reported that as of the end of November 1969, there were 1,359 U.S. servicemen who were missing or captured in Southeast Asia. Many of these prisoners have been in captivity for as long as 5 years. There is mounting evidence that these American prisoners are not being treated humanely. We know that our men are placed on a starvation diet of pumpkin soup and pig fat through months of solitary confinement. We have received reports from released prisoners of pilots being beaten, burned, and hung by their feet. The North Vietnamese have failed to release information about American prisoners, causing untold grief and anxiety on the part of the families of these men. Wives and parents keep a seemingly interminable vigil for a missing husband or son from whom or about whom there is absolutely no word. Children wonder whether their missing fathers will ever return to them.

All efforts by the U.S. Government even with the assistance of the International Red Cross, the Vatican, and other third parties have been to no avail. The North Vietnamese Government and the National Liberation Front have repeatedly rejected their good offices.

Americans may differ on the conduct of the war in Vietnam, but they are strongly united in their concern for the safety of U.S. servicemen who are prisoners of war. This resolution would dramatize this body's support of the decision by the Department of State and the Department of Defense to bring this issue to worldwide attention. The adoption of House Concurrent Resolution 454 would further express our sympathy to the sorrowing families of men missing or captured. Finally, this resolution, if adopted, may help to convince the North Vietnamese and the National Liberation Front that it is now time to honor the tenets of the Geneva Convention and desist in the inhumane and illegal treatment of our captive servicemen.

Mr. Speaker, for these reasons I urge a favorable vote on House Concurrent Resolution 454.

Mr. CULVER. Mr. Speaker, I support House Resolution 454 as an expression of the deep concern of this Congress and the American people for the humane treatment and early release of our servicemen who are being held prisoners of war in Vietnam.

At the end of November, 1,359 members of the U.S. Armed Forces were missing in action in Southeast Asia. At least 420 of them are believed captured, and some of them have been held as long as 5 years.

Like other Members of this body, I have constituents who are among those prisoners of war, and I know and share the anguish and concern of their families and friends.

Although Hanoi signed the Geneva Convention on humane treatment of prisoners in 1957, North Vietnam and the National Liberation Front have violated every provision of it. In doing so, they have rejected their international legal obligations—

To release information about the prisoners they hold;

To allow prisoners to exchange letters with their families and to receive packages;

To permit the seriously sick or wounded to be repatriated;

To allow impartial inspection to assure compliance with the humanitarian standards of the Geneva Convention; and

To agree on arrangements for the early release of all prisoners.

The United States has made repeated and consistent efforts for the humane treatment and safe return of prisoners of war on both sides. We tried first through diplomatic channels, and when that failed, brought the issue squarely into the open, with statements from the Secretaries of State and Defense and from our negotiators in Paris, and now—with this resolution—from the Congress.

In addition, third parties have been operating, especially through the Red Cross, in an effort to provide for the health and welfare of these heroic men.

But Hanoi has remained intransigent.

By strongly protesting the treatment of our servicemen, by demanding that Hanoi and the NLF comply with the Geneva Convention, and by supporting our Government and third parties in their efforts to obtain humane treatment and early release, the House of Representatives is extending its support and sympathies to the families of these servicemen.

Much beyond that, we may help to turn the body of world attention on the outrageous and illegal acts of Hanoi and the National Liberation Front, and will give added weight to the negotiating efforts of our own Government and of international agencies like the Red Cross.

The unanimous vote in support of House Resolution 454 demonstrates that, regardless of differences which may exist about the war itself, this Congress and the American people are united in their concern for the men who are being held prisoner in the North.

I include the text of that resolution at this point in the RECORD:

H. CON. RES. 454

Whereas more than one thousand three hundred members of the United States Armed Forces are prisoners of war or missing in action in Southeast Asia; and

Whereas North Vietnam and the National Liberation Front of South Vietnam have refused to identify prisoners they hold, to allow impartial inspection of camps, to permit free exchange of mail between prisoners and their families, to release seriously sick or injured prisoners, and to negotiate seriously for the release of all prisoners and thereby have violated the requirements of the 1949 Geneva Convention on prisoners of war, which North Vietnam ratified in 1957; and

Whereas the twenty-first International Conference of the Red Cross, meeting in Istanbul, Turkey, on September 13, 1969, adopted by a vote of 114 to 0 a resolution calling on all parties to armed conflicts to ensure humane treatment of prisoners of war and to prevent violations of the Geneva Convention; and

Whereas the United States has continuously observed the requirements of the Geneva Convention in the treatment of prisoners of war; and

Whereas the United States Government has repeatedly appealed to North Vietnam and to the National Liberation Front to comply with the provisions of the Geneva Convention: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress strongly protests the treatment of United States servicemen held prisoner by North Vietnam and the National Liberation Front of South Vietnam, calls on them to comply with the requirements of the Geneva Convention, and approves and endorses efforts by the United States Government, the United Nations, the International Red Cross, and other leaders and peoples of the world to obtain humane treatment and release of American prisoners of war.

Mr. ZABLOCKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER. The question is on the motion of the gentleman from Wisconsin that the House suspend the rules and pass the concurrent resolution, as amended.

The question was taken.

Mr. ADAIR. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant-at-Arms will notify absent Members and the Clerk will call the roll.

The question was taken; and there were—yeas 405, nays 0, not voting 28, as follows:

NAYS—0

NOT VOTING—28

Abbitt	Dawson	McFall
Anderson, Tenn.	Dingell	Madden
	Giaimo	Minshall
Blatnik	Goldwater	Pelly
Bolling	Hall	Powell
Brooks	Halpern	Ruppe
Cahill	Hébert	Smith, N.Y.
Chisholm	Ichord	Tunney
Conyers	Kirwan	Van Deerlin
Cunningham	Lipscomb	

So [two-thirds having voted in favor thereof] the rules were suspended and the concurrent resolution, as amended, was agreed to.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Lipscomb.
Mr. Anderson of Tennessee, with Mr. Minshall.
Mr. Dingell with Mr. Cunningham.
Mr. Blatnik with Mr. Cahill.
Mr. Giaimo with Mr. Smith of New York.
Mr. Ichord with Mr. Pelly.
Mr. McFall with Mr. Goldwater.
Mr. Brooks with Mr. Hall.
Mr. Tunney with Mr. Halpern.
Mr. Madden with Mr. Ruppe.
Mrs. Chisholm with Mr. Conyers.
Mr. Kirwan with Mr. Powell.
Mr. Abbitt with Mr. Van Deerlin.

The results of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may have 5 legislative days during which to extend their remarks prior to the vote on House Concurrent Resolution 454.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR AUTHORITY FOR SPEAKER TO RECOGNIZE FOR MOTIONS TO SUSPEND THE RULES ON TUESDAY, DECEMBER 16, 1969

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that it may be in order on Tuesday, December 16, 1969—that is tomorrow—for the Speaker to recognize motions to suspend the rules and pass the bills beginning with No. 11 listed on the whip notice of December 12, 1969.
